Title 6—ECONOMIC STABILIZATION

Chapter I—Cost of Living Council

PART 101—COVERAGE, EXEMPTION, AND CLASSIFICATION OF ECONOMIC UNITS

Dressed Broilers and Turkeys

Subpart D of Part 101 of Chapter 1 of Title 6 of the Code of Federal Regulations is amended in § 101.32 to include the first sale by producers of broilers and turkeys in the raw agricultural product exemption under § 101.32.

The poultry producing industry is in the unique position of being one of the only major sectors in which an initial sale of agricultural commodities is not exempt. Virtually all chickens and turkeys are hatched, grown to slaughter weight, slaughtered, eviscerated, and otherwise processed before the first sale. The industry is not unlike the fish industry where the killing, scaling, and other processing occurs prior to the first sale. The Council earlier defined "raw seafood" products to include those which have been shelled, shucked, iced, skinned, scaled, eviscerated, or decapitated.

Accordingly, this amendment modifies § 101.32 (a) and (b) in order to remove this inequity.

Because the purpose of these amendments is to amend and modify Part 101 to provide immediate guidance and information as to Cost of Living Council regulations, the Council finds that publication in accordance with usual rule making procedures is impracticable and that good cause exists for making this regulation effective in less than 30 days. Interested persons may submit written comments regarding the above amendments. Communications should be addressed to the Office of General Counsel, Cost of Living Council, New Executive Office Building, Washington, D.C. 20507.

Effective date: January 4, 1973.

DONALD RUMSFELD,
Director, Cost of Living Council.

Part 101 of Chapter I of Title 6 of the Code of Federal Regulations is amended as follows:

1. Subpart D is amended in § 101.32 to read as follows:

§ 101.32 Agricultural products, seafood products, and raw sugar price adjustments.

(a) *Raw agricultural products.* (1) Subject to the special rule set forth below, the sale of agricultural products which retain their original physical form and have not been processed is exempt. Processed agricultural products are products which have been canned, frozen, slaughtered, milled, or otherwise changed in their physical form. Packaging is not considered a processing activity. Examples:

Exempt	*Nonexempt*
Live cattle, calves, hogs, sheep, and lambs.	Carcasses and meat cuts.
Live poultry.	
Raw milk	Pasteurized milk and processed products, such as butter, cheese, ice cream.
	Frozen, dried, or liquid eggs.
Sheared or pulled wool.	Wool products.
	Processed and blended honey-butter product.
Mohair.	
Hay: Bulk, pelleted, cubed, or baled.	Dehydrated alfalfa meal or alfalfa meal pellets.
Wheat	Flour.
Sugar beets and sugarcane.	Refined sugar.
Maple sap.	
All seeds for planting.	Seeds processed for other uses.
Raw coffee bean	Roasted coffee bean.
	Canned and frozen vegetables.
	Dill pickles.
	Packaged slaw.
	Popped popcorn.
Feed grains including:	Mixed feed.
Corn	Cracked corn.
Sorghum.	
Barley	Rolled barley.
Oats	Rolled oats.
Soybean	Soybean meal and oil.
Leaf tobacco	Cigarettes and cigars.
Baled cotton, cotton seed, cotton lint.	Cotton yarn, cotton-seed oil, cotton-seed meal.
	Frozen french fries, dehydrated potatoes.
Unmilled rice	Milled rice.
	Roasted, salted, or otherwise processed nuts.
	Canned or freeze dried mushrooms.
Stumpage or trees cut from the stump.	Milled lumber.
	Canned fruit or juices.
	Glazed citrus peel.
	Canned grapes, wine.
	Applesauce.
	Canned prunes and prune juice.
	Canned olives.
Garden plants	Floral wreaths.

(2) Special rule: Only the first sale by the producer or grower of those agricultural products which are of a type sold for ultimate consumption in their original physical form is exempt. Examples of these products are:

Shell eggs, packaged or loose.	Brussels sprouts.
	Beets.
Raw honeycomb honey.	Unpopped popcorn.
Fresh potatoes, packaged or not.	All fresh or naturally dried fruits, packaged or not, including:
All raw nuts—shelled and unshelled.	Fresh oranges.
Fresh mushrooms.	Grapes and raisins.
Fresh mint.	Apples.
Dried beans, peas, and lentils.	Peaches.
All fresh vegetables and melons including:	Strawberries.
	Grapefruit.
Tomatoes.	Pears.
Lettuce.	Lemons.
Sweet corn.	Plums and prunes.
Onions.	Cherries.
Green beans.	Cranberries.
Cantaloupe.	Avocados.
Cucumbers.	Blueberries.
Cabbage.	Apricots.
Carrots.	Tangerines.
Watermelons.	Olives, uncured.
Green peas.	Nectarines.
Asparagus.	Raspberries.
Pepper.	Blackberries.
Broccoli.	Figs.
Cauliflower.	Tangelos.
Spinach.	Limes.
Green lima beans.	Dates.
Honeydews.	Papayas.
Escarole.	Bananas.
Garlic.	Pomegranates.
Artichokes.	Currants.
Eggplant.	Persimmons.
	Cut flowers.

(b) *Dressed broilers and turkeys and raw seafood products.* The first sale by (1) a producer of broilers or turkeys or (2) a producer or fisherman of raw seafood products including those which have been shelled, shucked, iced, skinned, scaled, eviscerated, or decapitated is exempt.

Title 7—AGRICULTURE

Subtitle A—Office of the Secretary of Agriculture

PART 10—CLASSIFICATION AND DECLASSIFICATION OF NATIONAL SECURITY INFORMATION AND MATERIAL

The following regulations are issued pursuant to Executive Order 11652 of March 8, 1972 (37 FR 5209), entitled "Classification and Declassification of National Security Information and Material" and the National Security Council Directive of May 17, 1972, implementing that Executive order.

The Department of Agriculture security regulations have been approved by the Interagency Classification Review Committee; the following parts thereof affecting the public are published as required by the above-cited Executive order and Directive.

Sec.
10.1 Purpose.
10.2 Authority to classify.
10.3 Department review committee.
10.4 Review of classified material for declassification purposes.
10.5 Historical research and access by former Government officials.

AUTHORITY: The provisions of this Part 10 are issued under Executive Order 11652 (37 FR 5209, Mar. 10, 1972) and National Security Council Directive of May 17, 1972 (37 FR 10053, May 19, 1972).

§ 10.1 Purpose.

To set forth those provisions of the U.S. Department of Agriculture Security Regulations to the extent they affect the general public.

§ 10.2 Authority to classify.

Classifying authority of national security information or material is vested in and only may be exercised by the Secretary of Agriculture.

§ 10.3 Department review committee.

The Department review committee shall consist of the Department Security Officer, who shall serve as Chairman; the Director of Personnel, who shall serve as Vice Chairman; the General Counsel; the Assistant Secretary for Administration; and the Administrator of the Agency originating a document which has been classified.

§ 10.4 Review of classified material for declassification purposes.

(a) *Mandatory review of exempted material.* All classified information and material originating in the Department of Agriculture after June 1, 1972, which is exempt from the General Declassification Schedule, and classified information originating in the Department of Agriculture prior to June 1, 1972, assigned to Groups 1, 2, or 3 of Executive Order 10501, as amended, shall be subject to a classification review by the originator at any time after the expiration of 10 years from the date or origin provided:

(1) A department or member of the public requests a review;

(2) The request describes the record with sufficient particularity to enable the Department to identify it; and

(3) The record can be obtained with only a reasonable amount of effort.

(b) *Systematic reviews.* All information and material classified after June 1, 1972, and determined in accordance with Chapter 21, 44 U.S.C. to be of sufficient historical or other value to warrant preservation shall be systematically reviewed on a timely basis by each Agency of the Department for the purpose of making such information and material available to the public in accordance with the determination regarding declassification made by the classifier. During each calendar year, each agency shall segregate to the maximum extent possible all such information and material warranting preservation and becoming declassified at or prior to the end of such year. Promptly after the end of such year, the Department or the Archives of the United States if transferred thereto, shall make the declassified information and material available to the public to the extent permitted by law.

(c) *Review for declassification of classified material 10 years old.* Members of the public or Departments may direct requests for mandatory review for declassification under section 5 (C) and (D) of Executive Order 11652 (hereafter referred to as the Order) to the Department Security Officer, Office of Personnel, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250. The Security Officer shall in turn assign the request to the appropriate Agency Head for action. In addition, the Security Officer or the Agency which has been assigned action shall immediately acknowledge receipt of the request in writing. If the request requires the rendering of services for which fair and equitable fees should be charged pursuant to 31 U.S.C. 483a the requester shall be so notified. The Agency which has been assigned action shall thereafter make a determination within 30 days of receipt or shall explain the reasons why further time is necessary. If at the end of 60 days from receipt of the request for review no determination has been made, the requester may apply to the Department review committee for a determination. Should the Agency assigned action on a request for review determine that under the criteria set forth in section 5(B) of the Order a continued classification is required, the requester shall promptly be notified, and whenever possible, provided with a brief statement as to why the requested information or material cannot be declassified. The requester may appeal any such determination to the Department review committee and the notice of determination shall advise him of this right.

(d) *Appeals to the Department review committee for declassification.* The Department review committee shall establish procedures to review and act within 30 days upon all applications and appeals regarding requests for declassification. The review committee is authorized to overrule previous determinations in whole or in part when, in its judgment, continued protection is no longer required. If the committee determines that continued classification is required under the criteria of section 5(B) of the Order it shall promptly so notify the requester and advise him that he may appeal the denial to the Interagency Classification Review Committee.

(e) *Review of classified material over 30 years old.* A request by a member of the public or by a Department, to review for declassification, documents more than 30 years old, shall be referred directly to the Archivist of the United States and he shall have the requested documents reviewed for declassification. If the information or material requested has not been transferred to the General Services Administration for accession into the Archives, the Archivist shall, together with the Secretary of Agriculture, have the requested documents reviewed for declassification. Classification shall be continued in either case only where the Secretary of Agriculture makes at that time the personal determination required by section 5(E)(1) of the Order. The Archivist shall promptly notify the requester of such determination and of his right to appeal the denial to the Interagency Classification Review Committee.

(f) *Burden of proof for administrative determinations.* For purposes of administrative determinations under paragraphs (c), (d), or (e) of this section, the burden of proof is on the originating Agency to show that continued classification is warranted within the terms of the Order.

(g) *Availability of declassified material.* Upon a determination, paragraphs (c), (d), or (e) of this section, that the requested material no longer warrants classification, it shall be declassified and made promptly available to the requester, if not otherwise exempt from disclosure under section 552(b) of Title 5 U.S.C. (Freedom of Information Act) or other provision of law. As required by section 5(C) of the Order, a request for classification review must describe the document with sufficient particularity to enable the Department to identify it with a reasonable amount of effort. Whenever a request is deficient in its description

V 38 - 4 JAN 8 73 XUM

of the record sought, the requester should be asked to provide additional identifying information whenever possible. Before denying a request on the grounds that it is unduly burdensome, the requester should be asked to limit his request to records that are reasonably obtainable. If none-the-less the requester does not describe the records sought with sufficient particularity, or the record requested cannot be obtained with a reasonable amount of effort, the requester shall be notified of the reasons why no action will be taken and of his right to appeal such decision.

§ 10.5 Historical research and access by former Government officials.

(a) Upon written request, persons outside the executive branch engaged in historical research projects or persons who have previously occupied policymaking positions to which they were appointed by the President, other than those referred to in section 11 of the Order, may have access to classified national security information if the Secretary:

(1) Determines that access is clearly consistent with the interests of national security; and

(2) Takes appropriate steps to assure that classified information or material is not published or otherwise compromised.

Access granted a person by reason of his having previously occupied a policymaking position shall be limited to those papers which the former official originated, reviewed, signed, or received while in public office.

(b) Every applicant for access shall, beforehand, agree in writing to the following:

(1) That he will protect any classified information made available to him in accordance with provisions of the Order.

(2) To a review of his notes and manuscript for the sole purpose of determining that no classified information or material is contained therein.

These regulations are effective June 1, 1972.

Dated: December 15, 1972.

FRANK B. ELLIOTT,
Assistant Secretary for Administration.

[FR Doc.73-344 Filed 1-5-73;8:45 am]

Chapter I—Agricultural Marketing Service (Standards, Inspection, Marketing Practices), Department of Agriculture

PART 32—MOHAIR STANDARDS

Standards for Grades of Mohair Top

This document establishes official standards of the United States for grades of mohair top. Mohair top is the processed fiber obtained after raw mohair—the hair of the Angora goat—has been scoured or cleaned, carded, and combed. Essentially, these standards provide:

(1) Specifications in terms of average fiber diameter and fiber diameter dispersion for 12 grades: Finer than 40s, 36s, 32s, 30s, 28s, 26s, 24s, 22s, 20s, 18s, and coarser than 18s; (2) methods for determining the grade of mohair top; and (3) methods for obtaining samples representative of the official mohair top grade standards.

On July 21, 1972, a notice of rule making was published in the FEDERAL REGISTER (37 FR 14614–14617) proposing to establish these standards to appear in 7 CFR Part 32, pursuant to authority conferred by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621 et seq.). A 90-day period following the public notice was provided for interested persons to submit written data, views, or arguments concerning the proposal.

Statement of considerations. A total of 9 comments on the proposed mohair top grade standards was received from mohair producers and their organizations, marketing agencies, research and educational workers, and others. All favored immediate adoption of the proposal. Among those strongly supporting the proposal were such groups as the Texas Sheep and Goat Raisers Association, the Texas Wool and Mohair Warehouse Association, the American Textile Manufacturer's Institute, Inc., and the Mohair Council of America.

On the basis of the comments received and all other information available to the Department, it is concluded that, with the slight editorial changes made for purposes of clarity and the minor changes noted herein, the adoption of the mohair top grade standards proposed July 21, 1972, is in the public interest and should be implemented.

Therefore, under the authority conferred by the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 et seq.), the official standards of the United States for grades of mohair top (7 CFR 32.100, 32.300, 32.301, 32.302, 32.402, 32.403) are promulgated as proposed in the FEDERAL REGISTER (37 FR 14614–14617) except for the following minor changes:

In § 32.201(d) the definition of the term "lot" is changed to read: "The entire quantity of mohair top constituting the subject of consideration. As used herein, "lot" refers to a test lot not exceeding 20,000 pounds (9,072 kg.)."

Subparagraph (2) of § 32.302(a)(i) is changed by removing the phrase specifying "a searchlight microprojector bulb" and replacing it with the following: "a light source that will give a well-defined fiber image."

Subparagraph (6) of § 32.302(a)(i) is modified by changing the sentence describing the placing of the sliver in the cross-sectioning device to read: "Each sliver (test specimen) of mohair top making up the sample shall be placed individually in the slot of the cross-sectioning device, positioning each sliver so that it will be cut at its approximate midlength."

It is not intended that these changes should make any change in the application of the standards from that intended under the proposal.

Therefore, in accordance with the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that further public rule making proceedings on the matter are impractical and unnecessary, and good cause is found for making the standards effective less than 30 days after their publication in the FEDERAL REGISTER.

Accordingly, the standards are promulgated as follows:

(Secs. 203, 205, 60 Stat. 1087, 1090 as amended, 7 U.S.C. 1622, 1624; 37 FR 28464, 28476)

OFFICIAL STANDARDS OF THE UNITED STATES FOR GRADES OF MOHAIR TOP

§ 32.100 Official mohair top grades.

The official grades for mohair top and the specifications for each shall be those set forth in table 1. However, mohair top which qualifies for a grade on the basis of its average fiber diameter but does not meet the fiber diameter dispersion requirement for that same grade shall be assigned a dual grade designation. In such cases, the first designation shall indicate the grade based on average fiber diameter and the second designation shall be that of the next coarser grade.

TABLE 1—SPECIFICATIONS FOR THE OFFICIAL GRADES OF MOHAIR TOP

Grade	Limits for average diameter (microns)	Fiber diameter dispersion: percent [1] 30 microns and under, minimum	40 microns and under, minimum	50 microns and under, minimum	30.1 microns and over, maximum	40.1 microns and over, maximum	50.1 microns and over, maximum	60.1 microns and over, maximum	Approximate number of fiber measurements [2]
Finer than 40's	Under 23.55	80			20	1			1,000
40's	23.55 to 25.54	74			26	4			1,000
36's	25.55 to 27.54	67			33	6			1,200
32's	27.55 to 29.54	57			43	8			1,200
30's	29.55 to 31.54	47			53	13			1,400
28's	31.55 to 33.54		80			20	3		1,400
26's	33.55 to 35.54		73			27	5		1,600
24's	35.55 to 37.54		64			36	8		1,600
22's	37.55 to 39.54		56			44	13		1,800
20's	39.55 to 41.54			82			18	6	2,200
18's	41.55 to 43.54			77			23	8	2,200
Coarser than 18's	Over 43.54								2,600

[1] The 3d maximum percent shown for any grade is a part of, and not in addition to, the 1st maximum percent. In each grade, the minimum percent and the 1st maximum percent total 100 percent.

[2] The number of fibers to measure for each test shall be the number needed to attain confidence limits of the mean within ±0.40 micron at a probability of 95 percent. The approximate number of fibers for the grades listed above may serve as a guide to the number of measurements needed to meet the required confidence limits.

§ 32.200 Meaning of words.

Words used in this part in the singular form shall be deemed to import the plural, and vice versa, as the case may demand.

§ 32.201 Terms defined.

For the purpose of this part, unless the context otherwise requires, the following terms shall be construed to mean:

(a) *Average fiber diameter.* The sum of the individual diameter measurements divided by the number of fibers measured, as described in § 32.302.

(b) *Fineness.* Average fiber diameter.

(c) *Grade.* A numerical designation used in classifying mohair top, based on average fiber diameter and dispersion of fiber diameters.

(d) *Lot.* The entire quantity of mohair top constituting the subject of consideration. As used herein, "lot" refers to a test lot not exceeding 20,000 pounds (9,072 kilograms).

(e) *Micron.* A unit of linear measurement equal to $\frac{1}{1000}$ millimeter or $\frac{1}{25.400}$ inch.

(f) *Mohair.* Fiber from the Angora goat.

(g) *Mohair top.* A continuous, untwisted strand of scoured mohair fibers from which the shorter fibers, i.e., noil, have been removed by combing.

(h) *Sample.* Four slivers (test specimens) of mohair top obtained as described in § 32.302(4).

(i) *Standards.* The official standards of the United States for grades of mohair top.

(j) *Standard samples.* Physical samples representative of the standards.

(k) *Test.* A determination by measurement of the average fiber diameter and the fiber diameter dispersion of a sample of mohair top, conducted in accordance with procedures provided in § 32.302.

(l) *Test specimen.* A sliver of mohair top at least 1 yard (0.91 meter) long, obtained as described in § 32.302(4).

METHODS FOR DETERMINING GRADE OF MOHAIR TOP

§ 32.300 General.

The official standards of the United States for grades of mohair top as defined in § 32.100 shall be the basis for grade determination. Grade may be determined by (a) inspection or (b) measuring the number of fibers of a sample needed to attain the required confidence limits of the mean, calculating the average fiber diameter and diameter dispersion, and comparing the average diameter and dispersion with the specifications for grades of mohair top. Both methods for determining grade shall be official; however, if the grade as determined by inspection differs from that determined by measurement, the grade determined by measurement shall prevail.

§ 32.301 Inspection method.

Determination of the grade of mohair top by inspection will be accomplished by comparing the fibers in the mohair top to be graded with the fibers in the mohair top samples certified by the U.S. Department of Agriculture as representative of the official grades. When using the certified samples to determine the grade of mohair top, the grade assigned shall be that of the certified sample which most nearly matches the mohair top being graded.

§ 32.302 Measurement method.

The determination of the grade of mohair top by measurement shall be by comparison of the measured average fiber diameter and fiber diameter dispersion with the specifications for the official standards of the United States for grades of mohair top. This determination shall be made in accordance with the procedure for determining average fiber diameter and fiber diameter dispersion provided in paragraph (a) of this section and the procedure for designating grade provided in paragraph (b) of this section.

(a) *Procedure for determining average fiber diameter and fiber diameter dispersion*—(1) *Summary of procedure.* The average fiber diameter and fiber diameter dispersion are determined by sectioning the fibers in a test specimen to a designated length, mounting the sections of fibers on a slide, projecting the magnified image onto a wedge scale, and measuring the diameter of a minimum number of fibers, as specified in this section.

(2) *Apparatus and material.* The following apparatus and materials are needed and shall comply with the following provisions:

(i) *Microprojector.* The microprojector shall be capable of giving a precise magnification of at least 500×. This magnification can be accomplished satisfactorily with a vertically installed microscope equipped with a 10–15× eyepiece, a 20–21× objective with an aperture of approximately 0.50 centimeter, a fixed body tube, a focusable stage responsive to a coarse and fine adjustment, a focusable substage with condenser and iris diaphragm, and a light source that will give a well-defined fiber image. The microscope must be installed so that the projection distance can be adjusted to produce the required 500× magnification.

(ii) *Stage micrometer.* Calibrated glass slide used for accurate setting and control of the magnification.

(iii) *Cross-sectioning device, heavy duty.* An instrument approximately 2 inches (5 cm.) in height; consisting essentially of a metal plate with slot for holding a quantity of fibers, a key for compressing the fibers, and a tongue-propelling arrangement by which the fiber bundle may be extruded for sectioning.

(iv) *Microscope slides.* 1" by 3" (25×75 mm.).

(v) *Cover glasses.* No. 1 thickness, ⅞" by 2" (22×50 mm.).

(vi) *Mounting medium.* Colorless mineral oil with a refractive index between 1.53 and 1.43 and of suitable viscosity.

(vii) *Wedge scales.* Strips of heavy paper or Bristol board imprinted with a wedge for use at a magnification of 500×. The wedge is usually divided into 2.5 micron intervals (cells).

(3) *Calibration.* The microscope shall be adjusted to give a magnification of 500× in the plane of the projected image. This may be accomplished by placing a stage micrometer on the stage of the microprojector and bringing the microscope into such adjustment that an interval of 0.20 mm. on the stage micrometer will measure 100 mm. when sharply focused in the center of the image plane.

(4) *Sampling.* The lot shall be sampled by drawing from each 20,000 pounds (9,072 kilograms), or fraction thereof, four sections of sliver (test specimens) each of which shall be at least 1 yard (0.91 meter) in length and taken from different balls of mohair top, selected at random. Only one ball shall be taken from any one bale or carton. For broken mohair top (top not wound into balls), an equivalent length of sliver shall be taken at random. Only one test specimen shall be taken from any one can or package. The four test specimens shall constitute a sample.

(5) *Test condition.* Test specimens shall be preconditioned to approximate moisture equilibrium in an atmosphere of from 5 to 25 percent relative humidity at a temperature less than 122° F. (50° C.). Then the test specimens shall be conditioned for at least 4 hours in the standard atmosphere for testing, namely, 63 to 67 percent relative humidity at a temperature of 68° to 72° F. (19.9° to 22.1° C.).

(6) *Preparation of slides*—(i) *Filling cross-section device.* Each sliver (test specimen) of mohair top making up the sample shall be placed individually in the slot of the cross-sectioning device, positioning each sliver so that it will be cut at its approximate midlength. The sliver shall be compacted firmly with the compression key and the latter secured with the set screw.

(ii) *Preliminary section.* The gripped fibers shall be cut off at the upper and lower surfaces of the plate. The fiber bundle shall be extruded approximately 0.50 mm. in order to take up slack in the fibers and the propulsion mechanism. The projecting fibers shall be moistened with a few drops of mineral oil. This projecting fiber bundle shall be cut off with a razor blade flush with the upper surface of the fiber holder plate and the section discarded.

(iii) *Final section.* The fiber bundle shall again be extruded, approximately 0.25 mm., i.e., 250 microns. The fiber bundle shall be moistened with a few drops of mineral oil and the excess blotted off. The projecting fibers shall be cut off with a sharp razor blade flush with the holder plate, leaving the fiber pieces adhering to the razor blade.

(iv) *Mounting the fibers.* A few drops of mineral oil shall be placed on a clean glass slide. With a dissecting needle the fiber pieces shall be scraped from the razor blade onto the slide. The fibers shall

V 38 - 4 JAN 8 73
XUM

be thoroughly dispersed in the oil with the dissecting needle and the slide completed with a cover glass. Sufficient oil should be used in the preparation of the slide to insure thorough distribution of the fibers, but an excess must be avoided, as practically no oil should be permitted to flow out or be squeezed out beyond the borders of the cover glass. If the number of fibers is too great to permit proper distribution on the slide, or if an excess of oil has been used, a portion of the mixture, after thorough dispersion of the fibers, may be wiped away with a piece of tissue or cloth. Slides shall be measured the day they are prepared.

(7) *Measurement of fibers.* The slide shall be placed on the stage of the microprojector, cover glass toward the objective. Fiber diameter measurments shall be made at the approximate mid-length of the fibers. Fiber edges appear as fine lines without borders when they are uniformly in focus. It is unusual, however, for both edges of the fiber to be in focus at the same time. If both edges of the fiber are not uniformly in focus, adjustment shall be made so that one edge of the fiber is in focus and the other shows as a bright line. To record the measurement, it is necessary to mark the point where the wedge corresponds with the fiber image as determined by (i) the fine lines of both edges when they are uniformly in focus, or (ii) the fine line of one edge and the inner side of the bright line at the other edge when they are not uniformly in focus. The slide shall be traversed in planned courses so that fibers on all portions of the slide will be measured. Successive fibers should be measured whose mid-points come within the field (a circle 4 inches in diameter, centrally located in the projected area). Fibers shorter than 200 microns or longer than 300 microns and those having distorted images shall be excluded from measurement. The marks on the wedge scale indicating the diameter of fibers measured are counted and combined into cells for calculation as indicated in paragraph (a) (10) of this section. Occasionally a fiber diameter will be less or greater than the extreme limits of the wedge scale. When this occurs, the image of the fiber is projected onto the border of the wedge scale and lines are drawn on the scale at the edges of the fiber image. The distance between the lines is later measured with a metric ruler to obtain the diameter of the fiber. When measuring fiber diameters in this manner, 1 mm. is equal to 2 microns.

(8) *Nature of test.* One test shall consist of the measurement by two operators of the same four slivers (test specimens) of mohair top. The measurment of both operators shall be combined for calculation of average fiber diameter and fiber diameter dispersion.

(9) *Number of slides and fibers.* Each operator shall make a slide from each test specimen, making a total of four slides per operator. The number of fibers to be measured per slide shall be determined by dividing the approximate number of fibers to be measured per test by 8 (the total number of slides prepared per test). The minimum number of fiber measurements required for each test shall be the number needed to attain confidence limits of the mean within ±0.40 micron at a probability of 95 percent. Each operator shall measure approximately one-half the required number of fibers. The approximate number of fiber measurements needed for each of the grades—as listed in § 32.100, table 1—may serve as a guide. However, the minimum number of fibers to be measured to attain the prescribed confidence limits can be calculated by using the equation shown below:

$$n=\left(\frac{1.96\sigma}{0.40}\right)^2$$

In this equation:

n = Number of fibers to be measured, and
σ = Standard deviation of fiber diameters.

(10) *Calculation and report.* The measurements of both operators shall be combined and the following calculations made by using the applicable formulae shown below:

(i) The average diameter of fibers ($\overline{X}$):

$$\overline{X}=A+mE_1$$

(ii) The standard deviation (σ):

$$\sigma=m\sqrt{E_2-E_1^2}$$

(iii) The confidence limits of mean at 95 percent probability level=

$$\overline{X}\pm\frac{1.96\sigma}{\sqrt{n}}$$

In the formulae stated above:

A = Midpoint of cell containing the smallest measurement.
m = Cell interval.
n = Total number of fiber measurements.

$$E_1=\frac{\Sigma fz}{n} \text{ and } E_2=\frac{\Sigma fz^2}{n}, \text{ where}$$

Σ = Summation.
f = Observed frequency.
z = Deviation in Cells from A.

An example of the calculations is set forth below:

EXAMPLE OF CALCULATIONS: AVERAGE FIBER DIAMETER, STANDARD DEVIATION, AND CONFIDENCE LIMITS OF MEAN

Cell No.	Cell boundaries (microns)	A (microns)	Deviation in cells from A, z	Observed frequency, f	fz	fz^2	Cumulative frequency	Cumulative percent
5	10.0 to 12.5	11.25	0	1	0	0	1	0.10
6	12.5 to 15.0	—	1	15	15	15	16	1.60
7	15.0 to 17.5	—	2	66	132	264	82	8.20
8	17.5 to 20.0	—	3	141	423	1,269	223	22.30
9	20.0 to 22.5	—	4	165	660	2,640	388	38.80
10	22.5 to 25.0	—	5	176	880	4,400	564	56.40
11	25.0 to 27.5	—	6	138	828	4,968	702	70.20
12	27.5 to 30.0	—	7	99	693	4,851	801	80.10
13	30.0 to 32.5	—	8	79	632	5,056	880	88.00
14	32.5 to 35.0	—	9	55	495	4,455	935	93.50
15	35.0 to 37.5	—	10	35	350	3,500	970	97.00
16	37.5 to 40.0	—	11	9	99	1,089	979	97.90
17	40.0 to 42.5	—	12	8	96	1,152	987	98.70
18	42.5 to 45.0	—	13	6	78	1,014	993	99.30
19	45.0 to 47.5	—	14	4	56	784	997	99.70
20	47.5 to 50.0	—	15	0	0	0	997	99.70
21	50.0 to 52.5	—	16	3	48	768	1,000	100.00
Total				1,000	5,485	36,225		

Number of measurements (n) = 1,000.
A (midpoint of cell containing smallest diameter measurement) = 11.25 microns.
m (cell interval) = 2.5 microns.

$$E_1=\left(\frac{\Sigma fz}{n}\right)=\frac{5,485}{1,000}=5.4850 \text{ and } E_2=\left(\frac{\Sigma fz^2}{n}\right)=\frac{36,225}{1,000}=36.2250$$

Average diameter, $\overline{X}=A+mE_1=11.25+2.5(5.4850)=24.96$ microns.[1]

Standard deviation, $\sigma=m\sqrt{E_2-E_1^2}=2.5\sqrt{36.2250-30.0652}=2.5(2.4779)=6.19$ microns.[1]

Confidence limits of mean at 95 percent probability level=

$$\overline{X}\pm\frac{1.96\sigma}{\sqrt{n}}=24.96\pm\frac{12.1324}{31.6127}=24.96\pm0.38 \text{ micron.}^1$$

[1] Round off the calculated values of average fiber diameter, standard deviation, and confidence limit of the mean to 2 decimal places as follows: If the figure in the 3d decimal place is 4 or less, retain the figure in the 2d decimal place unchanged; otherwise, increase the figure in the 2d decimal place by 1.

(b) *Procedure for designating grade—*

(1) *Single grade designation.* If the measured average diameter and the fiber diameter dispersion correspond to a single grade, that shall be the grade assigned.

Example: Average fiber diameter—30.94 microns.

Fiber diameter dispersion:

	Percent
30 microns and under	51
30.1 microns and over	49
40.1 microns and over	10

Grade designation—30s.

(2) *Dual grade designation.* If the fiber dispersion does not meet the requirements for the grade to which the average fiber diameter corresponds, the mohair top shall be assigned a dual grade designation, the second designation being one grade coarser than the grade to which the average fiber diameter corresponds.

Example: Average fiber diameter—30.94 microns.
Fiber diameter dispersion:

	Percent
30 microns and under	45
30.1 microns and over	55
40.1 microns and over	16

Grade designation—30s–28s.

SAMPLES REPRESENTATIVE OF THE OFFICIAL STANDARDS OF THE UNITED STATES FOR GRADES OF MOHAIR TOP

§ 32.402 Standard samples of mohair top grades; method of obtaining.

Samples certified as representative of the official standards of the United States for grades of mohair top will be furnished when available as follows, subject to other conditions of this section, upon filing of an approved application and prepayment of the cost thereof as fixed in § 32.403. The certification will be issued by the U.S. Department of Agriculture and will be signed by the Director of the Livestock Division or other official duly authorized by him.

(a) Samples representative of the official grades of mohair top: (1) *Complete set.* Nine certified samples of mohair top, grades 40s through 20s.

(2) *Individual sample.* Individual certified samples of mohair top, grades 40s through 20s.

(b) Each application for standard samples of mohair top shall be upon an application form furnished or approved by the Agricultural Marketing Service, shall be signed by the applicant, and shall be accompanied by certified check, draft, postal money order, or express money order, payable to the "Agricultural Marketing Service," in an amount to cover the cost of the samples requested and shall incorporate the following agreement:

(1) That no samples representative of the official mohair top standards shall be considered or used as representing such standards after cancellation in accordance with this section.

(2) That the said standard samples shall be subject to inspection by the Secretary or by any duly authorized officer or agent of the Department of Agriculture during usual business hours of the person having custody of the samples.

(3) That the certificate covering any of the samples representative of the standards may be revoked and cancelled by the Director of the Livestock Division, if it is found upon such inspection that the said samples are not representative of the official standards.

§ 32.403 Cost of Standard samples for mohair top grades.

(a) *Complete set.* Twenty-seven dollars each, delivered to any destination within the United States and $30 each, delivered to any destination outside the United States.

(b) *Individual sample.* Three dollars each, delivered to any destination within the United States, and $3.50 each, delivered to any destination outside the United States.

The foregoing standards shall become effective January 1, 1973.

Done at Washington, D.C., this 29th day of December 1972.

E. L. PETERSON,
Administrator,
Agricultural Marketing Service.

Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 3]

PART 711—MARKETING QUOTA REVIEW REGULATIONS

Extension of Office Term

On page 24827 of the FEDERAL REGISTER of November 22, 1972 (37 FR 24827), was published a notice of proposed rule making to issue an amendment to the Marketing Quota Review Regulations.

Interested persons were given 15 days after publication of such notice in which to submit written data, views, or recommendations with respect to the proposed amendment. No data, views, or recommendations were received. Accordingly, the amendment as proposed is adopted with the following additions:

1. The basis and purpose title is added to the introductory paragraph.

2. An authority clause is added.

3. An effective date provision is added immediately following the authority clause.

Signed at Washington, D.C., on December 29, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

Basis and purpose. The purpose of this amendment is to change the length of the term of office for serving as a member of a marketing quota review committee panel. Currently each panel member is appointed or reappointed annually by the Secretary for a period of 1 calendar year. This amendment provides that effective beginning with the 1973 calendar year each panel member be appointed for 3 consecutive calendar years and be subject to reappointment for succeeding terms. Since appointments of panel members for service in 1973 and succeeding years are required in the near future, it is hereby determined that compliance with the 30 day effective date provisions of 5 U.S.C. 553 is unnecessary and contrary to the public interest. Accordingly, this amendment shall became effective upon publication in the FEDERAL REGISTER (1–8–73).

Section 711.10 of the Marketing Quota Review Regulations (35 FR 15355, 16235, 36 FR 1463, 37 FR 10656, 11465) is revised to read as follows:

§ 711.10 Term of office.

Appointment as a member of a review committee panel shall be for a term of 3 calendar years. A member may be reappointed for succeeding terms. Notwithstanding the foregoing, a review committee shall continue in office to conclude hearings before it which are begun during such 3-year term and make final determinations thereof, or to hold a reopened hearing, or to conclude a hearing remanded to it by a court.

(Secs. 301, 363–368, 375, 52 Stat. 38, as amended, 63, as amended, 64, 66, as amended; 7 U.S.C. 1301, 1363–1368, 1375)

Effective date: Upon publication in the FEDERAL REGISTER (1–8–73).

[FR Doc.73-327 Filed 1-5-73;8:45 am]

PART 722—COTTON

Subpart—1973 Crop of Extra Long Staple Cotton; Acreage Allotments and Marketing Quotas

NATIONAL MARKETING QUOTA REFERENDUM RESULT

Section 722.564 is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (52 Stat. 31, as amended; 7 U.S.C. 1281 et seq.). This section announces the result of the national marketing quota referendum with respect to the 1973 crop of extra long staple cotton held during the period December 4 to 8, 1972, each inclusive.

Since the only purpose of § 722.564 is to announce the referendum result, it is hereby found and determined that compliance with the notice, public procedure and 30-day effective date requirements of 5 U.S.C. 553 is unnecessary. Accordingly, § 722.564 shall be effective upon filing this document with the Director, Office of the Federal Register.

§ 722.564 Result of the national marketing quota referendum for the 1973 crop of extra long staple cotton.

(a) *Referendum period.* The national marketing quota referendum for the 1973 crop of extra long staple cotton was held by mail ballot during the period December 4 to 8, 1972, each inclusive, in accordance with § 722.561 (37 FR 21988) and Part 717 of this chapter.

(b) *Farmers voting.* A total of 2,039 farmers engaged in the production of the 1972 crop of extra long staple cotton voted in the referendum. Of those voting, 1,899 farmers, or 93.1 percent, favored the 1973 national marketing quota, and 140 farmers, or 6.9 percent, opposed the 1973 national marketing quota.

(c) *1973 national marketing quota continues in effect.* The national marketing quota for the 1973 crop of extra long staple cotton of 113,800 bales proclaimed in § 722.558 (37 FR 21988) shall continue in effect since two-thirds or more

V 38 - 4 JAN 8 73 XUM

of the extra long staple cotton farmers voting in the referendum favored the quota.

(Sec. 343, 63 Stat. 670, as amended; 7 U.S.C. 1343)

Effective date: Date of filing this document with the Director, Office of the Federal Register (1-5-73).

Signed at Washington, D.C., on December 29, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

Chapter XIV—Commodity Credit Corporation, Department of Agriculture

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[1972-Crop Tung Oil Warehouse-Stored Supp.]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

1972-Crop Tung Oil Warehouse-Stored Loan Program

On page 20182 of the FEDERAL REGISTER of September 27, 1972, there was published a notice of proposed rule making relating to the support program for the 1972 crop of tung nuts. Interested persons were given 30 days in which to submit written data, views, and recommendations pertaining to the level of support, the method of support, conditions of eligibility, area and period of the program, and other program provisions. No comments have been received.

The general regulations governing price support for the 1970 and subsequent crops (35 FR 7363) and any amendments thereto and the 1970 and subsequent crop tung oil warehouse-stored loan program regulations (35 FR 19499) and any amendments to such regulations are supplemented by revising §§ 1421.450–1421.453, effective as to the 1972 crop of tung oil. The material previously appearing in these sections remains in full force and effect as to the crop to which it was applicable. The revised sections read as follows:

§ 1421.450 Availability.

(a) *Area.* The program will be available in the States of Alabama, Florida, Georgia, Louisiana, Mississippi, and Texas.

(b) *Period.* Loans will be available from November 1, 1972, through September 30, 1973.

§ 1421.451 Service fees and delivery charges.

Producers shall pay a loan service fee as provided in § 1421.11(a) of the general regulations, and instead of the delivery charge specified in § 1421.11(b) of the general regulations, a delivery charge of 6 cents per hundredweight for the quantity of tung oil tendered to CCC for loan which is not redeemed by October 31, 1973. Such fee and charge will be deducted from loan proceeds, but the charge applicable to the quantity of oil redeemed will be credited to the producer's account.

§ 1421.452 Support rate.

Loans on eligible tung oil produced from 1972 crop
from 1972-crop tung nuts shall be made at the rate of 27.6 cents per pound.

§ 1421.453 Maturity of loans.

Loans will mature on demand but not later than October 31, 1973.

(Sec. 4, 62 Stat. 1070, as amended; 15 U.S.C. 714(b). Interpret or apply sec. 5, 62 Stat. 1072, secs. 201, 401, 63 Stat. 1052, as amended, 1054; 15 U.S.C. 714(c); 7 U.S.C. 1446, 1421)

Effective date: Upon publication in the FEDERAL REGISTER (1-8-73).

Signed at Washington, D.C., on December 29, 1972.

KENNETH E. FRICK,
Executive Vice President, Commodity Credit Corporation.

Subpart—Using misleading name—VENDOR: § 13.2420 *Manufacturing nature:*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply section 5, 88 Stat. 719, as amended, 72 Stat. 1717; 15 U.S.C. 45, 70) [Cease and desist order, Glen Head Mills of Georgia, Inc., et al., Jasper, Ga., Docket No. C-2327, Dec. 1, 1972.]

In the Matter of Glen Head Mills of Georgia, Inc., a Corporation, and Edward Negola, Individually and as an Officer of Glen Head Mills of Georgia, Inc.

Consent order requiring a Jasper, Ga., wholesaler of carpeting fabrics fabricated from its yarns, among other things to cease removing or mutilating information required by the Textile Fiber Products Identification Act; failing to maintain adequate records; and misbranding its textile fiber products. Respondent is further required to cease using the word "Mills" as part of the corporate or trade name which misrepresents that respondent owns, operates or controls mills, factories or manufacturing plants.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Glen Head Mills of Georgia, Inc., a corporation, its successors and assigns, and its officers, and Edward Negola, individually and as an officer of Glen Head Mills of Georgia, Inc., and respondents' representatives, agents and employees, directly or through any corporation, subsidiary, division or other device, in connection with the introduction, manufacture for introduction, sale, advertising or offering for sale, in commerce, or the transportation or causing to be transported in commerce, or the importation into the United States of any textile fiber product; or in connection with the sale, offering for sale, advertising, delivery, transportation, or causing to be transported, of any textile fiber product which has been advertised or offered for sale, in commerce; or in connection with the sale, offering for sale, advertising, delivery, transportation or causing to be transported, after shipment in commerce, of any textile fiber product, whether in its original state or contained in other textile fiber products, as the terms "commerce" and "textile fiber product" are defined in the Textile Fiber Products Identification Act, do forthwith cease and desist from:

A. Misbranding textile fiber products by failing to affix a stamp, tag, label, or other means of identification to each such product showing in a clear, legible and conspicuous manner each element of information required to be disclosed by section 4(b) of the Textile Fiber Products Identification Act.

B. Failing to maintain or preserve records of fiber content of textile fiber products fabricated from their yarns and manufactured to their specifications as required by section 6(a) of the Textile Fiber Products Identification Act and Rule 39 of the rules and regulations promulgated thereunder.

C. Removing or mutilating, or causing or participating in the removal or mutilation of, the stamp, tag, label, or other identification required by the Textile Fiber Products Identification Act to be affixed to any textile fiber product, after such textile fiber product has been shipped in commerce, and prior to the time such textile fiber product is sold and delivered to the ultimate consumer without substituting therefor labels conforming to section 4 of said Act and the rules and regulations promulgated thereunder and in the manner prescribed by section 5(b) of the Act.

D. Failing to maintain and preserve, as required by section 6(b) of the Textile Fiber Products Identification Act, such records of the fiber content of textile fiber products as will show the information set forth on the stamps, tags, labels, or other identification removed by respondents, together with the name or names of the person or persons from whom such textile fiber products were received, when substituting stamps, tags, labels, or other identification pursuant to section 5(b) of the Textile Fiber Products Identification Act.

E. Failing to set forth in disclosing fiber content information as to floor coverings containing exempted backings, fillings or paddings, that such disclosure relates only to the face, pile or outer surface of such textile fiber products and not the exempted backings, fillings, or paddings.

It is further ordered, That respondents Glen Head Mills of Georgia, Inc., a corporation, its successors and assigns, and its officers, and Edward Negola, individually and as an officer of said corporation, and respondents' representatives, agents and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the offering for sale, sale or distribution of carpet rolls, rugs, or any other articles of merchandise, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Directly or indirectly using the word "Mills" or any other word or term of similar import or meaning in or as a part of respondents' corporate or trade name or representing in any other manner that respondents perform functions of a mill or otherwise manufacture or process the products sold by them unless or until respondents own, operate, or directly or absolutely control the mill, factory or manufacturing plant wherein said products are manufactured.

2. Misrepresenting in any manner that respondents own, operate or control mills, factories or manufacturing plants where their products are manufactured.

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent, Glen Head Mills of Georgia, Inc., such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

It is further ordered, That the respondent corporation, Glen Head Mills of Georgia, Inc., shall forthwith distribute a copy of the order to each of its operating divisions.

It is further ordered, That respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

Issued: December 1, 1972.

By the Commission.

[SEAL] CHARLES A. TOBIN,
Secretary.

[Docket No. 8894]

PART 13—PROHIBITED TRADE PRACTICES

Howard Carpet Mills, Inc., and Howard S. Stein

Subpart—Importing, manufacturing, selling, or transporting flammable wear: § 13.060 *Importing, manufacturing, selling, or transporting flammable wear.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, 67 Stat. 111, as amended; 15 U.S.C. 45, 1191) [Cease and desist order, Howard Carpet Mills, Inc., et al., New York, N.Y., Docket No. 8894, Dec. 1, 1972]

In the Matter of Howard Carpet Mills, Inc., a Corporation, and Howard S. Stein, Individually and as an Officer of the Corporation

Order requiring a New York City manufacturer of carpets, among other things to cease marketing dangerously flammable products.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That the initial decision of the Administrative Law Judge shall, on the 1st day of December, 1972, become the decision of the Commission.

It is further ordered, That respondent Howard Carpet Mills, Inc., a corporation, its successors and assigns, and its officers, and respondent Howard S. Stein, individually and as an officer of said corporation and respondents' agents, representatives and employees directly or through any corporation, subsidiary, division, or other device, do forthwith cease and desist from manufacturing for sale, selling, offering for sale, in commerce, or importing into the United States, or introducing, delivering for introduction, transporting or causing to be transported in commerce, or selling or delivering after sale or shipment in commerce, any product, fabric, or related material; or manufacturing for sale, selling, or offering for sale, any product made of fabric or related material which has been shipped or received in commerce, as "commerce", "product", "fabric" and "related material" are defined in the Flammable Fabrics Act, as amended, which product, fabric or related material fails to conform to an applicable standard or regulation continued in effect, issued or amended under the provisions of the aforesaid Act.

It is further ordered, That respondents notify all of their customers who have purchased or to whom have been delivered the products which gave rise to this complaint, of the flammable nature of said products and effect recall of said products from such customers.

It is further ordered, That the respondents herein either process the products which gave rise to the complaint so as to bring them into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said products.

It is further ordered, That the provisions of this order with respect to customer notification, recall, and processing or destruction shall, in addition to the products set forth in subparagraph 1 of paragraph 2 of the complaint, be applicable to any other styles of carpeting found not to meet an applicable standard under the Flammable Fabrics Act, as amended, since the issuance of the complaint and until the order becomes final within the meaning of the Federal Trade Commission Act.

It is further ordered, That respondents herein shall, within ten (10) days after service upon them of this order file with the Commission a special report in writing setting forth the respondents' intentions as to compliance with this order. This special report shall also advise the Commission fully and specifically concerning (1) the identity of the products which gave rise to the complaint, (2) the identity of the purchasers of said products, (3) the amount of said products on hand and in the channels of commerce. (4) any action taken and any further actions proposed to be taken to notify customers of the flammability of said products and effect the recall of said products from customers, and of the results thereof, (5) any action taken or proposed to be taken to bring said products into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or to destroy said products, and the results of such action and (6) any disposition of said products since November 10, 1971. Respondents will submit with their report, a complete description of each style of carpet or rug currently in inventory or production. Upon requests, respondents will forward to the Commission for

V38-4 JAN 8 73 XUM

testing a sample of any such carpet or rug. Respondents will also advise the Commission fully and specifically concerning items (1) through (5) above with regard to any products coming within the purview of paragraph 4 of this order.

It is further ordered, That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business or employment in which he is engaged as well as a description of his duties and responsibilities.

It is further ordered, That Howard Carpet Mills, Inc., a corporation, and Howard S. Stein, individually and as an officer of the corporation, shall, within sixty (60) days after service of this order upon them, file with the Commission a report in writing, signed by such respondents, setting forth in detail the manner and form of their compliance with the order to cease and desist.

Issued: December 1, 1972.

By the Commission.

[SEAL] CHARLES A. TOBIN, *Secretary.*

[Docket No. C-2328]

PART 13—PROHIBITED TRADE PRACTICES

Pakistan Arts and Crafts, Inc., and Jamil Akhter

Subpart—Importing, manufacturing, selling or transporting flammable wear: § 13.1060 *Importing, manufacturing, selling, or transporting flammable wear.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply section 5, 38 Stat. 719, as amended, 67 Stat. 111, as amended; 15 U.S.C. 45, 1191) [Cease and desist order, Pakistan Arts and Crafts, Inc., et al., New York, N.Y., Docket No. C-2328, Dec. 6, 1972]

In the Matter of Pakistan Arts and Crafts, Inc., a Corporation, and Jamil Akhter, Individually and as an Officer of Said Corporation

Consent order requiring a New York City importer and manufacturer of wearing apparel, among other things to cease manufacturing for sale, selling, importing, or distributing any product, fabric, or related material which fails to conform to an applicable standard of flammability or regulation issued under the provisions of the Flammable Fabrics Act, as amended.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That the respondents Pakistan Arts and Crafts, Inc., a corporation, its successors and assigns, and its officers, and Jamil Akhter, individually and as an officer of said corporation, and respondents' representatives, agents and employees, directly or through any corporation, subsidiary, division or other device, do forthwith cease and desist from manufacturing for sale, selling, offering for sale, in commerce, or importing into the United States, or introducing, delivering for introduction, transporting or causing to be transported in commerce, or selling or delivering after sale or shipment in commerce, any product, fabric, or related material; or manufacturing for sale, selling or offering for sale, any product made of fabric or related material which has been shipped or received in commerce as "commerce", "product", "fabric" and "related material" are defined in the Flammable Fabrics Act, as amended, which product, fabric, or related material fails to conform to an applicable standard or regulation issued, amended or continued in effect, under the provisions of the aforesaid Act.

It is further ordered, That respondents notify all of their customers who have purchased or to whom have been delivered the ponchos which gave rise to the complaint, of the flammable nature of said ponchos and effect the recall of said ponchos from such customers.

It is further ordered, That the respondents herein either process the ponchos which gave rise to the complaint so as to bring them into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said ponchos.

It is further ordered, That the respondents herein shall, within ten (10) days after service upon them of this order, file with the Commsision an interim special report in writing setting forth the respondents' intentions as to compliance with this order. This special report shall also advise the Commission fully and specifically concerning (1) the identity of the ponchos which gave rise to the complaint, (2) the number of said ponchos in inventory, (3) any action taken and any further actions proposed to be taken to notify customers of the flammability of said ponchos and effect the recall of said ponchos from customers, and of the results thereof, (4) any disposition of said ponchos since November 6, 1970, and (5) any action taken or proposed to be taken to bring said ponchos into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said ponchos, and the results of such action. Such report shall further inform the Commission as to whether or not respondents have in inventory any product, fabric, or related material having a plain surface and made of paper, silk, rayon and acetate, nylon and acetate, rayon, cotton or any other material or combinations thereof in a weight of 2 ounces or less per square yard, or any product, fabric or related material having a raised fiber surface. Respondents shall submit samples of not less than 1 square yard in size of any such product, fabric, or related material with this report.

It is further ordered, That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissoluiton of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this order.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with the order to cease and desist contained herein.

Issued: December 6, 1972.

By the Commission.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Cease and desist order, Sunshine Art Studios, Inc. et al., Springfield, Mass., Docket No. 8825, Nov. 30, 1972]

In the Matter of Sunshine Art Studios, Inc., Junior Sales Club of America, Inc., Sales Leadership Club, Inc., and Trans-American Collection Agency, Inc., Corporations, and Ryland E. Robbins, Individually and as an Officer of Said Corporations

Order requiring three Springfield, Mass., sellers of greeting cards and an affiliated collection agency, among other things to cease shipping and seeking payment for unordered merchandise; making deceptive "free" offers; using misleading order forms; sending substitute shipments without offering refunds; and collecting delinquent accounts through subterfuge.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Sunshine Art Studios, Inc., Junior Sales Club of America, Inc., Sales Leadership Club, Inc., and Guardian Collection Agency, Inc., corporations, their successors and assigns, and Ryland E. Robbins, individually and as an officer of each such corporation, and respondents' officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, offering for sale, sale, or distribution of greeting cards or any other product, or in the collection of accounts arising therefrom, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Sending any merchandise without the expressed request or consent of the recipient unless such merchandise shall have attached to it a clear and conspicuous statement that the recipient may treat the merchandise as a gift to him and that he has the right to retain, use, discard, or dispose of it in any manner that he sees fit without any obligation whatsoever to the sender.

2. Sending any communication (including bills, invoices, reminders, letters, notices, or dunning communications) that in any manner seeks to obtain payment for or return of merchandise shipped without the expressed consent or request of the recipient.

3. Sending any merchandise to any person without first obtaining a specific order therefor after respondents have been notified by such person that no further merchandise shipments are to be made.

4. Using any coupon or order form by which purchasers purport to authorize or authorize (either of which is referred to herein as "authorization") respondents to send merchandise at a future date unless the authorization is set forth in a completely separate and distinct paragraph in such document, which separate paragraph contains only words or information necessary to the authorization and which clearly and conspicuously states the following:

(1) That the document is an authorization to send merchandise at a future date; and

(2) That such authorization shall apply only to one offering other than an initial shipment, if any, which offering is to be shipped within 1 year; and

(3) A description of the merchandise covered by the authorization.

5. Resorting to any subterfuge or coercion to sell respondents' merchandise.

6. Representing, directly or by implication, that delinquent accounts will be, or have been, turned over to an independent, bona fide collection agency.

7. Representing, directly or by implication, that Guardian Collection Agency, Inc., is an independent, bona fide collection agency; or that any other organization or trade name owned or controlled wholly or partially by respondents is an independent, bona fide collection agency.

8. Representing, directly or by implication, that delinquent accounts will be referred to an attorney if payment is not received.

9. Using any subterfuge or deceptive scheme or device in connection with the collection of delinquent accounts.

10. Shipping to any customer greeting cards, or any other merchandise, that differ in a material respect from the greeting cards or the other merchandise ordered without informing the customer that he is entitled to a full cash refund if he does not wish to accept the substitute merchandise or a partial refund of a stated amount if he is willing to accept merchandise of lesser quality or value than that ordered.

11. Representing, directly or by implication, that imprinting or other service in connection with the sale of greeting cards or other products is given "free" or as a gift or without cost or charge in connection with:

(1) Any offer which runs for an indefinite term or continuously for a period in excess of 1 year;

(2) Any offer not covered by (1), above, excluding introductory offers, unless as to such limited offer:

(a) A regular bona fide retail price is established for the product without the imprinting or service;

(b) A regular bona fide retail price is established for the imprinting or service, or in the absence of such price a determination is made of the cost to respondents of providing the imprinting or service; and

(c) The price of the greeting cards or product is reduced at least as much as the price or cost of the imprinting or service.

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in any of the corporate respondents, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, affiliates, or any other change in the corporate respondents which may affect compliance obligations arising out of this order.

It is further ordered, That corporate respondents distribute a copy of this order to each of their operating divisions or departments.

It is further ordered, That the respondents herein shall, within sixty (60) days after the effective date of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

It is further ordered, That the initial decision, as modified, be, and it hereby is, adopted as the decision of the Commission.

Issued: November 30, 1972.

By the Commission.

[SEAL] CHARLES A. TOBIN, *Secretary.*

[Docket No. C-2329]

PART 13—PROHIBITED TRADE PRACTICES

William Freihofer Baking Co., Inc.

Subpart—Advertising falsely or misleadingly: § 13.20 *Comparative data or merits;* § 13.30 *Composition of goods;* § 13.135 *Nature of product or service;* § 13.170 *Qualities or properties of product or service:* 13.170–74 Nutritive; § 13.205 *Scientific or other relevant facts.* Subpart—Misrepresenting oneself and goods—Goods: § 13.1575 *Comparative data or merits;* § 13.1590 *Composition;* § 13.1605 *Content;* § 13.1710 *Qualities or properties;* § 13.1740 *Scientific or other relevant facts.* Subpart—Using deceptive techniques in advertising: § 13.2275 *Using deceptive techniques in advertising.*

(Sec. 6 38 Stat. 721; 15 U.S.C. 46. Interprets or applies section 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Cease and desist order, William Freihofer Baking Co., Inc., Allentown, Pa., Docket No. C-2329, Dec. 7, 1972]

In the Matter of William Friehofer Baking Co., Inc., a Corporation

Consent order requiring an Allentown, Pa., producer of bakery goods, among other things to cease misrepresenting the nutritional value of its bread.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent William Freihofer Baking Co., a corporation, their successors and assigns, and their agents, officers, representatives and employees, directly or through any corporate or other device, in connection with the advertising, offering for sale, sale or distribution of any bread or baked product, forthwith cease and desist from:

(1) Disseminating or causing the dissemination of any advertisement by means of the United States mails or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, which contains the following:

(a) Any representation, orally, visually, or by any other means, that Freihofer's Bread is "double enriched," has "almost twice the nutrition," is "double

V 38 - 4 JAN 8 73 XUM

nutrition," or has "almost twice the vitamins and iron," as ordinary enriched bread,

(b) Any representation, or implication, orally, visually, or by any other means, that the wheat germ content of Freihofer's Bread is equivalent to that of whole wheat bread, such as by saying " • • • Freihofer's now contains the same natural wheat germ as 100 percent whole wheat bread,"

(c) Any representation, orally, visually, or by any other means that Freihofer's Bread represents a "nutritional bread through" or breakthrough, or any other representation to that effect;

It is provided however, That should respondent reformulate its bread so as to make any of the above-proscribed representations true, that the above-proscribed representations may be made.

It is further ordered, That respondent shall forthwith distribute a copy of this order to each of their operating divisions.

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondents such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this order.

It is further ordered, That respondent shall, within sixty (60) days after the service of the order upon them, file with the Commission a report in detail the manner and form of their compliance with the order to cease and desist.

Issued: December 7, 1972.

By the Commission.

Title 31—MONEY AND FINANCE

Subtitle A—Office of the Secretary of the Treasury

PART 0—STANDARDS OF CONDUCT

Persons Required To File Financial Statements

Appendix A of the Department of the Treasury Standards of Conduct, which identifies positions the incumbent of which must file financial statements, as provided in § 0.735.70 of the Standards, is amended to identify positions in the new Bureau of Alcohol, Tobacco, and Firearms and to revise the entries for several other Bureaus and Offices of the Department.

The Department finds that notice of proposed rule making is not necessary under 5 U.S.C. 553 since the amendment relates exclusively to agency personnel. As revised Appendix A reads as follows:

APPENDIX A—IDENTIFICATION OF POSITIONS THE INCUMBENTS OF WHICH MUST FILE FINANCIAL STATEMENTS

SPECIFIC POSITIONS

Office of the Secretary

All employees Grade 15 and above.
All employees Grades 13 and 14, Office of Domestic Gold and Silver Operations.
All contract and procurement personnel Grades 13 and 14, Office of Administrative Programs, and Office of Central Services.

Bureau of Alcohol, Tobacco, and Fircarms

Director.
Deputy Director.
Assistant Director (Criminal Enforcement).
Deputy Assistant Director.
Chief, Special Programs Division.
Chief, Planning and Procedures Division.
Chief, Liaison and Technology Division.
Chief, Firearms and Explosives Division.
Chief, Alcohol Division.
Assistant Director (Inspection).
Deputy Assistant Director.
Regional Inspectors.
Assistant Director (Administration).
Chief, Administrative Programs Division.
All personnel, GS-13 and above who are involved in contract and procurement.
Assistant Director (Regulatory Enforcement.)
Technical Advisor (Tobacco).
Deputy Director.
Chief, Industry Control Division.
Assistant Chief, Industry Control Division.
Chief, Regulations and Procedures Division.
Assistant Chief, Regulations and Procedures Division.
Chief, Trade and Consumer Affairs Division.
Assistant Chief, Trade and Consumer Affairs Division.
Assistant Director (Technical and Scientific Services).
Chief, Data Processing Division.
Chief, Technical Services Division.
Chief, Scientific Services Division.
Regional Directors.
Assistant Regional Directors.
Special Agents in Charge.
Assistant Special Agents in Charge.
Resident Agents.
Chief, Field Operations.
Area Supervisors.
Group Supervisors.
All Attorneys GS-15 and above.

Bureau of Accounts

Commissioner of Accounts.
Chief Disbursing Officer.
Comptroller.
Director, Cash Management.
Assistant Director, Cash Management (Foreign Depositary Analysis).
Chief Domestic Banking Operations.
Chief Auditor.
Operating Facilities Officer.
Chief, Procurement Section.

Bureau of Customs

All employees, GS-15 and above.
Customs Law Specialists, GS-14.
Deputy Assistant Regional Commissioners of Customs (Classification and Value), (Inspection and Control), (Financial Management).
District Directors.

Title 32—NATIONAL DEFENSE

Chapter VII—Department of the Air Force

SUBCHAPTER A—ADMINISTRATION

PART 807—ISSUING AIR FORCE PUBLICATIONS AND FORMS OUTSIDE THE AIR FORCE

Miscellaneous Amendments

Part 807, Subchapter A, Chapter VII of Title 32 of the Code of Federal Regulations is amended as follows:

1. Section 807.1 is amended by revising paragraphs (b) and (c), and deleting paragraph (e) as set forth below.

§ 807.1 Issuing publications and forms to private citizens, private organizations, and commercial activities.

• • • • •

(b) Publications marked "for official use only" will be released to private citizens, private organizations, or commercial activities only under the conditions set forth in AFR 12-31.

(c) Publications and forms other than those specified in paragraphs (a) and (b) of this section will be issued, on request to private citizens and organizations of any country, but only under the conditions cited in AFR 11-25 and Parts 806 and 813 of this chapter. If requested items are not immediately available from local stocks, the Publications Distribution Office will obtain them from the Air Force Publications Distribution Center for release to the requester. For those publications with M or X distribution symbols to which the Publications Distribution Office is not normally entitled, PDOs will include a statement in the remarks section of the requisition that the item is for release to the public. When the index indicates that an item is stocked and issued only by the OPR (Office of Primary Responsibility), the requester will be referred to HQ USAF, AF/DADP.

• • • • •

(e) [Deleted]

§ 807.2 [Amended]

2. Section 807.2 is amended by deleting paragraphs (a) through (b)(2). The table following paragraph (b)(2) remains under this section.

(10 U.S.C. 8012)

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY, *Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.*

[FR Doc.73-67 Filed 1-5-73;8:45 am]

SUBCHAPTER A—ADMINISTRATION

PART 809—ISSUE AND CONTROL OF IDENTIFICATION (ID) CARDS

Subchapter A of Chapter VII of Title 32 of the Code of Federal Regulations is amended by revising Part 809 to read as follows:

Subpart A—General Information

Sec.
809.1 Purpose.
809.2 Types of ID cards.
809.3 Reproduction of ID cards.
809.4 Definitions.
809.5 Change in status of member or dependent.
809.6 Accredited/approved institutions of higher learning.
809.7 Chart of entitlement to benefits and privileges.

Subpart B—General Procedures

809.10 Command responsibility.
809.11 Action by Air Force Accounting and Finance Center (AFAFC).
809.12 Retrieval, confiscation, and appeal procedures.
809.13 Loss, theft, or destruction of ID cards.

Subpart C—ID Cards for Members on Active Duty—DD Form 2AF (Activel (Green)

809.20 General information.
809.21 Individual responsibility.
809.22 How to apply for green card.
809.23 Surrender of green card.

Subpart D—ID Cards for Members Entitled to Retire Pay—DD Form 2AF (Retired) (Gray)

809.30 General information.
809.31 How to apply for gray card.
809.32 When to issue/reissue gray card.
809.33 Surrender of gray card.

Subpart E—ID Cards for Reserve Members Not on Active Duty—DD Form 2AF (Reserve) (Red)

809.40 General information.
809.41 How to apply for red card.
809.42 When to issue/reissue red card.
809.43 Surrender of red card.

Subpart F—Geneva Conventions ID Cards—DD Forms 489 and 528

809.50 General information.
809.51 Geneva Conventions credential system described.
809.52 Issuance and use of ID cards.
809.53 When to issue/reissue ID cards.
809.54 Military-civilian relationship for prisoner of war identification purposes.

Subpart G—Uniformed Services Identification and Privilege (USIP) Card—DD Form 1173

809.60 General information.
809.61 Issue by other services.
809.62 Persons entitled to USIP cards.
809.63 When to surrender USIP card.
809.64 Where to file completed DD Forms 1172.
809.65 Expiration date to enter in item 3, DD Form 1173.

AUTHORITY: The provisions of this Part 809 issued under 10 U.S.C. 8012.

Subpart A—General Information

§ 809.1 Purpose.

(a) This part governs the preparation, issuance, use, accountability, and disposition of identification cards issued by the Air Force to U.S. Armed Forces active duty and retired Air Force personnel, Reserve of the Air Force personnel, dependents, and others eligible for certain services administered by the Armed Forces.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 809.2 Types of ID cards.

Individuals, except active duty members serving as OSI special agents and members designated in § 809.62(j), may be issued only one of the types of cards described in paragraphs (a), (b), (c), and (d) of this section. (DD Forms 2AF will be issued to Air Force members only.)

(a) DD Form 2AF (Active) (Green), Armed Forces Identification Card.

(b) DD Form 2AF (Retired) (Gray), Armed Forces Identification Card.

(c) DD Form 2AF (Reserve) (Red), Armed Forces Identification Card.

(d) DD Form 1173, Uniformed Services Identification and Privilege Card.

(e) DD Form 489, Noncombatant's Certificate of Identity.

(f) DD Form 528, Geneva Conventions Identification Card.

§ 809.3 Reproduction of ID cards.

Title 18, U.S.C. 701, prohibits photographing or other unauthorized reproduction or possession of United States identification cards under penalty of fine or imprisonment or both.

EXCEPTION: Photocopying of DD Forms 2AF and 1173 as part of the admission procedure for medical care under the Civilian Health and Medical Program for the Uniformed Services (CHAMPUS) is authorized.

§ 809.4 Definitions.

(a) *Armed Forces.* The Army, Navy, Air Force, Coast Guard, and Marine Corps.

(b) *Issuing activity.* An agency or person authorized, upon receipt of a properly certified application, to issue one of the ID cards listed in this part. (This activity must have the necessary photographing and laminating facilities.) Commissioned officers, warrant officers, noncommissioned officers (grades E-7 through E-9), civilians (GS-5 and above) may be authorized to authenticate ID cards. An NCO in grade E-5 or E-6 who is Noncommissioned Officer in Charge (NCOIC) of the pass issuing facility may be authorized to authenticate ID cards.

(c) *Active duty member of a Uniformed Service.* A person serving on active duty or active duty for training pursuant to a call or order that does not specify a period of 30 days or less.

V38-4 JAN 8 73 J XUM

(d) *Retired member of a Uniformed Service.* A retired member of the Uniformed Services who is entitled to retired, retainer, or equivalent pay.

(e) *Deceased member.* A member who died while serving on active duty or who died while in a retired status, or a member of the Reserve component who died in line of duty while in an active status for less than 30 days whose survivors are paid the death gratuity under DODPM, part 4, chapter 5.

(f) *Dependent.* A person who bears any of the following relationships to an active duty or retired member of a Uniformed Service or to a person who at the time of his death was on active duty or was a retired member of a Uniformed Service:

(1) The lawful wife.
(2) The unremarried widow.
(3) The lawful husband.
(4) The unremarried widower.
(5) Child:

NOTE: When used in this part, under 21 years of age (under age 21) means before the 21st birthday; under 23 years of age (under age 23) means before the 23d birthday; over 21 years of age (over age 21) means on or after the 21st birthday; over 23 years of age (over age 23) means on or after the 23d birthday.

(i) A legitimate child, adopted child, or legitimate stepchild:

(A) Who is unmarried and under 21 years of age whther or not dependent on the active duty or retired member; or

(B) Who is unmarried and 21 years of age or older, but is incapable of self-support because of a mental or physical incapacity that existed before his 21st birthday, and is, or was at the time of death of the active duty or retired member, dependent on the member for over half of his support; or

(C) Who is unmarried and 21 or 22 years of age and pursuing a full-time course of education approved by the Secretary of Defense or the Secretary of Health, Education, and Welfare (as applicable), or is approved by a State agency under Title 38, U.S.C., chapters 34 (Veterans Educational Assistance) and 35 (War Orphans' and Widows' Educational Assistance) for the purposes of those chapters, and is, or was at the time of death of the active duty or retired member, dependent on him for over half of his support.

(ii) An unmarried child or stepchild who was illegitimate at the time of birth, and who is, or was at the time of death of the active duty or retired member, dependent on the member for more than half of his support; residing in the member's household or in a dwelling provided or maintained by the member, and is:

(A) Under 21 years of age; or

(B) Twenty-one years of age or older, but incapable of self-support because of a mental or physical incapacity that existed before his 21st birthday; or

(C) Twenty-one or 22 years of age and pursuing a full-time course of education approved by the Secretary of Defense or the Secretary of Health, Education, and Welfare (as applicable), or that is approved by a State agency under Title 38, U.S.C., chapters 34 (Veterans' Educational Assistance) and 35 (War Orphans' and Widows' Educational Assistance) for the purpose of those chapters.

NOTE: Courses of education offered by institutions listed in "Education Directory, Part 3, Higher Education" and/or "Accredited Higher Institutions" issued periodically by the Office of Education, Department of Health, Education, and Welfare meet the criteria approved by the Secretary of Defense or Secretary of Health, Education, and Welfare. To determine approval of courses offered by a foreign institution, by an institution not approved by a State agency under Title 38, U.S.C., Chapters 34 and 35, a statement may be obtained from the Office of Education, Department of Health, Education, and Welfare, Washington, D.C. 20202.

(ii) A parent or parent-in-law who either:

(i) Is dependent on the active duty or retired member for over half of his support and is residing in a dwelling provided or maintained by the member; or

(ii) Was at the time of death of the member dependent on him for over half of his support and is residing in a dwelling provided or maintained by the member.

NOTE: For the purpose of commissary and theater, eligibility is determined on actual residence in the household of the military sponsor. For the purpose of exchange, the condition of residence is not essential in defining a parent/parent-in-law.

(g) *Eligible recipient.* Section 809.7 is a guide for designating the extent of benefits and privileges for entitled recipients. The pertinent directive will take precedence in conflicting situations, as follows:

(1) Medical care—Part 815 of this chapter and AFR 168–9.

(2) Commissary privileges—Part 823 of this chapter.

(3) Exchange patronage—AFR 147–14.

(4) Admission to military theaters—AFR 34–32.

(h) *Issuing activity.* An agency or person authorized, upon receipt of a properly certified application, to issue one of the ID cards listed in this part. (This activity must have the necessary photographing and laminating facilities.) Commissioned officers, warrant officers, noncommissioned officers (grades E–7 through E–9), and civilians (GS–5 and above) may be authorized to authenticate ID cards. An NCO in grade E–5 or E–6 who is NCOIC of the pass issuing facility may be authorized to authenticate ID cards.

(i) *Sponsor.* A person independently eligible for one of the cards listed in this part, upon whom another person's eligibility for an ID card is based.

(j) *Verifying activity.* An agency or person designated to certify to the eligibility of individuals to receive ID cards. Normally, the consolidated base personnel office (CBPO) is the responsible activity. The responsible person may be a commissioned officer, warrant officer, noncommissioned officer (grades E–7 through E–9), or civilian employees (GS–5 and above). An NCO in grade of E–5 or E–6 who is NCOIC of the verifying activity may be authorized to certify to the eligibility of ID card recipients.

(k) *Service member.* Individual of the Armed Forces on active duty for 31 days or more or retiree entitled to retired pay or retainer.

(l) *Protected personnel.* Included in this category are:

(1) Medical personnel exclusively engaged in the search for or the collection, transport, or treatment of the wounded or sick, or in the prevention of disease, staffs exclusively engaged in the administration of medical units and establishments, and chaplains attached to the Armed Forces.

(m) *Totally (100 percent) disabled veteran.* An individual who has been honorably discharged from any of the Services of the U.S. Armed Forces and certified by the Veterans' Administration to be totally (100 percent) disabled as a result of a service-connected injury or illness.

§ 809.5 Change in status of member or dependent.

(a) *Legal separation, interlocutory divorce, final divorce decree.* A wife or a dependent husband divorced from a service member (active duty, retired with pay) loses eligibility for DD Form 1173 on the date the divorce becomes final. A spouse does not lose eligibility through issuance of an interlocutory decree of divorce even when the court has approved a property settlement releasing the service member from responsibility for support. (However, the service member may revoke his designation of agent's privileges for commissary if he desires.) A spouse remains eligible for DD Form 1173 as long as the relationship of husband and wife is not terminated by a final divorce decree. (The eligibility of unmarried children is not affected by the divorce, except a stepchild relationship ceases upon divorce of parent and stepparent.) The fact that the divorced wife of a member remarries does not necessarily terminate a child's eligibility for medical care, exchange, and theater privileges. A child of an active duty or retired member adopted after the member's death retains eligibility for health benefits; however, the adoption of a child of a living member by another person (other than by a person whose dependents are eligible for health benefits) terminates the child's eligibility.

(b) *Marriage and final divorce decree of dependent child.* Children lose eligibility upon reaching age 21, except children mentally or physically incapacitated and those enrolled in an approved institution of higher learning. If a child is married, eligibility ceases on the date of marriage. However, should the marriage terminate by "final" divorce decree, annulment, or any other reason, the child may again be entitled to DD Form 1173 as the child of a service member if the eligibility requirements of a dependent child are met. An "interlocutory decree" would entitle the child to commissary and theater privileges if residing in the member's household.

(c) *Dependent's eligibility terminated.* Member's release from active duty, discharge, official placement of the member in a desertion status, or divorce (except as provided in paragraphs (a) and (b) of this section) terminates the eligibility for a dependent's DD Form 1173.

(d) *Hospital insurance benefits.* Upon attaining age 65, retired members, their spouses and children, and spouses and children of deceased members who become entitled to hospital insurance benefits under Social Security health insurance program lose their eligibility for benefits from civilian sources under the Civilian Health and Medical Program for the Uniformed Services (CHAMPUS).

(e) *Stepchildren.* Although an unmarried legitimate stepchild at the time of the member's or retired member's death is and continues to be an eligible dependent for the purpose of this part, such child loses eligibility for DD Form 1173 as a stepchild of a deceased member or retired member when the child's natural mother remarries or the child is adopted by a third party.

§ 809.6 Accredited/approved institutions of higher learning.

Institutions meeting the criteria are listed in the "Education Directory, Higher Education" issued periodically by the Office of Education, Department of Health, Education, and Welfare. (It may be requested through the publication distribution system.) Accredited business schools are listed in the Directory of Accredited Institutions published by the Accrediting Commission for Business Schools and may be obtained upon written request to the Commission, 1730 M Street NW., Washington, DC 20036. Institutions accredited by a State agency pursuant to title 38, U.S.C., chapters 34, 35, and 36 must be verified by the institution concerned. To determine approval or courses offered by a foreign institution, by an institution not listed in either of the above directories, or by an institution not approved by a State agency, a statement may be obtained from the Office of Education, Department of Health, Education, and Welfare, Washington, D.C. 20202.

NOTE: A full-time course of education is official enrollment in an institution above the high school level for 12 or more semester hours.

§ 809.7 Chart of entitlement to benefits and privileges.

Establish eligibility as a dependent/eligible recipient according to the appropriate paragraph.

Eligible recipients	A	B	C	D	E
	Medical Care		Commissary	Exchange	Theater
	Civilian Facility	Service Facility			
1. Dependents of active duty or retired member (eligible for retired pay) of Uniformed Services:					
a. Lawful wife	Yes	Yes	Yes	Yes	Yes.
b. Lawful husband	(1)	(1)	(29)	Yes	Yes.
c. Unmarried legitimate children, including adopted and stepchildren:					
(1) Under 21 years of age	Yes	Yes	(3)	(1)	Yes.
(2) Over 21 years of age	(4)	(4)	(3)	(4)	(2).
d. Unmarried illegitimate children:					
(1) Under 21 years of age	(19)	(19)	(3)	No	Yes.
(2) Over 21 years of age	(19)	(19)	(3)	No	(2).
e. Parents	No	(5)	(3)	(1)	(2).
f. Parents-in-law	No	(5)	(3)	(1)	(2).
2. Surviving dependents of members of Uniformed Services who died while on active duty or in a paid retired status:					
a. Unremarried widow	Yes	Yes	Yes	Yes	Yes.
b. Unremarried widower	(6)	(6)	No	No	No.
c. Unmarried legitimate children, including adopted and stepchildren:					
(1) Under 21 years of age	Yes	Yes	(3)	(7)	Yes.
(2) Over 21 years of age	(8)	(8)	(3)	(7)	(2).
d. Unmarried illegitimate children:					
(1) Under 21 years of age	(19)	(19)	(3)	No	Yes.
(2) Over 21 years of age	(19)	(19)	(3)	No	(2).
e. Parents	No	(9)	(3)	No	No.
f. Parents-in-law	No	(9)	(3)	No	No.
3. Other members of the household of active duty or retired members, and widows, such as stepparent, parent by adoption and wards.	No	No	(3)	No	(2).
4. Honorably discharged veteran of Armed Forces, totally (100 percent) disabled as result of service-connected disability and so certified by the Veterans' Administration	No	No	Yes	Yes	Yes.
a. Lawful wife	No	No	Yes	Yes	Yes.
b. Lawful husband	No	No	(25)	Yes	Yes.
c. Unmarried legitimate children, including adopted and stepchildren:					
(1) Under 21 years of age	No	No	(3)	(1)	Yes.
(2) Over 21 years of age	No	No	(3)	(4)	(2).
d. Parents	No	No	(3)	(1)	(2).
e. Parents-in-law	No	No	(3)	(1)	(2).
5. Surviving dependents of honorable discharged veteran of Armed Forces who died while certified by the Veterans' Administration as being totally (100 percent) disabled as result of service-connected disability:					
a. Unremarried widow	No	No	Yes	Yes	Yes.
b. Unremarried widower	No	No	No	No	No.
c. Unmarried legitimate children, including adopted and stepchildren:					
(1) Under 21 years of age	No	No	(3)	(7)	(7).
(2) Over 21 years of age	No	No	(3)	(7)	(7).
d. Parents	No	No	(3)	No	No.
e. Parents-in-law	No	No	(3)	No	No.
6. Surviving dependents of members of Reserve component of Armed Forces who died in line of duty complying with order that specified active status for a period of 30 days or less:					
a. Unremarried widow	No	No	Yes	Yes	Yes.
b. Unmarried legitimate children, including adopted and stepchildren:					
(1) Under 21 years of age	No	No	(3)	(7)	(7).
(2) Over 21 years of age	No	No	(3)	(7)	(7).
7. Surviving dependent of member of Reserve component of Armed Forces who died in line of duty with order that specified active duty status for a period of more than 30 days:					
a. Unremarried widow	Yes	Yes	Yes	Yes	Yes.
b. Unmarried legitimate children, including adopted and stepchildren:					
(1) Under 21 years of age	Yes	Yes	(3)	(7)	(7).
(2) Over 21 years of age	(8)	(8)	(3)	(7)	(7).
8. Court-approved separation or interlocutory divorce between service member and spouse:					
a. Lawful wife	Yes	Yes	Yes	Yes	Yes.
b. Lawful husband	(1)	(1)	No	Yes	Yes.
c. Unmarried legitimate children including adopted and stepchildren:					
(1) Under 21 years of age	Yes	Yes	(3)	(1)	(2).
(2) Over 21 years of age	(4)	(4)	(3)	(4)	(2).
d. Parents	No	(5)	(3)	(1)	(2).
e. Parents-in-law	No	(5)	(3)	(1)	(2).
9. Court-approved final divorce decree between service member and spouse:					
a. Ex-wife	No	No	No	No	No.
b. Ex-husband	No	No	No	No	No.
c. Unmarried legitimate children, including children adopted by service member residing with person not eligible for ID card:					
(1) Under 21 years of age	Yes	Yes	No	(1)	(2).
(2) Over 21 years of age	(4)	(4)	No	(4)	(2).
d. Parents of service member	No	(5)	(3)	(1)	(2).

V 38 - 4 JAN 8 73 XUM

Eligible recipients	A	B	C	D	E
	Medical Care		Commissary	Exchange	Theater
	Civilian Facility	Service Facility			
15. Foreign trainee under the Military Assistance Program, other than NATO, military or civilian, in U.S. or stationed at armed forces installation (and their dependents):					
a. Trainee	(10).....	(10).....	(11).....	(21).....	(15).
b. Dependents	No.....	(10).....	(3).....	No.....	(16).
16. Civilian of foreign nation on duty in U.S. at invitation of DOD Agency (and their dependents):					
a. Civilian on duty	No.....	(23).....	(11).....	(21).....	(15).
b. Dependents	No.....	No.....	No.....	No.....	No.
Eligible recipients					
10. Final divorce decree between deceased service member and spouse:					
a. Ex-wife	No.....	No.....	No.....	No.....	No.
b. Ex-husband	No.....	No.....	No.....	No.....	No.
11. Civilian employee of or affiliated with USAF: (For purposes of this item only, CONUS means for: Exchange—50 States, District of Columbia, Puerto Rico, Guam, Johnston Island, and other U.S. possessions. Medical Care—the 50 States and District of Columbia; Alaska and Hawaii after the 2-year waiting period; Commissary and Theater—the 50 States and District of Columbia)					
a. USAF employee and dependents residing on military installation:					
b. U.S. citizen employee of USAF, including person hired locally, paid from nonappropriated funds and his dependents stationed outside CONUS:	No.....	No.....	(11).....	(13).....	Yes.
c. Uniformed and nonuniformed, full-time paid employee of American Red Cross assigned to duty with USAF and his dependents:	No.....	(10).....	(12).....	(14).....	(12).
(1) OCONUS:	No.....	(10).....	(24).....	(1).....	(16).
(2) Outside CONUS:	No.....	(10).....	(22).....	(13).....	Yes.
d. Civilian employee under private or Government contract with USAF and his dependents:					
(1) CONUS:	No.....	No.....	No.....	(13).....	(16).
(2) Outside CONUS:	No.....	(10).....	(12).....	(18).....	(18).

(2) Over 21 years of age	(4).....	(4).....	(3).....	(30).....	(2).
d. Parents	No.....	No.....	(3).....	(30).....	(2).
e. Parents-in-law	No.....	Yes.....	(3).....	(30).....	Yes.
13. Foreign military member in U.S. other than NATO and his dependents in U.S.:					
a. Lawful wife	No.....	(23).....	Yes.....	(20).....	Yes.
b. Lawful husband	No.....	(23).....	Yes.....	(20).....	Yes.
c. Unmarried legitimate children, including adopted and stepchildren:					
(1) Under 21 years of age	No.....	(23).....	(3).....	(20).....	(2).
(2) Over 21 years of age	No.....	(23).....	(3).....	(20).....	(2).
d. Parents	No.....	(23).....	(3).....	(20).....	(2).
e. Parents-in-law	No.....	(10).....	(17).....	(18).....	(18).
14. Foreign military member training under U.S. sponsorship at armed forces installation outside his own country:					
a. Lawful wife	No.....	(10).....	(3).....	(18).....	(18).
b. Lawful husband	No.....	(10).....	(3).....	(18).....	(18).
c. Unmarried legitimate children, including adopted and stepchildren:					
(1) Under 21 years of age	No.....	(10).....	(3).....	(18).....	(18).
(2) Over 21 years of age	No.....	(10).....	(3).....	(18).....	(18).
d. Parents	No.....	No.....	(3).....	(18).....	(18).
e. Parents-in-law	No.....	No.....	(3).....	(18).....	(18).

NOTES: 1. Adopted children and stepchildren (except for medical care). Illegitimate children, parents, parents-in-law, and persons who stood in loco parentis to member for over half of their support. Unmarried legitimate children under 21 years of age who marry are not subject to dependency provisions. Husbands are not subject to dependency provisions for commissary, exchange and theater privileges. Red Cross personnel: Only uniformed paid American National Red Cross personnel are eligible for exchange privileges.

2. Yes, if actually residing in the military sponsor's household. For purposes of theater entitlement, a "military sponsor's household" is limited to the geographical area which constitutes the domicile of dependent children under 21 years of age with the military sponsor for over half of their support and residing in domicile provided or maintained by the military sponsor.

3. If actually residing full time in sponsor's (same) household, designated his agent in writing in Item 15, DD Form 1172, and making purchases in his behalf. A sponsor's child residing in the household of a divorced spouse or other noneligible recipient who is not a sponsor, may not be designated as an agent. A parent, parent-in-law, stepparent, or parent by adoption must be dependent upon the member for over half of his support and reside full-time in the same household as the sponsor. See Part 838 of this chapter for definition of dependency.

4. If unmarried legitimate child is incapable of self-support because of a mental or physical incapacity that existed before he reached age 21 and was at the time of the member's death in fact dependent on the member for over half of his support; or has not passed his 23d birthday and is enrolled in a full-time course of study in an institution of higher education as approved by the Secretary of Defense or the Secretary of Health, Education, and Welfare and is in fact dependent on the member for over half of his support. For exchange purposes, the mental or physical incapacity must have occurred while the child was receiving benefits under title 10 U.S.C., section 1072 (2) (D).

5. If in fact dependent on member for over half of his support and resides in a dwelling place provided or maintained by the member/retiree.

6. Is in fact dependent on member at the time of her death for over half of his support because of a mental or physical incapacity.

7. If the widow remains unmarried, legitimate children over age 21 must be more than 50 percent dependent on the widow for support, or under age 23 and enrolled full-time in a course of study in an accredited educational institution of higher learning above the high school level. Children under age 21 must be more than 50 percent dependent upon the widow.

8. If the child is incapable of self-support because of a mental or physical incapacity that existed before he reached age 21 and was at the time of the member's death in fact dependent on him for over half of his support; or has unit been a full-time course of study in an institution of higher learning as approved by the Secretary of Defense or the Secretary of Health, Education, and Welfare, and was at the time of the member's death in fact dependent on him for over half of his support. Note 7 also applies where appropriate.

9. If at the time of the member's death was in fact dependent on the member for over half of his support and residing in a dwelling provided and maintained by the member.

10. Privileges may be extended by the Secretary of the Air Force when it is impracticable for such personnel to procure subsistence supplies from civilian agencies without impairing the efficient operations of the installation.

11. Major commanders may extend privileges to visiting personnel on military installation upon approval of the installation commander and the Secretary of the Air Force. Dependents are not entitled to exchange privileges.

12. Within CONUS—limited exchange privileges to employee only. Outside CONUS, upon approval of major commander, dependents may be afforded exchange privileges.

13. Privileges may be extended by the military installation commander if the employee is in a TDY status under competent orders, official travel orders or evidence of temporary occupancy of Government quarters, or is occupying permanent Government quarters on military installation. TDY status per se does not entitle civilian personnel to theater privileges. Dependents of such personnel will not be afforded theater privileges. Allied nationals working for the U.S. Government may not be granted theater privileges within the country of their nationality.

(Footnotes continued on next page.)

16. Only during occupancy of temporary or permanent quarters on a military installation.
17. Only to the extent prescribed by Part 823 of this chapter.
18. Only to the extent consistent with applicable international agreements and subject to such limitations and restrictions as the oversea commander may consider necessary to impose.
19. An unmarried child or stepchild who was illegitimate at the time of birth and who is, or was at the time of death of the active duty or retired member, dependent on the member for more than half of his support; residing in the member's household or in a dwelling place provided or maintained by the member, and (1) under 21 years of age; or (2) 21 years of age or older but incapable of self-support because of a mental or physical incapacity that existed prior to his 21st birthday; or (3) 21 or 22 years of age and pursuing a full-time course of education that is approved by the Secretary of Defense or Secretary of Health, Education, and Welfare, as applicable, or that is approved by a State agency pursuant to chapters 34 (Veterans' Educational Assistance) and 35 (War Orphans' and Widows' Educational Assistance) of title 38, U.S.C., for the purposes of these chapters.
20. Officers and enlisted men of the armed forces of foreign nations, when on duty with the U.S. armed forces under competent orders issued by the Army, Navy, Air Force, or Marine Corps, and their dependents, as defined in AFR 147-14, are authorized unlimited exchange privileges. Purchases of items of the uniform are limited by the provisions of AFM 50-29. When visiting U.S. installation, officers and enlisted men of the armed forces of foreign nations are authorized unlimited exchange privileges, except that merchandise sold to them is restricted to quantities required for their personal use, and the sale of items of the uniform is governed by AFM 50-29 and AFR 147-14.
21. Foreign military personnel will be granted the privileges indicated in note 20. Civilian employees of foreign governments on duty under competent orders, and residing within the limits of a U.S. installation, for the convenience of the U.S. Government will be granted limited exchange privileges upon determination by the responsible commander that comparable commercial facilities are not conveniently available and upon authorization by the secretary of the department concerned. See AFR 147-14.
22. Commissary privileges may be extended to all uniformed and nonuniformed, full-time, paid professional and headquarters staff personnel and uniformed, full-time, paid secretarial and clerical workers of the Red Cross who are assigned to duty with the Armed Services by the Red Cross. Extension of such privileges will be determined by the major oversea commander or commandant upon the capability, without detriment to his ability to fulfill his military mission.
23. Foreign nationals, other than personnel of NATO nations, in the United States. Personnel of foreign nations, when in the United States on a status officially recognized by an agency of the Department of Defense, may be provided medical care in Air Force medical facilities to the same extent and under the same conditions as comparable U.S. personnel. Such persons include:
(a) Military personnel whose names appear on the Diplomatic List or the List of Employees of Diplomatic Missions published by the Department of State.
(b) Military personnel assigned or attached to U.S. military units for duty or training.
(c) Military personnel on duty in the United States at the invitation of the Department of Defense or one of the military departments.
(d) Military personnel accredited to Joint U.S. defense boards or commissions.
(e) Dependents of military personnel listed in (a) through (d) above when residing with their sponsor.
(f) Civilian personnel of foreign nations on duty in the United States at the invitation of the Department of Defense or one of the military departments and may be provided care in an emergency.
24. Privileges may be extended to all uniformed and nonuniformed, full-time, paid professional and headquarters staff personnel of the Red Cross who are assigned to duty with the armed services by the Red Cross and who reside within the military installation. Extension of such privileges will be determined by the major commander concerned.
25. Must reside in the same household as the sponsor.

Subpart B—General Procedures

§ 809.10 Command responsibility.

The commander of each Air Force or Air National Guard installation (or his designee) will:

(a) Designate verifying/issuing activities and individuals in writing. The commander of a unit geographically separated from the Unit Personnel Record Group (UPRGp) may act as the verifying activity if he has sufficient information to make an appropriate judgment. (Send questionable cases for verification to the servicing CBPO.)

(b) Issue an ID card to each eligible applicant. If a commander is aware that eligible dependents of active duty and retired members have not been issued DD Form 1173 and the member is unwilling or unable to execute the necessary application, the commander will request the appropriate verifying activity to execute DD Form 1172, "Application for Uniformed Services Identification and Privilege Card." The verifying activity will insure that the statement: "Member is (unwilling) or (unable) to make application" is entered in item 18, "Remarks," and that this paragraph is cited as authority. Upon verification of the dependency as provided herein, the designated issuing activity will issue DD Form 1173 to the eligible dependent(s).

(c) Extend medical care to all eligible dependents and insure it is not withheld because a member has failed to provide the usual ID cards to the dependents (paragraph (b) of this section). (Medical care in military medical treatment facilities is a right accruing to dependents of active duty personnel under title 10 U.S.C., 1071–1088. See also AFR 168–9.)

(d) Advise recipients to carry their ID cards on their person at all times; explain the penalties for their unlawful use. Insure that the sponsor completely understands the certification contained in item 19, DD Form 1172.

(e) Retrieve or confiscate ID cards under § 809.12.

(f) Issue DD Forms 489 and 528 consistent with current Air Force directives as well as policies established by major oversea commanders.

(g) Contact AFMPC/DPMDRM for further interpretation of policy if necessary to resolve question on cases not covered herein.

§ 809.11 Action by Air Force Accounting and Finance Center (AFAFC).

To obtain additional evidence required to establish dependency or relationship, AFAFC will correspond with the dependent(s) listed on DD Form 1172 and, when action is complete, return DD Form 1172 to the verifying activity with a separate statement, indicating whether the relationship/dependency requirement is established. A copy of AFAFC's determination will be filed with the DD Form 1172 until it is superseded.

NOTE: A dependent parent, parent-in-law, or any other person for whom a current determination of dependency is not in effect must complete a questionnaire on residency and financial affairs which AFAFC sends to the person upon receipt of DD Form 1172. Dependency determination is based on the income, expense, and residency data the claimed dependent reports on these forms. This determination is valid until superseded, terminated, or voided by a change in the dependent's status. Subsequent applications may be verified without submission to AFAFC if the sponsor certifies in writing in item 18, DD Form 1172, that the dependency status previously established by AFAFC has not changed. Sponsor should be cautioned that such certification means that the dependent has not received an initial payment or an increase in social security payment, VA compensation, or other income; has not inherited or otherwise acquired anything of monetary value, including cash, stock, or real property, etc; has not changed residence; has had no change in expense—household or personal; or has not had a change in marital status since dependency was last determined by AFAFC.

§ 809.12 Retrieval, confiscation, and appeal procedures.

ID cards are Government property. Any commissioned or noncommissioned officer or security policeman, in performing his duties may confiscate an ID card that has expired, is being fraudulently used, or is presented by a person not entitled to it. When any CBPO activity learns of a change in dependency status affecting entitlement to DD Form 1173 (that is, divorce, marriage of children, overage, etc.) that activity will send complete information to the Personal Affairs Section (Officer or Airman Records Unit for non-Base-Level Military Personnel System (BLMPS) CBPOs). The Personnel Affairs Section or Officer or Airman Records Unit will act to recover the dependent's card through the sponsor or his commander. If such action is unsuccessful, they will comply with paragraph (a) of this section. File evidence of such interim and final actions with the DD Form 1172. If the DD Form 1173 is retrieved, DD Form 1172 will be destroyed or appropriately annotated. A suspense period of 30 days from the date of notice to the sponsor will be established for completing CBPO action.

(a) *Retrieval.* Although authorities will make every effort to retrieve cards on a voluntary basis, they do not have the authority to seize ID cards by force from persons not subject to military law. If a person not subject to military law refuses to surrender an ID card on demand, recourse may be a suit to recover the property. If a card cannot be retrieved voluntarily, the circumstances will be reported to the nearest chief, security police. If all attempts fail, refer information to HQ USAF/JACL, Washington, D.C. 20314 for possible transmittal to the Department of Justice. Send an information copy of referral action to AFMPC/DPMDRM, Randolph AFB, Tex. 78148.

(b) *Confiscation.* Any officer, noncommissioned officer, or security policeman who confiscates an ID card will report the circumstances to the nearest Air Force installation chief, security police, who will initiate appropriate investigative action. Refer completed reports of investigation to the installation staff judge advocate, who will determine if judicial or administrative action is appropriate. In all cases involving the misuse of a card, send a copy of the completed report of investigation to AFMPC/DPMDRM, Randolph Air Force Base, Tex. 78148.

V 38 I 4 JAN 8 73 XUM

NOTE: DD Forms 1173 previously issued to retired members remain valid; however, the DD Form 2AF (Ret) (Gray) is presently the only card authorized for issuance/reissuance to Air Force retirees entitled to retired, retainer, or equivalent pay.

(c) *Special retrieval procedures.* When administrative elimination action that may result in discharge is initiated, a member's ID card (DD Form 2AF (Active)) and the member's dependents' ID cards (DD Forms 1173) will be retrieved by the member's commander. The member and his dependents will immediately be reissued ID cards overstamped "temporary" and expiring not later than 90 days from the date elimination action is initiated. If it becomes necessary to reissue the cards after 90 days, reissue will be effected for an additional period not exceeding 90 days. Reissue of cards on a 90-day basis will be continued until the case is resolved. Original (not expired) retrieved cards will be retained until the elimination action is resolved and either returned to the member/dependents or destroyed, as appropriate. All temporary cards will be destroyed. Reissue of DD Forms 2AF and 1173 will be documented by AF Form 279 or DD Form 1172, respectively.

(d) *Reissue.* If it becomes necessary to confiscate an ID card for misuse, abuse, or control of access to a privilege facility:

(1) *DD Form 1173.* Reissue the card immediately and obliterate those privileges withdrawn (that is, commissary, exchange, or theater). Annotations by overstamping that are required to add prominence to withdrawal of a privilege are authorized. Do not withdraw medical care benefits or change expiration date of card.

(2) *DD Form 2AF (Active), 2AF (Retired), and 2AF (Reserve).* Reissue the card immediately, prominently annotating the card to show privileges withheld; for example "exchange not authorized." Do not change other data on card unless incorrect.

(e) *Appeal.* Individuals whose privileges are withdrawn may submit to the installation commander a written appeal for restoring privileges.

§ 809.13 Loss, theft or destruction of ID cards.

The following procedures will be used for loss, theft, or destruction of ID cards.

Line	If the ID card is—	Rule 1	Rule 2	Rule 3
A	DD Form 2AF (Act), 2AF (Ret), 2AF (Res), or 1173	Yes		
B	DD Form 489		Yes	
C	DD Form 528			Yes
D	Loss, theft, or destruction will be reported promptly through the resubmission of the application for the appropriate ID card.	X	X	X
E	The following statement by the sponsor/member must be included on the DD Form 1172, in item 18, Remarks: "I certify that the DD Form....., issued to ....., has been (lost) (stolen) (destroyed) under the following circumstances: (Explain in detail). It has not been (located) (recovered) after a diligent search. Further, if found, I will surrender it to an appropriate USAF facility."	X		
F	The cardholder will certify the circumstances of the loss in a memorandum or letter to the nearest issuing activity who uses this report as a basis for replacement. The information in the report of loss should be similar to the statement in E above.		X	
G	Issuing activity will hold the certificate for 1 year and then destroy it		X	
H	Replacement of ID cards will be accomplished in the same manner as the original application.	X	X	X

Subpart C—ID Cards for Members on Active Duty—DD Form 2AF (Active) (Green)

§ 809.20 General information.

This subpart provides for the issue of DD Form 2AF (Active) (Green) to members of the Air Force on active duty (§ 809.4(c)). It will be issued to all personnel on active duty for more than 30 days, including protected personnel (§ 809.4(1)) and members of the Air Force Reserve and Air National Guard of the United States serving on active duty for training and currently enrolled cadets of the Air Force Academy (USAFA). Members ordered to active duty for 30 days or less will not be issued DD Form 2AF (Active) (Green), but will be identified by copies of their orders or other documents establishing temporary active duty status and their DD Form 2AF (Retired) (Gray) or DD Form 2AF (Reserve) (Red), as appropriate.

§ 809.21 Individual responsibility.

Each person to whom a DD Form 2AF (Active) (Green) is issued will insure that the card is in his possession at all times and will be aware of the penalty for unlawful use.

§ 809.22 How to apply for green card.

The applicant for DD Form 2AF (Active) (Green) will initiate action by contacting the CBPO/geographically separated unit (GSU). The CBPO Officer or Airman Records Unit or the CBPO Personal Affairs Section operating under the Base-Level Military Personnel System (BLMPS) will prepare one copy of AF Form 279, obtain member's signature, and verify information with the Unit Personnel Record Group. If CBPO/GSU services are not available, the applicant will complete AF Form 279 and submit it to a designated agency for verification. The verified AF Form 279 is returned to the applicant who takes it to the nearest Air Force issuing activity. Then it will be filed in the member's UPRGp and destroyed by the CBPO effecting the member's release from active duty when DD Form 2AF (Active) (Green) is destroyed.

§ 809.23 Surrender of green card.

An individual will surrender his DD Form 2AF (Active) (Green) when:

(a) It is replaced.
(b) It expires.
(c) He is in disciplinary confinement.
(d) He is no longer entitled to it.

If the ID card is replaced, he surrenders the old card to the issuing activity when his replacement card is issued; if it is not replaced, he surrenders it to the appropriate records custodian.

Subpart D—ID Cards for Members Entitled to Retired Pay—DD Form 2AF (Retired) (Gray)

§ 809.30 General information.

This subpart provides for the issue of DD Form 2AF (Retired) (Gray) to all USAF and ResAF members entitled to retired pay including those on the Temporary Disability Retired List (TDRL). Retired members entitled to retired pay who waive retired pay to receive VA compensation or who waive receipt of retired pay for any other reason are also entitled to DD Form 2AF (Retired) (Gray). Members who will retire under title 10, U.S.C. 1331, are not entitled to DD Form 2AF (Retired) (Gray) until they are eligible to receive retired pay by virtue of completing service requirements and upon reaching the prescribed statutory age.

§ 809.31 How to apply for gray card.

(a) *Personnel being retired.* An applicant for DD Form 2AF (Retired) (Gray) will complete and submit one copy of AF Form 279 to his Unit Personnel Record Group custodian for verification. The custodian will return the verified AF Form 279 to the applicant, who takes it to the nearest Air Force issuing activity.

(b) *Retired personnel.* An applicant for DD Form 2AF (Retired) (Gray) will complete and submit one copy of AF Form 279 to the CBPO of the nearest Air Force installation in person or by mail, as follows:

(1) Retired Air Force personnel will submit DD Form 2AF (Retired) (Gray), retirement orders (or letter of certification to the Veterans Administration for Pay), or evidence of listing in the Air Force Register.

(2) If retirement orders announce transfer to the Retired Reserve Section, but do not indicate that applicant is entitled to DD Form 2AF (Retired) (Gray) nor indicate entitlement to retired pay, send application and a copy of orders for verification to ARPC, 3800 York Street, Denver, CO 80205.

(3) The verified AF Form 279 is returned to the applicant for presentation to the nearest Air Force issuing activity.

§ 809.32 When to issue/reissue gray card.

(a) *Issue.* DD Form 2AF (Retired) (Gray) will be issued at the time an Air Force member is temporarily or permanently retired or upon individual application therefore at any time thereafter.

(b) *Reissue.* DD Form 2AF (Retired) (Gray) will be reissued to:

(1) Show a change in expiration date.
(2) Replace a lost, stolen, or destroyed card.
(3) Correct an error.
(4) Replace a mutilated card.
(5) Show change from airman to officer status.
(6) Change data that makes the old card questionable as a means of identification.
(7) Document entitlement to civilian medical care.

§ 809.33 Surrender of gray card.

A person surrenders his DD Form 2AF (Retired) (Gray) when:

(a) It is replaced.
(b) It expires.
(c) He is no longer entitled to it.
(d) He is requested to do so by competent authority (§ 809.12).

If the ID card is replaced, he surrenders the old card to the issuing activity where his replacement card is issued; if it is not replaced, he surrenders it to the appropriate records custodian.

Subpart E—ID Cards for Reserve Members Not on Active Duty—DD Form 2AF (Reserve) (Red)

§ 809.40 General information.

This subpart provides for the issue of DD Form 2AF (Reserve) (Red) to members of the USAF Reserve components not on active duty. DD Form 2AF (Reserve) (Red) will be issued to personnel participating in the USAF AFR program and retired Reserve personnel not entitled to either the DD Form 2AF (Active) (Green) or 2AF (Retired) (Gray). DD Form 2AF (Reserve) (Red) is not issued to a member of the Inactive Status List Reserve Section (ISLRS) or the Obligated Reserve Section (ORS). However, members of the Professional Officer Course or the Financial Assistance Program, AFROTC, and AFROTC graduates appointed as Reserves of the Air Force may be issued DD Form 2AF (Reserve) (Red), notwithstanding their assignment to ORS.

§ 809.41 How to apply for red card.

An applicant for DD Form 2AF (Reserve) (Red) will complete one copy of AF Form 279 and submit it to the custodian of his UPRGp for verification. (Exception: At the time oaths of office are signed, the Professor of Aerospace Studies may be designated verifying officer for AF Form 279.) The verified AF Form 279 is returned to the applicant, who takes it to the nearest Air Force or ANG issuing activity. AF Form 279 will be destroyed when DD Form 2AF (Reserve) (Red) becomes invalid and is destroyed.

(a) The ARPC, 3800 York Street, Denver, CO 80205, is custodian for master personnel records pertaining to members of the Retired Reserve (without pay), Nonaffiliated Reserve section, Eligible Reinforcement Designees, Mobilization Augmentees administered by ARPC, and AFROTC graduates.

(b) The ANG CBPO is custodian for all unit personnel records of ANG personnel.

(c) The AFROTC detachment is custodian for all unit personnel records of members of the professional officer course and financial assistance program.

The AF Form 279 will be filed in the Unit Personnel Record Group.

§ 809.42 When to issue/reissue red card.

(a) *Issue.* Upon individual request, DD Form 2AF (Reserve) (Red) may be issued at any time to any eligible member of the USAFR, ANG, or AFROTC.

(b) *Reissue.* DD Form 2AF (Reserve) (Red) will be reissued to:

(1) Show a change in grade upon promotion to or demotion from any grade above airman first class.
(2) Replace a lost, stolen or destroyed card.
(3) Correct an error.
(4) Replace a mutilated card.
(5) Change data that makes the card questionable as a means of identification.

§ 809.43 Surrender of red card.

Member surrenders his DD Form 2AF (Reserve) (Red) when:

(a) It is replaced.
(b) It expires.
(c) He is no longer entitled to it.
(d) He is requested to do so by competent authority (§ 809.12).

If the ID card is replaced, he surrenders the old ID card to the issuing activity where his replacement card is issued; if it is not replaced, he surrenders it to the appropriate records custodian.

Subpart F—Geneva Conventions ID Cards—DD Forms 489 and 528

§ 809.50 General information.

This subpart provides for the issue of ID cards established to meet the requirements of the Geneva Conventions to protect war victims, and it establishes relative military-civilian grade relationships for use exclusively in treatment of prisoners of war with due regard to grade.

§ 809.51 Geneva Conventions credential system described.

Pertinent articles of the Geneva Conventions Relative to Prisoners of War, August 12, 1949, require that:

(a) Identification cards be issued in duplicate to persons who are liable to become prisoners of war. In the event of capture as a prisoner of war, the prisoner is bound to identify himself by providing the capturing authority with his name, rank, service number, and date of birth. Identity cards shall be shown by the prisoner upon demand but shall in no case be taken from him. Prisoners of war should have identity documents in their possession at all times.

(b) Prisoners of war be treated with regard due their rank and age, and protected personnel are to be identified.

§ 809.52 Issue and use of ID cards.

DD Forms 489 and 528 are issued by direction of the appropriate authority and do not reuqire an application.

(a) *Armed Forces members.* (1) DD Form 2AF (Active) (Green) will be issued to all Air Force members on extended active duty. Members will keep this card in their possession at all times to fulfill the requirement referred to in § 809.51.

(2) DD Form 528 will be used in conjunction with DD Form 2AF (Active) (Green) to serve as the duplicate card. Upon capture and detention as a prisoner of war, the DD Form 528 may be surrendered to the capturing authority to provide identification of the bearer and for use in expeditiously compiling accurate prisoner of war data to be forwarded to the United States. DD Form 528 will be issued to all Air Force members departing the continental limits of the United States for assignments to duty elsewhere. The losing CBPO will initiate action to issue the card.

(b) *Civilian noncombatant personnel.* DD Form 489 will be issued in duplicate to civilian noncombatant personnel authorized to accompany U.S. military forces in regions of war and who are liable to capture and detention by the enemy as prisoners of war. This credential will be issued to such individuals departing the continental limits of the United States to serve elsewhere.

(c) *Military-civilian grade relationships.* In paragraph (d) of this section and § 809.54, military-civilian grade relationships are developed to conform with the pattern for advances of pay to prisoners of war established by Article 60 of the Geneva Conventions Relative to the Treatment of Prisoners of War, August 12, 1949, and to facilitate treatment of prisoners of war with due regard to grade. The development of these relationships is based largely on congressional action in establishing grades and salaries for military and civilian employees, and the categories will be used throughout the Department of Defense for prisoners of war identification purposes. It is not the intent of this part to require their use for any other purpose.

(d) *Categories.* Civilian noncombatants authorized by DOD component concerned to accompany the Armed Forces in regions of war will be placed in categories listed in § 809.54 as follows:

(1) Experts, consultants, and other special categories of personnel directly employed by the Federal Government will be assigned by the department concerned to an appropriate category based on a salary or grade comparison with civilian employees listed in § 809.54, columns d and e.

(2) Nonappropriated fund employees or service organization employees, such as United Service Organization (USO), Young Men's Christian Association, Salvation Army, etc., will be assigned by the department concerned to an appropriate category based on a salary or

V 38 - 4 JAN 8 73 XUM

grade comparison with civilian employees listed in § 809.54, columns d and e.

(3) Advisors, observers, contractors, representatives, employees, and similar categories of non-Federal personnel will be assigned by the department concerned to an appropriate category, based on the individual's standing in his profession or line of work and the difficulty and responsibility of duties performed.

(4) Professional entertainers will be assigned to the appropriate category by the Department of the Army, acting for the Department of Defense. Categories will be determined upon the recommendation of the United Service Organizations, based on the professional standing of the individual in the entertainment field.

(5) Red Cross personnel will be placed in category III.

(6) Accredited news media representatives will be assigned to the assimilated grade in the joint regulations for "Correspondents Accompanying the Armed Forces of the United States."

§ 809.53 When to issue/reissue ID cards.

DD Forms 489 and 528 will be issued:

(a) To personnel assigned to or proceeding to an oversea area where issue of the Geneva Conventions ID card applies.

(b) To replace a lost or stolen card.

(c) To correct an error.

(d) To replace a mutilated card.

(e) Upon reclassification and placement in a different Geneva Conventions category.

§ 809.54 Military-civilian relationship for prisoner of war identification purposes.

A	B	C	D	E	F
Geneva Convention categories	Description	Military grades	Classification Act and similar categories of personnel	Wage Board employees of Departments of the Army and Air Force	Upgraded employees of Department of the Navy
V	General officers or prisoners of war of equivalent rank.	O-7 and O-8.	GS-16 through GS-18, Public Law 313.		
IV	Majors, lieutenant colonels, and colonels or prisoners of equivalent rank.	O-4 through O-6.	GS-12 through GS-15.	WL-14 and WL-15, WS-15 through WS-19.	Masters, foremen, chief quartermen, and equivalents.
III	Warrant officers and commissioned officers below the rank of major or prisoners of equivalent rank.	O-1 through O-3, W-1 through W-4.	GS-7 through GS-11.	WG-12 through WG-15, WL-10 through WL-13, WS-9 through WS-14 (optional).	Quartermen, leadingmen, planners and estimators, progressmen, and other ungraded staff and supervisory personnel above the journeymen level.
II	Sergeants and other noncommissioned officers or prisoners of equivalent rank.	E-4 through E-9.	GS-5 and GS-6.	WG-6 through WG-11, WL-4 through WL-9, WS-1 through WS-8.	Heads, journeymen, and employees in other occupations above the helper level.
I	Prisoners ranking below sergeants.	E-1 through E-3.	GS-1 through GS-4.	WG-1 through WG-5, WL-1 through WL-3.	Laborers, helpers, and equivalents.

Subpart G—Uniformed Services ID and Privilege (USIP) Card—DD Form 1173

§ 809.60 General information.

This subpart states responsibilities of commanders and CBPOs (or designated verifying activities) and explains how to apply for and obtain DD Form 1173.

§ 809.61 Issue by other services.

(a) The Uniformed Services have agreed to assist each other in issuing DD Form 1173. (This agreement does not include issuance of DD Forms 2.) Any applicant for DD Form 1173, including totally (100 percent) disabled veterans, will obtain verification of entitlement from his or her sponsor's parent service before actual issuance of the DD Form 1173.

(b) The parent service will complete section IV and the applicable items of section II, DD Form 1172, and return it to the applicant/sponsor for presentation to any service installation having the proper facility for issuing the card. Every effort will be made to assist individuals of other services in obtaining proper identification credentials by assisting in the preparation of the application and directing the applicant to the nearest parent service installation.

§ 809.62 Persons entitled to USIP card.

DD Form 1173 is issued to:

(a) Dependents 10 years of age or over of members of the Uniformed Services (on active duty, entitled to retired pay, or deceased) when such dependents are residing with a divorced spouse or in a household of which the sponsor is not the head. DD Form 1173 may be issued to dependents under 10 years of age when unusual circumstances require unquestionable proof of relationship and entitlement.

(c) Honorably discharged veterans of the Armed Forces who are totally (100 percent) disabled as a result of a service-connected disability as certified by the Veterans' Administration, their eligible dependents, and surviving dependents.

(d) Military personnel assigned as OSI special agents (§ 809.2).

(e) U.S. civilians employed by or affiliated with the Air Force (§ 809.7, item 11, for restrictions):

(1) U.S. citizen employees of the Air Force and their dependents residing together on a military installation in the continental United States.

(2) U.S. citizen employees of the Air Force and their dependents stationed outside the continental United States.

(3) Uniformed, full-time, paid personnel of American Red Cross assigned to duty within an activity of the Armed Forces and their dependents.

(4) Non-U.S. citizen employees under private or Government contract with the Air Force and their dependents.

(5) U.S. citizen employees of other U.S. Government agencies and their dependents.

NOTE: Personnel on TDY will not be issued DD Form 1173. Travel orders are sufficient to establish entitlement for privileges and benefits.

(f) Foreign military personnel subject to NATO (North Atlantic Treaty Organization)/SOFA (Status of Forces Agreement) and their dependents when serving in the United States under the sponsorship of the Air Force.

(g) Foreign military personnel other than NATO and their dependents when serving in the United States under the sponsorship of the Air Force.

(h) Foreign military personnel and dependents under U.S. sponsorship at an oversea Air Force installation outside their own country.

(i) Foreign civilian personnel and dependents serving in an official status at an Air Force installation under Air Force sponsorship.

(j) Active duty members who also meet the criteria of a dependent when DD Form 1173 is required for proof of eligibility for medical care under the CHAMPUS.

§ 809.63 When to surrender USIP card.

DD Form 1173 will be surrendered:

(a) When a new card is issued, except to replace loss or theft.

(b) Upon expiration date.

(c) When the cardholder becomes ineligible by reason of age, divorce, attainment of self-support, or other reasons.

(d) Upon death, retirement, discharge, or release to inactive duty of sponsor. (CBPO will be notified for active duty personnel and AFMPC/DPMDRM for all others.) Sponsors being processed for separation or release from active duty are required to complete DD Form 1407, Dependent Medical Care and DD Form 1173 Statement, indicating whether they have a dependent receiving medical care under the dependent's Medical Care Program.

(e) When the sponsor is officially placed in deserter status.

(f) Upon demand of the verifying activity, the issuing activity, the base commander, or other authoritative activity (§ 809.12).

(g) Immediately upon a change in status of sponsor that would terminate or modify the right to any benefit for which the card may be used. Survivors of deceased personnel will be directed to comply with these provisions.

§ 809.64 Where to file completed DD Forms 1172.

Line	A If card is—	B Then DD Form 1172 is—
1	Sponsored by active duty member	Filed in member's UPR Gp.
2	Sponsored by member being retired with pay (see note).	
3	Sponsored by member retired with pay other than general officer or retiree on TDRL.	Filed in master personnel records, NPRC/NCPMF-F, 9700 Page Boulevard, St. Louis, MO 63132.
4	Sponsored by general officer retired with pay or member on TDRL.	Filed in master personnel records, AFMPC/DPMDRR, Randolph Air Force Base, Tex. 78148.
5	Issued to surviving dependent	Same as 3 above.
6	Issued to civilian employed by or affiliated with the Air Force.	Returned to verifying activity for filing with locally maintained records of sponsor.
7	Issued to foreign military member	
8	Issued to member of another uniformed service	Returned to verifying activity.
9	Issued to totally (100 percent) disabled veteran	

NOTE: Verifying and issuing activities will coordinate the issue of DD Form 1173 and retrieval of invalidated DD Form 1173 at least 7 days before retirement date of member to assure inclusion/removal of pertinent DD Form 1172 from member's Unit Personnel Record Group before release of the record from CBPO custody.

§ 809.65 Expiration date to enter in item 3, DD Form 1173.

Line	A If cardholder is—	B Then enter date—
1	Spouse of member serving on specific tour of enlistment.	Of sponsor's expiration of enlistment, or extension, or 6 years from date of issuance, whichever is earliest.
2	Spouse of member serving on contracted or specified period of duty.	Sponsor's tour of duty will be completed.
3	Spouse of regular AF officer or Reserve officer serving indefinite tour.	6 years from date of card issuance.
4	Spouse of member placed on TDRL	5 years from date member went on TDRL.
5	Spouse of member entitled to retired pay	6 years from date of issuance or date preceding 65th birthday, whichever comes first. (Card issued or reissued after age 65 showing appropriate civilian medical care entry will expire 6 years from date of issuance.)
6	Dependent child under 21 years of age	6 years from date of issuance, or the day before child's 21st birthday, or service expiration date of sponsor, whichever is earliest.
7	Dependent child over 21, but day under 23 years of age, attending school (§ 809.6).	Before child's 23d birthday, service expiration date of sponsor, or disenrollment date, whichever is earliest.
8	Dependent child over 21 years of age who is incompetent.	Service expiration date of sponsor or 6 years from date of issuance, whichever is earlier.
9	Unremarried widow or widower of a deceased member.	4 years from date of issuance.
10	Parent/parent-in-law	4 years from date of issuance, unless eligibility is otherwise terminated, whichever is earlier.
11	Foreign military member, civilian employee, or dependent(s).	Expiration of sponsor's tour of duty, date dependent child will become ineligible because of age before sponsor's duty is terminated, or 4 years from date of issuance, whichever is earliest.
12	Military member assigned as OSI special agent.	6 years from date of issuance, unless earlier expiration date is appropriate.
13	Totally (100 percent) disabled veteran, his dependent(s), or surviving dependent(s) (§ 809.62(c)).	3 years from date of issuance, unless earlier expiration date is appropriate.
14	Red Cross or U.S. citizen AAFES employee.	2 years from date of issuance, unless earlier expiration date is appropriate.
15	All others	1 year from date of issuance, unless earlier expiration date is appropriate.

NOTES: 1. Card will not be issued to person when eligibility for or use of the card for 30 days or less is indicated or for use in conjunction with TDY.
2. No card will be issued having an expiration date beyond 6 years from date of issuance.
3. Never use "Indefinite" in item 3.
4. Do not establish an expiration date beyond 65th birth date for CHAMPUS recipients. Reissue cards concurrently with 65th birth date with item 15b containing an entry to show CHAMPUS entitlement ("Yes" and date or "No" as appropriate).

By order of the Secretary of the Air Force

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

[FR Doc.73-10 Filed 1-5-73;8:45 am]

PART 809b—DEPENDENTS' EDUCATION

Miscellaneous Amendments

Part 809b, Subchapter A, Chapter VII of Title 32 of the Code of Federal Regulations is amended as follows:

1. Section 809b.0 is revised to read as follows:

§ 809b.0 Purpose.

(a) This part prescribes policies and procedures concerning military and contract transportation to and from schools, both on-base and off-base, for dependent schoolchildren of military and civilian personnel.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

2. Section 809b.6 is amended by revising paragraphs (f) and (k) to read as follows:

§ 809b.6 Policy.

• • • • • •

(f) Do not furnish transportation at Air Force expense to any school 1 mile or less from the pupil's residence unless specifically authorized by the major command concerned. This limitation will be waived only under highly unusual conditions when adherence would clearly jeopardize the health and safety of the pupils. Any request to waive this limitation must include a complete description of the conditions believed to justify it.

• • • • • •

(k) Only one trip to and one trip from the school per day is authorized for any one child. When unusual circumstances warrant, a request for an exception to this restriction may be requested from the major command concerned. The request must clearly document the unusual circumstances that justify the exception.

• • • • • •

3. Section 809b.8 is amended by revising paragraphs (a) (2) and (b) (3) (iii) to read as follows:

§ 809b.8 Transportation of children who reside on a military installation.

(a) *To public schools.* • • •

(2) Prior approval of the major command concerned is required before transportation will be provided at Air Force expense to public schools other than the local public schools. Requests for approval will include all required determinations, supporting documentary data, and rationale. This approval is required for each school year and will be requested only when the base commander determines that:

• • • • • •

(b) *To private schools.* • • •

(3) • • •

(iii) Attendance at private schools is necessary because available public

V38-4 JAN 8 73 XUM

schools in the locality are unable to provide adequately for the childrens' education. Prior approval of the major command concerned is required for each school year in which authorization is contingent upon a determination under this paragraph.

• • • • •

(10 U.S.C. 8012)

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

SUBCHAPTER B—SALES AND SERVICES

PART 811—SALE OR RELEASE OF DOCUMENTARY STILL PHOTOGRAPHS

Part 811, Subchapter B of Chapter VII of Title 32 of the Code of Federal Regulations is retitled as set forth above and revised to read as follows:

Sec.
811.1 Purpose.
811.2 Exclusions.
811.3 Policy on personal retention of photography.
811.4 Policy on sale of photography.
811.5 Authorized sellers.
811.6 Authorized purchasers.
811.7 Procedure for selling photographs.
811.8 Policy on releasing photographs.
811.9 Procedures for releasing photographs.
811.10 Procedure for collecting and controlling fees.
811.11 Schedule of fees and rates.

AUTHORITY: The provisions of this part 811 issued under 10 U.S.C. 8012, 31 U.S.C. 483a.

§ 811.1 Purpose.

This part controls the sale or release of Air Force documentary still photographs. It explains when photographic material may be sold or released without charge, and includes a schedule of fees. It also explains the collection and control of fees. It should be used with Part 806 of Subchapter A of this chapter and Part 813 of this subchapter. Additionally, Part 806 of this chapter tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 811.2 Exclusions.

This part does not apply to: (a) The sale of aerial photography. All requests for aerial photography are referred to the Assistant Secretary of Defense (Public Affairs), Washington, D.C. 20301.

(b) Photographs obtained by or made at the request of the Office of Special Investigations for use in connection with an investigation or a counterintelligence report. The release of such photographs is governed by Part 806 of Subchapter A of this chapter and AFR 124-4.

(c) Photographs obtained or made by the request of the aircraft and missile accident/incident investigative board in accordance with their investigation of Air Force aircraft and missile accident/incident investigated under authority of AFR 172-4. The release of such photographs is governed by Part 806 of Subchapter A of this chapter nad AFR 127-4.

§ 811.3 Policy on personal retention of photography.

Part 811a of this subchapter explains the policy on personal retention or other personal use of official Air Force photography.

§ 811.4 Policy on sale of photography.

(a) Air Force disclosure and denial procedures regarding requests for photographs are contained in Part 806 of Subchapter A of this chapter.

(b) Reproduction (prints and duplicate negatives) made from existing black and white negatives, duplicate color negatives and transparencies from existing counterpart color material, and color prints from existing color negatives may be sold within the restrictions listed in the following subparagraphs. The commander of the selling activity will insure that the purchaser understands the pertinent restrictions before photographs are sold to him. (See § 811.8 for policy on releasing photography.)

(1) Although photographs may be sold, it is Department of Defense policy not to compete with available commercial services. Therefore, photographs and related services that are also available from commercial sources should not be sold.

(2) Photography or photographic services that satisfy the other provisions of this part may be provided to State and local units of government under title III of the Intergovernmental Cooperation Act of 1968. The requester must certify that such services cannot be procured reasonably and expeditiously through ordinary business channels. Reimbursement will be in accordance with fees listed in § 811.11.

(3) Photographs of non-Air Force subjects or activities made by Air Force photographers may not be sold or released unless clearances or talent releases authorizing their use outside the Air Force are on file at the Depository.

(4) Photographs will not be sold for any use that implies Air Force endorsement of a service or product, unless the buyer has obtained written approval from the Secretary of the Air Force, Office of Information (SAF/OIPL).

(5) The reproduction of prints for sale must not interfere with official Air Force requirements, nor may such work be used to justify increased personnel and equipment.

(6) Each print sold will bear the official Air Force credit line as follows:

U.S. AIR FORCE PHOTO
Released by (Unit), ( ) Air Force Base

(7) The sale of prints does not include the waiver of proprietary or privacy rights, unless these rights and the right of transfer belong to the Air Force.

(8) No person or persons may claim exclusive rights to official Air Force photographs.

(c) Photographs required to conduct official Department of Defense business will be furnished without charge. To the extent that workload and funds permit, prints requested by the sources listed in Part 813 of this subchapter will be furnished without charge.

§ 811.5 Authorized sellers.

Any Air Force audio-visual activity with custody of still documentary negatives and transparencies may sell copies as provided in this part.

§ 811.6 Authorized purchasers.

Unclassified Air Force photographs and photographs not precluded from public dissemination by AFR 12-31 (For Official Use Only) may be purchased by:

(a) Members and agencies of the Federal Government, States, counties, and territorial governments.

(b) The public—that is, any person or group of persons not including those of foreign affiliation as noted in § 811.9(b).

§ 811.7 Procedure for selling photographs.

The Air Force activity receiving a purchase request will:

(a) Determine whether: (1) The photographs requested are unclassified and releasable (if required). (See § 811.8 for policy on release of photography.)

(2) The request requires the approval of another Air Force agency.

(3) The prints can be produced from negatives or other material on hand.

(b) If negatives are not on hand but are known to be in the U.S. Air Force Central Still Photographic Depository or elsewhere, the purchaser will be referred to the holding activity.

(c) A purchase request submitted in writing should include:

(1) The name of the requester (individual or organization).

(2) The title and number of the negative from which the print is to be made, or a complete description of the picture's content.

(3) The intended use of the photographic material—for example, personal, publication, advertising, etc.

(4) The exact number and size of prints requested.

§ 811.8 Policy on releasing photographs.

Photographic material may be released by the appropriate office of information or as stated in § 811.9. Classified photography will be downgraded as provided by Part 850 of Subchapter E of this chapter, and the appropriate classification guide. Photography requiring security clearance before release will be submitted to the appropriate office of information for security review.

§ 811.9 Procedure for releasing photographs.

(a) The appropriate office of information will determine in accordance with AFR 190-12 releasability of photographs requested by:

(1) Print or electronic media.
(2) Motion picture companies.
(3) Commercial industries.
(4) Nonprofit organizations.

(5) Persons connected, in any way, with the above organizations.

(6) The general public.

(b) The Foreign Liaison Division (HQ USAF/CVAFI) is the releasing authority for photography requested by foreign governments, foreign industry, or foreign nationals.

(c) The organizations possessing requested photographic material will release it directly to Federal, State, territorial, county, or municipal agencies.

(d) The appropriate casualty assistance office is the releasing authority for copies of official portraits requested by members of the armed forces in a casualty status, their next-of-kin, or authorized representative.

(e) The Secretary of the Air Force, Office of Legislative Liaison, is the releasing authority for photographs requested by members of Congress, their offices, or their representatives.

§ 811.10 Procedure for collecting and controlling fees.

(a) The Air Force activity that makes the sale (see § 811.5) will collect payment in advance.

(b) Purchasers will pay by cash, U.S. postal money order, certified check, cashier's check, bank draft, or personal or commercial check (subject to collection). Negotiable instruments will be drawn payable to the Treasurer of the United States.

(c) The officer in charge of the collecting activity will safeguard all fees received until they are deposited. The collecting activity will not hold fees overnight, unless adequate safekeeping facilities are available for storing them. The collecting officer will deposit fees daily with the servicing accounting and finance officer (AFO) or accounting and disbursing agent. The collections will be processed in accordance with accounting and finance directives.

§ 811.11 Schedule of fees and rates.

Fees are established by the Department of Defense.

(a) *Photography.* Still pictorial or documentary photographic prints, and not more than three prints from any individual negative, may be sold on each order. Unlisted standard sizes of prints may be furnished, if available, at proportionate rates.

(1) *Black and white photography:*

8- by 10-inches single weight glossy finish, first print	$1.25
Second and third prints, each	1.00
8- by 10-inch double weight matte finish, first print	1.75
Second and third prints, each	1.50
11- by 14-inch double weight matte finish, each	3.50
16- by 20-inch double weight matte finish, each	4.75
20- by 24-inch double weight matte finish, each	6.50

(2) *Color photography:*

35 mm. color transparencies (cardboard mount), each	3.50
4- by 5-inch color transparencies or color negatives, each	6.75
8- by 10-inch color transparencies or color negatives, each (in quantities not exceeding three copies of any one view)	$14.00
8- by 10-inch color print, first print	4.50
Second and third prints, each	2.00
11- by 14-inch color print, first print	8.00
Second and third prints, each	5.00
16- by 20-inch color print, each	17.50
16- by 20-inch color print on 20- by 24-inch board, each	19.25

(b) *Services:*

(1) Clerical search and processing, per hour	5.00
Minimum charge	3.00
(2) Professional searching or researching—(to be established at actual hourly rate prior to search. A minimum charge will be established at one-half hourly rate.)	

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

[FR Doc.73-69 Filed 1-5-73;8:45 am]

PART 811a—AUDIO-VISUAL DOCUMENTATION PROGRAM

Subchapter B of Chapter VII of Title 32 of the Code of Federal Regulations is revised by adding a new Part 811a.

Sec.
811a.1 Purpose.
811a.2 Sources of material for the program.
811a.3 Program objectives.
811a.4 Uses of documentation.
811a.5 Personal photography—U.S. Air Force photographer on official assignment.

AUTHORITY: The provisions of this Part 811a issued under 10 U.S.C. 8012.

§ 811a.1 Purpose.

(a) This part explains the audio-visual documentation program, its objectives and how the program is used.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 811a.2 Sources of material for the program.

The sources of material for this program are audio-visual documentation; combat documentation; base support photography; and the visual records produced by armament recordings, optical instrumentation, mapping and charting, and reconnaissance systems.

§ 811a.3 Program objectives.

The objectives of the audio-visual documentation program are to record the growth, progress, and employment of the Air Force through the use of the motion picture, still photographic and television media; to collect, house, evaluate, preserve, and serve these documentary media records; and to use this documentation to enhance Air Force presentations.

§ 811a.4 Uses of documentation.

Documentation is used for many purposes at all levels in the Air Force. These are divided into "immediate" and "future" uses.

(a) *Immediate use.* Documentation is relied upon heavily in analyzing and evaluating concepts and results of deployments, operations, tests, and exercises and to complete motion picture films and television presentations that support Air Force objectives. Television, motion picture, and still photographic products are extensively used by all Government offices to enhance the presentation of subject matter. Audio-visual documentation provides content for slides, silent and sound motion picture clips, video clips, and multimedia products used for training, management, informational, and briefing purposes.

(b) *Future use.* The audio-visual materials, selected from the total Air Force documentation effort, that have long term or permanent value, are retained in the U.S. Air Force Central Depositories and the National Archives. These historical records of Air Force operations and accomplishments are the source of content material for future presentations such as motion pictures and television productions, and publications such as books and magazines.

§ 811a.5 Personal photography—U.S. Air Force photographer on official assignment.

(a) Air Force photographers on official assignment are not permitted to engage in photography for personal sale, retention, or for any other purposes not directly related to official U.S. Air Force activities.

(b) Sometimes Air Force photographers, by choice or agreement, use personally-owned equipment or supplies—e.g., cameras or film—during an official assignment. In such cases, they should understand that ALL photographic material exposed while on that assignment will be the property of the Department of the Air Force. Photographs, motion pictures, negatives, transparencies, or other products of photography are subject to the same safeguards and release requirements as any material intended for release to the press, public, or to individuals. (For policies governing release of material outside the Department of Defense, refer to Part 806 of Subchapter A of this chapter, Part 810 of this subchapter, AFRs 190-12, and 190-22, and Part 835 of Subchapter C of this chapter.)

(c) Air Force photographic material will not be withheld for personal purposes, reproduced in whole or in part for other than official purposes, or disposed of in any manner whatsoever. The written consent of an official authorized by law, regulation, orders, or other competent authority, is required to permit such withholding, reproduction, or disposition of photographic material.

V38-4 JAN 8 73 XUM

By order of the secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

SUBCHAPTER H—AIR FORCE RESERVE OFFICERS' TRAINING CORPS

PART 872—AIR FORCE JUNIOR RESERVE OFFICERS' TRAINING CORPS

Miscellaneous Amendments

Part 872, Subchapter H of Chapter VII of Title 32 of the Code of Federal Regulations is amended as follows:

1. Section 872.1 is revised to read as follows:

§ 872.1 Purpose.

(a) This part prescribes policies and procedures for the organization, administration, and operation of the Air Force Junior Reserve Officers' Training Corps (AFJROTC).

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

1a. Section 872.2 is amended by revising paragraphs (e), (j), and (k), and adding a new paragraph (m) to read as follows:

§ 872.2 Definitions.

• • • • • •

(e) *Aerospace Education Instructor (AEI).* The senior retired Air Force officer employed by the secondary school to manage and conduct the AFJROTC program at the school.

• • • • • •

(j) *Aerospace Education (AE).* The official designation of the AFJROTC curriculum—an integral academic course of study prescribed by the Air Force and conducted by the secondary school.

(k) *Academic Year (AY).* The annual period of academic instruction at any given school.

• • • • • •

(m) *Officer.* Either a commissioned officer or a warrant officer.

2. Section 872.3 is revised to read as follows:

§ 872.3 Policy on AFJROTC.

The Department of the Air Force will conduct an AFJROTC program that will provide meaningful military training of benefit to the student and to the Air Force. The program is officially sponsored and funded.

3. Section 872.5 is revised to read as follows:

§ 872.5 AFJROTC objectives.

AFJROTC students should develop:

(a) An appreciation of the basic elements and requirements for national security.

(b) Respect for and an understanding of the need for constituted authority in a democratic society.

(c) Patriotism and an understanding of their personal obligation to contribute toward national security.

(d) Habits of orderliness and precision.

(e) A high degree of personal honor, self-reliance, and leadership.

(f) Knowledge of fundamental aerospace doctrine.

(g) Basic military skills.

(h) A knowledge of and appreciation for the traditions of the Air Force.

(i) An interest in the Air Force as a career.

4. Section 872.7 is revised to read as follows:

§ 872.7 AFJROTC organization.

The Secretary of the Air Force will determine the plans and policies to implement and conduct an AFJROTC program.

(a) AFJROTC units. Units of the AFJROTC are classified, as indicated below, according to the type of school where such units are established:

(1) *Military Institutes or Military Schools.* Schools at the secondary level that:

(i) Require a 4-year course of aerospace education.

(ii) Organize their students as a Corps of Cadets under constantly maintained discipline.

(iii) Require all members of the corps to be in uniform for most school activities.

(iv) Have as their objective the development of students' character by means of military training and the regulation of their conduct according to the principles of military discipline, and, in general, to meet military standards similar to those maintained at the service academies.

(2) *High schools—public or private secondary schools not operated on essentially military basis.* A 3-year course of aerospace education is conducted at these schools, and enrollment in the AFJROTC program is elective.

(b) The AFJROTC is organized as a subordinate activity of Air University with a central cadre manned by active duty personnel. AFJROTC units are manned by retired Air Force personnel hired by the host schools. Retired personnel so employed are in no way considered a part of the Air Force manpower ceiling established by the Office of the Secretary of Defense.

5. Section 872.8 is amended by revising the introductory text and paragraphs (a) and (b) to read as follows:

§ 872.8 Requirements for establishment.

A unit is established or involuntarily disestablished only by direction of the Secretary of the Air Force. A school that desires to establish an AFJROTC unit must be fully accredited by the appropriate State or regional accreditation agency and must make proper application for establishment of a unit to Air University. The school must enter into a contractual agreement with the Commander, Air University:

(a) To provide a program of instruction prescribed by the Air Force of either a 4-year course of required aerospace education at military schools or a 3-year elective course at high schools. (The unit is considered established when this program of instruction is fully implemented.)

(b) To maintain at established units an ROTC membership of not less than 100 physically fit male students who are at least 14 years of age and citizens of the United States.

• • • • • •

6. Section 872.9 is revised to read as follows:

§ 872.9 Procedures for establishment.

(a) Officials of a secondary school may apply for an AFJROTC unit by writing to the Commander, Air University, Maxwell Air Force Base, Ala. 36112. An application and agreement form will be sent to the requesting school. If the completed application indicates that the institution satisfies the selection criteria, the school will be visited by Air University personnel before a contract is executed.

(b) Reports of visits and recommendations by Air University will be sent to HQ USAF/DPPEA, Washington, D.C. 20330, not later than January 15th of each year for permission to establish units. If a request is made by a school system, Air University will include recommendations stating the advantages and disadvantages of organizing the AFJROTC program as a multiple unit. Upon approval by HQ USAF, Air University will notify the schools selected for establishment and any applicants not selected.

7. Section 872.10 is amended by revising paragraph (b) to read as follows:

§ 872.10 Conditions for retaining units.

• • • • • •

(b) During the probationary year, AFROTC will visit each unit on probation.

(1) If probation conditions are not corrected by the end of the probationary year, the Commandant, AFROTC, will either recommend disestablishment of the unit or, if a minimum of 50-student members are enrolled, he may request a 1-year extension of the probationary period. Justification for extension must include a program of positive actions to correct the probation conditions. The Commander, Air University, will approve or disapprove extended probation.

(2) If probation conditions are not corrected by the end of the additional probationary year, the Commandant, AFROTC, will recommend disestablishment of the unit or, if a minimum of 50-student members are enrolled, he may request a 3-year extension of the probationary period. This 3-year extension is contingent on a complete change of retired military personnel in the AFJROTC unit (if circumstances so warrant) before the start of the academic year in which the 3-year extension is effective. The Commander, Air University, will approve or disapprove continued extension of probation. The unit will be disestablished at the conclusion of the 3-year period if probation conditions are not corrected by that time.

(3) Copies of all correspondence concerning probation and disestablishment will be sent to HQ USAF/DPPEA, Washington, D.C. 20330. HQ USAF/DPPEA will be notified in writing 45 days before dispatch of disestablishment letters to schools hosting AFJROTC units, unless disestablishment is requested by officials of the host school.

8. Section 872.11 is revised to read as follows:

§ 872.11 Disestablishment of units.

(a) *Notification.* If the authorities of a school desire to disestablish the AFROTC unit, they will notify the Commander, Air University, in writing. Withdrawal of a unit for reasons other than request of the school officials will be made only for cases such as:

(1) Failure to maintain requirements for a unit.

(2) Failure of a school to remedy the deficiency that resulted in the unit's being placed on probation.

(3) When disestablishment serves the best interest of the Air Force.

(b) *Method of disestablishment.* Upon notification of disestablishment, the unit will be phased out and the equipment removed in an orderly manner. No new enrollments will be accepted and the total phaseout will be accomplished within a maximum of 2 years (3 years at military institutes or military schools) after completion of the probationary year.

9. Section 872.12 is amended by changing the title to read "Eligibility requirements" and revising paragraph (e) to read as follows:

§ 872.12 Eligibility requirements.

• • • • • •

(e) Be physically fit to participate in AFJROTC training. A student is considered physically fit if he is qualified for the physical education program of the school.

• • • • • •

10. Section 872.14 is amended by revising paragraphs (b) and (c) to read as follows:

§ 872.14 Admission of special students.

• • • • • •

(b) Special students will not be issued uniforms and will not be reported on institutional records as AFJROTC members.

(c) If the applicant is a citizen of a foreign country recognized by the United States, the national interest of which is compatible with the United States, he must obtain a letter from a representative of his government stating that there is no objection to the student's receiving AFJROTC instruction. The AEI will retain the original of the letter in the student's personnel records and send a copy of the letter to AFJROTC. If the AEI is in doubt about relations between the United States and another country, he will send a request for review through channels for decision.

11. Section 872.16 is revised to read as follows:

§ 872.16 Curriculum requirements.

The program of instruction for AFJ ROTC will be of not less than 3 academic years' duration. The curriculum will include a minimum of 96 hours a year of aerospace education, including leadership laboratory. A 4-year course of required aerospace education will be conducted at all military schools. Summer school sessions are authorized if credit received for summer school AFJ ROTC instruction equals not more than two semesters of credit based on the formula: 96 hours of instruction=2 semesters; 48 hours of instruction=1 semester.

12. Section 872.17 is revised to read as follows:

§ 872.17 Requirements for instructors.

(a) *Authorization.* Retired Air Force officer and noncommissioned officer instructors whose qualifications and subsequent performance of duty meet the standards prescribed by the Commander, Air University, will be authorized as follows:

(1) Single and multiple units in high schools and military schools are authorized one retired officer instructor per 500 AFJROTC members (or major fraction thereof), and one retired enlisted instructor per 100 AFJROTC members (or major fraction thereof). As an exception, each school qualifying for an AFJROTC unit is authorized at least one officer. Within these authorizations, an officer instructor may be substituted for an enlisted instructor, or vice versa.

(2) The number of instructor personnel authorized for each unit is determined annually by Air University, based on the average number of member students.

(i) Supervisory personnel for multiple units are obtained by organizing the multiple unit in such a way that the limitations above are not exceeded.

(ii) Multiple unit organization and management will be established where possible to minimize the number of instructors required, thus reducing the cost of operation to the schools and to the Air Force.

(b) *Application.* Personnel interested in AFJROTC instructor positions should request information and an application from AFROTC/JRI, Maxwell Air Force Base, Ala. 36112. Upon receipt of a completed application and associated documents, applicants will be considered for nomination to the instructor position of their choice. AFROTC will nominate the best qualified of those applicants interested in a vacancy. When possible, several applicants are nominated to schools for each instructor vacancy. The nominated applicants then contact the schools to negotiate for the position. The host school is the hiring authority. The school will send to AFROTC, for approval, the names of instructor personnel.

(c) *Uniform.* Retired personnel will wear the Air Force uniform as prescribed by AFM 35-10 while conducting the AFJROTC program and at such other times as considered appropriate.

(d) *Orientation.* The Air University may conduct orientation programs and workshops for instructors and school officials.

13. Section 872.18 is revised to read as follows:

§ 872.18 Employment status.

AFJROTC instructors are employees of the school. The senior instructor is responsible to the school principal or headmaster for the conduct of the AFJROTC program. The assistant instructors are responsible to the senior instructor. All instructors must meet Air Force and school requirements, maintain standards acceptable to the Department of the Air Force and be accountable to the Air Force for the success or failure of their units.

14. Section 872.19 is revised to read as follows:

§ 872.19 Instructor duties.

(a) Retired Air Force personnel employed under this part are primarily responsible for conducting the AFJROTC program. Normally, a department (or comparable office) of aerospace education or AFJROTC will be established in the school. The senior instructor will be the head of that department (or comparable office). As such, he may serve on committees and perform other duties normally performed by other department or comparable office heads. Assistant AEIs may serve on committees or perform other extra curricular duties normally performed by other faculty members. The performance of any duties desired by the institution in addition to those connected with instruction, operation, and administration of the AFJROTC program must be contracted separately between the school and the individual AFJROTC instructor at no cost to the Air Force.

(b) If an individual employed as an AFJROTC instructor enters into a contract with the institution to provide services that are not part of the AFJROTC instruction, these services must be performed outside the scope and hours prescribed for the AFJROTC duties. The institution is responsible for advising the Air University of any change of employment status of AFJROTC instructors employed at that institution.

15. Section 872.20 is revised to read as follows:

§ 872.20 AF Form 1256, "Certification of Training."

(a) A Certificate of Completion of AFJROTC will be presented to each student who successfully completes all of a prescribed AFJROTC program.

V 38 - 4 JAN 8 73 XUM

(b) A Certificate of Training (AF Form 1256) will be presented to each student who successfully completes 2 years of the AFJROTC program.

16. Section 872.21 is amended by revising paragraph (a) to read as follows:

§ 872.21 Credit for training.

(a) A Professor of Aerospace Studies (PAS) may waive either year of the General Military Course (GMC) of Senior AFJROTC for a student who possesses a Certificate of Completion of junior ROTC. A PAS may waive the entire GMC or any portion of it for a student who has completed 4 years of junior ROTC at a military school. A PAS may waive one academic term of the GMC for a student who possesses a Certificate of Training from junior ROTC.

. . . . .

17. Section 872.25 is revised to read as follows:

§ 872.25 Shipping and other costs.

Charges for shipment of Government property to and from the institution, including packaging and handling, will be paid by the Air Force, except for surplus Government property acquired in accordance with § 872.26. All costs incident to maintenance and local storage and safeguarding of the property will be paid by the institution.

18. Section 872.26 is revised to read as follows:

§ 872.26 Acquisition of surplus Government property.

(a) *DOD property.* HQ USAF/DPPEA prepares nominations to the Secretary of Defense to designate AFJROTC units as educational activities of special interest to the Armed Forces. Upon approval by the Secretary of Defense, such designation permits officials of AFJROTC host schools to complete donation agreements allowing their AFJROTC units to obtain certain categories of surplus DOD property for training purposes.

(1) The Defense Supply Agency (DSA) automatically sends donation agreements to approved host schools for signature. (A new AFJROTC unit should expect a delay of several months from the time of activation until a blank donation agreement is received.) Upon receipt of the signed agreement, DSA notifies surplus property disposal agents of DOD and other Government agencies that the AFJROTC unit is eligible to receive surplus property.

(2) For each transaction involving acquisition of surplus DOD property, the AFJROTC host school will be required to submit SF 123, "Application for Donation of Surplus Personal Property."

(3) Air University will annually inspect the property administration of AFJROTC host schools participating in the DOD surplus property programs to ensure the compliance with the donation agreement. The inspection will be performed by personnel responsible for conducting normal visits to AFJROTC units. Additional manning will not be authorized for this purpose. The inspection will specifically include a review of the categories and quantities of property received through donation to assure that only the type and quantity of property actually needed is acquired. Excess or unauthorized property will be reported to appropriate agencies in accordance with the donation agreement. The names of schools violating the donation agreement will be sent to HQ USAF/DPPEA, Washington, DC 20330, with Air University's recommendation for action.

(b) *Other property.* Schools desiring to acquire other surplus Government property must process requests on SF 123. Submit requests through the State surplus property agencies according to Department of Health, Education, and Welfare (DHEW) procedures. Property obtained through DHEW becomes institutional property and does not require the accountability records prescribed for DOD property.

19. A new § 872.27 is added to read as follows:

§ 872.27 Visits to Air Force installations.

Groups of AFJROTC cadets under control of an AEI or assistant AEI are authorized to participate in visits to Air Force installations to enhance or supplement the institutional training program. Such visits serve as motivational activities for cadets and provide educational experiences in addition to the theoretical knowledge supplied in the academic curriculum. AEIs are authorized to coordinate visits directly with local installation commanders. Air Force support and services may include, but are not limited to:

(a) Available housing, bedding, and messing facilities. Cadets will be charged for rations consumed. Commanders of Air Force activities will be prepared to furnish any reasonable assistance to AFJROTC students.

(b) Hospitalization and medical care in emergencies occurring while cadets are participating in AFJROTC sponsored visits to Air Force installations. Hospitalization beyond the period of emergency or medical care at other than Air Force medical facilities is not authorized at Air Force expense.

(c) Local orientation flights in Air Force aircraft and transportation by military motor vehicles, when available, under applicable provisions of AFM 77-1 and Department of Defense regulations.

20. A new § 872.28 is added to read as follows:

§ 872.28 Project officers.

Base commanders at Air Force installations near AFJROTC units are encouraged to appoint an AFJROTC Project Officer, on an additional duty basis, to coordinate support of the AFJROTC program.

(10 U.S.C. 8012)

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

[FR Doc.73-73 Filed 1-5-73;8:45 am]

SUBCHAPTER I—MILITARY PERSONNEL

PART 889—DESERTION AND UNAUTHORIZED ABSENTEEISM

Part 889, Subchapter I of Chapter VII of Title 32 of the Code of Federal Regulations is retitled and revised to read as follows:

Sec.
889.1 Purpose.
889.2 Criteria for administrative classification of deserters.
889.3 Authority to apprehend.
889.4 Rewards and reimbursements.
889.5 Cooperation of Armed Forces and civil law enforcement agencies.
889.6 Deserter information system.
889.7 Amplification of actions required.
889.8 Transfer from civilian to military jurisdiction.
889.9 Disposition when unauthorized absence has been terminated.

AUTHORITY: The provisions of this Part 889 issued under 10 U.S.C. 8012.

§ 889.1 Purpose.

(a) This part establishes uniform policies and standard procedures for the management of desertion and unauthorized absenteeism, to: (1) Minimize the occurrence of desertion and unauthorized absenteeism, (2) foster the development of effective deterrent programs, (3) enhance apprehension efforts, and (4) provide for accurate and timely reporting of cases of desertion and unauthorized absenteeism. This part applies to all military personnel serving on or ordered to report to active duty in the U.S. Air Force and members of the Reserve components serving on active duty or active duty for training.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 889.2 Criteria for administrative classification of deserters.

For administrative purposes, an absentee will be classified as a deserter and a DD Form 553, "Absentee Wanted by the Armed Forces," will be prepared when any of the following conditions exist:

(a) A member of the Air Force is absent without authority regardless of the length of absence, and the facts and circumstances include:

(1) Duty/travel restrictions have been imposed under the provisions of AFR 30-24; or

(2) Access within the past 12 months to top secret information or to secret or confidential information for which special access authority and procedures have been established.

(b) A member has been absent without leave for 30 consecutive days. (For administrative purposes date of departure is first day of a.w.o.l. and a.w.o.l. status continues through 2400 hours on 30th day of continued absence. Desertion starts at 0001 hour on the 31st day of continued absence.)

(c) A member has been absent without authority without regard to length of absence and has gone to or remains in any foreign country and while in such foreign country has requested or applied for, or accepted any type of asylum or residence permit from such country or any governmental agency thereof.

NOTE: When an unauthorized absence occurs and the member falls within the criteria of paragraphs (a) and (c) of this section, immediate action must be taken by the commander to notify the appropriate unit/agency.

(d) A member who absents himself without leave or escapes from custody before appropriate action is taken as a result of previous unauthorized absence.

(e) A member who is a prisoner and escapes.

(f) A member who as a result of preliminary inquiry has been charged in accordance with the Uniform Code of Military Justice (UCMJ) for a serious offense in addition to being absent without leave (a.w.o.l.).

§ 889.3 Authority to apprehend.

Apprehension of absentees and deserters may be accomplished by such personnel as specified in the following paragraphs.

(a) *Members of Armed Forces.* Absentees and deserters may be apprehended by members of the Armed Forces under the circumstances prescribed by Article 7(b) of the Uniform Code of Military Justice and paragraph 19 of Manual for Courts-Martial, 1969 (Revised Edition).

(b) *Civil officers.* Any civil officer having authority to apprehend offenders under the laws of the United States or of a State, Territory, Commonwealth, or Possession, or the District of Columbia may summarily apprehend a deserter and deliver him into the custody of the Air Force.

(c) *United States authorities.* United States authorities may apprehend absentees and deserters in foreign countries only when authorized by an international agreement with the country concerned or by agreement with appropriate local authorities when such an agreement is within the purview of an existing international agreement. In these cases, careful consideration must be given to possible international implications and adverse foreign reaction. Where apprehension cannot be accomplished under these circumstances, or in any case where doubt exists, as to apprehension authority, a report of the facts will be made to AFMPC/DPMAKE, with an information copy to the major command, for submission through channels to the Assistant Secretary of Defense (M&RA) for resolution.

§ 889.4 Rewards and reimbursements.

(a) Any authorized communication, oral or written, from a military or Federal law enforcement official or agency, requesting active cooperation in the apprehension or delivery to military control of an absentee or deserter wanted by the Air Force, will constitute the basis for a reward. Subsequent to such communication, persons or agencies apprehending, detaining, or delivering absentees, deserters, or escaped military prisoners to military control will be rewarded or reimbursed (but not both) as follows:

(1) Payment of a reward of $15 for the apprehension and detention of absentees, deserters, or escaped military prisoners until the military authorities take them under control.

(2) Payment of a reward of $25 for the apprehension and delivery to military control of absentees, deserters, or escaped military prisoners.

(3) Under circumstances where persons or agencies who apprehend/return absentees and deserters to military control may not be paid a reward; reimbursement for reasonable and actual expenses may be made not to exceed $25 for any one case.

(b) Payments authorized by paragraph (a) of this section and cost of travel of guards assigned to the absentees or deserters will be charged to the military personnel appropriation of the Air Force. These costs will not be reimbursed by the absentee or deserter. Costs associated with an absentee's or deserter's own transportation for return to military control will be charged to the pay accounts of the individual member as prescribed in the Joint Travel Regulation, volume I, chapter 5.

§ 889.5 Cooperation of Armed Forces and civil law enforcement agencies.

(a) Notices about members wanted for unauthorized absence or desertion from a command located in the jurisdiction of the United States will be given expeditious selective circulation among Armed Forces and civil law enforcement agencies deemed most useful in apprehending a particular absentee. Notification to the Federal Bureau of Investigation and the Selective Service System or any branch thereof, and Department of State (in the case of noncitizen deserters) will be made only by AFMPC/DPMAKE. The standard format of this notice will be the Department of Defense (DD) Form 553.

(b) Major commands located outside the jurisdiction of the United States will take initial actions such as the local situation may warrant, within the primacy of international agreements, to secure cooperation in apprehension of members absent without leave.

(c) In the absence of other specific prearrangements among Military Service Commands, when one of the military services makes a pickup of absentees or deserters from civil authorities anywhere in the continental United States, all such individuals—regardless of the military service to which they belong—will be picked up when practicable, at the same time and delivered to the nearest military installation having facilities to process absentees or deserters. When such pickup is not accomplished, the apprehending authorities will notify the military service(s) of the individuals remaining in civilian custody preferably prior to these authorities' departure from the civilian confinement facility.

(d) Apprehension of absentees who seek sanctuary in a church or other public building.

(1) When AFMPC/DPMAKE has furnished the Federal Bureau of Investigation (FBI) with a request to locate a deserter (DD Form 553), for return to military control, the FBI will assume responsibility and apprehend a deserter.

(2) When a number of airmen are involved, some of whom are absent without leave and some in a deserter status, responsibility will remain with the U.S. Air Force since it has the authority to apprehend both categories of personnel.

(3) In all other situations, the U.S. Air Force will assume responsibility for apprehending its absentees.

(4) Maximum cooperation will be solicited from local civil authorities in the apprehension of absentees not falling under FBI jurisdiction. If civil authorities decline to apprehend a U.S. Air Force absentee seeking sanctuary in a church or public building, all facts will be reported to HQ USAF/IGS, via OPREP 3 Report, in accordance with Joint Chiefs of Staff (JCS) PUB 6, volume V, before military apprehension is attempted.

NOTE: This does not preclude the U.S. Air Force from continuing to exercise its responsibility in "nonsanctuary" situations. For example, it does not preclude Air Force personnel from entering a building to apprehend an absentee in a "hot pursuit" situation or in other instances in which an absentee happens to be in a church or public building but is making no claim of sanctuary.

§ 889.6 Deserter information system.

(a) AFMPC/DPMAKE is the central focal point to provide for the control, accounting, and dissemination of information concerning Air Force members administratively classified as deserters and as warranted for those absent without leave for less than 30 days.

(b) To provide the means for making timely and complete deserter information available to civil law enforcement agencies, the Air Force has access to a terminal for direct entry to the FBI National Crime Information Center (NCIC) computer. Every deserter must be listed with the NCIC no later than 7 days after being administratively declared a deserter. Minimizing this time interval and increasing the reliability and utilization of this information source will be a primary consideration.

(c) The primary source of information to the NCIC will be from the DD Form 553, and DD Form 616, "Report of Return of Absentee Wanted by the Armed Forces." Upon initial receipt of deserter information, AFMPC/DPMAKE will make, as soon as possible, the requisite entries to the NCIC. Subsequently, AFMPC/DPMAKE will make

V 38 - 4 JAN 8 73 XUM

the necessary adjustments to update and purify NCIC records of deserter information. On the 60th day of continuous absence, AFMPC/DPMAKE will forward a copy of DD Form 553 to the FBI. (Distribution to the FBI will not be made by any other Air Force agency.)

§ 889.7 Amplification of actions required.

The actions which require possible further amplification are explained in the paragraphs below.

(a) *Notification of next of kin or payees of allotments.* (1) A letter, signed by the unit commander or the squadron section commander, must be forwarded without delay at the time required to the absentee's next of kin (including those who are aliens residing in a foreign country) under the following circumstances, whichever occurs first:

(i) When substantial information exists which shows that the member had planned or announced his intention to absent himself without authorization, or

(ii) When the member has been in an unauthorized absence status for 10 consecutive days, or

(iii) When the member is administratively declared a deserter.

(2) The letter will state that:

(i) The member is considered in an administrative status of an unauthorized absentee (or deserter, if appropriate), as his whereabouts is unknown to military authorities.

(ii) Continued absence may result in conviction of desertion; loss of pay, allowances, Government insurance; reduction in grade; bad conduct or dishonorable discharge (dismissal, if he is a commissioned officer); and confinement at hard labor.

(iii) They should urge the absentee to return to military control.

(iv) They should notify the nearest military installation if they have knowledge of his whereabouts, and

(v) Dependents will become ineligible for medical care and other benefits and privileges when the sponsor's status changes to desertion.

(vi) The payee of allotments must be notified that continued absence will result in benefits being discontinued.

(3) A copy of the letter to the next of kin will be furnished the Consolidated Base Personnel Office (CBPO) records unit.

(b) *Report of inquiry.* The losing unit commander will prepare the report of inquiry, based on actions he has taken, and will include information as to whether member was pending administrative discharge or court-martial action prior to a.w.o.l. Include duty status prior to a.w.o.l. If leave, furnish leave address, or if reassigned, furnish gaining unit and delay en route leave address. Report will be submitted to CBPO for distribution.

(c) *Preparation and distribution of DD Form 553.* DD Form 553 will show leave address or gaining unit (para (b) of this section) in the remarks section. This form will be prepared, and distributed (all copies will reflect the complete distribution made) to:

(1) AFMPC/DPMAKE—An original, capable of reproduction, and 3 legible copies.

(2) Major command of absent member, major command of CBPO.

(3) Base commander.

(4) Commander of the Army area where unit of assignment is located.

(5) Security Police of base near member's hometown and/or city where member is likely to go.

(6) Law enforcement agencies for addresses listed in items 31 and 33, DD Form 553, and to the place where absentee is likely to go.

(7) Air Force and Army finance and base exchange officers in the unit area and area where absentee is likely to go.

(8) Armed Forces Police Detachment, if such agency is located in geographical area where absentee is likely to go.

(9) Law enforcement agencies of foreign countries only where apprehension can be effected when absence occurs within the oversea command, and limited to countries within the area as determined by the oversea commander.

(10) Field Record Group of absentee.

(11) AFAFC/MPPPC/MPPR, 3800 York Street, Denver CO 80205.

§ 889.8 Transfer from civilian to military jurisdiction.

(a) Absentees and deserters being detained temporarily in the hands of civil authorities will be returned to military control as soon as possible after responsible military officials are informed of their whereabouts and the civil authorities are ready to release them. After receiving notification of the absentee/deserter's whereabouts, military authorities must make every reasonable effort to accomplish return to military control within 48 hours. Apprehension and detention of absent members by civil authorities are accomplished as a service to the military departments. Continuation of this essential support from civil authorities requires mutual cooperation.

(b) The commander of the unit to which the individual was assigned prior to his unauthorized absence is responsible for completing the required action when report of arrest is received. Actions as outlined in AFM 39–12, paragraph 2–23, September 1, 1966, apply when an absentee is serving a sentence to confinement imposed by a civil court. Actions as described in AFM 39–12, paragraph 2–32, apply when an absentee is reported to be in civil confinement and is not available for immediate return to military control. The commander is also responsible for lodging a detainer with civil authorities, and preparing AF Form 2098 to reflect the changed status.

§ 889.9 Disposition when unauthorized absence has been terminated.

Upon termination of unauthorized absence, disposition may be taken as follows:

(a) The immediate commander will make an administrative determination as to whether the absence was avoidable or unavoidable. In making this determination, he will be guided by the instructions in Department of Defense Pay Manual, table 1–3–3, and AFMs 177–373 and 30–3. Absences that are determined to have been unavoidable will be excused. In these cases the previously reported absence will be revoked by AF Form 2098 and the absence charged as leave unless otherwise authorized.

(b) Absences are not chargeable to leave when caused by the member's mental incapacity, or when he is detained, tried, and acquitted by civil authorities and later excused as unavoidable.

(c) When a member dies during a period of unauthorized absence, the commander of member's unit of assignment will make an administrative determination as to whether the member was in absence without leave, absence over leave, desertion, or duty status (DODPM, paragraphs 10212 and 40505c).

(d) When an absence is excused as unavoidable, it will not be counted as time lost. Appropriate entries on AF Form 1226 must be made, as provided in AFM 35–14.

(e) When it is determined that a person has been erroneously reported as an unauthorized absentee or deserter, the servicing CBPO will void all record entries pertaining to the alleged absence and will forward a DD Form 616 to all addressees of the original DD Form 553 and will include a full explanation of the erroneous report in the "Remarks" section. If a letter has been forwarded previously to the next of kin or allotment payee in regard to the member's absence, another letter will be forwarded immediately to all previous addressees explaining the erroneous report in full.

(f) Upon a determination that an absence was avoidable, the immediate commander must consider the appropriateness of disciplinary punishment.

(g) A member who is in an unauthorized absence for more than 31 consecutive days automatically loses his Servicemen's Group Life Insurance (SGLI) coverage. When he returns to Air Force control after an unauthorized absence of more than 31 days, the responsible Personal Affairs Section of the servicing CBPO must counsel the member on the loss of his insurance. When the member is returned to duty with pay, his SGLI coverage in force before his unauthorized absence is automatically restored and the accounting and finance office should resume deductions accordingly (AFR 211–5).

By order of the Secretary of the Air Force.

SUBCHAPTER J—CIVILIAN PERSONNEL

PART 890—EMPLOYMENT POLICIES

Miscellaneous Amendments

Part 890, Subchapter J of Chapter VII of Title 32 of the Code of Federal Regulations is amended as follows:

1. Section 890.1 is revised to read as follows:

§ 890.1 Purpose.

(a) This part contains information needed by commanders, civilian personnel offices, staff offices, and supervisors of civilian personnel. It does not apply to the employment of non-U.S. citizens in foreign areas or Guam or to the employment of local civilians in the Canal Zone.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

1a. Section 890.4 is amended by expanding the title and revising paragraph (a) to read as follows:

§ 890.4 Restrictions on employing non-Air Force candidates in competitive positions.

• • • • • •

(a) Entitled to priority placement in accordance with § 890.8.

• • • • • •

2. A new § 890.8 is added to read as follows:

§ 890.8 List of priorities.

Priority order	Category	Must be selected	Must be considered and may be selected	Conditions to be observed	Remarks
A	Employee with enforceable assignment rights or to be mandatorily placed as a corrective or remedial action.	Yes.	NA.	NA.	None.
B	Activity employee identified for demotion or separation due to reduction in force (RIF), failure to accept a functional transfer offer or for other reasons beyond his control which entitle him to RIF placement.	Yes, at same or lower acceptable grade.			
C	AF employee of another activity in commuting area identified for demotion or separation due to RIF.				Requirement to place applies whether or not employee is registered in DOD Priority Placement Program (PPP).
D	Employee entitled to non-competitive priority consideration as corrective action for failure to be given proper consideration under the Air Force Merit Promotion Program (AFMPP).	No.	For grade no higher than that improperly denied consideration.		None.
E	Downgraded employee entitled to special consideration for repromotion.		Any downgraded AF employee may be selected. All downgraded employees serviced by CCPO must be considered.		
F	AF employee on Reemployment Priority List (RPL) for commuting area due to RIF.	Yes, position at grade no higher than previously held.	NA.	NA.	Includes current and former employees.
G	AF employee on RPL for commuting area due to failure to accept an offer of functional transfer.				
H	Employee of the major command identified for demotion or separation due to RIF.	Yes, at same or lower acceptable grade.			None.
I	Priority 1 employee on Stopper List.	Yes, at same or lower acceptable grade. See conditions.		DOD 1400.20–1–M, Part 1, Ch 3, V H and L provides guidelines to CCPO.	
J	Priority 2 employee on Stopper List.				

V 38 - 4 JAN 8 73 XUM

Priority order	Category	Must be selected	Must be considered and may be selected	Conditions to be observed	Remarks
K	Priority 3 employee on Stopper List.			DOD 1400.20-1-M, Part I, Ch 3, V H and L provides guidelines to CCPO.	AFR 40-922 contains an explanation of placement to positions GS-15 and above.
L	Status quo employee in an Air Force Reserve Technician (ART) position.	Yes, at same or lower acceptable grade.		NA.	This category of employee will be registered in the DOD PPP as Priority 3 under special provisions of DOD 1400.20-1-M.
M	Activity employee whose position is to be downgraded to correct classification error or because of application of new or revised standards. Also employee with permanent physical disability no longer able to perform full range of duties of current position.	Yes, at same grade or grades intervening current and proposed as appropriate.			FPM Ch 752, App A and FPM Ch 306, Subch 8 provide guidelines to CCPO.
N	Candidates eligible for competitive consideration under AFMPP.	No, except for downgraded employee. See conditions.	All AFMPP eligibles must be considered to extent required by AFR 40-300.	Selection of downgraded employee mandatory to extent required by AFMPP guidelines (AF Suppl to FPM 355).	Outside candidates (categories Q-T) are also considered when required by FPM 355 and AF Suppl Priority T conditions must be observed.
O	Air Force employee eligible for noncompetitive in-service placement not covered by higher priorities.	No.	Considered at CCPO option.	NA.	None.
P	RPL registrant of other DOD components for commuting area.	Yes, position at grade no higher than previously held.	NA.		
Q	All RPL registrants for positions at grade higher than those from which separated.	No.	Only if within reach for competitive AFM-PP selection.	Rank with currently employed AFM-PP candidates.	
R	Priority 4 employee on Stopper List.	Yes.	Currently employed AF registrant in categories R and S may be selected before categories P and Q.	NA.	
S	Priority 5 employee on Stopper List.				
T	All other sources (includes transfers, reinstatements not covered in higher priority).	No.	Must be considered when required by FPM 355 and AF supplementation.	Cannot be selected if categories P, Q, R, and S candidates available. Selection also subject to AFR 40-300 restrictions.	

NOTE: Priority order N-T, consider concurrently—note special provisions.

(10 U.S.C. 8012)

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

SUBCHAPTER K—MILITARY TRAINING AND SCHOOLS

PART 905—MEDICAL SERVICE OFFICER PROCUREMENT PROGRAMS FOR IN-SERVICE TRAINING

Part 905, Subchapter K of Chapter VII of Title 32 of the Code of Federal Regulations is amended as follows:

1. Section 905.0 is revised to read as follows:

§ 905.0 Purpose.

(a) This part outlines the requirements each applicant must meet to participate in one of the following Air Force medical officer training programs; the civilian medical intern program; the military medical and dental intern program; the senior medical student program, the biomedical sciences training program, or the registered nurses training program.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 905.6 [Amended]

1a. Section 905.6 is amended by changing the office symbol from "USAFMPC (AFMSMB)" to "USAFMPC/SGPSSS."

§ 905.8 [Amended]

2. Section 905.8 is amended by changing the office symbol from "USAFMPC (AFMSMB)" to "USAFMPC/SGPSSS."

3. Section 905.10 is revised to read as follows:

§ 905.10 Participating in a medical, dental and veterinary education program for regular or reserve officers.

Part 908 of this subchapter tells how to participate in the regular program.

4. A new § 905.13 is added to read as follows:

§ 905.13 Participating in the military intern program for medical or dental students.

To be eligible for this training, the applicant must:

(a) Be a graduate or prospective graduate of a medical or dental school acceptable to the Surgeon General, U.S. Air Force.

(b) Participate in the national intern and resident matching program if he is applying for a medical internship.

5. Section 905.24 is revised by adding new paragraphs (c) and (d) to read as follows:

§ 905.24 Assignment and reappointment.

• • • • • •

(c) Each participant in the sponsored optometry training program is reappointed in the Reserve of the Air Force Biomedical Science Corps (BSC), upon graduation from optometry school.

(d) Each new participant (not previously commissioned) in the sponsored military internship program is appointed in the Reserve of the Air Force (Medical Corps) upon his graduation from medical school.

(10 U.S.C. 8012)

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

[FR Doc.73-74 Filed 1-5-73;8:45 am]

PART 907—DELAYED ENLISTMENT PROGRAM (DEP)

Part 907, Subchapter K of Chapter VII of Title 32 of the Code of Federal Regulations is amended as follows:

1. Section 907.1 is revised to read as follows:

§ 907.1 Purpose.

(a) This part authorizes the program for enlisting qualified applicants in the U.S. Air Force Reserve (USAFR) under 10 U.S.C. 511(b) and 10 U.S.C. 672(d). It states the policies and procedures governing a delayed enlistment program whereby applicants in the 50 States and the District of Columbia who enlist in the USAFR will enter on extended active duty or enlist in the Regular Air Force.

(b) Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 907.2 [Amended]

1a. Section 907.2 is amended by changing the period of time in the first sentence from "120 days" to "180 days".

2. Section 907.3 is amended by changing the period of time in paragraph (a) (1) from "120 days" to "180 days", by revising paragraphs (a) (2), (b) (4), and (b) (5) to read as follows:

§ 907.3 Enlistment criteria.

• • • • • •

(a) • • • (1) Who is a high school student within 180 days of graduation. (2) For assignment as a performing member of any Air Force band.

(b) • • •

(4) Who requires a preenlistment security investigation in accordance with Part 888 of Subchapter I of this chapter.

(5) Who is a prior service applicant as explained in Part 888 of Subchapter I of this chapter.

3. Section 907.4 is amended by revising paragraph (a) and by deleting paragraph (d) to read as follows:

§ 907.4 Category of enlistment.

• • • • • •

(a) *Regular DEP.* For a male applicant scheduled to enter the Regular Air Force under procedures other than in paragraph (c) of this section.

• • • • • •

AUTHORITY: 10 U.S.C. 8012.

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,
Colonel, USAF, Chief, Legislative Division, Office of The Judge Advocate General.

[FR Doc.73-75 Filed 1-5-73;8:45am]

Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Chapter 1—Federal Procurement Regulations

TERMS AND CONDITIONS FOR TRANSPORTATION CONTRACTS

This amendment of the Federal Procurement Regulation prescribes procedures and contract provisions for freight transportation services. A new Subpart 1–7.7, Transportation Contracts, prescribes the contract clauses for use in transportation contracts. Certain clauses from Standard Forms 33 and 33A are incorporated by reference, while certain other clauses in those forms have been modified appropriately to apply more directly to transportation contracts. Subpart 1–16.5 is amended to prescribe forms for use in transportation contracts. A new Subpart 1–19.7, Supplemental Provisions (Transportation Contracts), is added which sets forth procedures and additional supplemental contract provisions and clauses covering situations peculiar to the procurement of transportation services.

PART 1–7—CONTRACT CLAUSES

The table of contents for Part 1–7 is amended to provide for the addition of new entries, as follows:

Subpart 1–7.7—Transportation Contracts

Sec.

1–7.700 Scope of subpart.
1–7.701 Solicitation of offers for transportation services.
1–7.701–1 Preparation of solicitations.
1–7.701–2 Representations, certifications, and acknowledgments in transportation contracts.
1–7.702 Solicitation instructions and conditions for transportation contracts.
1–7.703 Required clauses in transportation contracts.
1–7.703–1 Definitions.
1–7.703–2 Changes.
1–7.703–3 Extras.
1–7.703–4 Inspection.
1–7.703–5 Payments.
1–7.703–6 Assignment of claims.
1–7.703–7 Examination of records by Comptroller General.
1–7.703–8 Default.
1–7.703–9 Disputes.
1–7.703–10 Convict labor.
1–7.703–11 Equal opportunity.
1–7.703–12 Officials not to benefit.
1–7.703–13 Covenant against contingent fees.
1–7.703–14 Utilization of small business concerns.
1–7.703–15 Federal, State, and local taxes.
1–7.703–16 Utilization of concerns in labor surplus areas.
1–7.703–17 Contract not affected by oral agreement.
1–7.703–18 Service Contract Act of 1965.
1–7.703–19 Termination for convenience of the Government.
1–7.703–20 Moving contracts for the relocation of a Federal office.
1–7.704 [Reserved]

Subpart 1–7.7 is added, as follows:

Subpart 1–7.7—Transportation Contracts

§ 1–7.700 Scope of subpart.

This subpart sets forth clauses for use in formally advertised and negotiated contracts for freight transportation services (including local drayage) by rail, motor (including bus), domestic freight forwarder, and domestic water carriers (including inland coastwise, and intercoastal). This subpart does not apply to the procurement of transportation services by domestic or international air carriers or by international ocean carriers, and it does not apply to the procurement of transportation services which are contracted for by bill of lading or when negotiating for reduced rates under the authority of sections 22, 217(b), 306(c), and 405(c) of the Interstate Commerce Act, 49 U.S.C. 22, 317(b), 906(c), and 1005(c).

§ 1–7.701 Solicitation of offers for transportation services.

§ 1–7.701–1 Preparation of solicitations.

(a) When procurement of transportation services is by formal advertising, the solicitation shall be prepared in accordance with the requirements of Part 1–2 to the extent applicable and not otherwise inconsistent with the requirements set forth in this Subpart 1–7.7.

(b) When procurement of transportation services is by negotiation, the solicitation shall be prepared in accordance with Part 1–3 to the extent applicable and not otherwise inconsistent with the requirements set forth in this Subpart 1–7.7. In addition, the solicitation shall include the requirements of § 1–2.201 to the extent applicable and not otherwise inconsistent with Part 1–3 and this Subpart 1–7.7.

§ 1–7.701–2 Representations, certifications, and acknowledgments in transportation contracts.

In addition to the representations, certifications, and acknowledgments on the reverse of Standard Form 33, the solicitations covering transportation services shall contain the following certification to be executed by the offeror when regulated transportation is involved:

PERMITS, AUTHORITIES, OR FRANCHISES

The offeror certifies that he does [ ], does not [ ], hold authorization from the Interstate Commerce Commission or other cognizant regulatory body. If authorization is held, reference thereto is as follows:

(Name of regulatory body)

(Authorization No.)

The offeror shall furnish to the Government copies of such authorization prior to the movement of the material under any contract awarded, if requested. In addition, the various permits, franchises, licenses, and other authorities issued by State and local agencies in such instances shall be secured and maintaind at his expense.

V 38 - 4 JAN 8 73 XUM

§ 1–7.702 Solicitation instructions and conditions for transportation contracts.

The solicitation instructions and conditions set forth in Standard Form 33A shall be modified as follows:

(a) When the solicitation for transportation services is limited to local storage, drayage, and/or hauling services, the following paragraph, completed by the contracting officer, shall be substituted for paragraph 13, Contractor's Invoices:

CONTRACTOR'S INVOICES

The Contractor shall submit itemized and certified invoices (*Contracting Officer to insert time period*) direct to the Government agency ordering services under this contract or as otherwise instructed by that agency. Each invoice shall be annotated with the contract number.

(b) When the solicitation for transportation services is for line-haul services and may or may not include local storage, drayage, and/or hauling services in connection with such line-haul services, the following paragraph, completed by the contracting officer, shall be substituted for paragraph 13, Contractor's Invoices:

CONTRACTOR'S INVOICES

The Contractor shall submit invoices, Standard Form 1113, Public Voucher for Transportation Charges, in accordance with instruction 7 on the reverse of the original Government bill of lading. Invoices should be submitted to the "Charges to be billed to" address shown on the face of the Government bill of lading.

(c) The following paragraphs shall be included as additional solicitation instructions and conditions:

(1) *Financial statement.*

FINANCIAL STATEMENT

The offeror shall, upon request, promptly furnish the Government with a current certified statement of its financial condition and such data as the Government may request with respect to its operations, in order to determine its ability to perform under the contract and its financial responsibility. Failure to comply with such request will be a factor in considering possible rejection of the offer on responsibility grounds.

(2) *Familiarization with conditions.*

FAMILIARIZATION WITH CONDITIONS

The offeror shall acquaint itself with all available information regarding difficulties which may be encountered and the conditions, including safety precautions, under which the work must be accomplished under the contract. The offeror will not be relieved from assuming all responsibility for properly estimating the difficulties and the cost of performing the services required herein because of its failure to investigate the conditions or to become acquainted with all information concerning the services to be performed.

§ 1–7.703 Required clauses in transportation contracts.

The clauses set forth in this section shall be used in transportation contracts in the manner provided.

§ 1–7.703–1 Definitions.

Insert the clause set forth in § 1–7.101–1.

§ 1–7.703–2 Changes.

CHANGES

The Contracting Officer may, at any time, by a written order and without notice to the sureties, if any, make changes within the general scope of the contract in any one or more of the following: (a) Specifications, (b) work or services, (c) the place of origin, (d) the place of delivery, (e) tonnage to be shipped, or (f) amount of Government-furnished property. If any such change causes an increase or decrease in the cost of, or in the time required for, performance of any part of the work or services under this contract, whether changed or not changed by any such order, an equitable adjustment shall be made in the contract price, or time of performance, or both, and the contract shall be modified in writing accordingly. Any claim by the Contractor for adjustment under this clause must be asserted within 30 days from the date of receipt by the Contractor of the notification of change: *Provided, however,* That the Contracting Officer, if he decides that the facts justify such action, may receive and act upon any such claim asserted at any time prior to final payment under this contract. Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes." However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

§ 1–7.703–3 Extras.

Insert the clause set forth in § 1–7.101–3.

§ 1–7.703–4 Inspection.

INSPECTION

All services, facilities, and equipment shall be subject to inspection and test by representatives of the Government. The Contractor shall, at all reasonable times, allow inspectors and other Government personnel free access to its facilities, equipment, and operations for this purpose, and shall provide such reasonable facilities and assistance as may be required for this work.

§ 1–7.703–5 Payments.

PAYMENTS

The Contractor shall be paid, upon the submission of proper invoices or vouchers, the amount due for services rendered and accepted, less deductions, if any, as herein provided. Submission of invoices should be in accordance with the requirements set forth in paragraph 13, Standard Form 33A, as modified herein.

§ 1–7.703–6 Assignment of claims.

Insert the clause set forth in § 1–30.703 under the conditions contained therein.

§ 1–7.703–7 Examination of records by Comptroller General.

Insert the clause set forth in § 1–7.101–10 under the conditions contained therein.

§ 1–7.703–8 Default.

DEFAULT

(a) The Government may, subject to the provisions of paragraph (c), below, by written notice of default to the Contractor, terminate the whole or any part of this contract in any one of the following circumstances:

(1) If the Contractor fails to pick up the commodities or to perform the services, including delivery services, within the time specified herein or any extension thereof; or

(2) If the Contractor fails to perform any of the other provisions of this contract, or so fails to make progress as to endanger performance of this contract in accordance with its terms, and in either of these two circumstances does not cure such failure within a period of (*time to be inserted*), or such longer period as the Contracting Officer may authorize in writing, after receipt of notice from the Contracting Officer specifying such failure.

(b) In the event the Government terminates this contract in whole or in part as provided in paragraph (a) of this clause, the Government may procure, upon such terms and in such manner as the Contracting Officer may deem appropriate, services similar to those so terminated, and the Contractor shall be liable to the Government for any excess costs of such similar services: *Provided, however,* That the Contractor shall continue the performance of this contract to the extent not terminated under the provisions of this clause.

(c) Except with respect to defaults of subcontractors, the Contractor shall not be liable for any excess costs if the failure to perform the contract arises out of causes beyond the control and without the fault or negligence of the Contractor. Such causes may include, but are not restricted to, acts of God or of the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather; but in every case the failure to perform must be beyond the control and without the fault or negligence of the Contractor. If the failure to perform is caused by the default of a subcontractor, and if such default arises out of causes beyond the control of both the Contractor and subcontractor, and without the fault or negligence of either of them, the Contractor shall not be liable for any excess costs for failure to perform, unless the services to be furnished by the subcontractor were obtainable from other sources in sufficient time to permit the Contractor to meet the required delivery schedule.

(d) If, after notice of termination of this contract under the provisions of this clause, it is determined for any reason that the Contractor was not in default under the provisions of this clause, or that the default was excusable under the provisions of this clause, the rights and obligations of the parties shall, if the contract contains a clause providing for termination for convenience of the Government, be the same as if the notice of termination had been issued pursuant to such clause. If, after notice of termination of this contract under the provisions of this clause, it is determined for any reason that the Contractor was not in default under the provisions of this clause, and if this contract does not contain a clause providing for termination for convenience of the Government, the contract shall be equitably adjusted to compensate for such termination and the contract modified accordingly; failure to agree to any such adjustment shall be a dispute concerning a question of fact within the meaning of the clause of this contract entitled "Disputes."

(e) In case of termination while the Contractor has the Government goods covered by this contract in its possession, the Contractor shall surrender the goods to the Government or its agent on demand.

(f) The rights and remedies of the Government provided in this clause shall not be exclusive and are in addition to any other rights and remedies provided by law or under this contract.

(g) The term "subcontractor" as used in this clause means subcontractor at any tier.

§ 1–7.703–9 Disputes.

Insert the clause set forth in § 1–7.101–12.

§ 1–7.703–10 Convict labor.

Insert the clause set forth in § 1–12.203.

§ 1–7.703–11 Equal opportunity.

Insert the clause set forth in § 1–12.803–2 under the conditions contained in § 1–12.803–1.

§ 1–7.703–12 Officials not to benefit.

Insert the clause set forth in § 1–7.101–19.

§ 1–7.703–13 Covenant against contingent fees.

Insert the clause set forth in § 1–1.503.

§ 1–7.703–14 Utilization of small business concerns.

Insert the clause set forth in § 1–1.710–3(a) under the conditions and in the manner prescribed therein.

§ 1–7.703–15 Federal, State, and local taxes.

Insert either the clause in § 1–11.401–1 or the clause in § 1–11.401–2 and, when appropriate, insert the supplementary clause in § 1–11.401–3(a), in accordance with the conditions contained in those sections.

§ 1–7.703–16 Utilization of concerns in labor surplus areas.

Insert the clause set forth in § 1–1.805–3(a) under the conditions and in the manner prescribed therein.

§ 1–7.703–17 Contract not affected by oral agreement.

CONTRACT NOT AFFECTED BY ORAL AGREEMENT

No oral statement of any person shall modify or otherwise affect the terms, conditions, or specifications herein stated. All modifications to the contract must be made in writing by the Government's Contracting Officer or his authorized representive.

§ 1–7.703–18 Service Contract Act of 1965.

Insert either the clause set forth in § 1–12.904–1 or the clause in § 1–12.904–2 in accordance with the conditions contained in those sections.

§ 1–7.703–19 Termination for convenience of the Government.

Insert either the clause set forth in § 1–8.705–1 under the conditions prescribed in § 1–8.700–2(a)(2).

§ 1–7.703–20 Moving contracts for the relocation of a Federal office.

To insure that a prospective contractor is properly authorized and competent to perform a moving contract involving the relocation of a Federal office, whether a move of this type takes place between States including the District of Columbia (i.e., an interstate move), or wholly within the borders of one State or the District of Columbia (i.e., an intrastate move), the following provisions shall be included in each such invitation and in the resulting contract:

PERFORMANCE CAPABILITY

(a) If the move specified herein is to be performed by the Contractor as a carrier within the borders of more than one State, including the District of Columbia (i.e., an interstate move), the Contractor shall have obtained and hold appropriate and current operating authority from the Interstate Commerce Commission.

(b) If the move specified herein is to be performed by the Contractor as a carrier wholly within the borders of one State or the District of Columbia (i.e., an intrastate move), the Contractor shall, when required by the State or the District of Columbia in which the move is to take place, have obtained and hold appropriate and current operating authority from such jurisdiction, in the form of a certificate, permit, or equivalent license to operate, or if no such authority to operate is required by the State or the District of Columbia in which the move is to take place, then the Contractor as carrier shall maintain facilities, equipment, and a business address within the jurisdiction in which the move is to take place: *Provided,* That if the move is to originate and/or terminate within an area of one State, or the District of Columbia, which comprises a part of a recognized Commercial Zone (see 49 CFR Part 1048), whose boundaries encompass portions of more than one State or the District of Columbia, it shall be sufficient if the Contractor as carrier maintains facilities, equipment, and a business address within the Commercial Zone and holds appropriate operating authority, if required, from the jurisdiction within which he maintains such facilities, equipment, and business address.

(c) If the move specified herein will not be performed by the Contractor as carrier it must be performed for the Contractor by a carrier operating under a subcontract with the Contractor. In such instance, the Contractor shall not be subject to the requirements of paragraphs (a) and (b), above, but it shall be the responsibility of the Contractor to require and insure that the subcontractor carrier complies with such requirements in every respect.

(d) There shall be compliance with the applicable requirements of this clause at least 14 days before the date on which performance of the contract shall commence under the terms and conditions herein specified: Except that, if the period from the date of award of the contract to the date that performance shall commence is less than 28 days, the Contractor need only comply with the applicable requirements of this clause midway between the time of award and the time of commencement of performance.

§ 1–7.704 [Reserved]

PART 1–16—PROCUREMENT FORMS

Subpart 1–16.5—Forms for Advertised and Negotiated Nonpersonal Service Contracts (Other Than Construction and Architect-Engineer Contracts)

1. Section 1–16.500 is revised, as follows:

§ 1–16.500 Scope of subpart.

This subpart prescribes forms for use in advertised and negotiated transportation and other nonpersonal service contracts (other than construction and architect-engineer contracts).

2. Section 1–16.501 is revised, as follows:

§ 1–16.501 Contract forms.

(a) *Transportation contracts.* Pending issuance of standard forms for use in those contracts for freight transportation services enumerated in § 1–7.700, Standard Form 33, Solicitation, Offer, and Award, and Standard Form 33A, Solicitation Instructions and Conditions (both illustrated at Subpart 1–16.9), shall be used for transportation contracts; however, the forms shall be modified to include the clauses prescribed for use by Subpart 1–7.7. In addition, the clauses prescribed in § 1–7.703 shall be assembled under the heading "General Provisions (Transportation Contracts)," and made an attachment to Standard Form 33. Standard Form 32, General Provisions (Supply Contract), referred to in Block 9 on the face of Standard Form 33, should be cited as not being applicable. The appropriate information, terms, and conditions prescribed in Subpart 1–19.7 shall be assembled separately under the heading of "Supplemental Provisions (Transportation Contracts)" and made an attachment to Standard Form 33. Titles for the subheadings, paragraphs, and subparagraphs in the supplemental clauses shall be those of the applicable subsections, paragraphs, and subparagraphs in Subpart 1–19.7.

(b) *Other nonpersonal service contracts.* The forms prescribed in §§ 1–16.101 and 1–16.201 for advertised and negotiated supply contracts are suitable for use in many advertised and negotiated nonpersonal service contracts (other than transportation, construction, and small purchases). Agencies are encouraged to require the use of these forms in advertised and negotiated nonpersonal service contracts where appropriate and practicable.

PART 1–19—TRANSPORTATION

The table of contents for Part 1–19 is amended by revising the entry for § 1–19.110 and adding a new Subpart 1–19.7 as follows:

Sec.

1–19.110 [Reserved]

Subpart 1–19.4—1–19.6 [Reserved]

Subpart 1–19.7—Supplemental Provisions (Transportation Contracts)

1–19.700 Scope of subpart.
1–19.701 General.
1–19.702 Supplemental provisions.
1–19.702–1 Scope and duration of contract.
1–19.702–2 Transportation service requirements.
1–19.702–3 Determination of weights.
1–19.702–4 Liability of contractor.
1–19.702–5 Insurance requirements.
1–19.702–6 Annotation and distribution of shipping documents.
1–19.702–7 Additional contractor responsibilities.

V 38 - 4 JAN 8 73 J XUM

Sec.
1–19.702–8 Government responsibilities.
1–19.702–9 Inspection of shipping and receiving facilities.
1–19.702–10 Rates and charges.

Section 1–19.110 is revised to delete the caption and the text and to indicate that the section is reserved.

§ 1–19.110 [Reserved]

Subpart 1–19.7 is added, as follows:

Subpart 1–19.7—Supplemental Provisions (Transportation Contracts)

§ 1–19.700 Scope of subpart.

This subpart sets forth supplemental provisions for transportation contracts entered into either by formal advertising or by negotiation (for other than small purchases as defined in Subpart 1–3.6).

§ 1–19.701 General.

(a) In addition to the required clauses set forth in Subpart 1–7.7, the solicitation and resultant contract shall contain a separate attachment to be entitled "Supplemental Provisions (Transportation Contracts)," hereafter referred to as "Supplemental Provisions" which provide (1) a clear and accurate description of the services required, (2) a basis for submitting rates or charges, and (3) the basis on which bids or proposals will be evaluated.

(b) The supplemental provisions shall be in such terms as to permit full and free competition among all modes of transportation, consistent with the law and safety regulations. Circumstances may exist which will limit competition to a particular mode or method of transportation. For example, the movement of certain dangerous commodities or highly specialized or scientific equipment or paraphernalia might require the services of specialized carriers. Provisions which tend to limit competition may be used where the need for specalized services is established, provided: (1) The requirements for service cannot reasonably be met in any other manner, and (2) a written justification for so limiting competition is included in the contract file.

(c) The information, terms, and conditions set forth in §§ 1–19.702–1 through 1–19.702–10 shall be included in the supplemental provisions for the procurement of transportation services, to the extent that they are applicable. Additional information, terms, and conditions, may be included, but only when such additions do not conflict with other contract provisions.

§ 1–19.702 Supplemental provisions.

§ 1–19.702–1 Scope and duration of contract.

(a) A provision shall be included to indicate the scope of the contract and the length of time the contract will remain in effect. The following points shall be covered by the supplemental provisions used, varying as necessary in accordance with the circumstances of each case.

(1) *Origin of shipments.* Full details shall be furnished regarding the location of the property to be transported. For example, the name of the shipper and the street address (not post office box), city, and State where the shipper is located, when the location is definite; a detailed description of the area, including boundaries, when indefinite or multiple shippers are involved, as in the case of drayage contracts and group movements of Government employees' household goods.

(2) *Destination of shipments.* Full details on the delivery point or points shall be included in each solicitation. For example, the name of the consignee and the street address (not post office box), city, and State where the consignee is located, when the destination is definite; a detailed description of the area, including boundaries, when indefinite or multiple consignees are involved.

(3) *Description of property.* The solicitation must contain a clear and concise description of the property to be transported, using freight classification descriptions, when available, or nontechnical descriptions when classification descriptions are unavailable. The solicitation shall include, when appropriate, a description of packing (i.e., whether domestic, export, etc.), dimensions and/or weight of items of unusual size, identification of items of unusual value, and any other details necessary to insure that offers will be submitted on a realistic basis. Particularly with respect to the supplemental provisions for drayage contracts, any commodities or types of shipments which would be subject to exclusion under the contract should be clearly identified by a separate clause entitled "Exclusion," for example:

EXCLUSION

Excluded from the scope of this contract are shipments which can be more advantageously or economically moved via parcel post or small package carrier, shipments of unusual value, explosives and other dangerous articles, household goods, commodities in bulk, commodities injurious or contaminating to other lading, and shipments which the Government may elect to move in Government-owned vehicles.

(4) *Quantity.* A statement of the actual weight, or a reasonably accurate estimate of the weight, of property to be transported is required. If the services are required for an extended period of time, a schedule should be provided of the actual or estimated tonnage or number of items which are to be moved during the week, month, or other appropriate period of time. In the case of group movements of household goods, an estimate of the aggregate weight and the basis for determining the aggregate weight shall be provided. Unless the services are required for a one-time move, or the requirements are known to be irrevocable, the following clause shall be included:

ESTIMATED WEIGHT

The above estimated weight is not to be construed as a guarantee of actual weight, as the Government does not guarantee any particular volume of traffic described herein. However, to the extent services are required, as described herein, and in accordance with the terms of this contract, orders for such services will be placed with the carrier awarded any contract hereunder.

(5) *Duration of contract.* A statement shall be included with respect to the period of time during which services will be required by the Government, either by establishing an expiration date (month, day, and year) or by stating the period of time during which the contract will remain in effect (usually commencing from the date of award).

(b) When the scope or duration of a contract is subject to exceptions, such exceptions shall be clearly stated. For example, when the contractor will not be obligated to transport all shipments tendered by the Government, regardless of size, the supplemental clauses shall indicate minimum and maximum weights of shipments, below and above which the contractor will not be required to provide services.

§ 1–19.702–2 Transportation service requirements.

(a) All service requirements shall be listed, so that offers can be prepared on a realistic basis. Care should be taken to make a distinction between what would be considered normal services and those services which would be considered "extra." If "extra" services such as inside delivery, are required only occasionally, the supplemental provisions shall so indicate and provide for separate charges for such services. The following details shall be provided:

(1) *Pickup service.* The solicitation shall contain a statement of the days of the week and the hours of the day during which pickup service will be expected and shall specify what advance notice will be furnished to the contractor that service is required. If special, emergency, or priority shipments will be involved, the shorter time for advance notice shall also be stated.

(2) *Delivery service.* The solicitation shall set forth the maximum time allowed for accomplishing delivery, and the following clause shall be added:

PICKUP AND DELIVERY SERVICE

Pickup and delivery services under this contract must be performed within the period set forth herein. Failure to comply may result in termination of the Contractor's right to proceed by reason of default. (See the "Default" clause in the General Provisions (Transportation Contracts) attached to Standard Form 33.)

(3) *Type of equipment.* The type and size of equipment shall be specified when appropriate. Otherwise, a statement to the effect that the contractor shall furnish clean and sound closed-type equipment of sufficient size to accommodate the shipment shall be included.

(b) Under certain types of transportation contracts, particularly for group movements of Government employees' household goods and personal effects, additional services, which otherwise would be considered accessorial services, are required to be performed by the contractor. Such additional services shall be specified, and the following clauses, in substantially the same language, shall be used as applicable:

SUPERVISION, LABOR, MATERIALS, AND EQUIPMENT

The Contractor shall furnish adequate supervision, labor, materials, supplies, and equipment necessary to perform all the services contemplated under this contract in an orderly, timely, and efficient manner.

PACKING AND/OR CRATING AND PADDING

The Contractor shall perform all of the packing and/or crating and padding necessary for the protection of the property to be transported. All packing containers, including, but not limited to barrels, boxes, wardrobes, and cartons; all crating materials; and all padding materials and equipment, shall be furnished by the Contractor. The Contractor shall also furnish or cause to be furnished, when necessary, padding or other protective material for the interior of the buildings, including elevators, from and to which the property shall be moved under this contract. All containers and materials shall be clean and of quality sufficient to insure protection of the property.

DISASSEMBLING AND REASSEMBLING OF PROPERTY AND PREPARING APPLIANCES

The disassembling of property, such as beds and sectional bookcases, and the preparing of appliances, such as washers, driers, and record players, for shipment shall be performed by the Contractor. When it is necessary to disassemble property for shipment, such property shall be reassembled by the Contractor upon delivery at the new location.

UNPACKING AND/OR UNCRATING AND PLACEMENT OF PROPERTY

The Contractor shall perform all unpacking and/or uncrating of property which was packed and/or crated for movement under the provisions of this contract. The Contractor shall also place the property in the new location as instructed by the owner of the property or his authorized representative and shall remove all packing and similar or related material from the premises as requested by the owner.

§ 1–19.702–3 Determination of weights.

(a) The method of determining weights of shipments will vary, depending upon the commodities to be transported, the type of service required, whether shipments will move in load or less-than-load lots, and other factors. The following clauses concerning the determination of the weights of shipments of other than household goods and office furniture and equipment shall be used as applicable, depending on whether the shipment is to move on agreed weights or whether the contractor is responsible for establishing the net weights:

AGREED WEIGHT

The shipping activity will determine the weight of each shipment. Such weight will be shown on the covering bill of lading and will be accepted by the Contractor as the agreed weight.

NET WEIGHTS

The net weight of the shipment shall be determined by deducting the tare weight of the vehicle (determined by having the empty vehicle weighed by a certified weighmaster, on a certified scale, with a full tank of fuel) from the gross weight of the vehicle (determined by having the loaded vehicle weighed by a certified weighmaster, on a certified scale, with a full tank of fuel).

(b) When the contract is for group movements of Government employees' household goods and for relocation of Government offices, the contractor is responsible for determining the net weight of the shipments. The following provisions shall be used as applicable:

FULL LOADS

The net weight of the shipment shall be determined by deducting the tare weight of the vehicle (determined by having the empty vehicle weighed by a certified weighmaster, on a certified scale, with the driver and a full tank of fuel, and all blankets, pads, chains, dollies, hand trucks, and all other necessary equipment inside the vehicle, but without the crew) from the gross weight of the vehicle (determined by having the fully loaded vehicle weighed by a certified weighmaster, on a certified scale, with the driver and a full tank of fuel, but without the crew, prior to arrival at destination).

PART LOADS

The net weight of the first part load shall be determined in the same manner as specified for a full load. The net weight of the second part load shall be determined by using as the tare weight of the vehicle the gross weight of the vehicle containing the first part load and deducting the weight from the new gross weight (determined by having the loaded vehicle weighed again, in the same manner as specified for the full load). The same procedure will apply for each succeeding part load.

SCALES NOT AVAILABLE

If certified scales are not available at origin, at any point en route, or at destination, a constructive weight based on 7 pounds per cubic foot of properly loaded van space may be used as the net weight of the shipment. Such constructive weight also may be used for a part load when its weight could not be obtained at origin, en route, or at destination, without first unloading it or other part loads being transported in the same vehicle.

§ 1–19.702–4 Liability of contractor.

The liability of the contractor for loss, damage, and injury to persons and property during the course of performing under the contract shall be spelled out in detail. Where no specific provisions are incorporated, the usual measure of liability is set forth in section 20(11) of the Interstate Commerce Act, 49 U.S.C. 20 (11). The following are examples of provisions which are to be used for the type of service indicated:

(a) *Transportation of property other than household goods.* The following clause shall be used when liability for the property is not limited to a released or declared value. When the contractor's liability for property is limited to declared or released value only so much of the clause as relates to property shall be used. The clause set forth in (b), below, shall be added with any references to "property" and "property damage" deleted.

TRANSPORTATION OF PROPERTY OTHER THAN HOUSEHOLD GOODS

The Contractor shall assume full liability for any and all property lost or damaged in the movement covered by this contract, except when such loss or damage arises out of causes beyond the control of, and without the fault or negligence of, the Contractor. Such causes may include, but are not restricted to, acts of God or the public enemy, the authority of law, or the act or default of the shipper; but in every case the loss or damage must be beyond the control of, and without the fault or negligence of, the Contractor. In addition, the Contractor shall be responsible for and reimburse the U.S. Government for any and all damage caused by the Contractor, his employees, or his agents to the interior or exterior of the buildings from and to which the property will be moved. Also, the Contractor shall save harmless and indemnify the Government, and assume responsibility for any and all damage or injury to persons or property resulting from the use or operation of his vehicles or other equipment by, or the action of, the Contractor, his employees, or his agents, in the performance of this contract. The Government shall in no event be liable or responsible for damage or injury to persons or property resulting from the use or operation of any vehicle or other equipment by, or the action of, the Contractor, his employees, or his agents, in performing under this contract.

(b) *Transportation of household goods.* The following clause applies to damage or injury to property other than the household goods being transported. A separate clause is required to establish the extent to which the contractor will be liable for loss or damage to the household goods.

TRANSPORTATION OF HOUSEHOLD GOODS

The Contractor assumes responsibility for all damage or injury to persons or property occasioned through the use and operation of his vehicles or other equipment by or the action of the Contractor, his employees, and agents, and the Contractor at his own expense shall maintain adequate public liability and property damage insurance during the continuance of this contract, insuring himself against all claims for injury or damage. The Contractor shall also maintain Workmen's Compensation and other legally required insurance with respect to his own employees and agents. The Government shall in no event be liable or responsible for damage or injury to any person or property occasioned through the use or operation of any vehicles or other equipment by or the action of the Contractor, his employees, and agents in performing under this contract.

§ 1–19.702–5 Insurance requirements.

The amount of insurance the contractor shall be required to maintain will depend upon the type of service required and the value of the property to be transported. Except when the shipments move under rates subject to released valuation or declared value, the contractor shall be required to maintain sufficient cargo insurance to cover the value of each vehicle load. In every instance where the contract is with a motor carrier, the contractor shall be required to carry an appropriate amount of vehicular liability insurance. In addition, all contractors shall be required to carry an appropriate amount of general public liability insurance and any other insurance required by law. The clauses set forth below shall be used in substantially the same language (the appropriate amounts and the

V 38 - 4 JAN 8 73 XUM

name and address of the agency to be inserted by the contracting officer at the time the solicitation is issued):

CARGO INSURANCE

The Contractor, at his own expense, agrees to provide and maintain, during the continuance of this contract, cargo liability insurance in the amount of $------ per vehicle to cover the value of property on each vehicle and in the amount of $------ to cover the total value of the property in the shipment. All insurance shall be written on companies acceptable to the (insert name of agency) and policies shall include such terms and conditions as may be required by the (insert name of agency). As evidence of insurance maintained, a complete duplicate certified copy of the cargo liability insurance policy or polices shall be furnished to the (insert name of agency). Evidence of acceptable cargo insurance must be furnished prior to commencing operations under this contract. Each cargo insurance policy shall include the following provision:

It is a condition of this policy that the Company shall furnish written notice to the (insert name of agency), at the address shown on the face sheet of this contract, 30 days in advance of the effective date of any reduction in or cancellation of this policy.

A complete duplicate certified copy of any renewal policy shall be furnished to the (insert name of agency) not less than 15 days prior to the expiration of any current policy on file with the (insert name of agency).

OTHER INSURANCE

The Contractor, at his own expense, agrees to maintain, during the continuance of this contract, vehicular liability and general public liability insurance with limits of liability for bodily injury of not less than $------ for each person and $------ for each occurrence and property damage limits of liability of not less than $------ for each accident and $------ in the aggregate. The Contractor also agrees to maintain Workmen's Compensation and other legally required insurance with respect to his own employees and agents.

§ 1–19.702–6 Annotation and distribution of shipping documents.

The contractor's responsibilities with respect to annotating and distributing shipping documents shall be set forth, in detail, in accordance with the provisions of the General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies, title 5, Transportation, to the extent such provisions are applicable. Also, the contracting agency's requirements and, when appropriate, the consignee's requirements shall be set forth. Of particular importance is the cross-referencing of bills of lading in mass movements of property made available to the contractor at one time, so that the Government will receive the benefit of the applicable volume rates.

§ 1–19.702–7 Additional contractor responsibilities.

Additional responsibilities of the contractor will vary, depending upon the commodities to be transported, the type of service required, whether shipments will move in load or less-than-load lots, and other pertinent matters. The following clauses, to the extent they are appropriate, shall be included in the supplemental provisions:

RECEIPT OF SHIPMENT

The Contractor will diligently count, examine, and receipt for all property tendered for shipment and make appropriate written exception for any and all property not in apparent good order.

LOADING AND UNLOADING

Unless otherwise specified herein to cover store-door or inside delivery, loading and unloading of shipments will be performed by the Contractor at no additional expense to the Government. The Government or its agent will place or receive freight at the tailgate of the Contractor's vehicle. Tailgate delivery, for purposes of this contract, is defined as that which enables a forklift truck or similar equipment, with operator only, to place or remove cargo from the tailgate of Contractor's vehicle.

BLOCKING AND BRACING

When loading is the responsibility of the Contractor, the Contractor shall perform all shoring, blocking, and bracing. Dunnage shall be provided by, and at the expense of, the Contractor.

RETURN OF UNDELIVERED FREIGHT

When, through no fault of the Contractor, a shipment cannot be delivered, the Contractor shall contact the shipper for disposition instructions. If such shipment is ordered returned to the origin point, the charges assessed for the return trip shall be the same as the charges assessed for the outbound trip. A record will be maintained of material which, through no fault of the Contractor, could not be delivered and is returned to the shipper. If, at a future date, such returned material is determined to be related to a claim against the Contractor, the claim will be adjusted accordingly. If, on the other hand, through the fault of the Contractor, a shipment cannot be delivered, the shipment shall be returned to the origin point and no charge shall be assessed by the Contractor; however, any charges incurred for redelivery, which are in excess of the charges that would have been incurred under this contract, shall be for the Contractor's account in accordance with the "Default" clause in the General Provisions (Transportation Contracts) attached to Standard Form 31.

§ 1–19.702–8 Government responsibilities.

Normally, the Government has certain responsibilities which have a direct bearing on the contractor's performance under the contract, including giving notice to the contractor of dangerous and inherent vices of the property, to insure that such shipments are properly placarded. Therefore, such responsibilities shall be made a part of the supplemental provisions. The following clauses shall be used as appropriate:

ADVANCE NOTIFICATION

The Government will notify the Contractor —— hours in advance as to the number of pieces and weight of all normal shipments and the time the shipment will be available for pickup. On other than normal shipments the Government will furnish such additional information, such as dimension of oversized pieces, etc., as necessary to determine the amount of equipment and/or manpower needed to perform the required services.

GOVERNMENT EQUIPMENT

The Government will provide forklifts or other heavy lifting equipment at (insert origin, destination, or both) to assist in (insert loading, unloading, or both), when required.

SUPERVISION AND MARKING

The agency being moved will tag or mark property, showing floor, room number, and location where property is to be placed within the new building. The agency will provide sufficient personnel to supervise and direct Contractor's personnel in the placement of the property at destination.

§ 1–19.702–9 Inspection of shipping and receiving facilities.

To insure the receipt of realistic bids, inspection of the shipping and receiving facilities should be permitted and should be encouraged. Therefore, a schedule shall be provided showing the dates (and hours, if appropriate) when the shipping facilities at origin and the receiving facilities at destination will be available for inspection by prospective bidders. Also, if appropriate, the supplemental clauses shall include the names, addresses, titles, and telephone numbers of the Government representatives to be contacted at origin and destination to make arrangements for inspecting the facilities.

§ 1–19.702–10 Rates and charges.

(a) A provision shall be included permitting the offeror to insert prices for items bid upon in accordance with the appropriate basis or bases set forth below. Such basis may be on an hourly rate, a rate per specified unit of weight, a total charge for all services required, or on a combination of factors. Certain other requirements relating to rates, as set forth below, shall be considered in connection with each solicitation, and the indicated provisions shall be used under the specified conditions.

(1) The following clause shall be used in all solicitations:

CHARGES

In no event are charges to be assessed under this contract in excess of charges based on the Contractor's lowest regular applicable rate available to the general public or in excess of charges based on rates otherwise tendered to the Government by the Contractor for the same type of service.

(2) When there are various types of services to be provided under one contract and the basis for assessing charges varies with the service, the supplemental provisions shall set forth the basis for submitting bids or proposals on each type of service.

(3) Whenever rates are requested on an hourly basis, a provision shall be made for charging for fractions of an hour; for example, a period of 30 minutes or less would be charged at one-half the hourly rate, and a period of more than 30 minutes but less than an hour would be charged at the full hourly rate.

(4) When shipments will vary in weight; e.g., under 1,000 pounds to over 40,000 pounds, rates shall be requested on a graduated basis, and an appropriate reference shall be made to the table of graduated weights which would be provided in the section in the supplemented provisions entitled "Rates and charges."

(5) The supplemental provisions shall set forth the basis on which the rates and/or charges will be evaluated; i.e., the formula to be used by the contracting officer to determine the lowest overall price quoted or offered. When multiple origins and/or destinations are involved, and the quantities or weights to be shipped between each origin and destination cannot be redetermined, estimated quantities or weights shall be established for the purpose of evaluating bids or proposals and an appropriate clause, in substantially the following language, shall be included:

ESTIMATED WEIGHT

For the purpose of evaluating bids, and for no other purpose, the following estimated quantities or weights will be considered as the quantities or weights to be shipped between each origin and destination listed: (Insert origin, destination, and estimated quantity or weight.)

(6) When procurement of transportation services is by negotiation, provision shall be made for accepting the most favorable proposal without further negotiation. A clause, in substantially the following language, shall be included:

ACCEPTANCE OF LOWEST OFFER

If it is determined by the Government that the most favorable proposal received in response to this request is fair and reasonable, award may be made to the carrier submitting such proposal without further negotiation. Accordingly, proposals should be submitted on the most favorable terms, from both a price and technical standpoint, which the offeror can initially submit to the Government.

(7) When it is anticipated that labor, in addition to that of the driver, will be required for loading or unloading shipments which, because of bulk or weight, are beyond the ability of the driver alone to handle, or when other circumstances will require services of the contractor which are not included in the basic rate, the conditions under which payment will be made for additional services shall be stated.

(b) When a solicitation involves multiple origins and/or destinations, detailed information shall be provided as to whether rates should be quoted for all origins and destinations or whether rates can be quoted for specific groups of origins and/or destinations.

(c) When multiple shipments will be tendered at one time from one origin to two or more consignees at the same destination or to various destinations along the one route, provision shall be made for charging the rate applicable to the aggregate weight; and, if otherwise appropriate, when more than one destination is involved, provision shall be made for payment of a stopoff charge for each of the intermediate destinations. The following clauses shall be included, as applicable:

MULTIPLE SHIPMENTS

When multiple shipments are tendered at one time to the Contractor for movement from one origin to multiple consignees at the same destination, the rate charged for each shipment will be the rate applicable to the aggregate weight.

STOPPING IN TRANSIT FOR PARTIAL UNLOADING

When multiple shipments are tendered at one time to the Contratcor for movement from one origin to two or more consignees along the route between the origin and the last destination, the rate charged will be the rate applicable to the aggregate weight, plus a charge of $---------- for each shipment unloaded at an intermediate point en route to the last destination.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This amendment is effective with respect to solicitations issued after January 29, 1973, but may be observed earlier.

Dated: December 29, 1972.

ARTHUR F SAMPSON,
Acting Administrator of General Services

[FR Doc.73-323 Filed 1-5-73;8:45 am]

Title 45—PUBLIC WELFARE

Subtitle A—Department of Health, Education, and Welfare, General Administration

PART 82—PROCEDURAL RULES FOR PROCEEDINGS CONDUCTED PURSUANT TO ENFORCEMENT OF EXECUTIVE ORDER 11246, AND RULES, REGULATIONS, AND ORDERS THEREUNDER

Pursuant to delegated authority and in accordance with Executive Order 11246, and rules, regulations, and orders thereunder, the Secretary of Health, Education, and Welfare hereby adopts the following amendments and revisions to Part 82 of Title 45 of the Code of Federal Regulations. These rules are not subject to the public participation procedures of the Administrative Procedure Act, 5 U.S.C. 553, nor are they subject to the Secretary's statement of policy concerning public participation in rule making, 32 FR 2532 (Feb. 5, 1971). Therefore, these rules shall be immediately effective upon publication in the FEDERAL REGISTER (1–8–73).

1. Section 82.2 is amended to read as follows:

§ 82.2 Scope of rules.

These rules govern the practice and procedure for proceedings conducted by the Department precedent to the imposition of sanctions under section 209(a)(5) and (6) of Executive Order 11246, for violations of Executive Order 11246, for violations of Executive Order 11246, and rules, regulations, and orders thereunder.

2. Section 82.4(b) is amended to read as follows:

§ 82.4 Definitions.

• • • • • •

(b) "Notice" means notice of proposed cancellation, termination, or ineligibility.

• • • • • •

3. Section 82.6(a)(3) is amended to read as follows:

§ 82.6 Participation by interested persons.

(a) • • •

(3) Any person or organization wishing to participate as a party under this paragraph shall file and serve upon the hearing officer and all parties a petition within 14 days after the notice has been filed. Such petition shall concisely state: (i) Petitioner's interest in the proceeding, (ii) who will appear for petitioner, (iii) the issues on which petitioner wishes to participate, and (iv) whether petitoner intends to present witnesses.

• • • • • •

4. Section 82.10 is amended to read as follows:

§ 82.10 Service-how made.

Service shall be made by personal delivery of one copy to each person to be served, or by mailing by first-class mail, properly addressed with postage prepaid. The notice shall be served upon the last known address of the respondent by registered mail, return receipt requested.

5. Section 82.14 is revised to read as follows:

§ 82.14 Notice of proposed cancellation, termination or incligibility.

Proceedings are commenced by the mailing of a written notice of proposed cancellation, termination, or ineligibility to the last known address of the respondent by registered mail, return receipt requested. The notice shall contain a concise jurisdictional statement, a short and plain statement of the matters furnishing a basis for the imposition of sanctions, an enumeration of the sanctions being requested, and a citation of the provisions of the order and regulations pursuant to which the requested action may be taken. The notice shall also indicate that respondent may request a hearing on the matters alleged.

6. Section 82.15 is revised to read as follows:

§ 82.15 Answer to notice.

(a) Within fourteen (14) days from receipt of the notice, respondent may file with the hearing officer, or if no hearing officer has been designated, with the Reviewing Authority, an answer to the notice and may request a hearing. The request for a hearing shall be included as a separate paragraph of the answer.

(b) The answer shall admit or deny specifically and in detail the matters set forth in each allegation of the notice unless respondent is without knowledge, in which case the answer shall so state, and the statement shall be deemed a denial. Matters alleged as affirmative defenses shall be separately stated and numbered.

(c) If respondent fails to file an answer, request a hearing, or otherwise formally contest the allegations in the notice within the 14-day period following receipt of the notice, the matters

V38-4 JAN 8 73 XUM

alleged in the notice are deemed admitted and respondent's opportunity for hearing is deemed waived. The Director, Office for Civil Rights, may then cancel, suspend or terminate any one or more contracts or subcontracts, or parts thereof, held by respondent, or enter an order declaring such contractor or subcontractor ineligible for further contracts, subcontracts, or extensions or other modification of existing contracts, until the contractor or subcontractor has satisfied the Secretary of Labor that it has established and will carry out personnel and employment policies and practices in compliance with the order.

(d) In response to respondent's request for a hearing, respondent shall be advised by the reviewing authority that a hearing officer has been designated and that the matter has been set down for hearing at a stated time and place. The time and place so fixed shall be reasonable and shall be subject to change for cause.

7. Section 82.22 is amended to read as follows:

§ 82.22 Evidentiary purpose.

The hearing is directed to receiving factual evidence and expert opinion testimony related to the issues in the proceeding. A hearing for the reception of evidence will be held only in case issues of fact must be resolved in order to determine whether respondent has failed to comply with one or more applicable requirements of Executive Order 11246, and rules, regulations, and orders thereunder. In case it appears from respondent's answer to the notice of hearing, from his failure timely to answer, or from his admissions or stipulations, that there are no matters of material fact in dispute, the hearing officer or the reviewing authority may enter an order so finding, vacating the hearing date, and fixing the time for filing briefs under § 82.35. Thereafter the proceedings shall go to conclusion in accordance with §§ 82.35 through 82.43. Within 10 days of its issuance, an order vacating the hearing date may be appealed to the reviewing authority, and the reviewing authority shall affirm, modify, or set aside such order within 28 days thereafter.

Dated: December 28, 1972.

ELLIOT L. RICHARDSON,
Secretary.

[FR Doc.73-342 Filed 1-5-73;8:45 am]

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[FCC 72-1200]

PART 0—COMMISSION ORGANIZATION

Subpart D—Public Availability of Classified Material

A new Subpart D is added to Part 0 of the FCC rules to codify that portion of security regulations pertaining to the public availability of classified material.

This action is taken to comply with Executive Order 11652 (37 FR 5209, Mar. 10, 1972) and the National Security Council Directive of May 17, 1972 (37 FR 10053, May 19, 1972). The prior notice and effective date provisions of the Administrative Procedure Act (5 U.S.C. 553) do not apply inasmuch as the new rules will benefit the public by clarifying procedures concerning access to classified documents, compliance with the prior notice and deferred effective date provisions of the APA (5 U.S.C. 553) would be contrary to the public interest.

The Interagency Classification Review Committee has approved the new regulations from which this material was extracted. Accordingly, *it is ordered*, That the rules as set forth below are adopted effective January 5, 1973.

Adopted: December 22, 1973.

Released: December 27, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] BEN F. WAPLE,
Secretary.

Part 0 of Chapter I of Title 47 of the Code of Federal Regulations is amended to add a new Subpart D to read as follows:

GENERAL

Sec.
0.501 Purpose.
0.502 Classification Review Committee.
0.503 Administrative enforcement.
0.504 Limitation of authority for original classification.

DOWNGRADING AND DECLASSIFICATION

0.521 Introduction.
0.522 General Declassification Schedule.
0.523 Exemption from General Declassification Schedule.
0.524 Applicability of the General Declassification Schedule to previously classified material.
0.525 Declassification of classified information or material after 30 years.
0.526 Systematic reviews.
0.527 Classification Review Committee.
0.528 Review of classified material over 30 years old.
0.529 Availability of declassified material.
0.530 Classification review requests.

ACCESS TO CLASSIFIED MATERIALS

0.541 Access by historical researchers.
0.542 Access by former Presidential appointees.

AUTHORITY: The provisions of this Subpart D issued under Executive Order 11652 (37 FR 5209, Mar. 10, 1972) and National Security Council Directive of May 17, 1952 (37 FR 10053, May 19, 1972).

GENERAL

§ 0.501 Purpose.

Pursuant to Executive Order 11652, the Commission prescribes the following regulations to insure that classified information and material is protected, but only to the extent and for such period as is necessary. The regulations identify the information to be protected, prescribe classification, downgrading, declassification and safeguarding procedures to be followed, and establish a monitoring system to ensure the regulations' effectiveness.

§ 0.502 Classification Review Committee.

The Executive Director has been assigned the responsibility for ensuring effective compliance with and implementation of these regulations. He will chair the Commission's Classification Review Committee which shall have authority to act on all suggestions and complaints with respect to the Commission's administration of these regulations. The General Counsel, or a senior member of his staff designated by him, and the Security Officer will serve as members of the Committee. All suggestions and complaints including those regarding overclassification, failure to classify, or delay in declassifying not otherwise resolved, shall be referred to the Committee for resolution. In addition, the Committee shall review all appeals of requests for records under section 522 of Title 5 U.S.C. (Freedom of Information Act) when the proposed denial is based on their continued classification under Executive Order 11652.

§ 0.503 Administrative enforcement.

The Classification Review Committee shall have responsibility for recommending to the chairman appropriate administrative action to correct abuse or violation of any provision of these regulations, including notifications by warning letters, formal reprimand, and to the extent permitted by law, suspension without pay and removal. The committee will maintain a record of the action taken.

§ 0.504 Limitation of authority for original classification.

The Commission's authority for original classification of natural security information or material under these regulations is limited to "Secret" and "Confidential." It shall be exercised only by (a) the Chief Engineer, (b) the Chief of the Field Engineering Bureau (FEB), and (c) the Executive Director. The Chief Engineer and the Chief, FEB shall exercise authority for original classification of information or material originated by their respective offices. The Executive Director shall exercise authority for the original classification of all other information or material originated by the FCC.

DOWNGRADING AND DECLASSIFICATION

§ 0.521 Introduction.

Classified information and material, unless declassified earlier by the original classifying authority, shall be declassified and downgraded in accordance with the provisions of §§ 0.522–0.530.

§ 0.522 General Declassification Schedule.

Classified information and material shall be declassified as soon as there are no longer any grounds for continued classification within the classification

[1] Commissioner H. Rex Lee absent.

category definitions. At the time of origination the classifier shall, whenever possible, clearly mark on the information or material a specific date or event upon which downgrading or declassification shall occur. Such dates or events shall be as early as is permissible without causing damage to the national security. Whenever earlier dates or events cannot be determined, the General Declassification Schedule set forth below shall apply. If the information or material is exempted under § 0.523, the classifier shall clearly mark the material to show that it is exempt and indicate the applicable exemption category. Unless impossible, the exempted information or material shall be assigned and clearly marked by the classifier with a specific date or event upon which declassification shall occur. Downgrading and declassification dates or events established in accordance with the foregoing, whether scheduled or non-scheduled, shall to the extent possible be carried forward and applied whenever the classified information or material is incorporated in other documents or material. When classified information or material from more than one source is incorporated into a new document or other material, the document or other material shall be classified, downgraded or declassified in the manner prescribed herein as applicable to the information requring the greatest protection.

(a) *Top secret.* Information or material originally classified "Top Secret" shall become automatically downgraded to "Secret" at the end of the second full calendar year following the year in which it was originated, downgraded to "Confidential" at the end of the fourth full calendar year following the year in which it was originated and declassified at the end of the 10th full calendar year following the year in which it was originated.

(b) *Secret.* Information and material originally classified "Secret" shall become automatically downgraded to "Confidential" at the end of the second full calendar year following the year in which it was originated, and declassified at the end of the eighth full calendar year following the year in which it was originated.

(c) *Confidential.* Information and material originally classified "Confidential" shall become automatically declassified at the end of the sixth full calendar year following the year in which it was originated.

§ 0.523 Exemption from General Declassification Schedule.

Certain classified information or material may warrant some degree of protection for a period exceeding that provided in the General Declassification Schedule. The Commission is not authorized to grant such exemption for any information it originated; however, it may receive exempted information from officials of Departments or Agencies having such authority. In each case such official shall specify in writing on the material the exemption category being claimed and, unless impossible, a date or event for automatic declassification. The use of the exemption authority shall be kept to the absolute minimum consistent with national security requirements and shall be restricted to the following categories:

(a) Classified information or material furnished by foreign governments or international organizations and held by the United States on the understanding that it be kept in confidence.

(b) Classified information or material specifically covered by statute, or pertaining to cryptography, or disclosing intelligence sources or methods.

(c) Classified information or material disclosing a system, plan, installation, project or specific foreign relations matter the continuing protection of which is essential to the national security.

(d) Classified information or material the disclosure of which would place a person in immediate jeopardy.

§ 0.254 Applicability of the General Declassification Schedule to previously classified material.

Information or material classified before June 1, 1972, and which is assigned to Group 4 under Executive Order No. 10501, as amended by Executive Order 10964, shall be subject to the General Declassification Schedule. All other information or material classified before June 1, 1972, whether or not assigned to Groups 1, 2, or 3 of Executive Order No. 10501, as amended, shall be excluded from the General Declassification Schedule. However, at any time after the expiration of 10 years from the date of origin it shall be subject to a mandatory classification review and disposition under the same conditions and criteria that apply to classified information and material created after the effective date of these regulations, as set forth in § 0.522. The Office of the Executive Director is hereby designated as the office to which members of the public or Departments may direct requests for mandatory review for declassification under this provision. This office shall, in turn, assign the request to the appropriate office for action. In each instance, receipt of the request will be acknowledged in writing immediately by the office which has been assigned action. Thereafter, that office shall make a determination within 30 days of receipt, or shall explain why further time is necessary. If at the end of 60 days from receipt of the request for review no determination has been made, the requester may apply to the Commission Committee, established by Section 0.502 of these regulations, for a determination. Should the office assigned action on a request for review determine that under the criteria set forth in § 0.523 continued classification is required, the requester shall be promptly notified, and, whenever possible, provided with a brief statement as to the reasons for denying the request. The requester may appeal any such determination to the Commission Committee and the notice of determination shall advise him of his right. If the requester requires the rendering of services for which fair and equitable fees should be charged pursuant to Title 5 of the Independent Offices Appropriations Act 1952, 65 Stat. 290, 31 U.S.C. 483a, the requester shall be so notified.

§ 0.525 Declassification of classified information or material after 30 years.

All classified information or material which is 30 years old or more, whether originating before or after the effective date of this order, shall be declassified under the following conditions:

(a) All information and material classified after June 1, 1972, shall, whether or not declassification has been requested, become automatically declassified at the end of 30 full calendar years after the date of its original classification except for such specifically identified information or material which the head of the originating Department personally determines in writing at that time to require continued protection because such continued protection is essential to the national security or disclosure would place a person in immediate jeopardy. In such case, the head of the Department shall also specify the period of continued classification.

(b) All information and material classified before June 1, 1972, and more than 30 years old is systematically reviewed for declassification by the Archivist of the United States by the end of the 30th full calendar year following the year in which it was originated. In his review, the Archivist separates and keeps protected only such information or material as is specifically identified by the head of the Department in accordance with paragraph (a) of this section. In such case, the head of the Department shall also specify the period of continued classification.

§ 0.526 Systematic reviews.

All information and material classified after the effective date of these regulations and determined in accordance with Chapter 21, 44 U.S.C. (82 Stat. 1287), to be of sufficient historical or other value to warrant preservation shall be systematically reviewed on a timely basis by each Bureau or Office for the purpose of making such information and material publicly available in accordance with the determination regarding declassification made by the classifier under this section. During each calendar year each Bureau or Office shall segregate to the maximum extent possible all such information and material warranting preservation and becoming declassified at or prior to the end of such year. Promptly after the end of such year the Commission, or the Archives of the United States, if transferred thereto, shall make the declassified information and material available to the public to the extent permitted by law.

§ 0.527 Classification Review Committee.

The Committee shall establish procedures to review and act within 30 days

V38-4 JAN 8 73 XUM

upon all applications and appeals regarding requests for declassification. The Commission acting through the Committee shall be authorized to overrule previous determinations in whole or in part when, in its judgment, continued protection is no longer required. If the Committee determines that continued classification is required under the criteria of § 0.522, it shall promptly so notify the requester and advise him that he may file an application for review with the Commission and thereafter may appeal to the Interagency Classification Review Committee.

§ 0.528 Review of classified material over 30 years old.

A request by a member of the public or by a Department under § 0.525 to review for declassification documents more than 30 years old shall be referred directly to the Archivist of the United States. If the information or material requested has not been transferred to the General Services Administration for accession into the Archives, the Archivist, together with the Commission, review the requested documents for declassification. Classifications shall be continued in either case only where the Chairman makes at that time the personal determination required by § 0.525. The Archivist notifies the requester of such determination and of his right to appeal the denial to the Interagency Classification Review Committee.

§ 0.529 Availability of declassified material.

Upon a determination under §§ 0.524, 0.525, 0.526, or 0.528, that the requested material no longer warrants classification, it shall be declassified and made promptly available to the requester, if not otherwise exempt from disclosure under section 552(b) of Title 5 U.S.C. (Freedom of Information Act) or other provision of law.

§ 0.530 Classification review requests.

A request for classification review must describe the document with sufficient particularity to enable the Commission to identify it and obtain it with a reasonable amount of effort. Whenever a request is deficient in its description of the record sought, the requester should be asked to provide additional identifying information whenever possible. Before denying a request on the ground that it is unduly burdensome, the requester should be asked to limit his request to records that are reasonably obtainable. If nonetheless the requester does not describe the records sought with sufficient particularity, or the record requested cannot be obtained with a reasonable amount of effort, the requester shall be notified of the reasons why no action will be taken and of his right to appeal such decision.

ACCESS TO CLASSIFIED MATERIALS

§ 0.541 Access by historical researchers.

Persons outside the executive branch engaged in historical research projects may be authorized access to classified information or material provided that the Commission determines that:

(a) The project and access sought conform to the requirements of section 12 of Executive Order 11652.

(b) The information or material requested is reasonably accessible and can be located and compiled with a reasonable amount of effort.

(c) The historical researcher agrees to safeguard the information or material in a manner consistent with the order and directives thereunder.

(d) The historical researcher agrees to authorize a review of his notes and manuscript for the sole purpose of determining that no classified information or material is contained therein. An authorization for access shall be valid for the period required but no longer than 2 years from the date of issuance unless renewed under Commission regulations.

§ 0.542 Access by former Presidential appointees.

Persons who previously occupied policymaking positions to which they were appointed by the President, may be authorized access to classified information or material which they originated, reviewed, signed or received while in public office. Upon the request of any such former official, such information and material as he may identify shall be reviewed for declassification.

Title 46—SHIPPING

Chapter I—Coast Guard, Department of Transportation

[CGD 72-238R]

SUBCHAPTER C—UNINSPECTED VESSELS

PART 25—REQUIREMENTS

SUBCHAPTER T—SMALL PASSENGER VESSELS (UNDER 100 GROSS TONS)

PART 184—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS EQUIPMENT

Light Intensity Standards

Sections 25.05-15(d) and 184.15-5(d) require compliance with certain intensity standards for new navigation lights installed and replacements of existing lights made on or after January 1, 1973. This date for compliance was predicated on the development and the issuance prior to that date of approval specifications for navigation lights. It now appears that these approval specifications cannot be developed and issued prior the present date. The amendments in this document extend the effective date for compliance with these light intensity standards from January 1, 1973, to January 1, 1974, in order to provide additional time for the development and issuance of these approval specifications.

Since the approval specifications for navigation lights have not yet been determined, compliance with §§ 25.05-15 (d) and 184.15-5(d) is not required, and since these amendments provide additional time for such a determination, imposing no additional burden on any person, notice and public procedure thereon are unnecessary and the amendments may be made effective in less than 30 days.

In consideration of the foregoing Parts 25 and 184 of Title 46 of the Code of Federal Regulations are amended as follows:

1. Section 25.05-15 is amended in paragraph (d) by revising the date of compliance as follows:

§ 25.05-15 Light intensity standards.

• • • • •

(d) The light intensity standards of this section shall apply to new navigation lights installed and replacement of existing lights made on or after January 1, 1974. Such lights shall be of an approved type.

2. Section 184.15-5 is amended in paragraph (d) by revising the date of compliance as follows:

§ 184.15-5 Light intensity standards.

• • • • •

(d) The light intensity standards of this section shall apply to new navigation lights installed and replacement of existing lights made on or after January 1, 1974. Such lights shall be of an approved type.

(Sec. 17, 54 Stat. 166, sec. 3, 70 Stat. 152, sec. 6(b)(1), 80 Stat. 937; 46 U.S.C. 526p, 390(b), 49 U.S.C. 1655(b)(1); 49 CFR 1.46(b))

Effective date: January 10, 1973.

Dated: January 2, 1973.

C. R. BENDER,
Admiral,
U.S. Coast Guard, Commandant.

Title 24—HOUSING AND URBAN DEVELOPMENT

Chapter X—Federal Insurance Administration, Department of Housing and Urban Development

[Docket No. R72-222]

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

SPECIAL HAZARD AREA IDENTIFICATION

Temporary Discontinuance

It has been the practice of the Federal Insurance Administration to temporarily designate as a flood plain area having special flood hazards the entire area of each community becoming eligible for the sale of flood insurance under the emergency flood insurance program authorized under section 1336 of the National Flood Insurance Act of 1968.

This temporary designation previously effective on the date the community became eligible for the sale of flood insurance under the emergency program, would then be superseded by a designation based upon the issuance of a flood hazard boundary map or flood insurance rate map that delineate the actual boundaries of the special hazard areas in the community. This map was issued or approved upon completion of a flood hazard evaluation or ratemaking study in the community usually at the time the community was converted to participation in the regular flood insurance program.

The purpose of the temporary designation was to warn the community that certain of its areas, not yet identified with precision, were seriously flood-prone, and that subsequent new construction in the community should only be built using construction methods and practices that will minimize flood damage.

Under section 1308(c) of the Act, 42 U.S.C. 4015, any new construction or substantial improvement of property that is begun after the area in which it is located has been identified as a flood plain area having special flood hazards is not eligible for flood insurance at subsidized rates and may be insured only at actuarial rates established for the community as a result of the formal ratemaking study. Because such rates have yet to be established in most of the communities participating in the flood insurance program, the effect of temporarily designating entire communities as special hazard areas has been to deny flood insurance to all new construction undertaken in these communities.

It was anticipated that this denial would not continue for very long, on the assumption that the necessary ratemaking study for each participating community could be completed without undue delay. However, experience to date indicates that the various Federal agencies competent to undertake such ratemaking studies are heavily burdened with other duties, and that substantial delays are being encountered in converting many communities from the emergency to the regular program. This problem has been compounded by Hurricane Agnes, which has imposed an even greater workload on the agencies concerned, with the result that it may in some cases take 3 to 5 years to obtain the detailed data needed to establish actuarial rates for a given community.

Rather than deny flood insurance to all new construction within emergency program communities during this interim period, the Administrator has determined that it is in the public interest to discontinue the temporary designation of these communities as areas of special flood hazards while awaiting completion of the ratemaking study. The burden of the unforeseen delay, in the agency's view, should be borne by the Federal Government, rather than by the participating communities. In addition, it is anticipated that an agreement will soon be worked out with the U.S. Geological Survey which will result in the early development of flood hazard boundary maps identifying specific special flood hazard areas in participating communities.

In the interim, the following regulation modifies existing policy to permit communities to enter the emergency flood insurance program without the necessity of being designated special flood hazard areas at the time of such entry. New as well as existing construction will be permitted to obtain subsidized flood insurance under the emergency program until specific special flood hazard areas are identified. Once the flood hazard boundary map has been issued, however, subsequent new construction in special flood hazard areas will not be eligible for flood insurance except at actuarial rates and therefore must await completion of the ratemaking study to obtain such insurance.

This modification necessitates a revision of the table which appears in 24 CFR 1915.3, in which special hazard area identifications are published. Therefore, another purpose of these amendments is to publish a revised table of communities in which special flood hazard areas have been identified in conformity with the modified procedure.

Since, under this revision, identification of special hazard areas will become effective only upon the issuance or approval of a flood hazard boundary map or flood insurance rate map, the effective date of the applicable map will also be the effective date of such identification. Thus, prior listed effective dates of identification of special hazard areas not based on the issuance of a flood hazard boundary map or flood insurance rate map are being repealed and are not listed in the table below. (In addition, for communities with respect to which no flood hazard boundary map has been issued, the identifications of areas of special hazards and the effective dates of such identifications, which were listed in prior entries to the table, are not listed in the table below and are hereby repealed.)

As of December 31, 1972, there were effective identifications of areas of special hazards only for the communities listed in the following table. For each community listed in the table a flood hazard boundary map or flood insurance rate map has been issued or approved on the date listed for the community in the last column of the table, which therefore is the correct effective date of the identification of special hazard areas in the community.

To accomplish these purposes, the following amendments to Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations (1) revise the language of 24 CFR 1914.3 to state the modified procedure of designating areas of special hazards only upon their specific identification and (2) revise the table which appears in 24 CFR 1915.3 to conform all prior identifications of special hazards areas to the modified procedure.

It has been determined that comment and public procedure are impracticable and that, in order to permit new construction in eligible communities to be protected by flood insurance as quickly as possible, these changes shall be effective upon publication.

Accordingly, Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended as follows:

PART 1910—CRITERIA FOR LAND MANAGEMENT AND USE

1. The introductory sentence of paragraph (a) of § 1910.3 is revised to read as follows:

§ 1910.3 Required land use and control measures for flood-prone areas.

• • • • • •

(a) When the Administrator has not defined the special flood hazard areas within a community, has not provided water surface elevation data, and/or has not provided sufficient data to identify the floodway or coastal high hazard area, the community must—

• • • • • •

2. The introductory sentence of paragraph (a) of § 1910.4 is revised to read as follows:

§ 1910.4 Required land use and control measures for mudslide areas.

• • • • • •

(a) When the Administrator has determined that a community is subject to mudslides but has not yet identified any area within the community as an area having special mudslide hazards, the community must—

• • • • • •

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

3. Section 1914.3 is revised to read as follows:

§ 1914.3 Procedures under the emergency program.

(a) In order to expedite a community's qualification for flood insurance under the emergency program, the Administrator may authorize the sale of such insurance without first designating either the entire community or any part thereof as a flood plain area having special flood

V 38 - 4 JAN 8 73 XUM

hazards and/or a mudslide area having special mudslide hazards, provided the community has previously adopted land use and control measures meeting the requirements of § 1910.3(a) or § 1910.4(a) of this subchapter. When the Administrator has obtained sufficient technical information to delineate the special flood or mudslide hazard areas with reasonable accuracy, he may delineate, or he may request the community to delineate subject to his approval, the proposed boundaries of the specific areas having special flood or mudslide hazards on a flood hazard boundary map. The local map or plat used to prepare the flood hazard boundary map must be of sufficient scale to show the location of building sites.

(b) After the issuance or approval of the flood hazard boundary map, flood insurance will be available at chargeable rates for newly constructed or substantially improved properties only if they are located outside of the areas then delineated as having special flood or mudslide hazards. Newly constructed or substantially improved properties located within the delineated areas having special flood or mudslide hazards will be able to obtain flood insurance (at actuarial rates) only upon the completion of a ratemaking study for the community and the subsequent issuance by the Administrator of a flood insurance rate map.

PART 1915—IDENTIFICATION OF SPECIAL HAZARD AREAS

4. The table which appears in § 1915.3 is revised to read as follows:

§ 1915.3 List of communities with special hazard areas.

Title 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T.D. 73-10]

PART 16—LIQUIDATION OF DUTIES

X-Radial Steel Belted Tires from Canada

In the FEDERAL REGISTER of May 12, 1972 (37 FR 9568), the Acting Commissioner of Customs announced that information had been received in proper form pursuant to § 16.24(b) of the Customs regulations (19 CFR 16.24(b)) which raised a question whether certain payments, bestowals, rebates, or refunds granted by Canada upon the manufacture, production, or exportation of X-radial steel belted tires by Michelin Tire Manufacturing Co. of Canada, Ltd., constitute the payment or bestowal of a bounty or grant directly or indirectly, within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303), upon the manufacture, production, or exportation of the merchandise to which the payments, bestowals, rebates, or refunds apply. The notice provided interested parties 30 days from the date of publication to submit data, views, or arguments with regard to the existence or nonexistence and the net amount of a bounty or grant.

An investigation was conducted pursuant to § 16.24(d) of the Customs regulations (19 CFR 16.24(d)).

It has been ascertained that Michelin Tire Manufacturing Co. of Canada, Ltd., has had constructed two manufacturing plants in the Province of Nova Scotia, one in Bridgewater, Nova Scotia, for the manufacture of steel cord for use in manufacturing tires and the other in Granton, Nova Scotia, for the manufacture of tires. A substantial majority of the tires produced are being and are expected to continue to be exported to the United States. It has been further ascertained that in connection with the establishment of the two manufacturing plants, the Government of Canada has made certain grants and made available to Michelin a special accelerated depreciation provision under Canadian income tax law. Additionally, the Province of Nova Scotia has provided certain grants and provided a low interest-rate loan and the municipalities concerned have made certain concessions which lower the property taxes on each plant.

After consideration of all information received, the Bureau is satisfied that exports of X-radial steel belted tires, manufactured by Michelin Tire Manufacturing Co. of Canada, Ltd., are subject to bounties or grants within the meaning of section 303.

Accordingly, notice is hereby given that X-radial steel belted tires, manufactured by Michelin Tire Manufacturing Co. of Canada, Ltd., imported directly or indirectly from Canada, if entered for consumption or withdrawn from warehouse for consumption after the expiration of 30 days after publication of this notice in the Customs Bulletin, will be subject to the payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed.

In accordance with section 303, until further notice the amount of such bounty or grant under the information presently available has been estimated to be 6.6 percent of the f.o.b. value of each tire. Although no benefit is being derived currently from the special accelerated depreciation provision of the Canadian income tax law, any benefit derived thereunder in the future would constitute a bounty or grant within the meaning of section 303. Declarations of the net amount of the bounties or grants ascertained and determined or estimated to have been paid, directly or indirectly, upon the manufacture, production, or exportation of X-radial steel belted tires from Canada, manufactured by Michelin Tire Manufacturing Co. of Canada, Ltd., will be published in subsequent issues of the Customs Bulletin.

Effective on the 31st day after the date of publication of the notice in the Customs Bulletin and until further notice, upon the entry for consumption or withdrawal from warehouse for consumption of such dutiable X-radial steel belted tires, manufactured by Michelin Tire Manufacturing Co. of Canada, Ltd., imported directly or indirectly from Canada which benefit from such bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration.

The liquidation of all entries for consumption or withdrawals from warehouse for consumption of such dutiable X-radial steel belted tires, manufactured by Michelin Tire Manufacturing Co. of Canada, Ltd., imported directly or indirectly from Canada which benefit from such bounties or grants and are subject to the order shall be suspended pending declarations of the net amounts of the bounties or grants paid or bestowed. A deposit of the estimated countervailing duty, in the amount of 6.6 percent of the f.o.b. value of each tire, shall be required at the time of entry for consumption or withdrawal from warehouse for consumption.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be paid, credited, or bestowed directly or indirectly, upon the manufacture, production, or exportation of such X-radial steel belted tires manufactured by Michelin Tire Manufacturing Co. of Canada, Ltd.

The table in § 16.24(f) of the Customs Regulations (19 CFR 16.24(f)) is amended by inserting after the last entry for Canada "X-radial steel belted tires manufactured by Michelin Tire Manufacturing Co. of Canada, Ltd." in the column headed "Commodity," the number of this Treasury decision in the column headed "Treasury decision," and the words "Bounty declared—Rate" in the column headed "Action."

(R.S. 251, secs. 303, 624; 46 Stat. 687, 759, 19 U.S.C. 66, 1303, 1624)

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

Approved: January 4, 1973.

EUGENE T. ROSSIDES,
Assistant Secretary of the Treasury.

[FR Doc.73-466 Filed 1-5-73;9:40 am]

Title 28—JUDICIAL ADMINISTRATION

Chapter I—Department of Justice

[Order 500-72]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart H—Antitrust Division

CONSUMER AFFAIRS LITIGATION

The Attorney General has assigned to the Assistant Attorney General in charge of the Antitrust Division the responsibility for conducting litigation pertaining to consumer affairs under certain specified Federal statutes, listed in 28 CFR 0.41 (h). This order amends that provision by adding the Consumer Product Safety Act to that list.

By virtue of the authority vested in me by 5 U.S.C. 301 and 28 U.S.C. 509, 510, paragraph (h) of § 0.41 of Subpart H of Part 0 of Chapter I of Title 28, Code of Federal Regulations, is amended by deleting the word "and" immediately before "the Textile Fiber Products Identification Act (15 U.S.C. 70 et seq.)" and adding at the end thereof, the following:

§ 0.41 Special functions.

* * * * *

(h) * * * and the Consumer Product Safety Act (Public Law 92-573), and any statute the functions of which are transferred to the Consumer Product Safety Commission by virtue of section 30 of that Act, except as the Commission may direct its attorneys to handle litigation arising under section 12 of the Act. This delegation includes the authority of the Attorney General to concur, in specific proceedings, that litigation other than that arising under section 12 of the Act may be handled directly by the Commission, pursuant to section 27(b)(7).

Dated: December 27, 1972.

RICHARD G. KLEINDIENST,
Attorney General.

[FR Doc.73-339 Filed 1-5-73;8:45 am]

Proposed Rule Making

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 11]

BOTTLED WATER

Proposed Quality Standards

Bottled water for human consumption is a food within the meaning of the Federal Food, Drug, and Cosmetic Act.

Bottled water is increasingly being used as a source of drinking water. Factors that have influenced this increase include consumer reaction to publicity of the potential pollution of some public water supplies, abnormal taste and odor of tap water in some areas, and increasing consumer affluence. The consumer expects bottled water to meet the minimum criteria established for public drinking water supplies.

The Food and Drug Administration has evaluated bottled water for human consumption using essentially the same criteria used in determining the acceptability of public water supplies. The criteria for evaluation of public water supplies are those of the U.S. Public Health Service Drinking Water Standards (1962), promulgated as regulations for drinking water and water supply systems used by interstate common carriers and others subject to the Federal interstate quarantine regulations. These standards set microbiological, physical, chemical, and radioactivity limits in drinking water based on health or esthetic factors. The standards are considered the minimum for public water supplies by the American Water Works Association and are the bases of State and local regulations pertaining to the control of public water supplies.

Analyses by the FDA and the Environmental Protection Agency (EPA) have shown that some bottled water fails to meet the criteria of the US. Public Health Service Drinking Water Standards (1962). A survey of bottled water in 1971, conducted by the FDA, revealed that 8 out of 85 samples tested contained coliform bacteria at levels in excess of the PHS Standards. In addition, the range of the geometric mean of the aerobic total plate count was 0 to 5.4 by 10^7 for the samples. Results of chemical tests on 86 samples revealed that none of the samples contained concentrations of heavy metals or pesticides that exceeded the PHS drinking water standards. As part of the EPA survey of the bottled water industry, bacteriological and chemical examinations were made of about 50 bottled water products from 25 bottling firms. Eight percent of the bottled water examined evidenced the presence of the coliform organism. Standard plate counts ranged from zero to "too numerous to count". Gross changes in the standard plate counts were noted in the 25 samples that were examined during a 63-day storage test. While six samples remained at or near zero for the entire test period, four rose to levels that became too numerous to count, while the remainder fluctuated widely with no definite discernible pattern. Chemical analyses by EPA revealed that three samples exceeded the PHS Standards for total dissolved solids and that one sample exceeded the PHS Standard for copper while another sample exceeded the PHS Standard for lead.

The criteria of the U.S. Public Health Service Drinking Water Standards (1962) can be applied to bottled water with two notable exceptions: (1) The sampling plans of the PHS Standards are designed for the repetitive examination of public water supplies and are not appropriate for bottled water, and (2) the bacteriological limits set by the standards are based on repetitive examinations and also are not appropriate for bottled water.

The Environmental Protection Agency now has the responsibility for establishing drinking water standards. Extensive revisions of the drinking water standards are currently being developed by EPA. It is FDA's intention to revise the bottled water quality standards to keep them compatible with revisions of the EPA drinking water standards.

On the basis of the U.S. Public Health Service Drinking Water Standards (1962), survey data, and other available information, the Commissioner of Food and Drugs is of the opinion that reasonable grounds exist for proposing standards of quality for bottled water. Accordingly, in order to promote honesty and fair dealing in the interest of consumers the Commissioner proposes to establish quality standards for bottled water.

The Commissioner proposed in the FEDERAL REGISTER for September 23, 1972 (37 FR 20038), a new Part 11 for microbiological standards for foods for which there are no standards of identity. Although the proposal to establish quality standards for bottled water includes physical and chemical aspects as well as microbiological aspects, it is logical to include this proposal within that new part. The heading of the new part will be changed when the final order promulgating the regulations proposed in the September 23, 1972, FEDERAL REGISTER is issued, to reflect that quality standards may include provisions relating other than to microbioligical aspects of a food.

Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 403(h), 701, 52 Stat. 1046, 1047 and 1055-1056, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 343(h), 371) and under authority delegated to him (21 CFR 2.120) the Commissioner proposes to amend Part 11 (37 FR 20038) of Chapter I, of Title 21 of the Code of Federal Regulations by adding a new section to Subpart B as follows:

§ 11.7 Bottled water.

(a) For purposes of this section, the following definitions shall apply:

(1) "Bottled water" is water that is sealed in bottles or other containers and intended for human consumption. Bottled water does not include mineral water or any food defined in § 31.1 of this chapter.

(2) A "sample" is 10 containers of water which are representative of the lot.

(3) An "analytical unit" is that portion of water taken from a container for purposes of analysis.

(b) *Microbiological quality.* Bottled water shall, when a sample is examined by the methods described in Part 400, of "Standard Methods for the Examination of Water and Wastewater," 13th Ed., 1971, American Public Health Association,[1] meet standards of microbiological quality as follows:

(1) (i) *Multiple-tube fermentation method.* Not more than one of the analytical units in the sample shall have a most probable number (MPN) of 2.2 or more coliform organisms per 100 milliliters and no analytical unit shall have a MPN of 9.2 or more coliform organisms per 100 milliliters, or:

(ii) *Membrane filter method.* Not more than one of the analytical units in the sample shall have a 4.0 or more coliform organisms per 100 milliliters and the arithmetic mean of the coliform density of the sample shall not exceed 500 per milliliter.

(2) The geometric average of the bacterial density (Standard Plate Count) of the 10 analytical units comprising the sample shall not exceed 500 per milliliter.

(c) *Physical quality.* Bottled water shall, when a composite of analytical units of equal volume from a sample is examined by the methods described in Part 100 of the 13th Ed., 1971, of "Standard Methods for the Examination of Water and Wastewater," American Public Health Association,[1] meet standards of physical quality as follows:

(1) The turbidity shall not exceed 5 units.

(2) The color shall not exceed 15 units.

(3) The odor shall not exceed threshold odor No. 3.

(d) *Chemical quality.* Bottled water shall, when a composite of analytical units of equal volume from a sample is examined by the methods described in

V38-4 JAN 8 73 XUM

Part 100 of the 13th Ed., 1971, of "Standard Methods of Examination of Water and Wastewater," American Public Health Association,[1] meet standards of chemical quality as follows:

(1) The bottled water shall not contain chemical substances in excess of the following concentrations:

Substance	Concentration in milligrams per liter
Arsenic	0.05
Barium	1.0
Cadmium	0.01
Chloride	250.0
Chromium (Hexavalent)	0.05
Copper	1.0
Cyanide	0.2
Iron	0.3
Lead	0.05
Manganese	0.05
Nitrate	45.0
Phenols	0.001
Selenium	0.01
Silver	0.05
Sulfate	250.0
Total Dissolved Solids	500.0
Zinc	5.0

(2) The bottled water shall not contain fluoride in excess of the levels in Table I and these levels shall be based on the annual average of maximum daily air temperatures at the location where the bottled water was filled.

TABLE I

Annual average of maximum daily air temperatures:	Flouride concentration in milligrams per liter
50.0–53.7	2.4
53.8–58.3	2.2
58.4–63.8	2.0
63.9–70.6	1.8
70.7–79.2	1.6
79.3–90.5	1.4

(e) *Radiological quality.* Bottled water shall, when a composite of analytical units of equal volume from a sample is examined by the methods described in Part 300 of the 13th Ed., 1971, of "Standard Methods for the Examination of Water and Wastewater," American Public Health Association,[1] meet standards of radiological quality as follows:

(1) The bottled water shall not contain radioactivity in excess of the following concentrations:

Substance	Concentration in micromicrocuries per liter
Radium-226	3
Strontium-90	10

(2) When it is known that the strontium-90 and alpha emitters are absent, the composite shall not contain a gross beta concentration in excess of 1,000 micromicrocuries per liter.

(f) *Label statements.* Bottled water, the quality of which is below that prescribed by this section, shall be labeled with a statement of substandard quality as follows:

(1) When the microbiological quality of bottled water is below that prescribed by paragraph (b) of this section, the label shall bear the statement of substandard quality specified in § 11.1(b).

(2) When the physical, chemical, and/or radiological quality of bottled water is below that prescribed by paragraphs (c) through (e) respectively of this section, the label shall bear the statement of substandard quality specified in § 11.1(b) except that, as appropriate, instead of or in addition to the words "Contains Excessive Bacteria" the following statement(s) shall be used:

(i) "Excessively Turbid", "Abnormal Color", and/or "Abnormal Odor" if the bottled water fails to meet the requirements of paragraph (c)(1), (2), and/or (3), respectively, of this section.

(ii) "Contains Excessive Chemical Substances", if the bottled water fails to meet any of the requirements of paragraph (d) of this section. The specific chemical(s) may be declared in lieu of the words "Chemical Substances" in the statement "Contains Excessive Chemical Substances". When a specific chemical is declared, that name by which the chemical(s) is designated in paragraph (d) of this section shall be used. Example: "Contains Excessive Copper".

(iii) "Excessively Radioactive" if the bottled water fails to meet the requirements of paragraph (e) of this section.

(g) Bottled water containing a substance at a level considered injurious to health under section 402(a)(1) of the act is deemed to be adulterated, regardless of whether or not the bottled water bears a label statement of substandard quality prescribed by paragraph (f) of this section.

Interested persons may, on or before March 9, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: December 22, 1972.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

National Institute of Education

[45 CFR Ch. 14]

EDUCATIONAL RESEARCH AND DEVELOPMENT GRANTS

General Provisions of National Institute of Education

Pursuant to the authority contained in section 405 of the General Education Provisions Act, the Director of the National Institute of Education, with the approval of the Secretary of Health, Education, and Welfare, hereby proposes to amend Title 45 of the Code of Federal Regulations by adding a new Chapter XIV, Subchapter A, as set forth below.

In section 301(a) of the Education Amendments of 1972 (Public Law 92–318), Congress enunciated policies of the U.S. Government: (1) To provide to every person an equal opportunity to receive an education of high quality regardless of his race, color, religion, sex, national origin, or social class; (2) to provide leadership in the conduct and support of scientific inquiry into the educational process to achieve such equality of opportunity; and (3) to improve American education through its reform and renewal and through the strengthening of the scientific and technological foundations of education and the building of an effective educational research and development system (section 405(a) of the General Education Provisions Act).

To carry out these policies, Congress established, within the Education Division of the Department of Health, Education, and Welfare, the National Institute of Education, to conduct educational research, collect and disseminate the findings of educational research, train individuals in educational research; to assist and foster such research, collection, dissemination, or training through grants, contracts, technical assistance to, or jointly financed cooperative arrangements with, public or private organizations, institutions, agencies, or individuals; and to promote the coordination of such research and research support within the Federal Government. An interim statement of organization for the Institute was published at 37 FR 19158 (September 19, 1972).

This proposed subchapter establishes general rules and requirements, both substantive and procedural, for the award of assistance to eligible parties to support "educational research," which is broadly defined in the statute to include basic and applied research, planning, surveys, evaluations, investigations, experiments, developments, and demonstrations in the field of education (including career education).

Sections 1400.2 and 1400.4 of this proposed subchapter indicate that the award and administration of contracts by the Institute are not subject to this subchapter, but are instead covered by Chapters 1 and 3 of Title 41 of the Code of Federal Regulations. However, §§ 1400.2 and 1400.4 bear upon prospective contractors by providing that Department standards for the selection between contract and grant procedures and instruments (published at 41 CFR 3–1.53) shall govern such selection by the Institute, both with respect to solicitation of grant proposals or contract proposals and awards based upon unsolicited proposals. In addition, § 1400.4(e) provides that the provisions on eligible applicants in this subchapter (§ 1403.2) shall govern contracts, as well as grant awards, except that profitmaking institutions may also be eligible for contracts with the Institute. The body of this subchapter applies only to the award and administration of grants by the Institute.

The provisions of this proposed subpart would establish general rules and regulations governing the award and administration of all grants by the Institute, except as otherwise provided in any regulations subsequently published by the Institute in Subchapter B of this chapter.

Notifications of any closing dates for receipt of applications for assistance under this subchapter will be published in the FEDERAL REGISTER.

The instant proposed subchapter contains provisions governing the submission and review of grant applications, and the award of grants based thereon. Part 1403 sets forth limitations on the extent of Federal participation in any project grant, including (in Appendixes) detailed provisions on allowable grantee costs (Part 1408).

Sections herein lay down programmatic and fiscal requirements for recipients of grant awards, including provisions for the protection of humans and animals involved as subjects in educational research. They contain detailed requirements for procurement actions (Part 1406) and property management (Part 1412, Subpart D) by grantees, as well as for construction supported by the Institute (Part 1412, Subpart C). They do not contain copyright provisions, which will be set forth in separate regulations.

Substantive and procedural requirements related to obligations of the grantee to account for Federal funds are set forth in Part 1414 of this proposed subchapter. In the same part are provisions which permit termination and suspension for cause where the grantee has failed to comply with the grant terms and conditions, or applicable statutes or regulations, subject to safeguards designed to assure procedural due process of law to the grantee. Termination is provided for, where the grantee has not so failed to comply with the grant terms and conditions or applicable statutes or regulations, only by agreement of the Institute and the grantee.

Except as specifically noted, the provisions of this subchapter are premised upon section 405 of the General Education Provisions Act (GEPA) which establishes the National Institute of Education and sets forth the parameters of authority of the Institute's basic components—the National Council on Educational Research and the Director of the Institute. Section 405(f)(1) of GEPA provides: "The Director, in order to carry out the provisions of this section, is authorized—(A) to make, promulgate, issue, rescind, and amend rules and regulations governing the manner of operation of the Institute * * *."

Interested persons are invited to submit written comments, suggestions, or objections, regarding the proposed regulations to the NIE Management Task Force, Room 627, Reporters Building, 300 Seventh Street SW., Washington, DC 20202, within 30 days of publication of this notice in the FEDERAL REGISTER. Comments received in response to this notice will be available for public inspection in Room 627, Reporters Building, 300 Seventh Street SW., Washington, D.C., between 8 a.m. and 4:30 p.m. Mondays through Fridays.

Dated: December 15, 1972.

THOMAS K. GLENNAN, Jr.,
Director of National Institute of Education.

Approved: December 27, 1972.

ELLIOT L. RICHARDSON,
Secretary of Health, Education, and Welfare.

Title 45 of the Code of Federal Regulations is amended by adding a new Chapter XIV, Subchapter A reading as follows:

Chapter XIV—National Institute of Education, Department of Health, Education, and Welfare

SUBCHAPTER A—GENERAL PROVISIONS FOR NATIONAL INSTITUTE OF EDUCATION

Part
1400 General.
1403 Eligibility and application for research grant assistance.
1406 Procurement standards for grantees.
1408 Federal financial participation.
1410 Financial reporting requirements for grantees.
1412 Administration of project grants.
1414 Accountability for Federal funds.

APPENDIX A—Principles for determining costs applicable to grants and contracts with nonprofit institutions.
APPENDIX B—Principles for determining costs applicable to grants and contracts with State and local governments. (OMB Circular No. A–87).
APPENDIX C—Principles for determining costs applicable to research and development under grants and contracts with educational institutions. (OMB Circular A–21).

NOTE: Appendix B is based on OMB Circular No. A–87 and Appendix C is based upon OMB Circular A–21. Incorporation of these same OMB circulars into future regulations will refer to Appendixes B and C of this Chapter XIV.

PART 1400—GENERAL

Sec.
1400.1 Definitions.
1400.2 Scope.
1400.3 Purpose.
1400.4 Policy on use of grants or contracts.

AUTHORITY: Sec. 405 of the General Education Provisions Act, as added by Section 301(a)(2) of Public Law 92–318, 86 Stat. 328 (20 U.S.C. 1221e), unless otherwise noted.

§ 1400.1 Definitions.

As used in this subchapter:

"Acquisition" means assumption of ownership including the receipt of gifts and necessary delivery, and includes purchase, lease, or lease-purchase.

"Act" means the General Education Provisions Act, as amended.

"Applicant" means an eligible party seeking Federal financial assistance under this chapter.

"Application" includes requests from eligible parties for grant assistance from the Federal Government.

"Award" means a properly executed grant to an eligible party under this chapter.

"Budget period" means the interval of time into which an approved activity is divided for budgetary purposes.

"Department" means the U.S. Department of Health, Education, and Welfare.

"Director" means the Director of the National Institute of Education or a designee of the Director.

"Educational research" means research (basic and applied), planning, surveys, evaluations, investigations, experiments, developments, and demonstrations in the field of education (including career education).

"Expendable personal property" means all tangible personal property other than nonexpendable personal property.

"Fiscal year" means a period beginning on July 1 and ending on the following June 30. (A fiscal year is designated in accordance with the calendar year in which the ending date of the fiscal year occurs.)

"Grant period" means the period during which costs may be charged against a grant.

"Grantee" means the individual, agency, organization, or institution which has received an award of grant assistance from the Institute.

"Institute" means the National Institute of Education.

"Nonexpendable personal property" means tangible personal property, including equipment, having a useful life of more than 1 year and an acquisition cost of $300 or more per unit.

"Private" means not under public supervision or control.

"Procurement" means the acquisition from non-Federal sources of personal property and nonpersonal services, including construction, by such means as purchasing, renting, leasing, including real property, contracting, or bartering, but not by seizure, condemnation, donation, or requisition.

"Project period" means the total period of time for which a project is approved for support with Federal funds.

"Public agency" means a legally constituted organization of government under public administrative control and direction, but does not include agencies of the Federal Government.

"Secretary" means the Secretary of the Department of Health, Education, and Welfare.

§ 1400.2 Scope.

(a) Except as otherwise provided by regulation, the regulations of this subchapter apply to all grant awards of Federal assistance to eligible parties authorized under section 405 of the General Education Provisions Act.

(b) The regulations of this subchapter will be supplemented by other regulations in this chapter setting forth any special (1) rules of procedure; (2) substantive rules of general applicability; and (3) statements of general policy or interpretations of general applicability developed under the authority of section 405 of the General Education Provisions Act.

(c) Subject to the provisions of § 1400.4, the regulations of this subchap-

V 38 - 4 JAN 8 73 XUM

ter are not applicable to the award and administration of contracts under section 405 of the Act. Such contracts are subject to the regulations in Chapters 1 and 3 of Title 41 of the Code of Federal Regulations.

(d) Federal financial assistance provided under this subchapter is also subject to the regulations in Part 80 of this title, issued by the Secretary of Health, Education, and Welfare and approved by the President, to effectuate the provisions of title VI of the Civil Rights Act of 1964 (Public Law 88–352).

(42 U.S.C. 2000 d)

(e) Federal financial assistance provided under this subchapter is also subject to the provisions of title IX of the Education Amendments of 1972 which prohibit sex discrimination, and any regulations issued thereunder (secs. 901–903, 905–907 of Public Law 92–318).

(20 U.S.C. 1681–1683, 1885–1686)

(f) Federal financial assistance provided under this subchapter is also subject to the provisions of section 904 of the Education Amendments of 1972 which prohibit discrimination on the grounds of blindness or severely impaired vision and any regulations issued thereunder.

(20 U.S.C. 1684)

§ 1400.3 Purpose.

(a) Congress has declared it a policy of the United States to provide to every person an equal opportunity to receive an education of high quality regardless of race, color, religion, sex, national origin, or social class. The Federal Government has a clear responsibility to provide leadership in the conduct and support of scientific inquiry into the educational process. Congress has further declared it to be the policy of the United States to:

(1) Help to solve, or to alleviate the problems of, and promote the reform and renewal of, American education;

(2) Advance the practice of education as an art, science, and profession;

(3) Strengthen the scientific and technological foundations of education; and

(4) Build an effective educational research and development system.

(b) This subchapter establishes general regulations for the award of grants by the National Institute of Education to carry out the policies set forth in paragraph (a) of this section.

§ 1400.4 Policy on use of grants or contracts.

(a) It is the policy of the Institute that competition be fostered to the maximum extent practicable in the review of grant applications, contract proposals, and unsolicited proposals which may lead to either grant or contract awards. Such competition will be designed to help achieve the purposes of the Institute through the identification and utilization of the best technical competence and other resources.

(b) In order to effectuate the purposes of § 1400.3, the Director may issue, with appropriate publication, formal written requests for proposals directed toward the award of contracts or announcements directed toward the award of grants and may award grants or contracts on the basis of unsolicited proposals from eligible parties. In addition, he may enter jointly financed cooperative arrangements with eligible parties.

(c) Generally, the Director shall select between grant and contract procedures and instruments, both with regard to the solicitation process and with respect to unsolicited proposals, on the basis of criteria set forth in Subpart 3–1.53 of Title 41 of the Code of Federal Regulations.

(d) Except as provided in paragraph (e) of this section, the award and administration of contracts and cooperative arrangements shall not be covered by this subchapter. As provided in § 1400.2 (c), contracts shall be subject to the regulations in Chapters 1 and 3 of Title 41 of the Code of Federal Regulations.

(e) The provisions of § 1403.2(a) of this subchapter on eligible parties shall govern contract awards and jointly financed cooperative arrangements by the Director, as well as grant awards, except that profitmaking corporations, organizations, institutions, or agencies shall also be eligible for such contracts and jointly financed cooperative arrangements.

PART 1403—ELIGIBILITY AND APPLICATION FOR RESEARCH GRANT ASSISTANCE

Sec.
1403.1 Nature and purpose of research project award.
1403.2 Eligibility for award.
1403.4 Applications.
1403.7 Cooperative arrangements.
1403.8 Effective date of approved project.
1403.10 Evaluation of applications.
1403.11 Disposition of applications.
1403.13 Amendments.
1403.15 Preliminary proposals.

AUTHORITY: Sec. 405 of the General Education Provisions Act, as added by section 301 (a)(2) of Public Law 92–318, 86 Stat. 328 (20 U.S.C. 1221e), unless otherwise noted.

§ 1403.1 Nature and purpose of research project award.

A research project grant is the award by the Director of funds to an institution, organization, or other person to assist in meeting the costs of conducting, for the purposes specified under § 1400.3 of this subchapter, an identified activity or program (hereinafter termed the "project") consisting of educational research.

§ 1403.2 Eligibility for award.

(a) *Persons eligible.* Except where otherwise prohibited by law, any individual, corporation, public or private institution or agency found by the Director to be authorized and qualified by educational, scientific, or other relevant competence to carry out a proposed research project in accordance with the regulations of this subchapter shall be eligible for an award except:

(1) Federal agencies or institutions not specifically authorized by law to receive such an award; and

(2) Any corporation, institution, agency, or other such person, other than an individual, whose net earnings inure, or may lawfully inure, to the benefit of any private shareholder or individual.

(b) *Projects eligible.* Any project found by the Director to be an educational research project within the meaning of § 1400.1 of this subchapter and § 1403.1 shall be eligible for an award. Eligible projects may include planning, laboratory, clinical, population, field, statistical, basic, applied or other types of investigations, studies, or experiments, dissemination, utilization, application, implementation, training, developments or demonstrations, or combinations thereof, and may either be limited to one, or a particular aspect of, a problem or subject, or may consist of two or more related problems or subjects for concurrent or consecutive investigation and involving multiple disciplines, facilities, and resources.

§ 1403.4 Applications.

(a) *Applications for grants.* Any applicant eligible for grant assistance may submit, on or before such cutoff date or dates as the Director may announce for each fiscal year, an application containing such pertinent information, and in accordance with the forms and instructions, as prescribed herein and additional forms as may be specified by the Director. Such application shall be executed by the applicant or an official or representative of the applicant duly authorized to make such application.

(b) *Forms.* (1) *Federal Assistance Application for Nonconstruction Programs.* The Federal Assistance Application for Nonconstruction Programs form (OMB No. 60–R0186) shall be used by the applicant for all actions covered by this subchapter except where the major purpose of the grant involves construction, land acquisition, or development or single-purpose and one-time grant applications for less than $10,000 which do not require State clearinghouse approval, an environmental impact statement, or the relocation of persons, businesses, or farms.

(2) *Application for Federal Assistance—Short Form.* The Application for Federal Assistance—Short Form (OMB No. 080–R0185) shall be used for all grants for single-purpose and one-time grant applications for less than $10,000 not requiring State clearinghouse approval, an environmental impact statement, or the relocation of persons, businesses, or farms.

(31 U.S.C. 628; OMB Circular No. A–102, Attachment M)

§ 1403.7 Cooperative arrangements.

(a) Eligible parties may enter into cooperative arrangements with other eligible parties, including those in another State, to apply for assistance.

(b) A joint application made by two or more applicants for assistance under this subchapter may have separate budgets corresponding to the programs, services, and activities performed by each of the joint applicants, or may have a combined budget. If joint applications present separate budgets, the Director may make separate awards, or may award separate amounts for each of the joint applicants.

(c) In the case of each cooperative arrangement authorized under paragraph (a) of this section and receiving assistance, except where the Director makes separate awards under paragraph (b) of this section, all such applicants (1) shall be deemed to be joint legal recipients of the grant award and (2) shall be jointly and severally responsible for administering the project assisted under such grant.

§ 1403.8 Effective date of approved project.

Federal financial participation is available only with respect to obligations incurred subsequent to the effective date of an approved project. The effective date of the project will be set forth in the notification of grant award, in accordance with allowable cost provisions set forth in Appendices A, B and C to this subchapter.

(31 U.S.C. 628; OMB Circular Nos. A–21, A–87)

§ 1403.10 Evaluation of applications.

(a) *Review procedures.* All applications filed in accordance with § 1403.4 shall be evaluated by the Director through officers, employees, and such experts or consultants engaged for this purpose as he/she determines are specially qualified in the areas of research involved in Appendixes A, B, and C to this subtions on applications shall be taken only by the Director or his/her designee who will be directly responsible to the Director.

(b) *Criteria for evaluation.* Review of applications under paragraph (a) of this section will take into account such factors as:

(1) Educational and scientific merit and significance of the project;

(2) Feasibility of the project;

(3) Soundness of research design, statistical technique, and procedures and methodology;

(4) Theoretical and technical soundness of the proposed plan of operation, including consideration of the extent to which:

(i) The objectives of the proposed project are sharply defined, clearly stated, and capable of being attained by the proposed procedures;

(ii) Provisions are made for adequate evaluation of the effectiveness of the project and for determining the extent to which the objectives are accomplished;

(iii) Where appropriate, provisions are made for satisfactory inservice training connected with project services.

(5) Expected potential for utilizing the results of the proposed project in other projects or programs for similar educational purposes;

(6) Sufficiency of size, scope, and duration of the project so as to secure productive results;

(7) Adequacy of qualifications and experience, including managerial, of personnel;

(8) Adequacy of facilities and other resources;

(9) Reasonableness of estimated cost in relation to anticipated results; and

(10) Where the applicant has previously received an award from the Institute, the applicant's compliance or noncompliance with requirements applicable to such prior award: *Provided, however,* That in any case where the Director proposes to deny assistance based upon the applicant's noncompliance with requirements applicable to a prior award, he shall do so only after affording the applicant reasonable notice and an opportunity to rebut the proposed basis for denial of assistance.

(31 U.S.C. 628)

§ 1403.11 Disposition of applications.

(a) On the basis of the review of an application pursuant to § 1403.10, the Director will either (1) approve the application in whole or in part, for such amount of funds and subject to such conditions as he/she may deem necessary or desirable for the completion of the approved project, (2) disapprove the application, or (3) defer action on the application for such reasons as lack of funds or a need for further review.

(b) *Reconsideration.* Any deferral or disapproval of an application shall not preclude its reconsideration or resubmission.

(c) *Notification of disposition.* The Director will notify the applicant in writing of the disposition of its application. A signed notification of grant award will be issued to notify the applicant of an approved project application.

§ 1403.13 Amendments.

Substantive amendments will be subject to approval in the same manner, and on the same forms, as original applications. Project amendments may be (a) requested by the grantee, as provided in § 1408.4 of this subchapter or (b) initiated by the Director if it appears that Federal grant funds are not being used effectively, or if changes are made in Federal appropriations, laws, regulations, or policies governing such projects. If such amendment constitutes a partial termination of the award, the procedures contained in § 1414.14 of this subchapter shall apply. Only those pages of the required forms which relate to the requested changes should be submitted.

§ 1403.15 Preliminary proposals.

When he/she deems it necessary or desirable to effectuate the purposes and policies in § 1400.3 and § 1400.4(a) of this subchapter, the Director may require any applicant for assistance under this subchapter to submit a preliminary proposal for review and approval prior to the acceptance of an application submitted under § 1403.4.

PART 1406—PROCUREMENT STANDARDS FOR GRANTEES

Sec.
1406.1 General standards for procurement.
1406.4 Code of conduct.
1406.5 Free competition.
1406.6 Procedural requirements.
1406.7 Negotiated procurement.
1406.10 Contractor responsibility.
1406.11 Records.
1406.12 Contract administration system.
1406.15 Contract provisions.
1406.16 Procurement of construction.

AUTHORITY: Sec. 405 of the General Education Provisions Act, as added by Sec. 301 (a)(2) of Public Law 92–318, 86 Stat. 328 (20 U.S.C. 1221e); OMB Circular A–102, Attachment O, unless otherwise noted.

§ 1406.1 General standards for procurement.

(a) Each project application shall provide that the activities and services for which Federal financial assistance is sought will be administered by, or under the supervision of, the applicant.

(b) The applicant shall not transfer to others, responsibility, in whole or in part, for the use of Federal funds for the conduct of project activities, but may enter into contracts or arrangements with others for carrying out a portion of any such activities in accordance with the provisions of this part.

(c) This part provides standards for use by grantees in establishing procedures for the procurement of supplies, equipment, construction, and other services with Federal grant funds. These standards are furnished to insure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal law and Executive orders.

(d) The standards contained in this part do not relieve the grantee of the responsibilities arising under its contracts. The grantee is the responsible authority regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into, in support of a grant. This includes but is not limited to: Disputes, claims, protests of award, source evaluation, or other matters of a contractual nature. Matters concerning violation of law are to be referred to such local, State, or Federal authority as may have proper jurisdiction.

(e) Grantees may use their own procurement regulations which reflect applicable State and local law, rules, and regulations provided that procurements made with Federal grant funds adhere to the standards set forth in this part.

§ 1406.4 Code of conduct.

The grantee shall maintain a code of standards of conduct which shall govern the performance of its officers, board members, employees, or agents in contracting with and expending Federal grant funds. The grantee's officers, employees, or agents shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors. To the extent per-

V 38 - 4 JAN 8 73 XUM

missible by State or local law, rules, or regulations, such standards shall provide for penalties, sanctions, or other disciplinary actions to be applied for violations of such standards by either the grantee officers, employees, or agents, or by contractors or their agents.

§ 1406.5 Free competition.

All procurement transactions regardless of whether negotiated or advertised and without regard to dollar value shall be conducted in a manner so as to provide maximum open and free competition. The grantee should be alert to organizational conflicts of interest or noncompetitive practices among contractors which may restrict or eliminate competition or otherwise restrain trade.

§ 1406.6 Procedural requirements.

The grantee shall establish procurement procedures which provide for, as a minimum, the following procedural requirements: (a) Proposed procurement actions shall be reviewed by high level grantee officials to avoid purchasing unnecessary or duplicative items. Where appropriate, an analysis shall be made of lease and purchase alternatives to determine which would be the most economical, practical procurement.

(b) Invitations for bids or requests for proposals shall be based upon a clear and accurate description of the technical requirements for the material, product, or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. "Brand name or equal" description may be used as a means to define the performance or other salient requirements of a procurement, and when so used, the specific features of the named brand which must be met by offerors should be clearly specified.

(c) Positive efforts shall be made by the grantees to utilize small business and minority-owned business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for contracts to be performed utilizing Federal grant funds.

(d) The type of procuring instruments used (i.e., fixed price contracts, cost reimbursable contracts, purchase orders, incentive contracts, etc.), shall be appropriate for the particular procurement and for promoting the purposes of this subchapter. The "cost-plus-a-percentage-of-cost" method of contracting shall not be used.

(e) Formal advertising, with adequate purchase description, sealed bids, and public openings shall be the required method of procurement unless negotiation pursuant to § 1406.7 is necessary to accomplish sound procurement. However, procurements of $2,500 or less need not be so advertised unless otherwise required by State or local law or regulations.

(1) Where such advertised bids are obtained, the awards shall be made to the responsible bidder whose bid is responsive to the invitation and is most advantageous to the grantee, price, and other factors considered. Factors such as discounts, transportation costs, and taxes may be considered in determining the lowest bid.

(2) Invitations for bids shall clearly set forth all requirements which the bidder must fulfill in order for his bid to be evaluated by the grantee.

(3) Any or all bids may be rejected when it is in the grantee's interest to do so, and such rejections are in accordance with applicable State and local law, rules, and regulations.

§ 1406.7 Negotiated procurement.

(a) Procurements may be negotiated if it is impracticable and unfeasible to use formal advertising. Generally, procurements may be negotiated by the grantee if one or more of the following conditions prevail:

(1) The public exigency will not permit the delay incident to advertising;

(2) The material or service to be procured is available from only one person or firm; all contemplated sole source procurements where the aggregate expenditure is expected to exceed $5,000 shall be referred to the Director for prior approval;

(3) The aggregate amount involved does not exceed $2,500;

(4) The contract is for personal or professional services, or for any service to be rendered by university, college, or other educational institutions, subject to the requirements of §§ 1406.1 (a) and (b) and 1412.7 of this subchapter.

(5) The material or services are to be procured and used outside the limits of the United States and its possessions;

(6) No acceptable bids have been received after formal advertising;

(7) For materials or services where the prices are established by law;

(8) For experimental, developmental or research work;

(9) Otherwise authorized by law, rules, or regulations.

(b) Notwithstanding the existence of circumstances justifying negotiation, competition shall be obtained to the maximum extent practicable.

§ 1406.10 Contractor responsibility.

Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Considerations shall be given to such matters as contractor integrity, record of past performance, financial and technical resources, or accessibility to other necessary resources.

§ 1406.11 Records.

Procurement records or files for purchases in amounts in excess of $2,500 shall provide at least the following pertinent information: Justification for the use of negotiation in lieu of advertising, contractor selection, and the basis for the cost or price negotiated.

§ 1406.12 Contract administration system.

A system for contract administration shall be maintained to assure contractor conformance with terms, conditions, and specifications of the contract or order, and to assure adequate and timely followup of all purchases.

§ 1406.13 Contract provisions.

The grantee shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all contracts:

(a) Contracts shall contain such contractual provisions or conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contracts terms, and provide for such sanctions and penalties as may be appropriate.

(b) All contracts, amounts for which are in excess of $2,500, shall contain suitable provisions for termination by the grantee including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(c) All contracts in excess of $10,000 shall include provisions for compliance with Executive Order No. 11246, entitled "Equal Employment Opportunity," as supplemented in Department of Labor Regulations (41 CFR Part 60). Each contractor shall be required to have an affirmative action plan which declares that it does not discriminate on the basis of race, color, religion, creed, national origin, sex, and age, and which specifies goals and target dates to assure the implementation of that plan. The grantee shall establish procedures to assure compliance with this requirement by contractors and to assure that suspected or reported violations are promptly investigated.

(d) Contracts or agreements, the principal purpose of which is to create, develop, or improve products, processes or methods; or for exploration into fields which directly concern public health, safety, or welfare; or contracts in the field of science or technology in which there has been little significant experience outside of work funded by Federal assistance, shall contain a notice to the effect that matters regarding rights to inventions, and materials generated under the contract or agreement are subject to § 1412.22 of this subchapter and any regulations issued by the grantee. Detailed copyright provisions covering project grants of the Institute will be issued as a separate regulation.

(e) All negotiated contracts except those of $2,500 or less awarded by grantees shall include a provision to the effect that the grantee, the Director, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to a specific grant program for the purpose of making audit, examination, excerpts, and transcriptions.

(f) Each contract of an amount in excess of $2,500 awarded by a grantee or subcontractor shall provide that the recipient will comply with applicable regulations and standards of the Cost of Living Council (6 CFR Ch. I) in establishing wages and prices. The provision shall advise the recipient that submission of a bid or offer or the submittal of an invoice or voucher for property, goods, or services furnished under a contract or agreement with the grantee shall constitute a certification by him that amounts to be paid do not exceed maximum allowable levels authorized by the Cost of Living Council regulations or standards. Violations shall be reported to the Institute and the local Internal Revenue Service field office.

(g) Contracts of amounts in excess of $10,000 shall contain a provision which requires the recipient to agree to comply with all applicable standards, orders, or regulations issued pursuant to the Clean Air Act of 1970. Violations shall be reported to the Institute and the Regional Office of the Environmental Protection Agency.

§ 1406.16 Procurement of construction.

All construction contracts are subject to the provisions of Subpart C of Part 1412 of this subchapter.

PART 1408—FEDERAL FINANCIAL PARTICIPATION

Sec.
1408.1 Amount of award.
1408.2 Limitations on costs.
1408.4 Budget revisions and minor deviations.
1408.7 Federal obligation.
1408.8 Payments.
1408.9 Duration of project.
1408.10 Obligation and liquidation by grantee.
1408.12 Allowable costs.

AUTHORITY: Section 405 of the General Education Provisions Act, as added by section 301(a)(2) of Public Law 92-318, 86 Stat. 328 (20 U.S.C. 1221e), unless otherwise noted.

§ 1408.1 Amount of award.

Federal assistance shall be provided only to meet allowable costs incurred by the award recipient in carrying out the approved project in accordance with section 405 of the Act and the regulations of this subchapter.

(31 U.S.C. 628)

§ 1408.2 Limitations on costs.

The amount of the award shall be set forth in the grant award document. The total cost to the Government will not exceed the amount set forth in the grant award document or any modification thereof approved by the Director which meets the requirements of applicable statutes and regulations. The Government shall not be obligated to reimburse the grantee for costs incurred in excess of such amount unless and until the Director has notified the grantee in writing that such amount has been increased and has specified such increased amount in a revised grant award document pursuant to § 1403.13 of this subchapter. Such revised amount shall thereupon constitute the revised total cost of the performance of the grant.

(31 U.S.C. 200)

§ 1408.4 Budget revisions and minor deviations.

(a) *State and local governments.* (1) This paragraph applies only to grantees which are State and local governments, as defined in subparagraph (2) of this paragraph.

(OMB Circular No. A-102, Attachment K)

(2) As used in this paragraph:

(i) "Direct cost object class budget categories" include only the following:

(a) Personnel;
(b) Fringe benefits;
(c) Travel;
(d) Equipment;
(e) Supplies;
(f) Contractual;
(g) Construction; and
(h) Other.

(ii) "Construction" means solely or primarily for construction.

(iii) "Local government" means a local unit of government including specifically a county, municipality, city, town, township, school district, local public authority, special district, intrastate district, council of governments, sponsor group representative organization, and other regional or interstate government entity, or any agency or instrumentality of a local government exclusive of institutions of higher education and hospitals.

(iv) "Nonconstruction" means not solely or primarily for construction.

(v) "State" means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of State institutions of higher education and hospitals.

(OMB Circular No. A-102, Exhibit M-3, 5)

(3) For nonconstruction grants, State and local government grantees shall request prior approval promptly from the Director for proposed budget revisions whenever one or more of the following conditions prevail:

(i) The revision results from approved changes in the scope or the objective of the project;

(ii) The revision indicates the need for additional Federal funding;

(iii) The budget is over $100,000 and the cumulative amount of transfers among direct cost object class budget categories exceeds or is expected to exceed $10,000, or five percent (5%) of the budget, whichever is greater. The same criteria apply to the cumulative amount of transfers among projects, functions, and activities when budgeted separately for a grant, except that the Director will permit no transfer which would cause any Federal appropriation, or part thereof, to be used for purposes other than those intended;

(iv) The budget is $100,000 or less, and the cumulative amount of transfers among direct cost object class budget categories exceeds or is expected to exceed five percent (5%) of the budget. The same criteria apply to the cumulative amount of transfers among projects, functions, and activities when budgeted separately for a grant, except that the Director will permit no transfer which would cause any Federal appropriation, or part thereof, to be used for purposes other than those intended;

(v) The revisions involve the transfer of amounts budgeted for indirect costs to absorb increases in direct costs; or

(vi) The revisions pertain to the addition of items requiring approval in accordance with the provisions of Appendix B to this subchapter.

(OMB Circular No. A-102, Attachment K, 1-2)

(4) Budget revisions for nonconstruction grants, other than those revisions set forth in paragraph (a)(3) of this section, do not require approval by the Director. Budget revisions which do not require such approval include (i) the use of grantee funds in furtherance of project objectives over and above the grantee minimum share (if any) included in the approved budget and (ii) the transfer of amounts budgeted for direct costs to absorb authorized increases in indirect costs.

(5) For construction grants, State and local government grantees shall request prior approval promptly from the Director for budget revisions whenever:

(i) The revision results from changes in the scope or objective of the project; or

(ii) The revision increases the budgeted amounts of Federal funds needed to complete the project.

(OMB Circular No. A-102, Attachment K, 2)

(6) (i) For both construction and nonconstruction grants, State and local government grantees shall notify the Director promptly whenever the amount of Federal authorized funds is expected to exceed the needs of the recipient by more than $5,000 or five percent (5%) of the Federal grant, whichever is greater.

(ii) The notification required in paragraph (a)(6)(i) of this section will not be required when applications for additional funding are submitted for continuing grants.

(OMB Circular No. A-102, Attachment K, 2)

(7) Within 30 days from the date of receipt of the request for budget revisions, the Director will review the request and notify the grantee as to whether or not the budget revisions have been approved. If the revision is still under consideration at the end of such 30-day period, the Director will inform the recipient in writing as to when the grantee may expect the Director's decision.

(OMB Circular No. A-102, Attachment K, 3)

(b) *Recipients other than State and local governments.* (1) Minor deviations from the project of a grantee other than a State or local government, as defined in paragraph (a)(2) of this section, in

V 38 - 4 JAN 8 73 XUM

methodology, approach, or other aspects of the project that would expedite achievement of the project's research objectives, including changes that grew out of the approved strategy, are permitted without the necessity for an approved amendment of revision where (i) they do not result in expenditures in excess of the total amount granted; (ii) there is not any material change in the content or the administration of the approved application; and (iii) expenditures are otherwise made in accordance with, and for kinds of expenditures authorized in, the approved project.

(2) Project changes which result in (i) expenditures in excess of the total amount granted; (ii) material changes in the content or administration of the approved project; or (iii) expenditures which are not of the kind authorized in the approved project require prior amendment to the grant by the Director, in accordance with § 1403.13 of this subchapter.

(31 U.S.C. 628)

§ 1408.7 Federal obligation.

The issuance of a grant award document will be regarded as an obligation of the Federal Government in the amount of the award.

(31 U.S.C. 200)

§ 1408.8 Payments.

(a) *Payment methods and adjustments.* Payments pursuant to grants may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, as the Director may determine.

(b) *Violations.* A payment under any such grant for expenditures which fail to meet the requirements of any of the provisions of applicable Federal statutes, regulations, or the approved project application (including any terms and conditions applicable thereto) may be taken into account in the determination of any such overpayments and any adjustments relating thereto.

(c) *Current needs.* Funds paid pursuant to a grant for amounts expended by a grantee to carry out its function under such grant generally will be limited to the amount necessary to meet current needs for disbursement.

(d) *Adjustment of records.* Each grantee, in its maintenance of project expenditure accounts, records, and reports shall promptly make any necessary adjustments in its records to reflect refunds, credits, underpayments, or overpayments, resulting from Federal or State administrative reviews and audits or otherwise. Such adjustments shall be set forth in any financial reports required to be filed with the Director.

§ 1408.9 Duration of project.

(a) The amount of the grant award shall remain available for obligation by the grantee during the period specified in the grant award or until otherwise terminated. Such period may be extended by revision of the grant with or without additional funds pursuant to paragraph (b) of this section where otherwise permitted by law.

(b) When it is determined that special or unusual circumstances will delay the completion of the project beyond the period for obligation, the grantee must in writing request the Director to extend such period and must indicate the reasons therefor.

§ 1408.10 Obligation and liquidation by grantee.

(a) Obligations will be considered to have been incurred by a grantee on the basis of documentary evidence of binding commitments for the acquisition of goods or property or for the performance of work, except that funds for personal services, for services performed by public utilities, for travel, and for the rental of facilities, shall be considered to have been obligated as of the time such services were rendered, such travel was performed, and such rented facilities were used, respectively.

(b) Obligations entered into by a grantee shall be liquidated within 1 year following the grant period unless the Director, in writing, extends the time for so liquidating obligations, on the basis of a request, in writing, from the grantee. Such request must be made prior to the end of the initial period for liquidating obligations.

(31 U.S.C. 200)

§ 1408.12 Allowable costs.

Subject to applicable Federal statutes and regulations, allowability of costs shall be determined in accordance with the principles and procedures contained in the following documents:

(a) Appendix A to this part, if the recipient is a nonprofit institution, agency, or organization which is not covered under paragraphs (b) or (c) of this section,

(b) Appendix B to this part if the recipient is a State or local government, or

(c) Appendix C to this part if the recipient is an institution of higher education.

(OMB Circulars Nos. A-21, A-87)

PART 1410—FINANCIAL REPORTING REQUIREMENTS FOR GRANTEES

Sec.
1410.1 General.
1410.2 Definitions.
1410.3 Reporting.
1410.5 Advances and reimbursements.

AUTHORITY: Sec. 405 of the General Education Provisions Act, as added by section 301(a)(2) of Public Law 92-318, 86 Stat. 328 (20 U.S.C. 1221e); OMB Circular A-102, Attachment H, unless otherwise noted.

§ 1410.1 General.

This part prescribes requirements for grantees to report financial information and to request advances and reimbursement when a letter-of-credit method is not used, and specifies standard forms incident thereto.

§ 1410.2 Definitions.

The following definitions apply for the purposes of this part:

Accrued expenditures. Accrued expenditures are the charges incurred by the grantee during a given period requiring the provision of funds for: (1) Goods and other tangible property received; (2) services performed by employees, contractors, and other payees; and (3) amounts becoming owed under programs for which no current services or performance are required.

Accrued income. Accrued income is the earnings during a given period which is a source of funds resulting from: (1) Services performed by the grantee; (2) goods and other tangible property delivered to purchasers; and (3) amounts becoming owed to the grantee for which no current services or performances are required by the grantee.

Disbursements. Disbursements are payments in cash or by check.

Federal funds authorized. Funds authorized represent the total amount of the Federal funds authorized for obligations and establish the ceilings for obligation of Federal funds. This amount may include any authorized carryover of unobligated funds from prior fiscal years.

In-kind contributions. In-kind contributions represent the value of noncash contributions provided by: (1) The grantee; (2) other public agencies and institutions; and (3) private organizations and individuals. In-kind contributions may consist of charges for real property and equipment, and value of goods and services directly benefiting and specifically identifiable to the grant project. When authorized by Federal legislation, property purchased with Federal funds may be considered as the grantee's in-kind contributions.

Obligations. Obligations are the amounts of orders placed, contracts awarded, services received, and similar transactions during a given period, which will require payment during the same or a future period.

Outlays. Outlays represent charges made to the grant project. Outlays can be reported on a cash or accrued expenditure basis.

Unobligated balance. The unobligated balance is the portion of the funds authorized by the Director which has not been obligated by the grantee and is determined by deducting the cumulative obligations from the funds authorized.

Unpaid obligations. Unpaid obligations represent the amount of obligations incurred by the grantee which have not been paid by him/her.

§ 1410.3 Reporting.

Only the following forms will be authorized for obtaining financial information from grantees:

(a) *Financial Status Report (OMB Form No. 80-120180).* (1) Grantees shall use the standard Financial Status Report to report the status of funds for all nonconstruction grant programs. The Financial Status Report shall not be required when the Request for Advance or Reimbursement (§ 1410.5) is determined to provide adequate information, except that a final Financial Status Report shall be required at the completion of the grant when the Request for Advance or Reimbursement form is used only for advance.

(2) The Director shall prescribe whether the report shall be on a cash or accrual basis. If the Director requires accrual information and the grantee's accounting records are not normally kept on the accrual basis, the grantee should develop such information through an analysis of the documentation on hand or on the basis of best estimates.

(3) The Director shall specify the frequency of the Financial Status Report for each grant project considering the site and complexity of the particular project. However, the report shall not be required more frequently than quarterly or less frequently than annually. Also, a final report shall be required at the completion of the grant.

(4) The original and two copies of the Financial Status Report shall be submitted within 30 days after the end of each specified reporting period. In addition, final reports shall be submitted 30 days after the end of the grant period of the completion of the project. Extensions to reporting due dates may be granted when requested by the grantee.

(b) *Report of Federal Cash Transactions (OMB Form No. 80-R0182).* (1) When funds are advanced to grantees through letters of credit or with Treasury checks, the grantee shall submit a Report of Federal Cash Transactions. This report shall be utilized to monitor cash advances to grantees and to obtain disbursement or outlay information for each grant project from the grantees.

(2) Forecasts of Federal cash requirements in the Remarks section of the report may be required.

(3) The Director will accept the identical information from the grantees in a machine-usable format in lieu of the Report of Federal Cash Transactions.

(4) Grantees shall submit the original and two copies of the Report of Federal Cash Transactions no later than 15 working days following the end of each quarter. For those grantees, if any, receiving annual grants totaling $1 million or more, a monthly report shall be required.

(5) The requirement for submission of the Report of Federal Cash Transactions may be waived when monthly advances do not exceed $10,000 per grantee: *Provided,* That such advances are monitored through other forms contained in this section or the grantee's accounting controls are adequate to minimize excessive Federal advances.

§ 1410.5 Advances and reimbursements.

Except as noted in this section, only the following form will be utilized by grantees in requesting advances and reimbursements:

REQUEST FOR ADVANCE OR REIMBURSEMENT (OMB FORM No. 80-R0183)

(a) The Request for Advance or Reimbursement is the standard form for all nonconstruction grant programs when letters of credit or predetermined automatic advance methods are not used.

(b) Grantees are authorized to submit requests for advances or reimbursement when letters of credit are not used. Grantees shall submit the original and two copies of the Request for Advance or Reimbursement.

PART 1412—ADMINISTRATION OF PROJECT GRANTS

Subpart A—Protection of Human and Animal Subjects

Sec.
1412.1 Protection of human subjects.
1412.2 Data-collection instruments.
1412.3 Treatment of animals.

Subpart B—General Requirements

1412.7 Principal investigators.
1412.10 Retention of records.
1412.11 Audits.
1412.14 Financial interest prohibited.
1412.15 Dual compensation.
1412.16 Fees to Department employees.
1412.19 Commencement of project activity.
1412.21 Leasing facilities.
1412.22 Inventions or discoveries.
1412.23 Standards for grantee financial management systems.
1412.24 Evaluation and performance reports.

Subpart C—Construction

1412.40 General.
1412.41 Title to site.
1412.42 Safety and health.
1412.43 Environmental impact.
1412.44 Reports.
1412.45 Cultural activities.
1412.46 Commencement of construction.
1412.47 Cost-sharing and operational funds.
1412.48 Contracting.
1412.49 Copeland "Anti-Kick Back" Act.
1412.50 Davis-Bacon Act.
1412.51 Contract Work Hours and Safety Standards Act.
1412.52 Bonds and insurance.
1412.53 Supervision and inspection.
1412.54 Civil rights assurance.
1412.55 Federal access to records and work.
1412.56 Operation and maintenance.
1412.57 Access by the handicapped.
1412.58 Timeliness of work.
1412.59 Avoidance of flood hazards.
1412.60 Relocation assistance.
1412.61 Preservation of historic sites.

Subpart D—Property Management

1412.69 Nonexpendable personal property.
1412.70 Special property.
1412.72 Property management standards.
1412.73 Unused expendable personal property.

AUTHORITY: Section 405 of the General Education Provisions Act, as added by section 301(a)(2) of Public Law 92-318, 86 Stat. 328 (20 U.S.C. 1221e); §§ 1412.48 to 1412.52 also issued under OMB Circular No. A-102, Attachment O; §§ 1412.69-1412.73 also issued under OMB Circular No. A-102, Attachment N, unless otherwise noted.

Subpart A—Protection of Human and Animal Subjects

§ 1412.1 Protection of human subjects.

All grantees, insofar as their proposal involves research with human subjects, must insure that the rights and welfare of human subjects are maintained. Every precaution must be taken to protect human subjects from physical, psychological, or sociological harm, in accordance with the specific provisions of Title 41, Subpart 3-4.55 of the Code of Federal Regulations.

§ 1412.2 Data-collection instruments.

(a) *Definitions.* For the purposes of this section:

"Data-collection instruments" means tests, questionnaires, inventories, interview schedules or guides, rating scales, and survey plans or any other forms which are used to collect information on substantially identical items from 10 or more respondents.

"Respondents" means individuals or organizations from whom information is collected.

(b) *Clearance.* (1) No data-collection instruments shall be used in any project unless such instruments have been approved in advance by the Director.

(2) To obtain approval of data-collection instruments, an applicant for assistance shall submit the following data:

(i) A statement which provides—

(*a*) The exact title of the data-collection instrument submitted for approval;

(*b*) The purposes of the project and the relation of such instrument thereto;

(*c*) The nature and size of the sample, including the method or methods of sampling;

(*d*) The locale of the project;

(*e*) The provisions for anonymity and confidentiality of response;

(*f*) A brief indication of the nature and extent of statistical analysis of the data;

(*g*) The estimated average time required of the respondent for his participation in the project; and

(*h*) A single figure giving the estimated cost of the survey as a component of the project to be assisted; and

(ii) Five copies of each data-collection instrument to be cleared, except that copies need not be submitted of instruments which deal solely with—

(*a*) Functions of technical proficiency, such as scholastic aptitude, school achievement, and vocational proficiency;

(*b*) Routine demographic information; or

(*c*) Routine institutional information.

(3) The Director will take into account all factors specified in paragraph (b)(2)(i) of this section in any determination regarding approval of data-collection instruments. Clearance will be denied where the Director determines that such instruments constitute unnecessary or offensive intrusions of privacy through inquiries regarding such matters as religion, sex, or politics.

(c) *Responsibility for collection of information.* A grantee shall not in any way represent or imply (either in a letter of transmittal, in the data-gathering instruments themselves, or in any other manner) that the information is being collected by or for the Federal Government or any of its subdivisions without prior, specific approval from the Director. Basic responsibility for the study and the data-gathering instruments rests with the grantee.

V38-4 JAN 8 73 XUM

(d) *Parental consent.* In the case of any survey using data-collection instruments which will include children below the age of 18 as respondents, in addition to the other requirements contained in this section, the applicant for assistance shall provide assurances satisfactory to the Director that informed consent will be obtained from the parents of each respondent prior to the use of such instruments.

§ 1412.3 Treatment of animals.

If animals are utilized in any project receiving assistance, the applicant for such assistance shall provide assurances satisfactory to the Director that such animals will be provided with proper care and humane treatment; in accordance with the Animal Welfare Act of 1970 (Public Law 89–544, as amended).

Subpart B—General Requirements

§ 1412.7 Principal investigators.

All grant awards shall be subject to the condition that the principal investigator designated in the application as responsible for the conduct of the approved project shall continue to be responsible for the duration of the project period. Whenever any such investigator shall become unavailable for any reason to discharge this responsibility, the grant shall be terminated and an accounting rendered as provided in §§ 1414.14 and 1414.15 of this subchapter unless the grantee replaces such investigator with another person found by the Director to be qualified to direct and conduct the approved project.

§ 1412.10 Retention of records.

(a) *Records.* Each grantee shall keep intact and accessible records relating to the receipt and expenditure of Federal funds and to the expenditure of the grantee's contribution to the cost of the project, if any, including all accounting records and related original and supporting documents that substantiate direct and indirect costs charged to the grant.

(b) *Retention.* Except as otherwise provided in this paragraph and paragraph (d) of this section, the records shall be retained for 3 years after the date of the submission of the final expenditure report, or for grants which are reviewed annually, for 3 years after the date of the submission of the annual expenditure report. Records for nonexpendable personal property which was acquired with Federal funds shall be retained for 3 years after its final disposition.

(c) *Microfilm copies.* Grantees may substitute microfilm copies in lieu of original records in meeting the requirements of this section.

(d) *Audit questions.* The records involved in any claim or expenditure which has been questioned by Federal audit shall be further retained until resolution of any such audit questions.

(e) *Audit and examination.* The Secretary, the Director, and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to all such records and to any other pertinent books, documents, papers, and records of the grantee.

(OMB Circular No. A–73; OMB Circular No. A–102, Attachment C)

§ 1412.11 Audits.

(a) All expenditures by grantees shall be audited by the grantee or at the grantee's direction to determine, at a minimum, the fiscal integrity of financial transactions and reports, and the compliance with laws and regulations.

(b) The grantee shall schedule such audits with reasonable frequency, usually annually, but not less frequently than once every 2 years, considering the nature, size, and complexity of the activity.

(c) Copies of audit reports shall be made available to the Director to assure that proper use has been made of the funds expended. The results of such audits will be used to review the grantee's records and shall be made available to Federal auditors. Federal auditors shall be given access to such records or other documents as may be necessary to review the results of such audits.

(d) Each grantee shall use a single auditor for all of its expenditures under Federal education assistance programs, regardless of the number of Federal agencies providing such assistance.

(OMB Circular No. A–102, Attachment G, 2; C–1)

§ 1412.14 Financial interest prohibited.

A person who is a public official, officer, or member of, or who is otherwise associated with a grantee, may not participate in an administrative decision with respect to the grantee's project, if such decision can be expected to result in any benefit or remuneration, including, without limitation, a royalty, commission, contingent fee, brokerage fee, or other benefit, to him/her or to any member of his/her immediate family.

§ 1412.15 Dual compensation.

If a project staff member or consultant of one grantee is involved simultaneously in two or more projects supported by any funds either under this chapter or otherwise, he/she may not be compensated for more than 100 percent of his time from any funds during any part of the period of dual involvement.

§ 1412.16 Fees to Federal employees.

The grantee shall not use any Federal funds or funds from other sources to pay a fee to, or travel expenses of, employees of the Federal Government for lectures, attending program functions, or any other activities in connection with the grant.

§ 1412.19 Commencement of project activity.

Projects receiving Federal financial assistance shall commence within a reasonable period of time subsequent to the awarding of the grant.

§ 1412.21 Leasing facilities.

In the case of a project involving the leasing of a facility, the grantee shall demonstrate that it will have the right to occupy, to operate, and, if necessary, to maintain and improve the leased facility during the proposed period of the project.

§ 1412.22 Inventions or discoveries.

Any award pursuant to this part is subject to the regulations of the Department of Health, Education, and Welfare as set forth in Parts 6 and 8 of this title, as amended. Such regulations shall apply to any activity for which grant funds are in fact used whether within the scope of the project as approved or otherwise. Appropriate measures shall be taken by the grantee and by the Director to assure that no contracts, assignments, or other arrangements inconsistent with the obligation are continued or entered into and that all personnel involved in the supported activity are aware of and comply with such obligation. Laboratory notes, related technical data and information pertaining to inventions or discoveries shall be maintained for such periods, and filed with or otherwise made available to the Director or those he may designate at such times and in such manner, as he may determine necessary to carry out such Department regulations.

§ 1412.23 Standards for grantee financial management systems.

Grantee financial management systems shall provide for:

(a) Accurate, current, and complete disclosure of the financial results of each grant program in accordance with reporting requirements. When the Director requires reporting on an accrual basis and the grantee's accounting records are not kept on that basis, the grantee should develop such information through an analysis of the documentation on hand or on the basis of best estimates.

(b) Records which identify adequately the source and application of funds for grant-supported activities. These records shall contain information pertaining to grant awards and authorizations, obligations, unobligated balances, assets, liabilities, outlays, and income.

(c) Effective control over and accountability for all funds, property, and other assets. Grantees shall adequately safeguard all such assets and shall assure that they are used solely for authorized purposes.

(d) Comparison of actual with budgeted amounts for each grant. Also, relation of financial information with performance or productivity data, including the production of unit cost information whenever appropriate and required by the grantor agency.

(e) Procedures to minimize the time elapsing between the transfer of funds from the U.S. Treasury and the disbursement by the grantee, whenever funds are advanced by the Federal Government. When advances are made by a letter-of-credit method, the grantee shall make drawdowns from the U.S. Treasury through his commercial bank as close as possible to the time of making the disbursements.

(f) Procedures for determining the allowability and allocability of costs in accordance with the provisions of applicable Office of Management and Budget circulars.

(g) Accounting records which are supported by source documentation.

(h) Audits to be made by the grantee in accordance with § 1412.11.

(i) A systematic method to assure timely and appropriate resolution of audit findings and recommendations.

§ 1412.24 Evaluation and performance reports.

Grantees shall constantly monitor the performance under grant-supported activities to assure that time schedules are being met, projected work units by time periods are being accomplished, and other performance goals are being achieved. This review shall be made for each program, function, or activity of each grant as set forth in the approved grant application.

(a) *Performance reports.* Grantees shall submit a performance report for each grant which briefly presents the following for each program, function, or activity involved:

(1) A comparison of actual accomplishments to the goals established for the period. Where the output of grant programs can be readily quantified, such quantitative data should be related to cost data for computation of unit costs;

(2) Reasons for slippage in those cases where established goals were not met;

(3) Other pertinent information including, when appropriate, analysis and explanation of cost overruns or high unit costs.

(b) Grantees shall submit the performance reports to the Institute with the Financial Status Reports, in the frequency established by the Director. The Director shall prescribe the frequency with which the performance reports will be submitted with the Request for Advance or Reimbursement when that form is used in lieu of the Financial Status Report. In no case, however, shall the performance reports be required more frequently than quarterly or less frequently than annually.

(c) Between the required performance reporting dates, events may occur which have significant impact upon the project or program. In such cases, the grantee shall inform the Director as soon as the following types of conditions become known:

(1) Problems, delays, or adverse conditions which will materially affect the ability to attain program objectives, prevent the meeting of time schedules and goals, or preclude the attainment of project performance units by established time periods. This disclosure shall be accompanied by a statement of the action taken, or contemplated, and any Federal assistance needed to resolve the situation.

(2) Favorable developments or events which enable meeting time schedules and goals sooner than anticipated or producing more performance units than originally projected.

(d) If any performance review conducted by the grantee discloses the need for change in the budget estimates in accordance with criteria established, the grantee shall submit a request for budget revision in accordance with § 1408.4 of this subchapter.

(e) The grantee shall cooperate in site visits by representatives of the Institute to:

(1) Review program accomplishments and management control systems.

(2) Provide such technical assistance as may be required.

(OMB Circular No. A–102, Attachment G)

Subpart C—Construction

§ 1412.40 General.

(a) *Scope.* It is the policy of the Institute that only limited funding will be available under section 405 of the Act for the support of construction. Construction activities will be approved for assistance under this subchapter, and the provisions of this part will apply, only when the Director decides that support of such activities is necessary to the effectuation of the purposes set forth in § 1400.3 of this subchapter.

(b) *Definition.* For the purposes of this section, the term "facilities" means one or more structures in one or more locations, constructed pursuant to this section.

(c) *Manner of construction.* Such construction must be functional, undertaken in an economical manner, and not elaborate in design or extravagant in the use of materials.

(d) *Conditions for assistance.* Where applications are submitted to the Director for projects which involve construction, Federal financial assistance for such construction shall be subject to the conditions specified in this subchapter.

§ 1412.41 Title to site.

The applicant shall have or will obtain a fee simple or such other estate or interest in the site, including access thereto, as is sufficient to assure undisturbed use and possession of the facilities for not less than the useful life of the facility.

§ 1412.42 Safety and health.

In planning for and designing facilities, the applicant shall observe local and States codes as well as the National Fire Protection Association (NFPA) Standard 101, (Life Safety Code) and standards adopted under the Occupational Safety and Health Act of 1970 (Public Law 91–576): *Provided, however,* That to the extent they are more stringent, State and local codes shall apply.

§ 1412.43 Environmental impact.

The applicant shall provide the Department Regional Office with an assessment of the impact of the project on the quality of the environment in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) and Executive Order No. 11514 (34 FR 4247); and will comply with such procedures in that regard as may be established by the Department.

§ 1412.44 Reports.

The applicant shall furnish progress reports and such other information relating to the proposed construction and the project as the Director may require.

§ 1412.45 Cultural activities.

Reasonable provision shall be made, consistent with the other uses to be made of the facilities, for areas in such facilities which are adaptable for artistic and cultural activities.

§ 1412.46 Commencement of construction.

Approval by the Director of the final working drawings and specifications shall be obtained before the proposed construction is advertised or placed on the market for bidding; the construction shall be completed in accordance with the approved application, drawings, and specifications; the applicant shall submit to the Director for prior approval changes that materially alter the scope or costs of the project, use of space, or functional layout; and the applicant shall not enter into any construction contract for the proposed construction or a part thereof until the requirements of this subchapter and, in particular, Part 1406 of this subchapter and this subpart, have been met.

§ 1412.47 Cost-sharing and operational funds.

Sufficient funds shall be available to meet the non-Federal share of the cost of constructing the facility where applicable, and sufficient funds shall be available when construction is completed to assure effective operation and maintenance of the facility for the purposes for which constructed.

§ 1412.48 Contracting.

Except as otherwise provided by State or local law, all contracting for construction including the purchase and installation of builtin equipment shall be on a lump sum fixed-price basis, and contracts shall be awarded in accordance with the procedural rules and substantive requirements set forth in Part 1406 of this subchapter.

§ 1412.49 Copeland "Anti-Kick Back" Act.

All contracts for construction or repair shall include a provision for compliance with the Copeland "Anti-Kick Back" Act (18 U.S.C. 874) as supplemented in Department of Labor regulations (29 CFR Part 3). This Act provides that each contractor shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The grantee shall report all suspected or reported violations to the Director.

V 38 - 4 JAN 8 73 XUM

§ 1412.50 Davis-Bacon Act.

All construction grants awarded by grantees and subcontractors shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276a to a–7) as supplemented by Department of Labor regulations (29 CFR Part 5). Under this Act contractors shall be required to pay wages to laborers and mechanics at a rate not less than the minimum wages specified in a wage determination made by the Secretary of Labor. In addition, contractors shall be required to pay wages not less often than once a week. The grantee shall place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation and the award of a contract shall be conditioned upon the acceptance of the wage determination. The grantee shall report all suspected or reported violations to the Director.

§ 1412.51 Contract Work Hours and Safety Standards Act.

Where applicable, all contracts awarded by grantees and subcontractors in excess of $2,000 for construction contracts and in excess of $2,500 for other contracts which involve the employment of mechanics or laborers shall include a provision for compliance with sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–330) as supplemented by Department of Labor regulations (29 CFR Part 5). Under section 103 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard workday of 8 hours and a standard workweek of 40 hours. Work in excess of the standard workday or workweek is permissible: *Provided*, That the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 8 hours in any calendar day or 40 hours in the workweek. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to his health and safety as determined under construction, safety, and health standards promulgated by the Secretary of Labor. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

§ 1412.52 Bonds and insurance.

(a) State and local government recipients shall follow their own requirements relating to bid guarantees, performance bonds, and payment bonds except for contracts exceeding $100,000. For all recipients of contracts exceeding $100,000, the minimum requirements shall be as follows:

(1) A bid guarantee from each bidder equivalent to 5 percent of the bid price. The "bid guarantee" shall consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder will, upon acceptance of his bid, execute such contractual documents as may be required within the time specified.

(2) A performance bond on the part of the contractor for 100 percent of the contract price. A "performance bond" is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

(3) A payment bond on the part of the contractor for 100 percent of the contract price. A "payment bond" is one executed in connection with a contract to assure payment as required by law of all persons supplying labor and material in the execution of the work provided for in the contract.

(b) Where the Federal Government guarantees the payment of money borrowed by the grantee, the Director may at his discretion require adequate bonding and insurance if the bonding and insurance requirements of a State or local government are not deemed to be sufficient to protect adequately the interest of the Federal Government.

(OMB Circular No. A–102, Attachment B)

(c) Except where the grantee is a State or local government, the grantee's contractor shall provide, during the life of the contract, for adequate fire, public liability, property damage, and workmen's compensation insurance. Where the grantee is a State or local government, the grantee shall follow its own legal requirements and normal practices with regard to insurance.

§ 1412.53 Supervision and inspection.

The applicant shall provide and maintain competent and adequate architectural engineering supervision and inspection at the construction site to insure that the completed work conforms to the approved drawings and specifications.

§ 1412.54 Civil rights assurance.

If an assurance of compliance with Title VI of the Civil Rights Act of 1964 (Form HEW 441) applying to the facility described in the application has not been filed, such an assurance shall be attached to the application.

§ 1412.55 Federal access to records and work.

Representatives of the Federal Government shall have access at all reasonable times to the applicant's records and to work whenever it is in preparation or progress, and the contractor will provide proper facilities for such access and inspection.

§ 1412.56 Operation and maintenance.

The facility shall be operated and maintained in accordance with the requirements of applicable Federal, State, and local agencies for the maintenance and operation of such facilities.

§ 1412.57 Access by the handicapped.

The applicant shall require the facility to be designed to comply with the "American Standard Specifications for Making Buildings and Facilities Accessible to, and Usable by, the Physically Handicapped," No. A117.1–1961, as modified by other standards prescribed by the Secretary of the U.S. Administrator of General Services.

(41 CFR 101–17.703)

§ 1412.58 Timeliness of work.

The applicant shall cause work on the project to be commenced within a reasonable time after receipt of notification from the Director that funds have been awarded, and the project shall be prosecuted to completion with reasonable diligence.

§ 1412.59 Avoidance of flood hazards.

In the planning of the construction of facilities involving the use of Federal funds, the recipient shall, in accordance with the provisions of Executive Order No. 11296 of August 10, 1966 (31 FR 10663) and such rules and regulations as may be issued by the Secretary to carry out those provisions, evaluate flood hazards in connection with such facilities and, as far as practicable, avoid the uneconomic, hazardous, or unnecessary use of flood plains in connection with such construction.

§ 1412.60 Relocation assistance.

Projects receiving Federal financial assistance pursuant to this section are subject to the regulations on Relocation Assistance and Real Property Acquisition policies contained in Part 15 of this title.

§ 1412.61 Preservation of historic sites.

Each application for Federal financial assistance for construction shall describe the relationship to and the probable effect, or lack of effect, on any district, site, building, structure, or object that is included in the National Register of Historic Preservation of the National Park Service and published with periodical updatings in the FEDERAL REGISTER. Such information is to be furnished to the Department of Health, Education, and Welfare to enable it to take into account such an effect and to consider the comments thereon of the Advisory Council of Historic Preservation, prior to providing such Federal financial assistance, as required by section 106 of Public Law 89–665 (16 U.S.C. 470f).

Subpart D—Property Management

§ 1412.69 Nonexpendable personal property.

(a) *Title.* When nonexpendable personal property is acquired by a grantee wholly or in part with Federal funds, title shall be vested in the grantee.

(b) *Use.* (1) The grantee shall retain such property in the grant project as long as there is a need for such property to accomplish the purpose of the project, whether or not the project continues to be supported by Federal funds.

(2) When there is no longer a need for such property to accomplish the purpose of the project, the grantee shall use the property in connection with other Federal awards it has received in the following order of priority:

(i) Other awards under Federal programs administered by the Director needing the property;

(ii) Grants of other Federal agencies needing the property.

(3) When the grantee no longer has need for such property in any of its federally assisted projects, the property may be used for the grantee's own official activities in accordance with the following standards:

(i) If the property had an acquisition cost of less than $500 per unit and has been used 4 years or more, the grantee may use the property without reimbursement to the Federal Government or sell the property and retain the proceeds;

(ii) For all such property not covered under paragraph (b)(3)(i) of this section, the grantee may retain the property for its own use provided that a fair compensation is made to the Federal Government for the Federal share of the property. The amount of such compensation shall be computed by applying the percentage of Federal participation in the project to the current fair market value of the property.

(c) *Disposition.* If the grantee has no need for the property, disposition of the property shall be made as follows:

(1) If the property had an acquisition cost of $1,000 or less per unit (except for property covered under paragraph (b)(3)(i) of this section), the grantee shall sell the property and reimburse the Federal Government in accordance with paragraph (b)(3)(ii) of this section.

(2) If the property had an acquisition cost of over $1,000 per unit, the grantee shall request disposition instructions from the Director. The Director will issue instructions to the grantee within 120 days following the receipt of such request and the following procedures shall govern:

(i) If the grantee is instructed to ship the property elsewhere, the grantee will be reimbursed by the Federal Government with an amount which is computed by applying the percentage of the grantee's participation in the project to the current fair market value of the property, plus any shipping or interim storage costs incurred.

(ii) If the grantee is instructed to otherwise dispose of the property, the grantee will be reimbursed by the Federal Government for the costs incurred in such disposition.

(iii) If disposition or other instructions are not issued within the 120-day period specified in this subparagraph (2), the grantee shall sell the property and reimburse the Federal Government with an amount which is computed by applying the percentage of Federal participation in the project to the sales proceeds. The grantee may retain $100 or 10 percent of the proceeds, whichever is greater, for the grantee's selling and handling expenses.

§ 1412.70 Special property.

Where the Director determines that nonexpendable personal property with an acquisition cost of $1,000 or more and financed solely with Federal funds is unique, difficult, or costly to replace, he may reserve title to such property, subject to the following provisions:

(a) The property shall be appropriately identified in the award or otherwise made known to the grantee.

(b) The Director will issue disposition instructions within 120 days after completion of the need for the property under the project for which it was acquired. If instructions are not issued within such 120-day period, the grantee shall apply the applicable standards contained in § 1412.69 (b)(1), (2), (3), and (c)(2).

§ 1412.72 Property management standards.

Grantees' property management standards for non-expendable personal property shall also include the following procedural requirements: (a) Property records shall be maintained accurately and provide for:

(1) A description of the property;

(2) Manufacturer's serial number or other identification number;

(3) Acquisition date and cost;

(4) Source of the property;

(5) Percentage of Federal funds used in the purchase of the property;

(6) Location, use, and condition of the property; and

(7) Ultimate disposition data including sales price or the method used to determine current fair market value if the grantee reimburses the Federal Government for the Federal share.

(b) A physical inventory of property shall be taken and the results reconciled with the property records at least once every 2 years to verify the existence, current utilization, and continued need for the property.

(c) A control system shall be in effect to insure adequate safeguards to prevent loss, damage, or theft to the property. Any loss, damage, or theft of nonexpendable property shall be investigated and fully documented. The grantee shall be responsible for replacing or repairing, with funds of such grantee, property which is lost, damaged, or destroyed due to the negligence of the grantee.

(d) Adequate maintenance procedures shall be implemented to keep the property in good condition.

(e) Proper sales procedures shall be established for unneeded property which would provide for competition to the extent practicable and result in the highest possible return.

§ 1412.73 Unused expendable personal property.

When the total inventory value of any unused expendable personal property exceeds $500 at the expiration of need for any Federal award purposes, the grantee may retain the property or sell the property as long as he compensates the Federal Government for its share in the cost. The amount of compensation shall be computed in accordance with § 1412.69 (b)(3)(ii).

PART 1414—ACCOUNTABILITY FOR FEDERAL FUNDS

Sec.
1414.1 Final accounting.
1414.2 Unexpended funds.
1414.4 Withholding of funds.
1414.6 Waiver of law prohibited.
1414.14 Termination and suspension for cause.
1414.15 Termination by agreement.

AUTHORITY: Sec. 405 of the General Education Provisions Act, as added by section 301 (a)(2) of Public Law 92–318, 86 Stat. 328 (20 U.S.C. 1221e), unless otherwise noted.

§ 1414.1 Final accounting.

(a) In addition to such other accounting as the Director may require, the grantee shall render, with respect to the project, a full account of funds expended, obligated, and remaining.

(b) A report of such accounting shall be submitted to the Director within 90 days of the expiration or termination of the grant, and the grantee shall remit within 30 days of the recipt of a written request therefor any amounts found by the Director to be due. Such periods may be extended at the discretion of the Director upon written request of the grantee.

(31 U.S.C. 628)

§ 1414.2 Unexpended funds.

In the even that the amounts previously awarded have not been obligated pursuant to the approved project, and in the judgment of the Director, will not be obligated for such purposes, the Director may, upon notice to the grantee, reduce the amount of the grant to an amount consistent with the grantee's needs pursuant to § 1414.14.

§ 1414.4 Withholding of funds.

The approval of a grant, and any payment pursuant thereto, shall not be deemed to waive the right of the Director to withhold funds by reason of the failure of a grantee to observe, either before or after such administrative action, any Federal requirements.

§ 1414.6 Waiver of law prohibited.

No official, agent, or employee of the Institute or the Department of Health, Education, and Welfare shall have the authority to waive or alter any provision of the regulations in this chapter, or other relevant statute or regulation, and no action or failure to act on the part of such official, agent, or employee shall operate in derogation of the Director's right to enforcement of such provisions in accordance with their terms.

(43 Dec. Comp. Gen. 31 (1963))

§ 1414.14 Termination and suspension for cause.

(a) *General.* (1) Grant assistance provided by the Institute under section 405 of the Act may be terminated in whole or in part if the Director determines, after affording the grantee reasonable notice and an opportunity to be heard, that the grantee has failed to carry out its approved project proposal in accord-

V 38 - 4 JAN 8 73 XUM

ance with the applicable law and the terms of such assistance or has otherwise failed to comply with any law, regulation, assurance, term, or condition applicable to the grant. Subject to paragraph (c) of this section, such assistance may be suspended during the pendency of termination proceedings initiated pursuant to this section.

(b) *Notice of termination.* (1) Proceedings with respect to the termination of the grant shall be initiated by the mailing of a notice to the recipient setting forth the basis of the proposed termination and the procedures available to the grantee under this section.

(2) If the Director determines that suspension of assistance during the pendency of such proceedings is necessary, such notice shall: (i) Inform the grantee of such determination, (ii) advise the grantee of the effective date of such suspension (which will be no earlier than the date of such notice), and (iii) offer the grantee an opportunity to show cause why such action should not be taken.

(3) The notice required under paragraph (b)(2) of this section shall further advise the grantee that no new obligations incurred in connection with the grant during the period of the suspension will be recognized by the Government in the event that assistance is ultimately terminated.

(4) Expenditures to fulfill legally enforceable commitments made prior to the notice of suspension, in good faith and in accordance with the recipient's approved project, and not in anticipation of suspension or termination, will not be considered new expenditures.

(c) *Opportunity to show cause.* If the grantee requests an opportunity to show cause why a suspension of assistance should not be continued or imposed, the Director will, within 7 days after receiving such request, hold an informal meeting for such purposes at a site selected by the Director.

(d) *Proceedings.* (1) Except as otherwise provided by statute or regulation, the grantee may appeal the Government's decision to terminate, by submitting to the Director, in writing, its rebuttal of the specific grounds for the proposed termination set forth in the notice of termination, within 30 days following the date of mailing of such notice by the Institute, unless an extension of such period of time has been granted by the Institute.

(2) The Director may, at his discretion, permit oral presentations by the Institute and the recipient regarding the notice of termination and the grantee's written rebuttal.

(3) The Director will issue a final decision in the case of such appeal after the submission of the grantee's written rebuttal, or any oral presentations permitted by the Director, whichever is later.

(4) Termination of assistance under this section will be effected by the delivery to the grantee of the notice of termination under paragraph (b) of this section; or, where the grantee invokes the procedures available under paragraphs (c), and (d)(1) of this section, upon the issuance of the Director's final decision under paragraph (d)(3) of this section.

(e) In the event the Department establishes a procedure for the consideration of administrative decisions to terminate a grant and such procedure is made applicable to grants under this subchapter, then the provisions of paragraph (d) of this section will be inapplicable. In such event, the notice of termination specified in paragraph (b) of this section will advise the grantee of the availability of such procedures. If the grantee requests an opportunity to show cause why such termination action shall not be taken, the Director will hold an informal meeting for such purpose. Such meeting may be consolidated with the meeting specified in paragraph (c) of this section may be held at another time no later than 30 days after receipt of such request. If following such meeting the matter of the termination of the grant has not been resolved, the grantee may have recourse to the procedures of the Department.

(f) *Effect of termination.* (1) In the event assistance is terminated under this section, financial obligations incurred by the grantee prior to the effective date of such termination will be allowable to the extent they would have been allowable had such assistance not been terminated, except that no obligations incurred during the period in which such assistance was suspended and no obligations incurred in anticipation of suspension or termination will be allowed.

(2) Within 60 days of the effective date of termination of assistance under this section, the grantee shall furnish an itemized accounting of funds expended, obligated, and remaining. Within 30 days of a request therefor, the grantee shall remit to the Institute any accounts found due.

(31 U.S.C. 628; OMB Circular No. A-102, Attachment L)

§ 1414.15 Termination by agreement.

The director or the grantee may terminate an award, in whole or in part, when both parties agree that the continuation of the project would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date and, in the case of partial terminations, the portion to be terminated. The grantee shall not incur new obligations for the terminated portion after the effective date, and shall cancel as many outstanding obligations as possible. The Director will allow full credit to the recipient for the Federal share of the noncancellable obligations, properly incurred by the grantee prior to termination.

(OMB Circular No. A-102, Attachment L)

Appendix A—Principles for Determining Costs Applicable to Grants and Contracts With Nonprofit Institutions

A. PURPOSE AND SCOPE

1. *Objectives.* This Appendix provides principles for determining the costs applicable to grants and contracts awarded by the Department of Health, Education, and Welfare and performed by nonprofit organizations other than educational institutions, hospitals and State and local Government organizations. These principles are confined to the subject of cost detemination and make no attempt to identify the circumstances or dictate the extent of agency and institutional participation in the financing of a particular project. The principles are designed to provide recognition of the full allocated costs of work under generally accepted accounting principles. No provision for profit or other increment above cost is provided for in these principles.

2. *Definition of Nonprofit Institution.* (a) A nonprofit institution for purposes of this document is any corporation, foundation, trust, association, cooperative or other organization other than (i) educational institutions, (ii) hospitals and (iii) State and local Governmental agencies, bureaus or departments, which is operated primarily for scientific, educational, service, charitable, or similar purposes in the public interest, which is not organized primarily for profit and which uses all income exceeding costs to maintain, improve and/or expand its operations.

The charter or other legally binding authority for the existence of the institution must provide that no part of the net earnings, properties or other assets of the institution, on dissolution or otherwise, shall inure to the benefits of any private person or individual including any member, employee, officer, director or trustee of the institution, and that, on liquidation or dissolution all properties and assets remaining after providing for all debts and obligations shall be distributed and paid over to such other fund, foundation or other organization formed and operated as a nonprofit institution, as defined herein, as the board of directors or trustees may determine. Institutions which have received tax exemptions as nonprofit institutions from the U.S. Internal Revenue Service shall be considered to have met the criteria of this definition.

(b) For purposes of this document, the terms nonprofit and not-for-profit as they are descriptively applied to institutions shall be considered synonymous provided the requirements of 2(a) are met.

3. *Policy guides.* The successful application of these principles requires development of mutual understanding between representatives of nonprofit institutions and of the Federal Government as to their scope, applicability, and interpretation. It is recognized that the arrangements for agency and institutional participation in the financing of a project are properly subject to negotiation between the agency and the institution concerned in accordance with such governmentwide criteria as may be applicable, that each institution should be expected to employ sound management practice in the fulfillment of its obligation, and that each grantee or contractor organization in recognition of its own unique combination of staff, facilities and experience should be responsible for employing whatever form of organization and management techniques as may be necessary to assure proper efficient administration.

4. *Application.* These principles shall be applied in determining cost incurred in the performance of all grants and cost-reimbursement type contracts awarded by the Department of Health, Education, and Welfare. The principles shall also apply to cost-reimbursement type contracts performed under DHEW grants and cost-reimbursement type subcontracts and shall be used as a guide in the pricing of fixed price contracts and subcontracts. The principles do not apply to construction grants or contracts.

B. BASIC CONSIDERATIONS

1. *Composition of total cost.* The total cost of a contract or grant is the sum of the allowable direct and indirect costs allocable to the grant/contract less any applicable credits. In ascertaining what constitutes costs, any generally accepted accounting method of determining or estimating costs that is equitable under the circumstances may be used.

2. *Factors affecting allowability of costs.* Factors to be considered in determining the allowability of individual items of cost include (a) reasonableness, (b) allocability, (c) application of those generally accepted accounting principles and practices appropriate to the particular circumstances, and (d) any limitations or exclusions set forth in this document or otherwise included in the grant/contract as to types or amounts of cost items.

3. *Definition of reasonableness.* A cost is reasonable if, in its nature or amount, it does not exceed that which would be incurred by an ordinarily prudent person in the conduct of competitive business. The question of the reasonableness of specific costs must be scrutinized with particular care in connection with institutions or separate divisions thereof which may not be subject to effective competitive restraints. What is reasonable depends upon a variety of considerations and circumstances involving both the nature and amount of the cost in question. In determining the reasonableness of a given cost, consideration shall be given to:

(a) Whether the cost is of a type generally recognized as ordinary and necessary for the operation of the institution or the performance of the grant/contract.

(b) The restraints or requirements imposed by such factors as generally accepted sound business practices, arms length bargaining, Federal and State laws and regulations, and grant/contract terms and specifications;

(c) The action that a prudent businessman would take in the circumstances, considering his responsibilities to the public at large, the Government, his employees, his clients, shareholders or members and the fulfillment of the purposes for which the institution was organized; and

(d) Significant deviations from the established practices of the institution which may unjustifiably increase the grant/contract costs.

4. *Definition of allocability.* A cost is allocable if it is assignable or chargeable to a particular cost objective, such as a grant/contract, project, product, service, process, or other major activity, in accordance with the relative benefits received or other equitable relationship. Subject to the foregoing, a cost is allocable to a Government grant/contract if it:

(a) Is incurred specifically for the grant/contract;

(b) Benefits both the grant/contract and other work and can be distributed to them in reasonable proportion to the benefits received; or

(c) Is necessary to the overall operation of the institution, although a direct relationship to any particular cost objective cannot be shown.

Where an organization utilizes the Standards of Accounting and Financial Reporting for Voluntary Health and Welfare Organizations (or comparable generally accepted accounting standards peculiar to its particular organizational structure or activity) to allocate costs to nonfederally supported activities it must also use such standards to allocate costs to Federal grants/contracts.

5. *Applicable credits.* The term applicable credits refers to those receipt or negative expenditure types of transactions which operate to offset or reduce expense items that are allocable to grants or contracts as direct or indirect costs. Typical examples of such transactions are: purchase discounts, rebates or allowances; recoveries or indemnities on losses; sales of scrap or incidental services; and adjustments of overpayments or erroneous charges. The applicable portion of any income, rebate, allowance, and other credit relating to any allowable cost, received by or accruing to the grantee/contractor shall be credited to the Government either as a cost reduction or by cash refund, as appropriate.

C. DIRECT COSTS

1. A direct cost is any cost which can be identified specifically with a particular cost objective. Direct costs are not limited to items which are incorporated in the end product as materiel or labor. Costs identified specifically with the grant/contract are direct costs of the grant/contract and may be charged directly thereto. Costs identified specifically with other work of the institution are direct costs of that work and are not to be charged to the grant/contract either directly or indirectly. Items charged as direct cost to Government-supported projects must be charged in a uniform manner to all other work of the institution in order to preclude an overcharge to the Government as a result of the Government's participation in the indirect cost pool. Conversely, where the institution's established accounting system provides for the treatment of certain items of cost as direct costs of the institution, then the same items must be considered direct costs to Government-supported projects and may not be included in the indirect cost pool.

2. Certain types of cost, or costs associated with certain activities are not reimbursable as a charge to a DHEW grant/contract. These unallowable costs or activities are identified in section G. Even though a particular activity or cost is designated as unallowable for purposes of computing costs charged to Government work, it nonetheless must be treated as a direct cost or activity if a portion of the institution's indirect cost (as defined in section D) is properly allocable to it. The amount of indirect cost allocated must be in accordance with the principles set forth in section D-2. In general, an unallowable institutional activity shall be treated as a direct function when it (1) includes salaries of personnel, (2) occupies space, and (3) is serviced by an indirect cost grouping(s). Thus the costs associated with the following types of activities when normal or necessary to an institution's primary mission shall be treated as direct costs:

(a) Maintenance of membership rolls, subscriptions, publications and related functions.

(b) Providing services and information to members, legislative or administrative bodies or the public.

(c) Promotion, lobbying, and other forms of public relations.

(d) Meetings and conferences except those held to conduct the general administration of the institution.

(e) Fund raising.

(f) Maintenance, protection, and investment of special funds not used in operation of institutions.

(g) Administration of group benefits on behalf of members or clients including life and hospital insurance, annuity or retirement plans, financial aid, etc.

(h) Other activities performed primarily as a service to a membership, clients, or the public.

3. This definition shall be applied to all items of cost of significant amount unless the institution demonstrates that the application of any different current practice achieves substantially the same results. Direct cost items of minor amount may be distributed as indirect costs as provided in section D.

D. INDIRECT COSTS

1. An indirect cost is one which, because of its incurrence for common or joint objectives, is not readily subject to treatment as a direct cost. Minor direct cost items may be considered to be indirect costs for reasons of practicality. After direct costs have been determined and charged directly to the grant/contract or other work as appropriate, indirect costs are those remaining to be allocated to the several classes of work. The overall objective of the allocation process is to distribute the indirect costs of the institution to its various major activities or cost objectives in reasonable proportions with the benefits provided to those activities or cost objective. Because of the diverse natures and purposes of organizations falling within the definition of a non-profit organization, it is impractical to specifically identify those functions which constitute major activities for purposes of identifying and distributing indirect costs. Such identification will be dependent upon an institution's purpose-inbeing, the services it renders to the public, its clients and/or members, the amount of effort devoted to fund raising activities, public relations, and membership activities, etc. (See section C-2.)

2. Indirect costs shall be accumulated by logical cost groupings with due consideration of the reasons for incurring the costs. Each grouping should be determined so as to permit distribution of the grouping on the basis of the benefits accruing to the several cost objectives. Sub-grouping may be required where there is no single equitable distribution base for all the elements of cost comprising a group. Actual conditions must be taken into account in selecting the method or base to be used in distributing the expenses assembled under each of the individual cost groupings established to applicable cost objectives. Where a distribution can be made by assignment of a cost grouping directly to the area benefited, the distribution should be made in that manner. Where the expenses under a cost grouping are more general in nature, the distribution to the cost objectives should be made through use of a selected base which will produce results which are equitable to both the Government and the institution. In general, any cost element or cost-related factor associated with the institution's work is potentially adaptable for use as a distribution base provided (1) it can readily be expressed in terms of dollars or other quantitative measure (total direct expenditures, direct salaries, manhours applied, square feet utilized, hours of usage, number of documents processed, population served, and the like); and (2) it is common to the cost objectives during the base period. The essential consideration in selection of the distribution base in each instance is that it be the one best suited for assigning the pool of costs to the cost objectives in accord with the relative benefits derived; the traceable cause and effect relationship; or logic and reason, where neither benefit nor cause and effect relationship is determinable.

3. The number and composition of the groupings should be governed by practical considerations and should be such as not to complicate unduly the allocation where substantially the same results are achieved through less precise methods.

4. A base period for distribution of indirect costs is the period during which such costs are incurred and accumulated for distribution to work performed within that period. The base period normally should coincide with the fiscal year established by the insti-

V 38 - 4 JAN 8 73 XUM

tution, but in any event the base period should be so selected as to avoid inequities in the distribution of costs.

E. DETERMINATION AND APPLICATION OF INDIRECT COST RATE OR RATES

1. *Indirect cost pools.* (a) Subject to (b) below, indirect costs allocable to an institution's direct functions should be treated as a common pool, and the costs in such common pool should then be distributed to the individual projects benefiting therefrom by use of a single rate.

(b) In some instances a single rate for use across the board on all activities at an institution may not be appropriate, since it would not take into account those different environmental factors which may affect substantially the indirect costs applicable to a particular segment of work at the institution. For this purpose, a particular segment of work may be that performed under a single grant/contract or it may consist of work under a group of grants/contracts performed in a common environment. The environmental factors are not limited to the physical location of the work. Other important factors are the level of the administrative support required, the nature of the facilities or other resources employed, the scientific disciplines or technical skills involved, the organizational arrangements used, or any combination thereof. Where a particular segment of work is performed within an environment which appears to generate a significantly different level of indirect costs, provision should be made for a separate indirect cost pool applicable to such work. The separate indirect cost pool should be developed during the course of the regular distribution process, and the separate indirect cost rate resulting therefrom should be utilized provided it is determined that (1) such indirect cost rate differs significantly from that which would have been obtained under (a) above, and (2) the volume of work to which such rate would apply is material in relation to other activity at the institution.

2. *The distribution base.* Indirect costs should be distributed to each applicable project on the basis of direct salaries and wages, total direct costs or other basis which results in an equitable distribution. For this purpose, an indirect cost rate should be determined for each of the separate indirect cost pools developed pursuant to section E.1. The rate in each case should be stated as the percentage which the amount of the particular indirect cost pool is of the base selected.

F. APPLICATION OF PRINCIPLES AND PROCEDURES

1. Costs shall be allowed to the extent that they are reasonable (see B.3) allocable (see B.4) and determined to be allowable in view of the other factors set forth in paragraph B.2. and section G. These criteria apply to all of the selected items of cost which follow notwithstanding that particular guidance is provided in connection with certain specific items for emphasis or clarity.

2. Costs of all subcontracts under a grant or cost-reimbursement type contract are subject to those Federal cost regulations and policies appropriate to the subcontract involved. Thus if the subcontract is for supplies or services with a nonprofit institution other than an educational institution, hospital or State and local governmental unit this document would apply; if the subcontract is for supplies or services with a commercial organization, Federal Procurement Regulation Part 1.15.2 would apply; if the subcontract is with an educational institution, Bureau of the Budget Circular A–21 (Federal Procurement Regulation Part 1.15.3) would apply.

3. Selected items of cost are treated in Section G. However, section G does not cover every element of cost and every situation that might arise in a particular case. Failure to treat any item of cost in Section G is not intended to imply that it is either allowable or unallowable. With respect to all items, whether or not specifically covered, determination of allowability shall be based on the principles and standards set forth in this document and, where appropriate, the treatment of similar or related selected items.

G. GENERAL STANDARDS FOR SELECTED ITEMS OF COST

Sections G–1 through G–46 provide standards to be applied in establishing the allowability of certain items involved in determining costs. These standards should apply irrespective of whether a particular item of cost is properly treated as direct cost or indirect cost. Failure to mention a particular item of cost in the standards is not intended to imply that it is either allowable or unallowable; rather determination as to allowability in each case should be based on the treatment or standards provided for similar or related items of cost. In case of a discrepancy between the provisions of a specific grant/contract and the applicable standards provided, the provisions of the grant/contract shall govern. Under any given grant/contract the reasonableness and allocability of certain items of costs may be difficult to determine. This is particularly true in connection with nonprofit institutions which are so diverse in nature and not subject to effective competive restraints. In order to avoid possible subsequent disallowance or dispute based on unreasonableness or nonallocability, it is important that institutions entering into grants or contracts with the Government seek agreement in advance of the incurrence of special or unusual costs in categories where reasonableness or allocability are difficult to determine. Such action may also be initiated by the Government. Examples of costs on which advance agreements may be particularly important are:

1. Compensation for personal services;
2. Consultant fees;
3. Deferred maintenance costs;
4. Excess facility costs;
5. Materiel, services, and supplies sold between organizations or divisions under common control;
6. Preaward costs;
7. Publication and public information costs;
8. Royalties;
9. Training and educational costs;
10. Travel costs, as related to special or mass personnel movement, and to the class of air-travel accommodations allowable;
11. Use charge for fully depreciated assets;
12. Depreciation or use charge on assets donated to the institution by third parties.

1. *Advertising costs.* (a) Advertising costs mean the costs of advertising media and corollary administrative costs. Advertising media include magazine, newspapers, radio, and television programs, direct mail, trade papers, outdoor advertising, dealer cards, and window displays, conventions, exhibits, free goods, and samples, and the like.

(b) The only advertising costs allowable are those which are solely for (1) the recruitment of personnel required for the performance by the institution of obligations arising under the grant/contract, when considered in conjunction with all other recruitment costs, as set forth in G.36; (2) the procurement of scarce items for the performance of the grant/contract or (3) the disposal of scrap or surplus materials acquired in the performance of the project. Costs of this nature, if incurred for more than one Government award or for both Government work and other work of the institution, are allowable to the extent that the principles in paragraphs B–3, B–4, and section D are observed.

2. *Bad debts.* Bad debts, including losses (whether actual or estimated) arising from uncollectible customers' accounts and other claims, related costs, and related legal costs, are unallowable.

3. *Bidding or proposal costs.* Bidding or proposal costs are the immediate costs of preparing bids or proposals on potential Government and non-Government contracts or projects or applications for financial assistance under Federal grant and contract programs, including development of scientific, engineering and cost data necessary to support the institution's bids, proposals or applications. Bidding costs of the current accounting period are allowable as part of the indirect cost pool. Costs of past accounting periods are unallowable. Bidding costs do not include any of those costs described in section G–16 and G–30.

4. *Bonding costs.* (a) Bonding costs arise when the Government requires assurance against financial loss to itself or others by reason of the act or default of the grantee/contractor. They arise also in instances where the grantee/contractor requires similar assurance. Included are such bonds as bid, performance, payment, advance payment, infringement, and fidelity bonds.

(b) Costs of bonding required pursuant to the terms of the grant/contract are allowable.

(c) Costs of bonding required by the grantee/contractor in the general conduct of its operations are allowable to the extent that such bonding is in accordance with sound business practice and the rates and premiums are reasonable under the circumstances.

5. *Civil defense costs.* (a) Civil defense costs are those incurred in planning for, and the protection of life and property against, the possible effects of enemy attack. Reasonable costs of civil defense measures (including costs in excess of normal plant protection costs, first-aid training and supplies, fire fighting training and equipment, posting of additional exit notices and directions, and other approved civil defense measures) undertaken on the institution's premises pursuant to suggestions or requirements of civil defense authorities are allowable when allocated to all work of the institution.

(b) Costs of capital assets under (a) above are allowable through depreciation or use charges in accordance with G–10.

(c) Contributions to local civil defense funds and projects are unallowable.

6. *Compensation for personal services.*— (a) *Definition.* Compensation for personal services includes all remuneration paid currently or accrued in whatever form and whether paid immediately or deferred for services rendered by employees of the institution during the period of grant/contract performance. It includes, but is not limited to salary, wages, directors' and executive committee members' fees, bonuses, incentive awards, employee insurance, fringe benefits, and contributions to pension, annuity, and management employee incentive compensation plans.

(b) *Allowability.* Except as otherwise specifically provided in this subsection, the costs of compensation for personal services are to be treated as allowable to the extent that:

(1) Compensation is paid in accordance with policy, programs, and procedures that effectively relate individual compensation to the individual's contribution to the performance of grant or contract work, result in internally consistent treatment of employees in like situations, and effectively relate compensation paid within the organization to that paid for similar services outside the organization;

(2) Total compensation of individual employees is reasonable for the services rendered; and

(3) Costs are not in excess of those costs which are allowable by the Internal Revenue Code and regulations thereunder.

(c) *Reasonableness.* (1) When the institution is predominantly engaged in activities other than those sponsored by the Federal Government, compensation for employees on federally sponsored work will be considered reasonable to the extent that it is consistent with that paid for similar work in the institution's other activities;

(2) When the institution is predominantly engaged in federally sponsored activities, and in cases where the kind of employees required for the federally sponsored activities are not found in the institution's other activities, compensation for employees on federally sponsored work will be considered reasonable to the extent that it is comparable to that paid for similar work in the labor markets in which the institution competes for the kind of employees involved.

(d) *Review and approval of compensation of individual employees.* In determining the reasonableness of compensation, the compensation of each individual employee normally need not be subject to review and approval. Reviews and approvals of individuals need be made only in those cases in which a general review reveals amounts or types of compensation which appear unreasonable or otherwise out of line.

(e) *Special considerations in determining allowability.* Certain conditions require special consideration and possible limitation as to allowability for grant and contract cost purposes where amounts appear excessive. Among such conditions are the following:

(1) Compensation to share holders, members, trustees, directors, associates, officers or members of the immediate families thereof, or to persons who are contractually committed to acquire a substantial financial interest in the enterprise. Determination should be made that such compensation is reasonable for the actual personal services rendered rather than a distribution of earnings in excess of costs.

(2) Any change in an institution's compensation policy resulting in a substantial increase in the institution's level of compensation, particularly when it was concurrent with an increase in the ratio of Government awards to other business, or any change in the treatment of allowability of specific types of compensation due to changes in Government policy.

(3) The institution's activities are such that its compensation levels are not subject to the restraints normally occurring in the conduct of competitive business.

(f) Notwithstanding any other provisions of this subsection, costs of compensation are not allowable to the extent that they result from provisions of labor-management agreements that, as applied to work in the performance of Government grants or contracts are determined to be unreasonable either because they are unwarranted by the character and circumstances of the work or because they are discriminatory against the Government. The application of the provisions of a labor-management agreement designed to apply to a given set of circumstances and conditions of employment (for example, work involving extremely hazardous activities or work not requiring recurrent use of overtime) is unwarranted when applied to a Government grant or contract involving significantly different circumstances and conditions of employment, (for example, work involving less hazardous activities or work continually requiring use of overtime). It is discriminatory against the Government if it results in individual personnel compensation (in whatever form or name) in excess of that being paid for similar non-Government work under comparable circumstances. Disallowance of costs will not be made under this subparagraph unless:

(1) The institution has been permitted an opportunity to justify the costs; and

(2) Due consideration has been given to whether there are unusual conditions pertaining to the Government work which impose burdens, hardships, or hazards on the institution's employees, for which compensation that might otherwise appear unreasonable is required to attract and hold necessary personnel.

(g) (1) In addition to the general requirements set forth in (a) through (f) of this subsection, certain forms of compensation are subject to further requirements as specified in (2) through (9) below.

(2) *Salaries and wages.* Salaries and wages for current services include gross compensation paid to employees in the form of cash, products, or services, and are allowable. However, see G.25 as it relates to compensation for overtime.

(3) *Incentive compensation.* Incentive compensation to employees based on cost reduction, or efficient performance, suggestion awards, safety awards, etc. are allowable to the extent that the overall compensation is determined to be reasonable and such costs are paid or accrued pursuant to an agreement entered into in good faith between the institution and the employees before the services were rendered, or pursuant to an established plan followed by the institution so consistently as to imply, in effect, an agreement to make such payment. Awards, and incentive compensation when deferred are allowable to the extent provided in (4) below.

(4) *Deferred compensation.* (a) As used herein, deferred compensation includes all remuneration, in whatever form, for which the employee is not paid until after the lapse of a stated period of years or the occurrence of other events as provided in the plans, except that it does not include normal end of accounting period accruals for regular salaries and wages. It includes (i) contributions to pension and annuity plans, (ii) contributions to disability, withdrawal, insurance, survivorship, and similar benefit plans, and (iii) other deferred compensation.

(b) Deferred compensation is allowable to the extent that (i) except for past service pension and retirement costs, it is for services rendered during the grant/contract period; (ii) it is, together with all other compensation paid to the employee, reasonable in amount; (iii) it is paid pursuant to an agreement entered into in good faith between the institution and its employees before the services are rendered, or pursuant to an established plan followed by the institution so consistently as to imply, in effect, an agreement to make such payments; (iv) the benefits of the plan are vested in the employees or their designated beneficiaries and no part of the deferred compensation reverts to the employer institution; (v) in the case of past service pension costs, it is amortized over a period of ten years or more; and (vi) for a plan which is subject to approval by the Internal Revenue Service, it falls within the criteria and standards of the Internal Revenue Code and the regulations of the Internal Revenue Service.

(c) In determining the cost of deferred compensation allowable under the grant or contract, appropriate adjustments shall be made for credits or gains, including those arising out of both normal and abnormal employee turnover, or any other contingencies that can result in a forfeiture by employees of such deferred compensation. Adjustments shall be made only for forfeitures which directly or indirectly inure to the benefit of the institution; forfeitures which inure to the benefits of other employees covered by a deferred compensation plan with no reduction in the institution's costs will not normally give rise to an adjustment in grant/contract costs. Adjustments for normal employee turnover shall be based on the institution's experience and on foreseeable prospects, and shall be reflected in the amount of cost currently allowable. Such adjustments will be unnecessary to the extent that the institution can demonstrate that its contributions take into account normal forfeitures. Adjustments for possible future abnormal forfeitures shall be effected according to the following rules:

(i) Abnormal forfeitures that are foreseeable and which can be currently evaluated with reasonable accuracy, by actuarial or other sound computation shall be reflected by an adjustment of current costs otherwise allowable; and

(ii) Abnormal forfeitures, not within (i) above, may be made the subject of agreement between the Government and the institution either as to an equitable adjustment or a method of determining such adjustment.

(d) In determining whether deferred compensation is for services rendered during the agreement period or is for future services, consideration shall be given to conditions imposed upon eventual payment, such as requirements of continued employment, consultation after retirement, and covenants not to compete.

(5) *Fringe benefits.* Fringe benefits are allowances and services provided by the institution to its employees as compensation in addition to regular wages and salaries. Costs of fringe benefits, such as pay for vacations, holidays, sick leave, military leave, employee insurance, and supplemental unemployment benefit plans are allowable to the extent required by law, employer-employee agreement, or an established policy of the institution.

(6) Severance pay. See G.40.

(7) Training and education expenses. See G.44.

(8) *Location allowances.* (a) "Location allowances", sometimes called "supplemental pay" or "incentive pay", are compensation in addition to normal wages or salaries and are paid by institutions to especially compensate or induce employees to undertake or continue work at locations which may be isolated or in an unfavorable environment. Location allowances include extra wage or salary payments in the form of station allowances, extended per diem, or mileage payments for daily commuting; they also include such benefits as institution-furnished housing. Payment of location allowances shall be allowed as costs under grants and cost-reimbursement type contracts, or recognized in pricing fixed-price type contracts, only with prior approval in writing from the awarding agency and only where and so long as the isolation or unfavorable environment of the site makes such payments necessary to the accomplishment of the work without unacceptable delays. Whether the site is so isolated, or its environment is so unfavorable, as to require location allowances is to be determined in the light of (a) its location and climate; (b) the availability and adequacy of housing within reasonable commuting distance; and (c) the availability and adequacy of education, recreational, medical, and hospital facilities. The extent to which compensation includes location allowances is to be determined by comparing it with (a) the institution's normal compensation policy, including pay scales at its principal operating locations; (b) pay scales of other organizations and concerns operating at or near the site; and (c) compensation paid by other concerns within the same field for similar services elsewhere.

(b) Locations for which location allowances are paid shall be reviewed at least once a year to determine whether such allowances should continue to be allowed.

V 38 - 4 JAN 8 73 XUM

(9) *Support of salaries and wages.* (a) Direct charges for professionals must be supported by either:

(i) An adequate appointment and workload distribution system, accompanied by monthly reviews performed by responsible officials and a reporting of any significant change in workload distribution of each professional (i.e., an exception reporting system) or

(ii) A monthly after-the-fact certification system which will require persons in supervisory positions having firsthand knowledge of the services performed to report the distribution of effort (i.e., a positive reporting system). Such reports must account for the *total* salaried effort of the persons covered. Consequently, a system which provides for the reporting only of effort applicable to federally sponsored activities is not acceptable.

(b) Direct charges for salaries and wages of nonprofessionals will be supported by time and attendance and payroll distribution records.

(c) Allowable indirect personal services costs will be supported by the institution's accounting system maintained in accordance with generally accepted institutional practices. Where a comprehensive accounting system does not exist, the institution should make periodic surveys no less frequently than annually to support the indirect personal services costs for inclusion in the overhead pool. Such supporting documentation must be retained for subsequent review by Government representatives.

7. *Capital expenditures.* The costs of equipment buildings, and repairs which materially increase the value or useful life of buildings or equipment, are unallowable except as provided for in the grant/contract.

8. *Contingencies.* (a) A contingency is a possible future event or condition arising from presently known or unknown causes, the outcome of which is indeterminable at the present time.

(b) In historical costing, contingencies are not normally present since such costing deals with costs which have been incurred and recorded on the institution's books. Accordingly, contingencies are generally unallowable for historical costing purposes. However, in some cases, as for example, terminations, a contingency factor may be recognized which is applicable to a past period to give recognition to minor unsettled factors in the interest of expeditious settlement.

(c) In connection with estimates of future costs, contingencies fall into two categories:

(1) Those which may arise from presently known and existing conditions, the effects of which are foreseeable within reasonable limits of accuracy; e.g., pension funds, sick leave, and vacation accruals, etc. In such situations where they exist, contingencies of this category are to be included in the estimates of future cost so as to provide the best estimate of performance costs; and

(2) Those which may arise from presently known or unknown conditions, the effect of which cannot be measured so precisely as to provide equitable results to the institution and to the Government; e.g., results of pending litigation, and other general business risks. Contingencies of this category are to be excluded from cost estimates under the several items of cost, but should be disclosed separately, including the basis upon which the contingency is computed in order to facilitate the negotiation of appropriate contractual coverage (see, for example, G–17, G–21, and G–40).

9. *Contributions and donations.* (a) Contributions and donations by the grantee/contractor are unallowable.

(b) The value of donated services or goods provided by individual volunteers or members of volunteer organizations is not an allowable cost; however, the fair market value of donated services or goods utilized in the performance of a direct cost activity as defined in C.1 and C.2 shall be considered in the determination of the indirect cost rate(s) and, accordingly, shall be allocated a proportionate share of indirect cost.

10. *Depreciation and use allowances.* (a) Institutions may be compensated for the use of buildings, capital improvements and usable equipment on hand through depreciation or use allowances. Depreciation is a charge to current operations which distributes the cost of a tangible capital asset, less estimated residual value, over the estimated useful life of the asset in a systematic and logical manner. It does not involve a process of valuation. Useful life has reference to the prospective period of economic usefulness in the particular institution's operations as distinguished from physical life. Use allowances are the means of allowing compensation when depreciation or other equivalent costs are not considered.

(b) Depreciation or a use allowance on assets donated by third parties is allowable. However, any limitations on the amount of depreciation which would have applied to the donor as a result of restrictions contained in this Section shall also apply to the recipient organization.

(c) Due consideration will be given to Government-furnished facilities utilized by the institution when computing use allowances and/or depreciation if the Government-furnished facilities are material in amount. Computation of the use allowance and/or depreciation will exclude both the cost or any portion of the cost of grounds, buildings and equipment borne by or donated by the Federal Government, irrespective of where title was originally vested or where it presently resides, and secondly, the cost of grounds. Capital expenditures for land improvements (paved areas, fences, streets, sidewalks, utility conduits, and similar improvements not already included in the cost of buildings) are allowable provided the systematic amortization of such capital expenditures has been provided in the institution's books of account, based on reasonable determinations of the probable useful lives of the individual items involved, and the share allocated to the grant or contract is developed from the amount thus amortized for the base period involved.

(d) Normal depreciation on an institution's plant, equipment, and other capital facilities, except as excluded by (d) below, is an allowable element of cost provided that the amount thereof is computed:

(1) Upon a property cost basis which could have been used by the institution for Federal Income Tax purposes, had such institution been subject to the payment of income tax; and

(2) By the consistent application to the assets concerned of any generally accepted accounting method, and subject to the limitations of the Internal Revenue Code of 1954 as amended, including—

(a) The straight line method;

(b) The declining balance method, using a rate not exceeding twice the rate which would have been used had the annual allowance been computed under the method described in (a) above;

(c) The sum-of-the-years-digits method; and

(d) Any other consistent method productive of an annual allowance which, when added to all allowances for the period commending with the use of the property and including the current year, does not during the first two-thirds of the useful life of the property exceed the total of such allowances which would have been used had such allowances been computed under the method described in (b) above.

(e) Where the depreciation method is followed, adequate property records must be maintained. The period of useful service (service life) established in each case for usable capital assets must be determined on a realistic basis which takes into consideration such factors as type of construction, nature of the equipment used, technological developments in the particular area, and the renewal and replacement policies followed for the individual items or classes of assets involved. Where the depreciation method is introduced for application to assets acquired in prior years, the annual charges therefrom must not exceed the amounts that would have resulted had the depreciation method been in effect from the date of acquisition of such assets.

(f) Depreciation on idle or excess facilities shall not be allowed except on such facilities as are reasonably necessary for standby purposes. (See G. 13.)

(g) Where an institution elects to go on a depreciation basis for a particular class of assets, no depreciation, rental or use charge may be allowed on any such assets that would be viewed as fully depreciated: *Provided, however,* That reasonable use charges may be negotiated for any such assets if warranted after taking into consideration the cost of the facility or item involved, the estimated useful life remaining at time of negotiation, the actual replacement policy followed in the light of service lives used for calculating depreciation, the effect of any increased maintenance charges or decreased efficiency due to age, and any other factors pertinent to the utilization of the facility or item for the purpose contemplated.

(h) Where the use allowance method is followed, the use allowance for buildings and improvements will be computed at an annual rate not exceeding 2 percent of acquisition cost. The use allowance for equipment will be computed at an annual rate not exceeding 6⅔ percent of acquisition cost of usable equipment in those cases where the institution maintains current records with respect to such equipment on hand. Where the institution's records reflect only the cost (actual or estimated) of the original complement of equipment, the use allowance will be computed at an annual rate not exceeding 10 percent of such cost. Original complement for this purpose means the complement of equipment initially placed in buildings to perform the functions currently being performed in such buildings; however, where a permanent change in the function of a building takes place, a redetermination of the original complement of equipment may be made at that time to establish a new original complement. In those cases where no equipment records are maintained, the institution will justify a reasonable estimate of the acquisition cost of usable equipment which may be used to compute the use allowance at an annual rate not exceeding 6⅔ percent of such estimate.

(i) Depreciation and/or use charges should usually be allocated to all activities as an indirect cost.

11. *Employee morale, health, welfare costs, and credits.* (a) Employee morale, health, and welfare activities are those services or benefits provided by the institution to its employees to improve working conditions, employer-employee relations, employee morale, and employee performance. Such activities include house publications, health or first-aid clinics, recreation, employee counseling services and, for the purpose of this paragraph, food and dormitory services. Food and dormitory services include operating or furnishing facilities for cafeterias, dining rooms, canteens, lunch wagons, vending machines, living accommodations, or similar types of services for the institution's employees at or near its facilities.

(b) Except as limited by (c) below, the aggregate of costs incurred on account of all activities mentioned in (a) above, less income generated by all such activities is allowable to the extent that the net amount is reasonable.

(c) Losses from the operation of food and dormitory services may be included as cost incurred under (b) above, only if the institution's objective is to operate such services on a break-even basis. Losses sustained because food services or lodging accommodations are furnished without charge or at prices or rates which obviously would not be conducive to accomplishment of the above objective, are not allowable, except that a loss may be allowed to the extent the institution can demonstrate that unusual circumstances exist (e.g., (i) where the institution must provide food or dormitory services at remote locations where adequate commercial facilities are not reasonably available or (ii) where it is necessary to operate a facility at a lower volume than the facility could economically support) such that, even with efficient management, operation of the services on a break-even basis would require charging inordinately high prices or prices or rates higher than those charged by commercial establishments offering the same services in the same geographical areas.

(d) In those situations where the institution has an arrangement authorizing an employee association to provide or operate a service such as vending machines in the institution's plant, and retain the profits derived therefrom, such profits shall be treated in the same manner as if the institution were providing the service (but see (e)).

(e) Contributions by the institution to an employee organization, including funds set over from vending machine receipts or similar sources, may be included as cost incurred under (b) above only to the extent that the institution demonstrates that an equivalent amount of the costs incurred by the employee organization would be allowable if incurred by the institution directly.

12. *Entertainment costs.* Costs of amusement, diversion, social activities, ceremonials, and incidental costs relating thereto, such as meals, lodging, rentals, transportation, and gratuities, are unallowable (but see G–11 and G–43).

13. *Excess facility costs.* (a) As used in this paragraph, the words and phrases defined in this subparagraph (a) shall have the meanings set forth below.

(1) Facilities means plant or any portion thereof (inclusive of land integral to the operation); equipment individually or collectively; or any other tangible capital asset, wherever located, and whether owned or leased by the institution.

(2) Idle facilities means completely unused facilities that are excess to the institution's current needs.

(3) Idle capacity means the unused capacity of partially used facilities. It is the difference between that which a facility could achieve under 100 percent operating time on a one shift basis less operating interruptions resulting from time lost for repairs, setups, unsatisfactory materiels, and other normal delays, and the extent to which the facility was actually used to meet demands during the accounting period. (A multiple shift basis may be used if it can be shown that this amount of usage could normally be expected for the type of facility involved.)

(4) Costs of idle facilities or idle capacity are costs such as maintenance, repair, housing, rent, and other related costs, e.g., property taxes, insurance, and depreciation.

(b) The cost of idle facilities are unallowable except to the extent that:

(i) They are necessary to meet fluctuations in workload; or

(ii) Although not necessary to meet fluctuations in workload, they were necessary when acquired and are now idle because of changes in program requirements, grantee/contractor efforts to produce more economically, reorganization, termination, or other causes which could not have been reasonably foreseen.

Under the exception stated in (ii) of this subparagraph (b), costs of idle facilities are allowable for a reasonable period of time, ordinarily not to exceed 1 year, depending upon the initiative taken to use, lease, or dispose of such facilities (but see G.42(b) and (e)).

(c) The costs of idle capacity are normal costs of doing business and are a factor in the normal fluctuations of usage or overhead rates from period to period. Such costs are allowable, provided the capacity is reasonably anticipated to be necessary or was originally reasonable and is not subject to reduction or elimination by subletting, renting, or sale, in accordance with sound business, economics, or security practices. Widespread idle capacity throughout an entire plant or among a group of assets having substantially the same function may be idle facilities.

14. *Fines and penalties.* Costs of fines and penalties resulting from violations of, or failure of the institution to comply with, Federal, State, and local laws and regulations are unallowable except when incurred as a result of compliance with specific provisions of the grant or contract instructions in writing from the awarding agency.

15. *Fringe benefits.* (See G.–6–(g)–(5).

16. *Independent research and development.* (a) An institution's independent research and development (I.R. & D.) is that research and development which is not sponsored by the Government or a non-Government organization or agency under a grant/contract or other arrangement.

(b) Basic research, for the purpose of this document, is that type of research which is directed toward increase of knowledge within a particular discipline. In such research, the primary aim of the investigator is a fuller knowledge or understanding of the subject under study, rather than any practical application thereof. Applied research, for the purpose of this document consists of that type of effort which (1) is normally derived from the results of basic research, but may not be severable from the related basic research, (2) attempts to determine and expand the potentialities of new scientific discoveries or improvements in technology, materiels, processes, methods, devices, and techniques, and (3) attempts to "advance the state of the art." Applied research, does not include any such efforts when their principal aim is the design, development, or test of specific articles or services to be offered for sale, which are within the definition of the term development as defined in (c) below. Census research, for the purpose of this document, is that type of activity devoted to the compilation and interpretation of statistical and other analytical information acquired through survey (e.g. interview, circularization of questionnaires), observations or from books, treatises, articles or other sources relative to specifically defined activities, occurrences or conditions for the purpose of accomplishing some scientific end.

(c) "Development" is the systematic use of scientific knowledge which is directed toward the production of, or improvements in, useful products to meet specific performance requirements, but exclusive of manufacturing and production engineering.

(d) Independent research and development will be treated in a manner consistent with the treatment of sponsored research and development. Accordingly, an institution's I.R. & D. shall be allocated in proportionate share of indirect costs on the same basis that indirect costs are allocated to sponsored research and development.

(e) The cost of an institution's I.R. & D. including its proportionate share of indirect costs, is unallowable.

17. *Insurance and indemnification.* (a) Insurance includes insurance which the institution is required to carry, or which is approved, under the terms of the grant or contract and any other insurance which the institution maintains in connection with the general conduct of its business.

(1) Costs of insurance required or approved, and maintained, pursuant to the grant or contract are allowable.

(2) Costs of other insurance maintained by the institution in connection with the general conduct of its business are allowable subject to the following limitations:

(a) Types and extent of coverage shall be in accordance with sound business practice and the rates and premiums shall be reasonable under the circumstances;

(b) Costs allowed for business interruption or other similar insurance shall be limited to exclude coverage of profit;

(c) Costs of insurance or of any provision for a reserve covering the risk of loss of or damage to Government property are allowable only to the extent that the institution is liable for such loss or damage and such insurance or reserve does not cover loss or damage which results from willful misconduct or lack of good faith on the part of any of the institution's trustees, directors or officers, or other equivalent representatives, who has supervision or direction of (i) all or substantially all of the institution's business, or (ii) all or substantially all of the institution's operations at any one separate location in which the grant or contract is being performed, or who are specifically identified as the project director in the project or otherwise primarily responsible for the direction and/or execution of the project supported by the grant or contract.

(d) Provisions for a reserve under an approved self-insurance program are allowable to the extent that types of coverage, extent of coverage, and the rates and premiums would have been allowed had insurance been purchased to cover the risks; and

(e) Costs of insurance on the lives of trustees, officers, or other employees holding positions of similar responsibilities are allowable only to the extent that the insurance represents additional compensation. (See G–6).

(3) Actual losses which could have been covered by permissible insurance (through an approved self-insurance program or otherwise) are unallowable unless expressly provided for in the grant or contract, except:

(a) Costs incurred because of losses not covered under nominal deductible insurance coverage provided in keeping with sound business practice, are allowable; and

(b) Minor losses not covered by insurance, such as spoilage, breakage, and disappearance of supplies, which occur in the ordinary course of doing business, are allowable.

(b) Indemnification includes securing the institution against liabilities to third persons and any other loss or damage, not compensated by insurance or otherwise. The Government is obligated to indemnify the institution only to the extent expressly provided in (a)(3) above.

18. *Interest and other financial costs.* (a) Costs incurred for interest on borrowed capital or temporary use of endowment funds, however represented, are unallowable.

(b) Costs of organized fund raising, including financial campaigns, endowment

V 38 - 4 JAN 8 73 XUM

drives, solicitation of gifts and bequests, and similar expenses incurred solely to raise capital or obtain contributions, are unallowable.

(c) Costs of investment counsel and staff and similar expenses incurred solely to enhance income from investments are unallowable.

(d) Where substantial effort or time is devoted to fund raising and investment activities as described in (b) and (c) in relation to other functions of an institution, such activities shall be considered as a major activity of the institution and shall be allocated its share of indirect costs in accordance with section D. (See also C-2.)

19. *Labor relations costs.* Costs incurred in maintaining satisfactory relations between the institution and its employees, including costs of labor management committees, employee publications, and other related activities, are allowable.

20. *Losses on other grants or contracts.* Any excess of costs over income on any grant or contract is unallowable as a cost of any other grant or contract.

21. *Maintenance and repair costs.* (a) Costs necessary for the upkeep of property (including Government property unless otherwise provided for), which neither add to the permanent value of the property nor appreciably prolong its intended life, but keep it in an efficient operating condition, are to be treated as follows (but see G-10):

(1) Normal maintenance and repair costs are allowable:

(2) Extraordinary maintenance and repair costs are allowable, provided such are allocated to the periods to which applicable for purposes of determining grant or contract costs.

(b) Expenditures for plant and equipment, including rehabilitation thereof, which, according to generally accepted accounting principles as applied under the institution's established policy, should be capitalized and subjected to depreciation, are allowable only on a depreciation basis.

22. *Materiels costs* .(a) The cost of consumable supplies, serum, drugs, fabricated parts, and other materiels necessary to carry out the objectives of a grant or contract, whether purchased outside or manufactured by the institution are allowable subject to the provisions (b) through (e) below. The cost may include such collateral items as inbound transportation and intransit insurance.

In computing these costs consideration will be given to reasonable overruns, spoilage, or defective work if consistent with the nature of the project being performed and the recognized practice of the industry.

(b) Costs of materiel shall be suitably adjusted for applicable portions of income and other credits, including available trade and cash discounts, refunds, rebates, allowances, and credits for scrap and salvage and materiel returned to vendors. Such income and other credits shall either be credited directly to the cost of the materiel involved or be allocated (as credits) to indirect costs. However, where the institution can demonstrate that failure to take cash discounts was due to reasonable circumstances, such lost discounts need not be so credited.

(c) Reasonable adjustments arising from differences between periodic physical inventories and book inventories may be included in arriving at costs, provided such adjustments relate to the period of performance of the grant or contract.

(d) When the materiels are purchased specifically for and identifiable solely with performance under a grant or contract, the actual purchase cost thereof should be charged to that grant or contract. If materiel is issued from stores, any generally recognized method of pricing such materiel is acceptable if that method is consistently applied and the results are equitable. When estimates of materiel costs to be incurred in the future are required, either current market price or anticipated acquisition cost may be used, but the basis of pricing must be disclosed.

(e) Allowance for all materiels, supplies and services which are sold or transferred between any division, subsidiary or affiliate of the institution under a common control shall be on the basis of cost incurred in accordance with these principles, except that when it is the established practice of the transferring organization to price interorganization transfers of materiels, supplies and services at other than cost for non-Government work of the institution or any division, subsidiary or affiliate of the institution under a common control, allowance may be at a price when:

(1) It is or is based on an "established catalog or market price of commercial items sold in substantial quantities to the general public"; or

(2) It is the result of "adequate price competition" and is the price at which an award was made to the affiliated organization after obtaining quotations on an equal basis from such organization and one or more outside sources which normally produce the item or its equivalent in significant quantity.

Provided, That in either case:

(1) The price is not in excess of the transferor's current sales price to his most favored customer (including any division, subsidiary, or affiliate of the institution under a common control) for a like quantity under comparable conditions, and

(2) The price is not determined to be unreasonable by the awarding agency;

The price determined in accordance with (1) above should be adjusted, when appropriate, to reflect the quantities being procured and may be adjusted upward or downward to reflect the actual cost of any modifications necessary because of grant or contract requirements.

23. *Organization costs.* Expenditures, such as incorporation fees, attorney's fees, accountant's fees, brokers' fees, fees to promoters and organizers, in connection with (a) organization or reorganization of a business, or (b) raising capital, are unallowable unless specified otherwise in the grant or contract.

24. *Other business expenses.* Included in this item are such recurring expenses as preparation and publication of reports to members and trustees, preparation and submission of required reports and forms to taxing and other regulatory bodies; and incidental costs of directors and committee meetings. The above and similar costs are allowable when allocated on an equitable basis.

25. *Overtime, extra-pay shift and multi-shift premiums.* Premiums for overtime, extra-pay shifts, and multishift work are allowable only to the extent approved by the awarding agency except:

(a) When necessary to cope with emergencies, such as those resulting from accidents, natural disasters, breakdowns of production equipment, or occasional production bottlenecks of a sporadic nature;

(b) When by indirect labor employees such as those performing duties in connection with administration, protection, transportation, maintenance, standby plant protection, operation of utilities, or accounting;

(c) In the performance of tests, laboratory procedures, or other similar operations which are continuous in nature and cannot reasonably be interrupted or otherwise completed; or

(d) When lower overall cost to the Government will result.

Overtime premiums and shift premiums may be considered proper for approval when determined in writing by the awarding agency that approval:

(a) Is necessary to meet delivery or performance schedules, and such schedules are determined to be extended to the maximum consistent with essential program objectives;

(b) Is necessary to make up for delays which are beyond the control and without the fault or negligence of the institution;

(c) Is necessary to eliminate foreseeable bottlenecks of an extended nature which cannot be eliminated in any other way.

Approvals should ordinarily be prospective, but may be retroactive where justified by the circumstances. Such approvals may be for an individual grant or contract project, or program, or for a division, department, or branch, as most practicable.

Overtime for which overtime premiums would be at Government expense should not be approved under an award where the institution is already obligated, without the right to additional compensation, to meet the required delivery date.

Where overtime premiums or shift premiums are being paid at Government expense in connection with the performance of Government grant or contract; the continued need therefor should be subject to periodic review by the awarding agency.

26. *Patent and copyright costs.* Costs of preparing disclosures, reports, and other documents required by the grant/contract and of searching the art to the extent necessary to make such disclosures, are allowable. In accordance with the conditions of the grant or contract relating to patents or copyrights, costs of preparing documents and any other costs, in connction with the filing of a patent application or copyright where title is conveyed to the Government, are allowable. However, similar costs incurred in connection with patents or copyrights where title is not conveyed to the Government are unallowable. (See G-39)

27. *Pension plans.* (See G-6(g)-(4))

28. *Plant protection costs.* Costs of items such as (a) wages, uniforms, and equipment of personnel engaged in plant protection, (b) depreciation on plant protection capital assets, and (c) necessary expenses to comply with security requirements are allowable.

29. *Plant reconversion costs.* Plant reconversion costs are those incurred in the restoration or rehabilitation of the institutions' facilities to approximately the same condition existing immediately prior to the commencement of the grant or contract work, fair wear and tear excepted. Reconversion costs are unallowable except for the cost of removing Government property and the restoration or rehabilitation costs caused by such removal. However, in special circumstances where equity so dictates, additional costs may be allowed to the extent agreed upon in writing before the costs are incurred. Whenever such costs are given consideration, care should be exercised to avoid duplication through allowance as contingencies, as additional profit or fee, or in other grants or contracts.

30. *Preaward costs.* Preaward costs are those incurred prior to the effective date of the grant or contract directly pursuant to the negotiation and in anticipation of the award of the grant or contract where such incurrence is necessary to comply with the proposed delivery schedule or period of performance. Such costs are allowable only to the extent that they would have been allowable if incurred after the date of the award and only with the prior written approval of the awarding agency.

31. *Professional service costs—legal, accounting, scientific and other.* (a) Costs of professional services rendered by the member of a particular profession who are not employees of the institution are allowable, subject to (b), (c) and (d) below, when reasonable in relation to the services rendered. (but see G-23)

(b) Factors to be considered in determining the allowability of costs in a particular case include:

(1) The nature and scope of the service rendered in relation to the service required;

(2) The necessity of contracting for the service considering the institution's capability in the particular area;

(3) The past pattern of such costs, particularly in years prior to the award of Government work;

(4) The impact of Government work on the institution's business (i.e., what new problems have arisen);

(5) Whether the proportion of Government work to the institution's total business is such as to influence the institution in favor of incurring the cost, particularly where the services rendered are not of a continuing nature and have little relationship to work under Government grants/contracts;

(6) Whether the service can be performed more economically by employment rather than by contracting;

(7) The qualifications of the individual or concern rendering the service and the customary fees charged, especially on non-government grants/contracts;

(8) Adequacy of the contractual agreement for the service (e.g., description of the service, estimate of time required, rate of compensation; termination provisions).

(c) Retainer fees to be allowable must be reasonably supported by evidence of bona fide services available or rendered.

(d) Costs of legal, accounting, and consulting service, and related costs, incurred in connection with organization and reorganization, defense of anti-trust suits, and the prosecution of claims against the Government, are unallowable. Costs of legal, accounting, and consulting services, and related costs, incurred in connection with patent or copyright infringement litigation, are unallowable unless otherwise provided for in the grant or contract.

32. *Profits and losses on disposition of plant equipment, or other capital assets.* Profits or losses of any nature arising from the sale or exchange of plant, equipment, or other capital assets, including sale or exchange of either short or long term investments, shall be excluded in computing grant or contract costs.

33. *Public information services costs.* Public information services cost includes the cost associated with promotions, public relations, pamphlets, news releases, and other forms of information services. Such costs are normally incurred to:

(a) Inform or instruct individuals, groups or the general public about health or social problems.

(b) Interest individuals or groups in participating in a service program of the institution.

(c) Provide stewardship reports to State and local Government agencies, benefactor foundations and associations, etc.

(d) Appeal for funds.

(e) Disseminate the results of sponsored and non-sponsored research or other activity to the scientific community.

To the extent that the costs incurred for any of these purposes are identifiable with a particular cost objective they should be charged to the objective to which they relate.

If these costs are not identifiable with a particular cost objective they should be allocated as indirect costs to all major activities of the institution except that costs related to fund raising appeals are unallowable as costs of grants and contracts.

Public information service costs are unallowable as a direct cost of grants and contracts unless formally approved by the awarding agency.

34. *Publication and printing costs.* Publication costs include the costs of printing (including the processes of composition, platemaking, press work, binding and the end products produced by such processes), distribution, promotion, mailing and general handling.

Publication costs are unallowable as a direct cost of grants and contracts unless formally approved by the awarding agency.

35. *Rearrangement and alteration costs.* Costs incurred for ordinary or normal rearrangement and alteration of facilities are allowable. Special arrangement and alteration costs incurred specifically for the project are allowable when written approval has been given in advance by the awarding agency.

36. *Recruitment costs.* (a) Subject to (b), (c), and (d) of this G-36, and provided that the size of the staff recruited and maintained is in keeping with workload requirements, costs of help-wanted advertising, operating costs of an employment office necessary to secure and maintain an adequate labor force, costs of operating an aptitude and educational testing program, travel costs of employees while engaged in recruiting personnel, and travel costs of applicants for interviews for prospective employment are allowable to the extent that such costs are incurred pursuant to a well managed recruitment program. Where the institution uses employment agencies, costs not in excess of standard commercial rates for such services are allowable.

(b) In publications, costs of help-wanted advertising that (1) includes color, (2) includes advertising materiel for other than recruitment purposes, or (3) is excessive in size (taking into consideration recruitment purposes for which intended and normal business practices in this respect) are unallowable.

(c) Costs of (1) help-wanted advertising and (2) excessive salaries, fringe benefits, and special emoluments that have been offered to prospective employees, designed to attract personnel from another institution performing as grantee or contractor to the Government, or in excess of the standard practices in comparable institutions, are unallowable.

(d) Where relocation costs incurred incident to recruitment of a new employee have been allowed either as an allocable direct or indirect cost and the newly hired employee resigns for reasons within his control within 12 months after hire, the institution shall be required to refund or credit such relocation costs to the Government.

37. *Relocation costs.* (a) Relocation costs, for the purpose of this document, are costs incident to the permanent change of duty assignment (for an indefinite period, or for a stated period of no less than 12 months) of an existing employee or upon recruitment of a new employee. These costs may include, but are not limited to cost of (i) transportation of the employee, members of his immediate family and his household and personal effects to the new location; (ii) finding a new home, such as advance trips by employees and spouses to locate living quarters and temporary lodging during the transition period; (iii) closing costs (i.e., brokerage fees, legal fees, appraisal fees, etc.), incident to the disposition of housing; (iv) other necessary and reasonable expenses normally incident to relocation, such as cost of cancelling an unexpired lease, disconnecting or reinstalling household appliances, and purchase of insurance against damages to personal property; (v) loss on sale of home; and (vi) acquisition of a home in a new location (i.e., brokerage fees, legal fees, appraisal fees, etc.).

(b) Subject to (c) below, relocation costs of the type covered in (a) (i), (ii), (iii), and (iv) above are allowable, provided (1) the move is for the benefit of the employer; (ii) reimbursement is in accordance with an established policy or practice consistently followed by the employer, and such policy or practice is designed to motivate employees to relocate promptly and economically; (iii) the costs are not otherwise unallowable under the provisions of G-36 or any other paragraph of this document and (iv) amounts to be reimbursed shall not exceed the employee's actual (or reasonably estimated) expenses.

(c) Costs otherwise allowable under (b) above are subject to the following additional provisions: (i) the transition period for incurrance of costs of the type covered in (a) (ii) above shall be kept to the minimum number of days necessary under the circumtances, but shall not, in any event, exceed a cumulative total of 30 days including advance trip time; and (ii) allowance for cost of the type covered in (a) (iii) above shall not exceed 8 percent of the sales price of the property sold. Costs of the type covered in (a) (iii) and (iv) above are allowable only in connection with the relocation of existing employees, and are not allowable for newly recruited employees.

(d) Costs of the type covered in (a) (v) and (vi) above are not allowable.

38. *Rental costs (including sale and leaseback of facilities).* (a) Rental costs of land, building, and equipment and other personal property are allowable if the rates are reasonable in light of such factors as rental costs of comparable facilities and market conditions in the area, the type, life expectancy, condition, and value of the facilities leased, options available, and other provisions of the rental agreement. Application of these factors, in situations where rentals are extensively used, may involve among other considerations, comparison of rental costs with the amount which the institution would have received had it owned the facilities.

(b) Charges in the nature of rent between plants, divisions, or organizations under common control are allowable to the extent such charges do not exceed the normal costs of ownership, such as depreciation, taxes, insurance, and maintenance: *Provided*, That no part of such costs shall duplicate any other allowed costs.

(c) Unless otherwise specifically provided in the grant or contract, rental costs specified in sale and leaseback agreements, incurred by institutions through selling plant facilities to investment organizations, such as insurance companies, associate institutions, or to private investors, and concurrently leasing back the same facilities, are allowable only to the extent that such rentals do not exceed the amount which the grantee/contractor would have received had it retained legal title to the facilities.

(d) Rentals for land, building and equipment and other personal property owned by affiliated organizations including corporations or by stockholders, members, directors, trustees, officers or other key personnel of the institution or their families either directly or through corporations, trusts or other similar arrangements in which they hold a more than token interest are allowable only to the extent that such rentals do not exceed the amount the institution would have received had legal title to the facilities been vested in it.

(e) The allowability of rental costs under unexpired leases in connection with terminations is treated in G-42(e).

39. *Royalties and other costs for use of patents and copyrights.* (a) Royalties on a patent or copyright or amortization of the cost of acquiring by purchase a copyright, patent or rights thereto, necessary for the proper performance of the grant or contract applicable to grant products or processes, are allowable unless:

(1) The Government has a license or the right to free use of the patent;

V 38 - 4 JAN 8 73 XUM

(2) The patent or copyright has been adjudicated to be invalid, or has been administratively determined to be invalid;

(3) The patent or copyright is considered to be unenforceable; or

(4) The patent or copyright is expired.

(b) Special care should be exercised in determining reasonableness where the royalties may have been arrived at as a result of less than arms-length bargaining; e.g.:

(1) Royalties paid to persons, including corporations, affiliated with the institution;

(2) Royalties paid to unaffiliated parties, including corporations, under an agreement entered into in contemplation that a Government grant or contract would be awarded; or

(3) Royalties paid under an agreement entered into after the award of the grant or contract.

(c) In any case involving a patent or copyright formerly owned by the institution, the amount of royalty allowed should not exceed the cost which would have been allowed had the institution retained title thereto.

40. *Severance pay.* (a) Severance pay, also commonly referred to as dismissal wages, is a payment in addition to regular salaries and wages, by institutions to workers whose employment is being terminated. Costs of severance pay are allowable only to the extent that, in each case, it is required by (1) law, (2) employer-employee agreement, (3) established policy that constitutes, in effect, an implied agreement on the institution's part, or (4) circumstance of the particular employment.

(b) Costs of severance payments are divided into two categories as follows:

(1) Actual normal turnover severance payments shall be allocated to all work performed in the institution's facilities; or, where the institution provides for accrual of pay for normal severances such method will be acceptable if the amount of the accrual is reasonable in light of payments actually made for normal severances over a representative past period, and if amounts accrued are allocated to all work performed in the institution's facilities; and

(2) Abnormal or mass severance pay is of such a conjectural nature that measurement of costs by means of an accrual will not achieve equity to both parties. Thus, accruals for this purpose are not allowable. However, the Government recognizes its obligation to participate, to the extent of its fair share, in any specific payment. Thus, allowability will be considered on a case-by-case basis in the event of occurrence.

41. *Taxes.* (a) Taxes are certain charges levied by Federal, State, or local governments. They do not include fines and penalties except as otherwise provided herein. In general, taxes which the institution is required to pay and which are paid or accrued in accordance with generally accepted accounting principles are allowable, except for:

(1) Federal income taxes and similar levies against income of the institution derived from activities unrelated to the project supported by the grant or contract;

(2) Taxes in connection with financing, refinancing, or refunding operations (see G-18);

(3) Taxes from which exemptions are available to the institution directly or available to the institution based on an exemption afforded the Government except when the awarding agency determines that the administrative burden incident to obtaining the exemption outweighs the corresponding benefits accruing to the Government;

(4) Special assessments on land which represent capital improvements; and

(5) Taxes on any category of property which is used solely in connection with work other than on Government grants or contracts. (Taxes on property used solely in connection with either non-Government or Government work should be considered directly applicable to the respective category of work unless the amounts involved are insignificant or comparable results would otherwise be obtained.)

(b) Taxes otherwise allowable under paragraph (a) of this section, but upon which a claim of illegality or erroneous assessment exists, are allowable provided the institution, prior to payment of such taxes:

(1) Promptly requests instructions from the awarding agency concerning such taxes, and

(2) Takes all action directed by the awarding agency arising out of subparagraph (1) of this paragraph or an independent decision of the Government as to the existence of a claim of illegality or erroneous assessment, including cooperation with and for the benefit of the Government to (i) determine the legality of such assessment, or (ii) secure a refund of such taxes.

Reasonable costs of any such action undertaken by the institution at the direction or with the concurrence of the awarding agency are allowable. Interest and penalties incurred by an institution by reason of the nonpayment of any tax at the direction of the awarding agency or by reason of the failure of the awarding agency to issue timely direction after prompt request therefor, are also allowable.

(c) Any refund of taxes, interest, or penalties, and any payment to the institution of interest thereon, attributable to taxes, interest, or penalties which were allowed as project costs, shall be credited or paid to the Government in the manner directed by the Government, provided any interest actually paid or credited to an institution incident to a refund of tax, interest or penalty shall be paid or credited to the Government only to the extent that such interest accrued over the period during which the institution had been reimbursed by the Government for the taxes, interest or penalties.

42. *Termination costs.* Grants and contracts terminations generally give rise to the incurrence of costs, or the need for special treatment of costs, which would not have arisen had the project not been terminated. Cost principles covering these items are set forth below. They are to be used in conjunction with the remainder of this document in termination situations.

(a) *Common items.* The cost of items reasonably usable on the institution's other work shall not be allowable unless the institution submits evidence that it could not retain such items at cost without sustaining a loss. In deciding whether such items are reasonably usable on other work of the institution, the awarding agency should consider the institution's plans and orders for current and scheduled production. Contemporaneous purchases of common items by the institution shall be regarded as evidence that such items are reasonably usable on the institution's other work. Any acceptance of common items as allocable to the terminated portion of the project should be limited to the extent that the quantities of such items on hand, in transit, and on order are in excess of the reasonable quantitative requirements of other work.

(b) *Costs continuing after termination.* If in a particular case, despite all reasonable efforts by the institution certain costs cannot be discontinued immediately after the effective date of termination, such costs are generally allowable within the limitations set forth in this document, except that any such costs continuing after termination due to the negligent or willful failure of the institution to discontinue such costs shall be considered unallowable.

(c) *Initial costs.* Initial costs, including starting load and preparatory costs, are allowable, subject to the following:

(1) Starting load costs are costs of a nonrecurring nature arising in the early stages of operation, investigation or production and not fully absorbed because of the termination. Such costs may include the cost of labor and materiel, and related indirect cost attributable to such factors as:

(a) Excessive spoilage resulting from inexperienced labor;

(b) Idle time and subnormal production occasioned by testing and changing methods of processing;

(c) Employee training; and

(d) Unfamiliarity or lack of experience with the product, materiels, manufacturing processes, and techniques.

(2) Preparatory costs are costs incurred in preparing to perform the terminated project including costs of initial plant rearrangement and alterations, management and personnel organization, production planning and similar activities, but excluding special machinery and equipment and starting load costs.

(3) If initial costs are claimed and have not been segregated on the institution's books, segregation for settlement purposes shall be made from cost reports and schedules which reflect the high unit cost incurred during the early stages of the project.

(4) When the settlement proposal is on the inventory basis, initial costs should normally be allocated on the basis of total end items called for by the project immediately prior to termination; however, if the project includes end items of a diverse nature, some other equitable basis may be used, such as machine or labor hours.

(5) When initial costs are included in the settlement proposal as a direct charge, such costs shall not also be included in overhead.

(6) Initial costs attributable to only one project shall not be allocated to other projects.

(d) *Loss of useful value.* Loss of useful value of special tooling and special machinery and equipment is generally allowable if:

(1) Such special tooling, machinery, or equipment is not reasonably capable of use in the other work of the institution;

(2) The interest of the Government is protected by transfer of title or by other means deemed appropriate by the awarding agency and

(3) The loss of useful value as to any one terminated project is limited to that portion of the acquisition cost which bears the same ratio to the total acquisition cost as the terminated portion of the project bears to the entire terminated project and other Government projects for which the special tooling and special machinery and equipment was acquired.

(e) *Rental costs.* Rental costs under unexpired leases are generally allowable where clearly shown to have been reasonably necessary for the performance of the terminated project less the residual value of such leases, if:

(1) The amount of such rental claimed does not exceed the reasonable use value of the property leased for the period of the project and such further period as may be reasonable; and

(2) The institution makes all reasonable efforts to terminate, assign, settle, or otherwise reduce the cost of such lease.

There also may be included the cost of alterations of such leased property, provided such alterations were necessary for the performance of the project, and of reasonable restoration required by the provisions of the lease.

(f) *Settlement expenses.* Settlement expenses including the following are generally allowable:

(1) Accounting, legal, clerical, and similar costs reasonably necessary for—

(a) The preparation and presentation to awarding agency of settlement claims and supporting data with respect to the terminated portion of the project, and

(b) The termination and settlement of subcontracts; and

(2) Reasonable costs for the storage, transportation, protection, and disposition of property acquired or produced for the project.

(g) *Subcontractor claims.* Subcontractor claims, including the allocable portion of claims which are common to the project and to other work of the institution are generally allowable.

43. *Trade, Business, Technical, and Professional Activity Costs*—(a) *Membership.* This category includes costs of memberships in trade, business, technical, and professional organizations. Such costs are allowable.

(b) *Subscriptions.* This item includes cost of subscriptions to trade, business, professional, or technical periodicals. Such costs are allowable.

(c) *Meetings and conferences.* This item includes costs of meals, transportation, rental of facilities for meetings, and costs incidental thereto, when the primary purpose of the incurrence of such costs is the dissemination of technical information or stimulation of production. Such costs are allowable.

44. *Training and educational costs.* (a) The costs of training courses taken by a bona fide employee to acquire basic skills which he should bring to the job or to qualify a person for duties other than those related to an institution's goals are unallowable.

(b) Costs of on the job training and part-time education, at an undergraduate or post-graduate college level, related to the job requirements of bona fide employees, identified in (1) through (5) below, are allowable.

(1) Training materiels;

(2) Textbooks;

(3) Fees charged by the educational institution;

(4) Tuition charged by the educational institution, or in lieu of tuition, instructors' salaries and the related share of indirect cost of the educational institution to the extent that the sum thereof is not in excess of the tuition which would have been paid to the participating educational institution; and

(5) Straight-time compensation of each employee for time spent attending classes during working hours not in excess of 156 hours per year where circumstances do not permit the operation of classes or attendance at classes after regular working hours.

(c) Costs of tuition, fees, training materiels and textbooks (but not subsistence, salary, or any other emoluments) in connection with full time scientific and medical education at a post-graduate (but not undergraduate) college level related to the job requirements of bona fide employees for a total period not to exceed 1 school year for each employee so trained, are allowable when approved in writing by the awarding agency.

(d) Grants to educational or training institutions, including the donation of facilities or other properties, scholarships, or fellowships, are considered contributions and are unallowable.

45. *Transportation costs.* Transportation costs include freight, express, cartage, and postage charges relating either to goods purchased, in process, or delivered. These costs are allowable. When such costs can readily be identified with the items involved, they may be directly costed as transportation costs or added to the cost of such items (see G-22).

Where identification with the materiels received cannot readily be made, inbound transportation costs may be charged to the appropriate indirect cost accounts if the institution follows a consistent, equitable procedure in this respect. Outbound freight, if reimbursable under the terms of the grant or contract shall be treated as a direct cost.

46. *Travel costs.* (a) Travel costs include costs of transportation, lodging, subsistence, and incidental expenses, incurred by institution personnel in a travel status while on official business.

(b) Travel costs may be based upon actual costs incurred, or on a per diem or mileage basis in lieu of actual costs, or on a combination of the two, provided the method used does not result in an unreasonable charge. The difference in cost between first-class and less than first-class air accommodations is unallowable except when less than first-class air accommodations are not reasonably available to meet necessary mission requirements, such as where less than first-class accommodations would (1) require circuitous routing, (2) require travel during unreasonable hours, (3) greatly increase the duration of the flight, (4) result in additional costs which would offset the transportation savings, or (5) offer accommodations which are not reasonably adequate for the medical needs of the traveler.

(c) Travel costs incurred in the normal course of overall administration of the business are allowable and shall be treated as indirect costs.

(d) Travel costs directly attributable to specific grant or contract performance are allowable and may be charged to the grant or contract in accordance with the principle of direct costing (see section C).

(e) Costs of personnel movement of a special or mass nature are allowable only when authorized or approved in writing by the sponsoring agency.

APPENDIX B—PRINCIPLES FOR DETERMINING COSTS APPLICABLE TO GRANTS AND CONTRACTS WITH STATE AND LOCAL GOVERNMENTS

PART I—GENERAL

A. PURPOSE AND SCOPE

1. *Objectives.* This appendix sets forth principles for determining the allowable costs of programs administered by State and local governments under grants from and contracts with the Federal Government. The principles are for the purpose of cost determination and are not intended to identify the circumstances or dictate the extent of Federal and State or local participation in the financing of a particular grant. They are designed to provide that federally assisted programs bear their fair share of costs recognized under these principles, except where restricted or prohibited by law. No provision for profit or other increment above cost is intended.

2. *Policy guides.* The application of these principles is based on the fundamental premises that:

a. State and local governments are responsible for the efficient and effective administration of grant and contract programs through the application of sound management practices.

b. The grantee or contractor assumes the responsibility for seeing that federally assisted program funds have been expended and accounted for consistent with underlying agreements and program objectives.

c. Each grantee or contractor organization, in recognition of its own unique combination of staff facilities and experience, will have the primary responsibility for employing whatever form of organization and management techniques may be necessary to assure proper and efficient administration.

3. *Application.* These principles will be applied in determining costs incurred by State and local governments under Federal grants and cost reimbursement type contracts (including subgrants and subcontracts) except those with (a) publicly financed educational institutions subject to Appendix C to this part and (b) publicly owned hospitals and other providers of medical care subject to requirements promulgated by the Director.

B. DEFINITIONS

1. *Approval or authorization of the grantor Federal agency* means documentation evidencing consent prior to incurring specific cost.

2. *Cost allocation plan* means the documentation identifying, accumulating, and distributing allowable costs under grants and contracts together with the allocation methods used.

3. *Cost,* as used herein, means cost as determined on a cash, accrual, or other basis acceptable to the Federal grantor agency as a discharge of the grantee's accountability for Federal funds.

4. *Cost objective* means a pool, center, or area established for the accumulation of cost. Such areas include organizational units, functions, objects or items of expense, as well as ultimate cost objectives including specific grants, projects, contracts, and other activities.

5. *Federal agency* means the National Institute of Education.

6. *Grant* means an agreement between the Federal Government and a State or local government whereby the Federal Government provides funds or aid in kind to carry out specified programs, services, or activities. The principles and policies stated in this appendix as applicable to grants in general also apply to any federally sponsored cost reimbursement type of agreement performed by a State or local government, including contracts, subcontracts and subgrants.

7. *Grant program* means those activities and operations of the grantee which are necessary to carry out the purposes of the grant, including any portion of the program financed by the grantee.

8. *Grantee* means the department or agency of State or local government which is responsible for administration of the grant.

9. *Local unit* means any political subdivision of government below the State level.

10. *Other State or local agencies* means departments or agencies of the State or local unit which provide goods, facilities, and services to a grantee.

11. *Services,* as used herein, means goods and facilities, as well as services.

12. *Supporting services* means auxiliary functions necessary to sustain the direct effort involved in administering a grant program or an activity providing service to the grant program. These services may be centralized in the grantee department or in some other agency, and include procurement, payroll, personnel functions, maintenance and operation of space, data processing, accounting, budgeting, auditing, mail and messenger service, and the like.

C. BASIC GUIDELINES

1. *Factors affecting allowability of costs.* To be allowable under a grant program, costs must meet the following general criteria:

a. Be necessary and reasonable for proper and efficient administration of the grant program, be allocable thereto under these principles, and, except as specifically provided herein, not be a general expense required to carry out the overall responsibilities of State or local governments.

V38-4 JAN 8 73 XUM

b. Be authorized or not prohibited under State or local laws or regulations.

c. Conform to any limitations or exclusions set forth in these principles, Federal laws, or other governing limitations as to types or amounts of cost items.

d. Be consistent with policies, regulations, and procedures that apply uniformly to both federally assisted and other activities of the unit of government of which the grantee is a part.

e. Be accorded consistent treatment through application of generally accepted accounting principles appropriate to the circumstances.

f. Not be allocable to or included as a cost of any other federally financed program in either the current or a prior period.

g. Be net of all applicable credits.

2. *Allocable costs.* a. A cost is allocable to a particular cost objective to the extent of benefits received by such objective.

b. Any cost allocable to a particular grant or cost objective under the principles provided for in this appendix may not be shifted to other Federal grant programs to overcome fund deficiencies, avoid restrictions imposed by law or grant agreements, or for other reasons.

c. Where an allocation of joint cost will ultimately result in charges to a grant program, an allocation plan will be required as prescribed in section J.

3. *Applicable credits.* a. Applicable credits refer to those receipts or reduction of expenditure-type transactions which offset or reduce expense items allocable to grants as direct or indirect costs. Examples of such transactions are: Purchase discounts; rebates or allowances; recoveries or indemnities on losses; sale of publications, equipment, and scrap; income from personal or incidental services; and adjustments of overpayments or erroneous charges.

b. Applicable credits may also arise when Federal funds are received or are available from sources other than the grant program involved to finance operations or capital items of the grantee. This includes costs arising from the use or depreciation of items donated or financed by the Federal Government to fulfill matching requirements under another grant program. These types of credits should likewise be used to reduce related expenditures in determining the rates or amounts applicable to a given grant.

D. COMPOSITION OF COST

1. *Total cost.* The total cost of a grant program is comprised of the allowable direct cost incident to its performance, plus its allocable portion of allowable indirect costs, less applicable credits.

2. *Classification of costs.* There is no universal rule for classifying certain costs as either direct or indirect under every accounting system. A cost may be direct with respect to some specific service or function, but indirect with respect to the grant or other ultimate cost objective. It is essential therefore that each item of cost be treated consistently either as a direct or an indirect cost. Specific guides for determining direct and indirect costs allocable under grant programs are provided in the sections which follow.

E. DIRECT COSTS

1. *General.* Direct costs are those that can be identified specifically with a particular cost objective. These costs may be charged directly to grants, contracts, or to other programs against which costs are finally lodged. Direct costs may also be charged to cost objectives used for the accumulation of costs pending distribution in due course to grants and other ultimate cost objectives.

2. *Application.* Typical direct costs chargeable to grant programs are:

a. Compensation of employees for the time and effort devoted specifically to the execution of grant programs.

b. Cost of materials acquired, consumed, or expended specifically for the purpose of the grant.

c. Equipment and other approved capital expenditures.

d. Other items of expense incurred specifically to carry out the grant agreement.

e. Services furnished specifically for the grant program by other agencies, provided such charges are consistent with criteria outlined in Section G of these principles.

F. INDIRECT COSTS

1. *General.* Indirect costs are those (a) incurred for a common or joint purpose benefiting more than one cost objective, and (b) not readily assignable to the cost objectives specifically benefited, without effort disproportionate to the results achieved. The term "indirect costs," as used herein, applies to costs of this type originating in the grantee department, as well as those incurred by other departments in supplying goods, services, and facilities, to the grantee department. To facilitate equitable distribution of indirect expenses to the cost objectives served, it may be necessary to establish a number of pools of indirect cost within a grantee department or in other agencies providing services to a grantee department. Indirect cost pools should be distributed to benefiting cost objectives on bases which will produce an equitable result in consideration of relative benefits derived.

2. *Grantee departmental indirect costs.* All grantee departmental indirect costs, including the various levels of supervision, are eligible for allocation to grant programs provided they meet the conditions set forth in this Appendix. In lieu of determining the actual amount of grantee departmental indirect cost allocable to a grant program, the following methods may be used:

a. *Predetermined fixed rates for indirect costs.* A predetermined fixed rate for computing indirect costs applicable to a grant may be negotiated annually in situations where the cost experience and other pertinent facts available are deemed sufficient to enable the contracting parties to reach an informed judgment (1) as to the probable level of indirect costs in the grantee department during the period to be covered by the negotiated rate, and (2) that the amount allowable under the predetermined rate would not exceed actual indirect cost.

b. *Negotiated lump sum for overhead.* A negotiated fixed amount in lieu of indirect costs may be appropriate under circumstances where the benefits derived from a grantee department's indirect services cannot be readily determined as in the case of small, self-contained or isolated activity. When this method is used, a determination should be made that the amount negotiated will be approximately the same as the actual indirect cost that may be incurred. Such amounts negotiated in lieu of indirect costs will be treated as an offset to total indirect expenses of the grantee department before allocation to remaining activities. The base on which such remaining expenses are allocated should be appropriately adjusted.

3. *Limitation on indirect costs.* a. Federal grants may be subject to laws that limit the amount of indirect cost that may be allowed. Agencies that sponsor grants of this type will establish procedures which will assure that the amount actually allowed for indirect costs under each such grant does not exceed the maximum allowable under the statutory limitation or the amount otherwise allowable under this Appendix, whichever is the smaller.

b. When the amount allowable under a statutory limitation is less than the amount otherwise allocable as indirect costs under this Appendix, the amount not recoverable as indirect costs under a grant may not be shifted to another federally sponsored grant program or contract.

G. COST INCURRED BY AGENCIES OTHER THAN THE GRANTEE

1. *General.* The cost of service provided by other agencies may only include allowable direct costs of the service plus a pro rata share of allowable supporting costs (section B.12.) and supervision directly required in performing the service, but not supervision of a general nature such as that provided by the head of a department and his staff assistants not directly involved in operations. However, supervision by the head of a department or agency whose sole function is providing the service furnished would be an eligible cost. Supporting costs include those furnished by other units of the supplying department or by other agencies.

2. *Alternative methods of determining indirect cost.* In lieu of determining actual indirect cost related to a particular service furnished by another agency, either of the following alternative methods may be used provided only one method is used for a specific service during the fiscal year involved.

a. *Standard indirect rate.* An amount equal to 10 percent of direct labor cost in providing the service performed by another State agency (excluding overtime, shift, or holiday premiums and fringe benefits) may be allowed in lieu of actual allowable indirect cost for that service.

b. *Predetermined fixed rate.* A predetermined fixed rate for indirect cost of the unit or activity providing service may be negotiated as set forth in section F.2.a.

H. COST INCURRED BY GRANTEE DEPARTMENT FOR OTHERS

1. *General.* The principles provided in section G. will also be used in determining the cost of services provided by the grantee department to another agency.

J. COST ALLOCATION PLAN

1. *General.* A plan for allocation of costs will be required to support the distribution of any joint costs related to the grant program. All costs included in the plan will be supported by formal accounting records which will substantiate the propriety of eventual charges.

2. *Requirements.* The allocation plan of the grantee department should cover all joint costs of the department as well as costs to be allocated under plans of other agencies or organizational unit which are to be included in the costs of federally sponsored programs. The cost allocation plans of all the agencies rendering services to the grantee department, to the extent feasible, should be presented in a single document. The allocation plan should contain, but not necessarily be limited to, the following:

a. The nature and extent of services provided and their relevance to the federally sponsored programs.

b. The items of expense to be included.

c. The methods to be used in distributing cost.

3. *Approval of cost allocation plan.* The allocation plan for a given cost area or objective will serve all the Federal agencies involved.

a. At the State level, the Department of Health, Education, and Welfare will be responsible for the negotiation and approval of the cost allocation plans for central support services to grant programs. The approved plans will be accepted by other Federal agencies, unless an agency determines that the approved plan would result in significant inequitable or improper charges to programs for which it is responsible. The Department of Health, Education, and Welfare will collaborate with the other Federal agencies concerned in the development of guidance material concerning the cost allocation plan and in the negotiation and approval of the plan. It will also collaborate with the States concerning procedures for the administration of the cost allocation plan. The Department of Health, Education, and Welfare will be responsible for the audit of costs resulting from the cost allocation plan, the results of which will be accepted by other Federal agencies.

b. At the grantee department level in a State, and for local governments, Federal agencies will work toward the objective of designating a single Federal agency, the one with predominant interest, which will have responsibility similar to that set forth in a. above for the negotiation and approval of the cost allocation plan and for the audit of costs.

PART II—STANDARDS FOR SELECTED ITEMS OF COST

A. PURPOSE AND APPLICABILITY

1. *Objective.* This part provides standards for determining the allowability of selected items of cost.

2. *Application.* These standards will apply irrespective of whether a particular item of cost is treated as direct or indirect cost. Failure to mention a particular item of cost in the standards is not intended to imply that it is either allowable or unallowable, rather determination of allowability in each case should be based on the treatment of standards provided for similar or related items of cost. The allowability of the selected items of cost is subject to the general policies and principles stated in Part I of this appendix.

B. ALLOWABLE COSTS

1. *Accounting.* The cost of establishing and maintaining accounting and other information systems required for the management of grant programs is allowable. This includes cost incurred by central service agencies for these purposes. The cost of maintaining central accounting records required for overall State or local government purposes, such as appropriation and fund accounts by the Treasurer, Comptroller, or similar officials, is considered to be a general expense of government and is not allowable.

2. *Advertising.* Advertising media includes newspapers, magazines, radio, and television programs, direct mail, trade papers, and the like. The advertising costs allowable are those which are solely for:

a. Recruitment of personnel required for the grant program.

b. Solicitation of bids for the procurement of goods and services required.

c. Disposal of scrap or surplus materials acquired in the performance of the grant agreement.

d. Other purposes specifically provided for in the grant agreement.

3. *Advisory councils.* Costs incurred by State advisory councils or committees established pursuant to Federal requirements to carry out grant programs are allowable. The cost of like organizations is allowable when provided for in the grant agreement.

4. *Audit service.* The cost of audits necessary for the administration and management of functions related to grant programs is allowable.

5. *Bonding.* Costs of premiums on bonds covering employees who handle grantee agency funds are allowable.

6. *Budgeting.* Costs incurred for the development, preparation, presentation, and execution of budgets are allowable. Costs for services of a central budget office are generally not allowable since these are costs of general government. However, where employees of the central budget office actively participate in the grantee agency's budget process, the cost of identifiable services is allowable.

7. *Building lease management.* The administrative cost for lease management which includes review of lease proposals, maintenance of a list of available property for lease, and related activities is allowable.

8. *Central stores.* The cost of maintaining and operating a central stores organization for supplies, equipment, and materials used either directly or indirectly for grant programs is allowable.

9. *Communications.* Communication costs incurred for telephone calls or service, telegraph, teletype service, wide area telephone service (WATS), centrex, telpak (tie lines), postage, messenger service and similar expenses are allowable.

10. *Compensation for personal services*—a. *General.* Compensation for personal services includes all remuneration, paid currently or accrued, for services rendered during the period of performance under the grant agreement, including but not necessarily limited to wages, salaries, and supplementary compensation and benefits (section B.13.). The costs of such compensation are allowable to the extent that total compensation for individual employees: (1) Is reasonable for the services rendered, (2) follows an appointment made in accordance with State or local government laws and rules and which meets Federal merit system or other requirements, where applicable; and (3) is determined and supported as provided in b. below. Compensation for employees engaged in federally assisted activities will be considered reasonable to the extent that it is consistent with that paid for similar work in other activities of the State or local government. In cases where the kinds of employees required for the federally assisted activities are not found in the other activities of the State or local government, compensation will be considered reasonable to the extent that it is comparable to that paid for similar work in the labor market in which the employing government competes for the kind of employees involved. Compensation surveys providing data representative of the labor market involved will be an acceptable basis for evaluating reasonableness.

b. *Payroll and distribution of time.* Amounts charged to grant programs for personel services, regardless of whether treated as direct or indirect costs, will be based on payrolls documented and approved in accordance with generally accepted practice of the State or local agency. Payrolls must be supported by time and attendance or equivalent records for individual employees. Salaries and wages of employees chargeable to more than one grant program or other cost objective will be supported by appropriate time distribution records. The method used should produce an equitable distribution of time and effort.

11. *Depreciation and use allowances,* a. Grantees may be compensated for the use or buildings, capital improvements, and equipment through use allowances or depreciation. Use allowances are the means of providing compensation in lieu of depreciation or other equivalent costs. However, a combination of the two methods may not be used in connection with a single class of fixed assets.

b. The computation of depreciation or use allowance will be based on acquisition cost. Where actual cost records have not been maintained, a reasonable estimate of the original acquisition cost may be used in the computation. The computation will exclude the cost or any portion of the cost of buildings and equipment donated or borne directly or indirectly by the Federal Government through charges to Federal grant programs or otherwise, irrespective of where title was originally vested or where it presently resides. In addition, the computation will also exclude the cost of land. Depreciation or a use allowance on idle or excess facilities is not allowable, except when specifically authorized by the grantor Federal agency.

c. Where the depreciation method is followed, adequate property records must be maintained, and any generally accepted method of computing depreciation may be used. However, the method of computing depreciation must be consistently applied for any specific asset or class of assets for all affected federally sponsored programs and must result in equitable charges considering the extent of the use of the assets for the benefit of such programs.

d. In lieu of depreciation, a use allowance for buildings and improvements may be computed at an annual rate not exceeding 2 percent of acquisition cost. The use allowance for equipment (excluding items properly capitalized as building cost) will be computed at an annual rate not exceeding 6⅔ percent of acquisition cost of usable equipment.

e. No depreciation or use charge may be allowed on any assets that would be considered as fully depreciated: *Provided, however,* That reasonable use charges may be negotiated for any such assets if warranted after taking into consideration the cost of the facility or item involved, the estimated useful life remaining at time of negotiation, the effect of any increased maintenance charges or decreased efficiency due to age, and any other factors pertinent to the utilization of the facility or item for the purpose contemplated.

12. *Disbursing service.* The cost of disbursing grant program funds by the Treasurer or other designated officer is allowable. Disbursing services cover the processing of checks or warrants, from preparation to redemption, including the necessary records of accountability and reconciliation of such records with related cash accounts.

13. *Employee fringe benefits.* Costs identified under a. and b. below are allowable to the extent that total compensation for employees is reasonable as defined in section B.10.

a. Employee benefits in the form of regular compensation paid to employees during periods of authorized absences from the job, such as for annual leave, sick leave, court leave, military leave, and the like, if they are: (1) Provided pursuant to an approved leave system, and (2) the cost thereof is equitably allocated to all related activities, including grant programs.

b. Employee benefits in the form of employers' contribution or expenses for social security, employees' life and health insurance plans, unemployment insurance coverage, workmen's compensation insurance, pension plans, severance pay, and the like, provided such benefits are granted under approved plans and are distributed equitably to grant programs and to other activities.

14. *Employee morale, health, and welfare costs.* The costs of health or first-aid clinics and/or infirmaries, recreational facilities, employees' counseling services, employee information publications, and any related expenses incurred in accordance with general State or local policy are allowable. Income generated from any of these activities will be offset against expenses.

15. *Exhibits.* Costs of exhibits relating specifically to the grant programs are allowable.

16. *Legal expenses.* The cost of legal expenses required in the administration of grant programs is allowable. Legal services furnished by the chief legal officer of a State or local government or his staff solely for

V38-4 JAN 8 73 XUM

the purpose of discharging his general responsibilities as legal officer are unallowable. Legal expenses for the prosecution of claims against the Federal Government are unallowable.

17. *Maintenance and repair.* Costs incurred for necessary maintenance, repair, or upkeep of property which neither add to the permanent value of the property nor appreciably prolong its intended life, but keep it in an efficient operating condition, are allowable.

18. *Materials and supplies.* The cost of materials and supplies necessary to carry out the grant programs is allowable. Purchases made specifically for the grant program should be charged thereto at their actual prices after deducting all cash discounts, trade discounts, rebates, and allowances received by the grantee. Withdrawals from general stores or stockrooms should be charged at cost under any recognized method of pricing consistently applied. Incoming transportation charges are a proper part of material cost.

19. *Memberships, subscriptions and professional activities*—a. *Memberships.* The cost of membership in civic, business, technical and professional organizations is allowable provided: (1) The benefit from the membership is related to the grant program, (2) the expenditure is for agency membership, (3) the cost of the membership is reasonably related to the value of the services or benefits received, and (4) the expenditure is not for membership in an organization which devotes a substantial part of its activities to influencing legislation.

b. *Reference material.* The cost of books, and subscriptions to civic, business, professional, and technical periodicals is allowable when related to the grant program.

c. *Meetings and conferences.* Costs are allowable when the primary purpose of the meeting is the dissemination of technical information relating to the grant program and they are consistent with regular practices followed for other activities of the grantee.

20. *Motor pools.* The costs of a service organization which provides automobiles to user grantee agencies at a mileage or fixed rate and/or provides vehicle maintenance, inspection and repair services are allowable.

21. *Payroll preparation.* The cost of preparing payrolls and maintaining necessary related wage records is allowable.

22. *Personnel administration.* Costs for the recruitment, examination, certification, classification, training, establishment of pay standards, and related activities for grant programs, are allowable.

23. *Printing and reproduction.* Cost for printing and reproduction services necessary for grant administration, including but not limited to forms, reports, manuals, and informational literature, are allowable. Publication costs of reports or other media relating to grant program accomplishments or results are allowable when provided for in the grant agreement.

24. *Procurement service.* The cost of procurement service, including solicitation of bids, preparation and award of contracts, and all phases of contract administration in providing goods, facilities and services for grant programs, is allowable.

25. *Taxes.* In general, taxes or payments in lieu of taxes which the grantee agency is legally required to pay are allowable.

26. *Training and education.* The cost of in-service training, customarily provided for employee development which directly or indirectly benefits grant programs is allowable. Out-of-service training involving extended periods of time is allowable only when specifically authorized by the grantor agency.

27. *Transportation.* Costs incurred for freight, cartage, express, postage, and other transportation costs relating either to goods purchased, delivered, or moved from one location to another are allowable.

28. *Travel.* Travel costs are allowable for expenses for transportation, lodging, subsistence, and related items incurred by employees who are in travel status on official business incident to a grant program. Such costs may be charged on an actual basis, on a per diem or mileage basis in lieu of actual costs incurred, or on a combination of the two, provided the method used is applied to an entire trip, and results in charges consistent with those normally allowed in like circumstances in nonfederally sponsored activities. The difference in cost between first-class air accommodations and less-than-first-class air accommodations is unallowable except when less-than-first-class air accommodations are not reasonably available.

C. COSTS ALLOWABLE WITH APPROVAL OF GRANTOR AGENCY

1. *Automatic data processing.* The cost of data processing services to grant programs is allowable. This cost may include rental of equipment or depreciation on grantee-owned equipment. The acquisition of equipment, whether by outright purchase, rental-purchase agreement or other method of purchase, is allowable only upon specific prior approval of the grantor Federal agency as provided under the selected item for capital expenditures.

2. *Building space and related facilities.* The cost of space in privately or publicly owned buildings used for the benefit of the grant program is allowable subject to the conditions stated below. The total cost of space, whether in a privately or publicly owned building, may not exceed the rental cost of comparable space and facilities in a privately owned building in the same locality. The cost of space procured for grant program usage may not be charged to the program for periods of nonoccupancy, without authorization of the grantor Federal agency.

a. *Rental cost.* The rental cost of space in a privately owned building is allowable.

b. *Maintenance and operation.* The cost of utilities, insurance, security, janitorial services, elevator service, upkeep of grounds, normal repairs, and alterations and the like, are allowable to the extent they are not otherwise included in rental or other charges for space.

c. *Rearrangements and alterations.* Cost incurred for rearrangement and alteration of facilities required specifically for the grant program or those that materially increase the value or useful life of the facilities (section C.3.) are allowable when specifically approved by the grantor agency.

d. *Depreciation and use allowances on publicly owned buildings.* These costs are allowable as provided in section B.11.

e. *Occupancy of space under rental-purchase or a lease with option-to-purchase agreement.* The cost of space procured under such arrangements is allowable when specifically approved by the Federal grantor agency.

3. *Capital expenditures.* The cost of facilities, equipment, other capital assets, and repairs which materially increase the value or useful life of capital assets is allowable when such procurement is specifically approved by the Federal grantor agency. When assets acquired with Federal grant funds are (a) sold, (b) no longer available for use in a federally sponsored program, or (c) used for purposes not authorized by the grantor agency, the Federal grantor agency's equity in the asset will be refunded in the same proportion as Federal participation in its cost. In case any assets are traded on new items, only the net cost of the newly acquired assets is allowable.

4. *Insurance and indemnification.* a. Costs of insurance required, or approved and maintained pursuant to the grant agreement, is allowable.

b. Costs of other insurance in connection with the general conduct of activities is allowable subject to the following limitations:

(1) Types and extent and cost of coverage will be in accordance with general State or local government policy and sound business practice.

(2) Costs of insurance or of contributions to any reserve covering the risk of loss of, or damage to, Federal Government property is unallowable except to the extent that the grantor agency has specifically required or approved such costs.

c. Contributions to a reserve for a self-insurance program approved by the Federal grantor agency are allowable to the extent that the type of coverage, extent of coverage, and the rates and premiums would have been allowed had insurance been purchased to cover the risks.

d. Actual losses which could have been covered by permissible insurance (through an approved self-insurance program or otherwise) are unallowable unless expressly provided for in the grant agreement. However, costs incurred because of losses not covered under nominal deductible insurance coverage provided in keeping with sound management practice, and minor losses not covered by insurance, such as spoilage, breakage and disappearance of small hand tools which occur in the ordinary course of operations, are allowable.

e. *Indemnification* includes securing the grantee against liabilities to third persons and other losses not compensated by insurance or otherwise. The Government is obligated to indemnify the grantee only to the extent expressly provided for in the grant agreement, except as provided in d above.

5. *Management studies.* The cost of management studies to improve the effectiveness and efficiency of grant management for ongoing programs is allowable except that the cost of studies performed by agencies other than the grantee department or outside consultants is allowable only when authorized by the Federal grantor agency.

6. *Preagreement costs.* Costs incurred prior to the effective date of the grant or contract, whether or not they would have been allowable thereunder if incurred after such date, are allowable when specifically provided for in the grant agreement.

7. *Professional services.* Cost of professional services rendered by individuals or organizations not a part of the grantee department is allowable subject to such prior authorization as may be required by the Federal grantor agency.

8. *Proposal costs.* Costs of preparing proposals on potential Federal Government grant agreements are allowable when specifically provided for in the grant agreement.

D. UNALLOWABLE COSTS

1. *Bad debts.* Any losses arising from uncollectible accounts and other claims, and related costs, are unallowable.

2. *Contingencies.* Contributions to a contingency reserve or any similar provision for unforeseen events are unallowable.

3. *Contributions and donations.* Unallowable.

4. *Entertainment.* Costs of amusements, social activities, and incidental costs relating thereto, such as meals, beverages, lodgings, rentals, transportation, and gratuities, are unallowable.

5. *Fines and penalties.* Costs resulting from violations of, or failure to comply with Federal, State, and local laws and regulations are unallowable.

6. *Governor's expenses.* The salaries and expenses of the office of the Governor of a State or the chief executive of a political subdivision are considered a cost of general State or local government and are unallowable.

7. *Interest and other financial costs.* Interest on borrowings (however represented), bond discounts, cost of financing and refinancing operations, and legal and professional fees paid in connection therewith, are unallowable except when authorized by Federal legislation.

8. *Legislative expenses.* Salaries and other expenses of the State legislature or similar local governmental bodies such as county supervisors, city councils, school boards, etc., whether incurred for purposes of legislation or executive direction, are unallowable.

9. *Underrecovery of costs under grant agreements.* Any excess of cost over the Federal contribution under one grant agreement is unallowable under other grant agreements.

(OMB Circular No. A–87)

APPENDIX C

PART I—PRINCIPLES FOR DETERMINING COSTS APPLICABLE TO RESEARCH AND DEVELOPMENT UNDER GRANTS AND CONTRACTS WITH EDUCATIONAL INSTITUTIONS

A. PURPOSE AND SCOPE

1. *Objectives.* This appendix provides principles for determining the costs applicable to research and development work performed by educational institutions under grants from and contracts with the Federal Government. These principles are confined to the subject of cost determination and make no attempt to identify the circumstances or dictate the extent of agency and institutional participation in the financing of a particular research or development project. The principles are designed to provide recognition of the full allocated costs of such research work under generally accepted accounting principles. No provision for profit or other increment above cost is intended.

2. *Policy guides.* The successful application of these principles requires development of mutual understanding between representatives of universities and of the Federal Government as to their scope, implementation, and interpretation. It is recognized that—

a. The arrangements for agency and institutional participation in the financing of a research and development project are properly subject to negotiation between the agency and the institution concerned in accordance with such Government-wide criteria as may be applicable.

b. Each college and university, possessing its own unique combination of staff, facilities, and experience, should be encouraged to conduct research in a manner consonant with its own academic philosophies and institutional objectives.

c. Each institution, in the fulfillment of its obligations, should employ sound management practices.

d. The application of the principles established herein should require no significant changes in the generally accepted accounting practices of colleges and universities and standards herein provided on a consistent basis. Where wide variations exist in the treatment of a given cost item among institutions, the reasonableness and equitableness of such treatments will be fully considered during the rate negotiations and audit.

3. *Application.* The Director will apply these principles and related policy guides in determining the costs incurred for such work under any type of research and development agreement. These principles should also be used as a guide in the pricing of fixed price contracts or lump sum agreements.

B. DEFINITION OF TERMS

1. *Organized research* means all research activities of an institution that are separately budgeted and accounted for.

2. *Departmental research* means research activities that are not separately budgeted and accounted for. Such research work, which includes all research activities not encompassed under the term "organized research," is regarded for purposes of this document as a part of the instructional activities of the institution.

3. *Research agreement* means any valid arrangement to perform federally sponsored research, including grants, cost-reimbursement type contracts, cost-reimbursement type subcontracts, and fixed-price contracts and subcontracts for research.

4. *Other institutional activities* means all organized activities of an institution not directly related to the instruction and research functions, such as residence halls, dining halls, student hospitals, student unions, intercollegiate athletics, bookstores, faculty housing, student apartments, guest houses, chapels, theaters, public museums, and other similar activities or auxiliary enterprises. Also included under this definition is any other category of cost treated as "unallowable," provided such category of cost identifies a function or activity to which a portion of the institution's indirect costs (as defined in section E.1.) are properly allocable.

5. *Apportionment* means the process by which the indirect costs of the institution are assigned as between (a) instruction and research, and (b) other institutional activities.

6. *Allocation* means the process by which the indirect costs apportioned to instruction and research are assigned as between (a) organized research, and (b) instruction, including departmental research.

7. *Stipulated salary support* is a fixed or a stated dollar amount of the salary of professorial or other professional staff involved in the conduct of research which a Government agency agrees in advance to reimburse an educational institution as a part of sponsored research costs.

8. *Federal agency* or sponsoring agency means the National Institute of Education.

C. BASIC CONSIDERATIONS

1. *Composition of total costs.* The cost of a research agreement is comprised of the allowable direct costs incident to its performance, plus the allocable portion of the allowable indirect costs of the institution, less applicable credits as described in section C.5.

2. *Factors affecting allowability of costs.* The tests of allowability of costs under these principles are: (a) they must be reasonable; (b) they must be allocable to research agreements under the standards and methods provided herein; (c) they must be accorded consistent treatment through application of those generally accepted accounting principles appropriate to the circumstances; and (d) they must conform to any limitations or exclusions set forth in these principles or in the research agreement as to types or amounts of cost items.

3. *Reasonable costs.* A cost may be considered reasonable if the nature of the goods or services acquired or applied, and the amount involved therefor, reflect the action that a prudent person would have taken under the circumstances prevailing at the time the decision to incur the cost was made. Major considerations involved in the determination of the reasonableness of a cost are: (a) Whether or not the cost is of a type generally recognized as necessary for the operation of the institution or the performance of the research agreement; (b) the restraints or requirements imposed by such factors as arm's-length bargaining, Federal and State laws and regulations, and research agreement terms and conditions; (c) whether or not the individuals concerned acted with due prudence in the circumstances, considering their responsibilities to the institution, its employees, its students, the Government, and the public at large; and (d) the extent to which the actions taken with respect to the incurrence of the cost are consistent with established institutional policies and practices applicable to the work of the institution generally, including Government research.

4. *Allocable costs.* a. A cost is allocable to a particular cost objective (i.e., a specific function, project, research agreement, department, or the like) if the goods or services involved are chargeable or assignable to such cost objective in accordance with relative benefits received or other equitable relationship. Subject to the foregoing, a cost is allocable to a research agreement if it is incurred solely to advance the work under the research agreement; or it benefits both the research agreement and other work of the institution in proportions that can be approximated through use of reasonable methods; or it is necessary to the overall operation of the institution and, in the light of the standards provided in this appendix is deemed to be assignable in part to organized research. Where the purchase of equipment or other capital items is specifically authorized under a research agreement, the amounts thus authorized for such purchases are allocable to the research agreement regardless of the use that may subsequently be made of the equipment or other capital items involved.

b. Any costs allocable to a particular research agreement under the standards provided in this appendix may not be shifted to other research agreements in order to meet deficiencies caused by overruns or other fund considerations, to avoid restrictions imposed by law or by terms of the research agreement, or for other reasons of convenience.

5. *Applicable credits.* a. The term applicable credits refers to those receipt or negative expenditure types of transactions which operate to offset or reduce expense items that are allocable to research agreements as direct or indirect costs. Typical examples of such transactions are: purchase discounts, rebates, or allowances; recoveries or indemnities on losses; sales of scrap or incidental services; and adjustments of overpayments or erroneous charges.

b. In some instances, the amounts received from the Federal Government to finance institutional activities or service operations should be treated as applicable credits. Specifically, the concept of netting such credit items against related expenditures should be applied by the institution in determining the rates or amounts to be charged to Government research for services rendered whenever the facilities or other resources used in providing such services have been financed directly, in whole or in part, by Federal funds. (See sections F.6., J.10.b., and J.37. for areas of potential application in the matter of direct Federal financing.)

6. *Costs incurred by State and local governments.* Costs incurred or paid by State or local governments in behalf of educational institutions for certain personnel benefit programs such as pension plans, FICA, and any other costs specifically disbursed in behalf of and in direct benefit to the institutions, are allowable costs of such institutions whether or not these costs are

V38-4 JAN 8 73 XUM

recorded in the accounting records of such institutions, subject to the following:

a. Such costs meet the requirements of sections C.1. through C.5.

b. Such costs are properly supported by cost allocation plans in accordance with Appendix B to this part.

c. Such costs are not otherwise borne directly or indirectly by the Federal Government.

D. DIRECT COSTS

1. *General.* Direct costs are those costs which can be identified specifically with a particular research project, an instructional activity or any other institutional activity or which can be directly assigned to such activities relatively easily with a high degree of accuracy.

2. *Application to research agreements.* Identifiable benefit to the research work rather than the nature of the goods and services involved is the determining factor in distinguishing direct from indirect costs of research agreements. Typical transactions chargeable to a research agreement as direct costs are the compensation of employees for performance of work under the research agreement, including related staff benefit and pension plan costs to the extent that such items are consistently treated by the educational institution as direct rather than indirect costs; the costs of materials consumed or expended in the performance of such work; and other items of expense incurred for the research agreement, including extraordinary utility consumption. The cost of materials supplied from stock or services rendered by specialized facilities or other institutional service operations may be included as direct costs of research agreements provided such items are consistently treated by the institution as direct rather than indirect costs and are charged under a recognized method of costing or pricing designed to recover only actual costs and conforming to generally accepted cost accounting practices consistently followed by the institution.

E. INDIRECT COSTS

1. *General.* Indirect costs are those that have been incurred for common or joint objectives and therefore cannot be identified specifically with a particular research project, an instructional activity or any other institutional activity. At educational institutions such costs normally are classified under the following functional categories: general administration and general expenses; research administration expenses; operation and maintenance expenses; library expenses; and departmental administration expenses.

2. *Criteria for distribution*—a. *Base period.* A base period for distribution of indirect costs is the period during which such costs are incurred and accumulated for distribution to work performed within that period. The base period normally should coincide with the fiscal year established by the institution, but in any event the base period should be so selected as to avoid inequities in the distribution of costs.

b. *Need for cost groupings.* The overall objective of the allocation and apportionment process is to distribute the indirect costs described in section F to organized research, instruction, and other activities in reasonable proportions consistent with the nature and extent of the use of the institution's resources by research personnel, academic staff, students, and other personnel or organizations. In order to achieve this objective, it may be necessary to provide for selective distribution by establishing separate groupings of cost within one or more of the functional categories of indirect costs referred to in section E.1. In general, the cost groupings established within a functional category should constitute, in each case, a pool of those items of expense that are considered to be of like character in terms of their relative contribution to (or degree of remoteness from) the particular cost objectives to which distribution is appropriate. Cost groupings should be established considering the general guides provided in c. below. Each such pool or cost grouping should then be distributed individually to the appertaining cost objectives, using the distribution base or method most appropriate in the light of the guides set out in d. below.

c. *General considerations on cost groupings.* The extent to which separate cost groupings and selective distribution would be appropriate at an institution is a matter of judgment to be determined on a case-by-case basis. Typical situations which may warrant the establishment of two or more separate cost groups (based on account classification or analysis) within a functional category include but are not limited to the following:

(1) Where certain items or categories of expense relate solely to one of the three major divisions of the institution (instruction, organized research or other institutional activities) or to any two but not the third, such expenses should be set aside as a separate cost grouping for direct assignment or selective distribution in accordance with the guides provided in b. above and d. below.

(2) Where any types of expense ordinarily treated as general administration and general expenses or departmental administration expenses are charged to research agreements as direct costs, the similar type expenses applicable to other activities of the institution must, through separate cost groupings, be excluded from the indirect costs allocable to those research agreements and included in the direct cost of other activities for cost allocation purposes.

(3) Where it is determined that certain expenses are for the support of a service unit or facility whose output is susceptible of measurement on a workload or other quantitative basis, such expenses should be set aside as a separate cost grouping for distribution on such basis to organized research and other activities at the institution or within the department.

(4) Where organized activities (including identifiable segments of organized research as well as the activities cited in section B.4.) provide their own purchasing, personnel administration, building maintenance or similar service, the distribution of general administration and general expenses or operation and maintenance expenses to such activities should be accomplished through cost groupings which include only that portion of central indirect costs (such as for overall management) which are properly allocable to such activities.

(5) Where the institution elects to treat as indirect charges the cost of the pension plan and other staff benefits, such costs should be set aside as a separate cost grouping for selective distribution to appertaining cost objectives, including organized research.

(6) The number of separate cost groupings within a functional category should be held within practical limits, after taking into consideration the materiality of the amounts involved and the degree of precision attainable through less selective methods of distribution.

d. *Selection of distribution method.* (1) Actual conditions must be taken into account in selecting the method or base to be used in distributing to applicable cost objectives the expenses assembled under each of the individual cost groupings established as indicated under b. above. Where a distribution can be made by assignment of a cost grouping directly to the area benefited, the distribution should be made in that manner. Where the expenses under a cost grouping are more general in nature, the distribution to appertaining cost objectives should be made through use of a selected base which will produce reaults that are equitable to both the Government and the institution. In general, any cost element or cost-related factor associated with the institution's work is potentially adaptable for use as a distribution base provided (a) it can readily be expressed in terms of dollars or other quantitative measure (total direct expenditures, direct salaries, manhours applied, square feet utilized, hours of usage, number of documents processed, population served, and the like); and (b) it is common to the appertaining cost objectives during the base period.

(2) Results of cost analysis studies may be used when they result in more accurate and equitable distribution of costs. Such cost analysis studies may take into consideration weighting factors, population, or space occupied if they produce equitable results. Cost analysis studies, however, should (a) be appropriately documented in sufficient detail for subsequent review by the cognizant Federal agency, (b) distribute the indirect costs to the appertaining cost objectives in accord with the relative benefits derived, (c) be conducted to fairly reflect the true conditions of the activity and to cover representative transactions for a reasonable period of time, (d) be performed specifically at the institution at which the results are to be used, and (e) be updated periodically and used consistently. Any assumptions made in the study will be sufficiently supported. The use of cost analysis studies and periodic changes in the method of cost distribution must be fully justified.

(3) The essential consideration in selection of the distribution base in each instance is that it be the one best suited for assigning the pool of costs to appertaining cost objectives in accord with the relative benefits derived; the traceable cause and effect relationship; or logic and reason, where neither benefit nor cause and effect relationship is determinable.

3. *Administration of limitations on allowances for research costs.* Research agreements may be subject to statutory or administrative policies that limit the allowance of research costs. When the maximum amount allowable under a statutory limitation or the terms of a research agreement is less than the amount otherwise reimbursable under this Circular, the amount not recoverable under that research agreement may not be charged to other research agreements.

F. IDENTIFICATION AND ASSIGNMENT OF INDIRECT COSTS

1. *General administration and general expenses.* a. The expenses under this heading are those that have been incurred for the general executive and administrative offices of educational institutions and other expenses of a general character which do not relate solely to any major division of the institution; i.e., solely to (1) instruction, (2) organized research, or (3) other institutional activities. The general administration and general expense category should also include the staff benefit and pension plan costs applicable to the salaries and wages included therein, an appropriate share of the costs of the operation and maintenance of the physical plant, and charges representing use allowances and/or depreciation applicable to the buildings and equipment utilized in performing the functions represented thereunder.

b. The expenses included in this category may be apportioned and allocated on the basis of total expenditures exclusive of capital expenditures in situations where the results of the distribution made on this basis

are deemed to be equitable both to the Government and the institution; otherwise the distribution of general administration and general expenses should be made through use of selected bases applied to separate cost groupings established within this category of expenses in accordance with the guides set out in section E.2.d.

2. *Research administration expenses.* a. The expenses under this heading are those that have been incurred by a separate organization or identifiable administrative unit established solely to administer the research activity, including such functions as contract administration, security, purchasing, personnel administration, and editing and publishing of research reports. They include the salaries and expenses of the head of such research organization, his assistants, and their immediate secretarial staff together with the salaries and expenses of personnel engaged in supporting activities maintained by the research organization, such as stock rooms, stenographic pools, and the like. The salaries of members of the professional staff whose appointments or assignments involve the performance of such administrative work may also be included to the extent that the portion so charged to research administration is supported as required by section J.7. The research administration expense category should also include the staff benefit and pension plan costs applicable to the salaries and wages included therein, an appropriate share of the costs of the operation and maintenance of the physical plant, and charges representing use allowance and/or depreciation applicable to the buildings and equipment utilized in performing the functions represented thereunder.

b. The expenses included in this category should be allocated to organized research and, where necessary, to departmental research or to any other benefiting activities on any basis reflecting the proportion fairly applicable to each. (See section E.2.d.)

3. *Operation and maintenance expenses.* a. The expenses under this heading are those that have been incurred by a central service organization or at the departmental level for the administration, supervision, operation, maintenance, preservation, and protection of the institution's physical plant. They include expenses normally incurred for such items as janitorial and utility services; repairs and ordinary or normal alterations of buildings, furniture and equipment; and care of grounds and maintenance and operation of buildings and other plant facilities. The operation and maintenance expense category should also include the staff benefit and pension plan costs applicable to the salaries and wages included therein, and charges representing use allowance and/or depreciation applicable to the buildings and equipment utilized in performing the functions represented thereunder.

b. The expenses included in this category should be apportioned and allocated to applicable cost objectives in a manner consistent with the guides provided in section E.2, on a basis that gives primary emphasis to space utilization. The allocations and apportionments should be developed as follows: (1) Where actual space and related cost records are available or can readily be developed and maintained without significant change in the accounting practices, the amount distributed should be based on such records; (2) where the space and related cost records maintained are not sufficient for purposes of the foregoing, a reasonable estimate of the proportion of total space assigned to the various cost objectives normally will suffice as a means for effecting distribution of the amounts of operation and maintenance expenses involved; or (3) where it can be demonstrated that an area or volume of space basis of allocation is impractical or inequitable, other bases may be used provided consideration is given to the use of facilities by research personnel and others, including students.

4. *Library expenses.* a. The expenses under this heading are those that have been incurred for the operation of the library, including the costs of books and library materials purchased for the library, less any items of library income that qualify as applicable credits under section C.5. The library expense category should also include the staff benefit and pension plan costs applicable to the salaries and wages included therein, an appropriate share of the costs of the operation and maintenance of the physical plant, and charges representing use allowances and/or depreciation applicable to the buildings and equipment utilized in the performance of the functions represented thereunder. Costs incurred in the purchases of rare books (museum-type books) with no research value should not be allocated to Government-sponsored research.

b. The expenses included in this category should be allocated on the basis of population including students and other users. Where the results of the distribution made on this basis are deemed to be inequitable to the Government or the institution, the distribution should then be made on a selective basis in accordance with the guides set out in section E.2. Such selective distribution should be made through use of reasonable methods which give adequate recognition to the utilization of the library attributable to faculty, research personnel, students and others. The method used will be based on data developed periodically on the respective institution's experience for representative periods.

5. *Departmental administration expenses.* a. The expenses under this heading are those that have been incurred in academic deans' offices, academic departments and organized research units such as institutes, study centers and research centers for administrative and supporting services which benefit common or joint departmental activities or objectives. They include the salaries and expenses of deans or heads, or associate deans or heads, of colleges, schools, departments, divisions, or organized research units, and their administrative staffs together with the salaries and expenses of personnel engaged in supporting activities maintained by the department, such as stockrooms, stenographic pools, and the like provided such supporting services cannot be directly identified with a specific research project, with an instructional activity or with any other institutional activity. The salaries of other members of the professional staff whose appointments or assignments involve the performance of such administrative work may also be included to the extent that the portion so charged to departmental administration expenses is supported as required by section J.7. The departmental administration expense category should also include the staff benefit and pension plan costs applicable to the salaries and wages included therein, an appropriate share of the costs of the operation and maintenance of the physical plant, and charges representing use allowances and/or depreciation applicable to the buildings and equipment utilized in performing the functions represented thereunder.

b. The distribution of departmental administration expenses should be made through use of selected bases applied to cost groupings established within this category of expenses in accordance with the guides set out in section E.2.d.

6. *Setoff for indirect expenses otherwise provided for by the Government.* a. The items to be accumulated under this heading are the reimbursements and other receipts from the Federal Government which are used by the institution to support directly, in whole or in part, any of the administrative or service (indirect) activities described in the foregoing (sections F.1. through F.5.). They include any amounts thus applied to such activities which may have been received pursuant to an institutional base grant or any similar contractual arrangement with the Federal Government other than a research agreement as herein defined (section B.3).

b. The sum of the items in this group shall be treated as a credit to the total indirect cost pool before it is apportioned to organized research and to other activities. Such setoff shall be made prior to the determination of the indirect cost rate or rates as provided in section G.

G. DETERMINATION AND APPLICATION OF INDIRECT COST RATE OR RATES

1. *Indirect cost pools.* a. Subject to b. below, indirect costs allocated to organized research should be treated as a common pool, and the costs in such common pool should then be distributed to individual research agreements benefiting therefrom on a single rate basis.

b. In some instances a single rate basis for use across the board on all Government research at an institution may not be appropriate, since it would not take into account those different environmental factors which may affect substantially the indirect costs applicable to a particular segment of Government research at the institution. For this purpose, a particular segment of Government research may be that performed under a single research agreement or it may consist of research under a group of research agreements performed in a common environment. The environmental factors are not limited to the physical location of the work. Other important factors are the level of the administrative support required, the nature of the facilities or other resources employed, the scientific disciplines or technical skills involved, the organizational arrangements used, or any combination thereof. Where a particular segment of Government research is performed within an environment which appears to generate a significantly different level of indirect costs, provision should be made for a separate indirect cost pool applicable to such work. The separate indirect cost pool should be developed during the course of the regular distribution process, and the separate indirect cost rate resulting therefrom should be utilized provided it is determined that (1) such indirect cost rate differs significantly from that which would have obtained under a. above, and (2) the volume of research work to which such rate would apply is material in relation to other Government research at the institution.

2. *The distribution base.* Indirect costs allocated to organized research should be distributed to applicable research agreements on the basis of direct salaries and wages. For this purpose, an indirect cost rate should be determined for each of the separate indirect cost pools developed pursuant to section G.1. The rate in each case should be stated as the percentage which the amount of the particular indirect cost pool is of the total direct salaries and wages of all research agreements identified with such pool. For the purpose of establishing an indirect cost rate, direct salaries and wages may include that portion contributed to the research by the institution for cost sharing or other purposes. Bases other than salaries and wages may be used provided it can be demonstrated that they produce more equitable results.

3. *Negotiated lump sum for indirect costs.* A negotiated fixed amount in lieu of indirect costs may be appropriate for self-contained, off-campus, or primarily subcontracted re-

V 38 - 4 JAN 8 73 XUM

search activities where the benefits derived from an institution's indirect services cannot be readily determined. Such amount negotiated in lieu of indirect costs will be treated as an offset to total indirect expenses before apportionment to instruction, organized research, and other institutional activities. The base on which such remaining expenses are allocated should be appropriately adjusted.

4. *Predetermined fixed rates for indirect costs.* Public Law 87–638 (76 Stat. 437) authorizes the use of predetermined fixed rates in determining the indirect costs applicable under research agreements with educational institutions. The stated objectives of the law are to simplify the administration of cost-type research and development contracts (including grants) with educational institutions, to facilitate the preparation of their budgets, and to permit more expeditious closeout of such contracts when the work is completed. In view of the potential advantages offered by this procedure, consideration should be given to the negotiation of predetermined fixed rates for indirect costs in those situations where the cost experience and other pertinent facts available are deemed sufficient to enable the parties involved to reach an informed judgment as to the probable level of indirect costs during the ensuing accounting period.

5. *Negotiated fixed rates and carryforward provisions.* When a fixed rate is negotiated in advance for a fiscal year (or other time period), the over- or under-recovery for that year may be included as an adjustment to the indirect cost for the next rate negotiation. When the rate is negotiated before the carryforward adjustment is determined due to the delay in audit, the carryforward may be applied to the next subsequent rate negotiation. When such adjustments are to be made, each fixed rate negotiated in advance for a given period will be computed by applying the expected indirect costs allocable to Government research for the forecast period plus or minus the carryforward adjustment (over- or under-recovery) from the prior period, to the forecast distribution base. Unrecovered amounts under lump-sum agreements or cost-sharing provisions of prior years shall not be carried forward for consideration in the new rate negotiation. There must, however, be an advance understanding in each case between the institution and the cognizant Federal agency as to whether these differences will be considered in the rate negotiation rather than making the determination after the differences are known. Further, institutions electing to use this carryforward provision may not subsequently change without prior approval of the cognizant Federal agency. In the event that an institution returns to a postdetermined rate, any over- or under-recovery during the period in which negotiated fixed rates and carryforward provisions were followed will be included in the subsequent postdetermined rates. Where multiple rates are used, the same procedure will be applicable for determining each rate. This procedure also applies to rates established for grants and contracts for training and other educational services, but does not apply to cost-type research agreements covering work performed in wholly or partially Government-owned facilities.

H. SIMPLIFIED METHOD FOR SMALL INSTITUTIONS

1. *General.* a. Where the total direct cost of all federally supported work under research and educational service agreements at an institution does not exceed $1 million in a fiscal year (excluding direct payments by the institution to participants under educational service agreements for stipends, support, and similar costs requiring little, if any, indirect cost support), the use of the abbreviated procedure described in 2., below, may be used in determining allowable indirect costs. Under this abbreviated procedure, the institution's most recent annual financial report and immediately available supporting information, with salaries and wages segregated from other costs, will be utilized as a basis for determining the indirect cost rate applicable both to federally supported research and educational service agreements.

b. The rigid formula approach provided under this abbreviated procedure should not be used where it produces results which appear inequitable to the Government or the institution. In any such case, indirect costs should be determined through use of the regular procedure.

2. *Abbreviated procedure.* a. Establish the total amount of salaries and wages paid to all employees of the institution.

b. Establish an indirect cost pool consisting of the expenditures (exclusive of capital items and other costs specifically identified as unallowable) which customarily are classified under the following titles or their equivalents:

(1) General administration and general expenses (exclusive of costs of student administration and services, student aid, student activities, and scholarships).

(2) Operation and maintenance of physical plant.

(3) Library.

(4) Department administration expenses, which will be computed as 20 percent of the salaries and expenses of deans and heads of departments.

In those cases where expenditures classified under 2.b.(1) and 2.b.(2) have previously been allocated to other institutional activities, they may be included in the indirect cost pool. The total amount of salaries and wages included in the indirect cost pool must be separately identified.

c. Establish a salary and wage distribution base, determined by deducting from the total of salaries and wages as established under 2.a. the amount of salaries and wages included under 2.b.

d. Establish the indirect cost rate, determined by dividing the amount in the indirect cost pool 2.b. by the amount of the distribution base 2.c.

e. Apply the indirect cost rate established to direct salaries and wages for individual agreements to determine the amount of indirect costs allocable to such agreements.

J. GENERAL STANDARDS FOR SELECTED ITEMS OF COST

Sections J.1. through J.46. provide standards to be applied in establishing the allowability of certain items involved in determining cost. These standards should apply irrespective of whether a particular item of cost is properly treated as direct cost or indirect cost. Failure to mention a particular item of cost in the standards is not intended to imply that it is either allowable or unallowable; rather determination as to allowability in each case should be based on the treatment or standards provided for similar or related items of cost. In case of discrepancy between the provisions of a specific research agreement and the applicable standards provided, the provisions of the research agreement should govern.

1. *Advertising costs.* The term advertising costs means the costs of advertising media and corollary administrative costs. Advertising media include magazines, newspapers, radio and television programs, direct mail, exhibits, and the like. The only advertising costs allowable are those which are solely for: (a) The recruitment of personnel required for the performance by the institution of obligations arising under the research agreement, when considered in conjunction with all other recruitment costs, as set forth in J.32.; (b) the procurement of scarce items for the performance of the research agreement; or (c) the disposal of scrap or surplus materials acquired in the performance of the research agreement. Costs of this nature, if incurred for more than one research agreement or for both research agreement work and other work of the institution, are allowable to the extent that the principles in sections D and E are observed.

2. *Bad debts.* Any losses, whether actual or estimated arising from uncollectible accounts and other claims, related collections costs, and related legal costs, are unallowable.

3. *Capital expenditures.* The costs of equipment, buildings, and repairs which materially increase the value or useful life of buildings or equipment, are unallowable except as provided for in the research agreement. Government funds shall not be used for the acquisition of land, or any interest therein, except with the specific prior approval of the sponsoring agency.

4. *Civil defense costs.* Civil defense costs are those incurred in planning for, and the protection of life and property against, the possible effects of enemy attack. Reasonable costs of civil defense measures (including costs in excess of normal plant protection costs, first-aid training and supplies, firefighting training, posting of additional exit notices and directions, and other approved civil defense measures) undertaken on the institution's premises pursuant to suggestions or requirements of civil defense authorities are allowable when distributed to all activities of the institution. Capital expenditures for civil defense purposes will not be allowed, but a use allowance or depreciation may be permitted in accordance with provisions set forth in section J.10. Costs of local civil defense projects not on the institution's premises are unallowable.

5. *Commencement and convocation costs.* Costs incurred for commencements and convocations apply only to instruction and therefore are not allocable to research agreements, either as direct costs or indirect costs.

6. *Communication costs.* Costs incurred for telephone services, local and long-distance telephone calls, telegrams, radiograms, postage and the like, are allowable.

7. *Compensation for personal services*—a. *General.* Compensation for personal services covers all remuneration paid currently or accrued to the institution for services of employees rendered during the period of performance under Government research agreements. Such remuneration includes salaries, wages, staff benefits (see section J.39.), and pension plan costs (see section J.23.). The costs of such remuneration are allowable to the extent that the total compensation to individual employees is reasonable for the services rendered and conforms to the established policy of the institution consistently applied, and provided that the charges for work performed directly on Government research agreements and for other work allocable as indirect costs to organized research are determined and supported as hereinafter provided.

b. *Payroll distribution.* Amounts charged to organized research for personal services, except stipulated salary support, regardless of whether treated as direct costs or allocated as indirect costs, will be based on institutional payrolls which have been approved and documented in accordance with generally accepted institutional practices. Support for direct and indirect allocations of personal service costs to (1) instruction, (2) organized research, and (3) indirect activities as defined in section E.1., or (4) other institutional activities as defined in section

B.4., will be provided as described in c., d., e., and f., below.

c. *Stipulated salary support.* As an alternative to payroll distribution, stipulated salary support amounts may be provided in the research agreement for professorial staff, any part of whose compensation is chargeable to Government-sponsored research. Stipulated salary support may also be provided for any other professionals who are engaged part time in sponsored research and part time in other work. The stipulated salary support for an individual will be determined by the Government and the educational institution during the proposal and award process on the basis of considered judgment as to the monetary value of the contribution which the individual is expected to make to the research project. This judgment will take into account any cost sharing by the institution and such other factors as the extent of the investigator's planned participation in the project and his ability to perform as planned in the light of his other commitments. It will be necessary for those who review research proposals to obtain information on the total academic year salary of the faculty members involved; the other research projects or proposals for which salary is allocated; and any other duties they may have such as teaching assignments, administrative assignments, number of graduate students for which they are responsible, or other institutional activities. Stipulated amounts for an individual must not per se result in increasing his official salary from the institution.

d. *Direct charges for personal services under payroll distribution.* The direct cost charged to organized research for the personal services of professorial and professional staff, exclusive of those whose salaries are stipulated in the research agreement, will be based on institutional payroll systems. Such institutional payroll systems must be supported by either: (1) An adequate appointment and workload distribution system accompanied by monthly reviews performed by responsible officials and a reporting of any significant changes in workload distribution of each professor or professional staff member, or (2) a monthly after-the-fact certification system which will require the individual investigators, deans, departmental chairmen or supervisors having first-hand knowledge of the services performed on each research agreement to report the distribution of effort. Reported changes will be incorporated during the accounting period into the payroll distribution system and into the accounting records. Direct charges for salaries and wages of nonprofessionals will be supported by time and attendance and payroll distribution records.

e. *Direct charges for personal services under stipulated salaries.* The amounts stipulated for salary support will be treated as direct costs. The stipulated salary for the academic year will be prorated equally over the duration of the grant or contract period during the academic year, unless other arrangements have been made in the grant or contract instrument. No time or effort reporting will be required to support these amounts. Special provision for summer salaries, or for a particular "off period" if other than summer, will be required. The research agreements will state that any research covered by summer salary support must be carried out during the summer, not during the academic year, and at locations approved in advance in writing by the granting agency. The certification required in section K will attest to this requirement as well as all others in a given research agreement. Stipulated salary support remains fixed during the funding period of the grant or contract and will be costed at the rate described above unless there is a significant change in performance. For example, a significant change in performance would exist if the faculty member (1) was ill for an extended period, (2) took sabbatical leave to devote effort to duties unrelated to his research, or (3) was required to increase substantially his teaching assignments, administrative duties, or responsibility for more research projects. In the latter event, it will be the responsibility of the educational institution to reduce the charges to the research agreement proportionately or seek an appropriate amendment. In the case of those covered by stipulated salary support, the auditors are no longer required to review the precise accuracy of time or effort devoted to research projects. Rather, their reviews should include steps to determine on a sample basis that an institution is not reimbursed for more than 100 percent of each faculty member's salary and that the portion of each faculty member's salary charged to Government-sponsored research is reasonable in view of his university workload and other commitments. The stipulated salary method may also be agreed upon for that portion of a professional's salary that represents cost sharing by the institution.

f. *Indirect personal services costs.* Allowable indirect personal services costs will be supported by the educational institution's accounting system maintained in accordance with generally accepted institutional practices. Where a comprehensive accounting system does not exist, the institution should make periodic surveys no less frequently than annually to support the indirect personal services costs for inclusion in the overhead pool. Such supporting documentation must be retained for subsequent review by Government officials.

g. *General guidance for charging personal services.* Budget estimates on a monthly, quarterly, semester, or yearly basis do not qualify as support for charges to federally sponsored research projects and should not be used unless confirmed after the fact. Charges to research agreements may include reasonable amounts for activities contributing and intimately related to work under the agreement, such as preparing and delivering special lectures about specific aspects of the ongoing research, writing research reports and articles, participating in appropriate research seminars, consulting with colleagues and graduate students with respect to related research, and attending appropriate scientific meetings and conferences. In no case should charges be made to federally sponsored research projects for lecturing or preparing for formal courses listed in the catalog and offered for degree credit, or for committee or administrative work related to university business.

h. *Nonuniversity professional activities.* A university must not alter or waive university-wide policies and practices dealing with the permissible extent of professional services over and above those traditionally performed without extra university compensation, unless such arrangements are specifically authorized by the sponsoring agency. Where university-wide policies do not adequately define the permissible extent of consultantship or other nonuniversity activities undertaken for extra pay, the Government may require that the effort of professional staff working under research agreements be allocated as between (1) university activities, and (2) nonuniversity professional activities. If the sponsoring agency should consider the extent of nonuniversity professional effort excessive, appropriate arrangements governing compensation will be negotiated on a case-by-case basis.

i. *Salary rates for academic year.* Charges for work performed on Government research by faculty members during the academic year will be based on the individual faculty member's regular compensation for the continuous period which, under the practice of the institution concerned, constitutes the basis of his salary. Charges for work performed on research agreements during all or any portion of such period would be allowable at the base salary rate. In no event will the charge to research agreements, irrespective of the basis of computation, exceed the proportionate share of the base salary for that period, and any extra compensation above the base salary for work on Government research during such period would be unallowable. This principle applies to all members of the faculty at an institution. Since intrauniversity consulting is assumed to be undertaken as a university obligation requiring no compensation in addition to full-time base salary, the principle also applies to those who function as consultants or otherwise contribute to a research agreement conducted by another faculty member of the same institution. However, in unusual cases where consultation is across departmental lines or involves a separate or remote operation, and the work performed by the consultant is in addition to his regular departmental load, any charges for such work representing extra compensation above the base salary are allowable provided such consulting arrangement is specifically provided for in the research agreement or approved in writing by the sponsoring agency.

j. *Salary rates for periods outside the academic year.* Charges for work performed by faculty members on Government research during the summer months or other periods not included in the base salary period will be determined for each faculty member at a monthly rate not in excess of that which would be applicable under his base salary and will be limited to charges made in accordance with other subsections of J.7.

k. *Salary rates for part-time faculty.* Charges for work performed on Government research by faculty members having only part-time appointments for teaching will be determined at a rate not in excess of that for which he is regularly paid for his part-time teaching assignments. Example: An institution pays $5,000 to a faculty member for half-time teaching during the academic year. He devoted one-half of his remaining time (25 percent of his total available time) to Government research. Thus his additional compensation, chargeable by the institution to Government research agreements, would be one-half of $5,000 or $2,500.

8. *Contingency provisions.* Contributions to a contingency reserve or any similar provision made for events the occurrence of which cannot be foretold with certainty as to time, intensity, or with an assurance of their happening, are unallowable.

9. *Deans of faculty and graduate schools.* The salaries and expenses of deans of faculty and graduate schools, or their equivalents, and their staffs, are allowable.

10. *Depreciation and use allowances.* a. Institutions may be compensated for the use of buildings, capital improvements, and usable equipment on hand through use allowances or depreciation. Use allowances are the means of providing such compensation when depreciation or other equivalent costs are not considered. However, a combination of the two methods may not be used in connection with a single class of fixed assets.

b. Due consideration will be given to Government-furnished facilities utilized by the institution when computing use allowances and/or depreciation if the Government-furnished facilities are material in amount. Computation of the use allowance and/or depreciation will exclude both the cost or any portion of the cost of buildings and equipment borne by or donated by the Federal Government, irrespective of where title was originally vested or where

V 38-4 JAN 8 73 XUM

it presently resides and, secondly, the cost of grounds. Capital expenditures for land improvements (paved areas, fences, streets, sidewalks, utility conduits, and similar improvements not already included in the cost of buildings) are allowable provided the systematic amortization of such capital expenditures has been provided, based on reasonable determinations of the probable useful lives of the individual items involved, and the share allocated to organized research is developed from the amount thus amortized for the base period involved. Amortization methods once used should not be changed for a given building or equipment unless approved in advance by the cognizant Federal agency.

c. Where the use allowance method is followed, the use allowance for buildings and improvements will be computed at an annual rate not exceeding 6⅔ percent of acquisition cost. The use allowance for equipment will be computed at an annual rate not exceeding 6⅔ percent of acquisition cost of usable and needed equipment in those cases where the institution maintains current records with respect to such equipment on hand. Where the institution's records reflect only the cost (actual or estimated) of the original complement of equipment, the use allowance will be computed at an annual rate not exceeding 10 percent of such cost. Original complement for this purpose means the complement of equipment initially placed in buildings to perform the functions currently being performed in such buildings; however, where a permanent change in the function of a building takes place, a redetermination of the original complement of equipment may be made at that time to establish a new original complement. In those cases where no equipment records are maintained, the institution will justify a reasonable estimate of the acquisition cost of usable and needed equipment which may be used to compute the use allowance at an annual rate not exceeding 6⅔ percent of such estimate.

d. Where the depreciation method is followed, adequate property record must be maintained and periodic inventory (a statistical sampling basis is acceptable) must be taken to insure that properties for which depreciation is charged do exist and are needed. The period of useful service (service life) established in each case for usable capital assets must be determined on a realistic basis which takes into consideration such factors as type of construction, nature of the equipment used, technological developments in the particular research area, and the renewal and replacement policies followed for the individual items or classes of assets involved. Where the depreciation method is introduced for application to assets acquired in prior years, the annual charges therefrom must not exceed the amounts that would have resulted had the depreciation method been in effect from the date of acquisition of such assets.

e. Where an institution elects to go on a depreciation basis for a particular class of assets, no depreciation, rental or use charge may be allowed on any such assets that, under d. above, would be viewed as fully depreciated provided, however, that reasonable use charges may be negotiated for any such assets if warranted after taking into consideration the cost of the facility or item involved, the estimated useful life remaining at time of negotiation, the actual replacement policy followed in the light of service lives used for calculating depreciation, the effect of any increased maintenance charges or decreased efficiency due to age, and any other factors pertinent to the utilization of the facility or item for the purpose contemplated.

11. *Employee morale, health, and welfare costs and credits.* The costs of house publications, health or first-aid clinics and/or infirmaries, recreational activities, employees' counseling services, and other expenses incurred in accordance with the institution's established practice or custom for the improvement of working conditions, employer-employee relations, employee morale, and employer-performance, are allowable. Such costs will be equitably apportioned to all activities of the institution. Income generated from any of these activities will be credited to the cost thereof unless such income has been irrevocably set over to employee welfare organizations.

12. *Entertainment costs.* Costs incurred for amusement, social activities, entertainment, and any items relating thereto, such as meals, lodging, rentals, transportation, and gratuities, are unallowable.

13. *Equipment and other facilities.* The cost of permanent equipment or other facilities are allowable where such purchases are approved by the sponsoring agency concerned or provided for by the terms of the research agreement. Total expenditures for permanent equipment may not exceed 125 percent of the amount allotted for the permanent equipment category by the sponsoring agency (through an approved budget or other document) except with approval. The term of property which has an acquisition cost of $200 or more and has an expected service life of one year or more.

a. *General purpose equipment.* Approval must be obtained to acquire with Government funds any general purpose permanent equipment, i.e., any items which are usable for activities of the institution other than research, such as office equipment and furnishings, air conditioning, reproduction, or printing equipment, motor vehicles, etc., or any automatic data processing equipment.

b. *Research equipment.* Approval must be obtained to acquire with Government funds any item of permanent research equipment costing $1,000 or more.

14. *Fines and penalties.* Costs resulting from violations of, or failure of the institution to comply with, Federal, State, and local laws and regulations are unallowable except when incurred as a result of compliance with specific provisions of the research agreement, or instructions in writing from the contracting officer.

15. *Insurance and indemnification.* a. Costs of insurance required or approved, and maintained, pursuant to the research agreement, are allowable.

b. Costs of other insurance maintained by the institution in connection with the general conduct of its activities, are allowable subject to the following limitations: (1) types and extent and cost of coverage must be in accordance with sound institutional practice; (2) costs of insurance or of any contributions to any reserve covering the risk of loss of or damage to Government-owned property are unallowable except to the extent that the Government has specifically required or approved such costs; and (3) costs of insurance on the lives of officers or trustees are unallowable except where such insurance is part of an employee plan which is not unduly restricted.

c. Contributions to a reserve for an approved self-insurance program are allowable to the extent that the types of coverage, extent of coverage, and the rates and premiums would have been allowed had insurance been purchased to cover the risks.

d. Actual losses which could have been covered by permissible insurance (through an approved self-insurance program or otherwise) are unallowable unless expressly provided for in the research agreement, except that costs incurred because of losses not covered under existing deductible clauses for insurance coverage provided in keeping with sound management practice as well as minor losses not covered by insurance, such as spoilage, breakage, and disappearance of small hand tools, which occur in the ordinary course of operations, are allowable.

e. Indemnification includes securing the institution against liabilities to third persons and other losses not compensated by insurance or otherwise. The Government is obligated to indemnify the institution only to the extent expressly provided for in the research agreement, except as provided in d. above.

16. *Interest, fund raising, and investment management costs.* a. Costs incurred for interest on borrowed capital or temporary use of endowment funds, however represented, are unallowable.

b. Costs of organized fund raising, including financial campaigns, endowment drives, solicitation of gifts and bequests, and similar expenses incurred solely to raise capital or obtain contributions, are not allowable under Government research agreements.

c. Costs of investment counsel and staff and similar expenses incurred solely to enhance income from investments are not allowable under Government research agreements.

d. Costs related to the physical custody and control of monies and securities are allowable.

17. *Labor relations costs.* Costs incurred in maintaining satisfactory relations between the institution and its employees, including costs of labor management committees, employees' publications, and other related activities, are allowable.

18. *Losses on other research agreements or contracts.* Any excess of costs over income under any other research agreement or contract of any nature is unallowable. This includes, but is not limited to, the institution's contributed portion by reason of cost-sharing agreements or any under-recoveries through negotiation of flat amounts for indirect costs.

19. *Maintenance and repair costs.* Costs incurred for necessary maintenance, repair, or upkeep of property (including Government property unless otherwise provided for) which neither add to the permanent value of the property nor appreciably prolong its intended life but keep it in an efficient operating condition, are allowable.

20. *Material costs.* Costs incurred for purchased materials, supplies, and fabricated parts directly or indirectly related to the research agreement, are allowable. Purchases made specifically for the research agreement should be charged thereto at their actual prices after deducting all cash discounts, trade discounts, rebates, and allowances received by the institution. Withdrawals from general stores or stockrooms should be charged at their cost under any recognized method of pricing stores withdrawals conforming to sound accounting practices consistently followed by the institution. Incoming transportation charges are a proper part of material cost. Direct material cost should include only the materials and supplies actually used for the performance of the research agreement, and due credit should be given for any excess materials retained, or returned to vendors. Due credit should be given for all proceeds or value received for any scrap resulting from work under the research agreement. Where Government-donated or furnished material is used in performing the research agreement, such material will be used without charge.

21. *Memberships, subscriptions, and professional activity costs.* a. Costs of the institution's membership in civic, business, technical, and professional organizations are allowable.

b. Costs of the institution's subscriptions to civic, business, professional, and technical periodicals are allowable.

c. Costs of meetings and conferences, when the primary purpose is the dissemination of technical information, are allowable. This includes costs of meals, transportation, rental of facilities, and other items incidental to such meetings or conferences.

22. *Patent costs.* Cost of preparing disclosures, reports, and other documents required by the research agreement and of searching the art to the extent necessary to make such invention disclosures, are allowable. In accordance with the clauses of the research agreement relating to patents, costs of preparing documents and any other patent costs, in connection with the filing of a patent application where title is conveyed to the Government, are allowable. (See also section J.33.)

23. *Pension plan costs.* Costs of the institution's pension plan which are incurred in accordance with the established policies of the institution are allowable, provided such policies meet the test of reasonableness and the methods of cost allocation are not discriminatory, and provided appropriate adjustments are made for credits or gains arising out of normal and abnormal employee turnover or any other contingencies that can result in forfeitures by employees which inure to the benefit of the institution.

24. *Plant security costs.* Necessary expenses incurred to comply with Government security requirements, including wages, uniforms, and equipment of personnel engaged in plant protection, are allowable.

25. *Preresearch agreement costs.* Costs incurred prior to the effective date of the research agreement, whether or not they would have been allowable thereunder if incurred after such date, are unallowable unless specifically set forth and identified in the research agreement.

26. *Professional services costs.* a. Costs of professional services rendered by the members of a particular profession who are not employees of the institution are allowable subject to b. and c. below, when reasonable in relation to the services rendered and when not contingent upon recovery of the costs from the Government. Retainer fees to be allowable must be reasonably supported by evidence of services rendered.

b. Factors to be considered in determining the allowability of costs in a particular case include (1) the past pattern of such costs, particularly in the years prior to the award of Government research agreements; (2) the impact of Government research agreements on the institution's total activity; (3) the nature and scope of managerial services expected of the institution's own organizations; and (4) whether the proportion of Government work to the institution's total activity is such as to influence the institution in favor of incurring the cost, particularly where the services rendered are not of a continuing nature and have little relationship to work under Government research agreements.

c. Costs of legal, accounting, and consulting services, and related costs, incurred in connection with organization and reorganization or the prosecution of claims against the Government, are unallowable. Costs of legal, accounting and consulting services, and related costs, incurred in connection with patent infrigement litigation, are unallowable unless otherwise provided for in the research agreement.

27. *Profits and losses on disposition of plant, equipment, or other capital assets.* Profits or losses of any nature arising from the sale or exchange of plant, equipment, or other capital assets, including sale or exchange of either short or long term investments, shall not be considered in computing research agreement costs.

28. *Proposal costs.* Proposal costs are the costs of preparing bids or proposals on potential Government and nongovernment research agreements or projects, including the development of engineering data and cost data necessary to support the institution's bids or proposals. Proposal costs of the current accounting period of both successful and unsuccessful bids and proposals normally should be treated as indirect costs and allocated currently to all activities of the institution, and no proposal costs of past accounting periods will be allocable in the current period to the Government research agreement. However, the institution's established practices may be to treat proposal costs by some other recognized method. Regardless of the method used, the results obtained may be accepted only if found to be reasonable and equitable.

29. *Public information services costs.* Costs of news releases pertaining to specific research or scientific accomplishment are unallowable unless specifically authorized by the sponsoring agency.

30. *Rearrangement and alteration costs.* Costs incurred for ordinary or normal rearrangement and alteration of facilities are allowable. Special arrangement and alteration costs incurred specifically for the project are allowable when such work has been approved in advance by the sponsoring agency concerned.

31. *Reconversion costs.* Costs incurred in the restoration or rehabilitation of the institution's facilities to approximately the same condition existing immediately prior to commencement of Government research agreement work, fair wear and tear excepted, are allowable.

32. *Recruiting costs.* a. Subject to b., c., and d. below, and provided that the size of the staff recruited and maintained is in keeping with workload requirements, costs of "help wanted" advertising, operating costs of an employment office necessary to secure and maintain an adequate staff, costs of operating an aptitude and educational testing program, travel costs of employees while engaged in recruiting personnel, travel costs of applicants for interviews for prospective employment, and relocation costs incurred incident to recruitment of new employees, are allowable to the extent that such costs are incurred pursuant to a well managed recruitment program. Where the institution uses employment agencies, costs not in excess of standard commercial rates for such services are allowable.

b. In publications, costs of help wanted advertising that includes color, includes advertising material for other than recruitment purposes, or is excessive in size (taking into consideration recruitment purposes for which intended and normal institutional practices in this respect), are unallowable.

c. Costs of help wanted advertising, special emoluments, fringe benefits, and salary allowances incurred to attract professional personnel from other institutions that do not meet the test of reasonableness or do not conform with the established practices of the institution, are unallowable.

d. Where relocation costs incurred incident to recruitment of a new employee have been allowed either as an allocable direct or indirect cost, and the newly hired employee resigns for reasons within his control within 12 months after hire, the institution will be required to refund or credit such relocation costs to the Government.

33. *Royalties and other costs for use of patents.* Royalties on a patent or amortization of the cost of acquiring a patent or invention or rights thereto, necessary for the proper performance of the research agreement and applicable to tasks or processes thereunder, are allowable unless the Government has a license or the right to free use of the patent, the patent has been adjudicated to be invalid or has been administratively determined to be invalid, the patent is considered to be unenforceable, or the patent has expired.

34. *Sabbatical leave costs.* Costs of leave of absence to employees for performance of graduate work or sabbatical study, travel, or research are allowable provided the institution has a uniform policy on sabbatical leave for persons engaged in instruction and persons engaged in research. Such costs will be allocated on an equitable basis among all appertaining activities of the institution. Where sabbatical leave is included in fringe benefits for which a cost is determined for assessment as a direct charge, the aggregate amount of such assessments applicable to all work of the institution during the base period must be reasonable in relation to the institution's actual experience under its sabbatical leave policy.

35. *Scholarships and student aid costs.* Costs of scholarships, fellowships and other forms of student aid apply only to instruction and therefore are not allocable to research agreements, either as direct costs or indirect costs. However, in the case of students actually engaged in work under research agreements, any tuition remissions to such students for work performed are allocable to such research agreements provided consistent treatment is accorded such costs. (See section J.39.)

36. *Severance pay.* a. Severance pay is compensation in addition to regular salaries and wages which is paid by an institution to employees whose services are being terminated. Costs of severance pay are allowable only to the extent that such payments are required by law, by employer-employee agreement, by established policy that constitutes in effect an implied agreement on the institution's part, or by circumstances of the particular employment.

b. Severance payments that are due to normal, recurring turnover and which otherwise meet the conditions of a. above may be allowed provided the actual costs of such severance payments are regarded as expenses applicable to the current fiscal year and are equitably distributed among the institution's activities during that period.

c. Severance payments that are due to abnormal or mass terminations are of such conjectural nature that allowability must be determined on a case-by-case basis. However, the Government recognizes its obligation to participate, to the extent of its fair share, in any specific payment.

37. *Specialized service facilities operated by institution.* a. The costs, including amortization by generally accepted accounting practice, of institutional services involving the use of highly complex and specialized facilities such as electronic computers, including the cost of adapting computers for use, wind tunnels, and reactors are allowable provided the charges therefor meet the conditions of b. or c. below, and otherwise take into account any items of income or Federal financing that qualify as applicable credits under section C.5.

b. The costs of such institutional services normally will be charged directly to applicable research agreements based on actual usage or occupancy of the facilities on the basis of a schedule of rates that (1) is designed to recover only aggregate costs of providing such services over a long term agreed upon in advance by the cognizant Federal agency on an individual basis, and (2) is applied on a nondiscriminatory basis as between organized research and other work of the institution, including usage by the institution for internal purposes. Commercial or accommoda-

V 38 - 4 JAN 8 73 XUM

tion sales of computer services will be charged at not less than the above rates; however, if the rates charged for these services are greater, the total amount of charges above the scheduled rates when significant may be considered in revising the schedule of rates. Further, within the constraints of this paragraph, it is not necessary that the rates charged for services be equal to the cost of providing those services during any one fiscal year.

c. In the absence of an acceptable arrangement for direct costing as provided in b. above, the costs incurred for such institutional services may be assigned to research agreements as indirect costs, provided the methods used achieve substantially the same results. Such arrangements should be worked out in coordination with the cognizant Federal agency in order to assure equitable distribution of the indirect costs.

38. *Special services costs.* Costs incurred for general public relations activities, catalogs, alumni activities, and similar services, are unallowable.

39. *Staff benefits.* a. Staff benefits in the form of regular compensation paid to employees during periods of authorized absences from the job, such as for annual leave, sick leave, military leave, and the like, are allowable provided such costs are absorbed by all institutional activities, including organized research, in proportion to the relative amount of time or effort actually devoted to each. (See section J.34. for treatment of sabbatical leave.)

b. Staff benefits in the form of employer contributions or expenses for social security, employee insurance, workmen's compensation insurance, the pension plan (see section J.23.), tuition or remission of tuition for individual employees or their families (see section J.35.), and the like, are allowable provided such benefits are granted in accordance with established institutional policies, and provided such contributions and other expenses, whether treated as indirect costs or as an increment of direct labor costs, are distributed to particular research agreements and other activities in a manner consistent with the pattern of benefits accruing to the individuals or groups of employees whose salaries and wages are chargeable to such research agreements and other activities.

40. *Student activity costs.* Costs incurred for intramural activities, student publications, student clubs, and other student activities, apply only to instruction and therefore are not allocable to research agreements, either as direct costs or indirect costs.

41. *Student services costs.* Costs of the deans of students, administration of student affairs, registrar, placement offices, student advisers, student health and infirmary services, and such other activities as are identifiable with student services apply only to instruction and therefore are not allocable to research agreements, either as direct costs or indirect costs. However, in the case of students actually engaged in work under research agreements, a proportion of student services costs measured by the relationship between hours of work by students on such research work and total student hours including all research time may be allowed as a part of research administration expenses.

42. *Taxes.* a. In general, taxes which the institution is required to pay and which are paid or accrued in accordance with generally accepted accounting principles, and payments made to local governments in lieu of taxes which are commensurate with the local government services received are allowable, except for: (1) Taxes from which exemptions are available to the institution directly or which are available to the institution based on an exemption afforded the Government and in the latter case when the sponsoring agency makes available the necessary exemption certificates, and (2) special assessments on land which represent capital improvements.

b. Any refund of taxes, interest, or penalties, and any payment to the institution of interest thereon, attributable to taxes, interest, or penalties which were allowed as research agreement costs, will be credited or paid to the Government in the manner directed by the Government provided any interest actually paid or credited to an institution incident to a refund of tax, interest and penalty will be paid or credited to the Government only to the extent that such interest accrued over the period during which the institution had been reimbursed by the Government for the taxes, interest, and penalties.

43. *Transportation costs.* Costs incurred for freight, express, cartage, postage, and other transportation services relating either to goods purchased, in process, or delivered, are allowable. When such costs can readily be identified with the items involved, they may be charged directly as transportation costs or added to the cost of such items. Where identification with the materials received cannot readily be made, inbound transportation costs may be charged to the appropriate indirect cost accounts if the institution follows a consistent, equitable procedure in this respect. Outbound freight, if reimbursable under the terms of the research agreement, should be treated as a direct cost.

44. *Travel costs.* a. Travel costs are the expenses for transportation, lodging, subsistence, and related items incurred by employees who are in travel status on official business of the institution. Such costs may be charged on an actual basis, on a per diem or mileage basis in lieu of actual costs incurred, or on a combination of the two, provided the method used is applied to an entire trip and not to selected days of the trip, and results in charges consistent with those normally allowed by the institution in its regular operations.

b. Travel costs are allowable subject to c., d., e., and f. below, when they are directly attributable to specific work under a research agreement or are incurred in the normal course of administration of the institution or a department or research program thereof.

c. The difference in cost between first-class air accommodations and less than first-class air accommodations is unallowable except when less than first-class air accommodations are not reasonably available to meet necessary mission requirements, such as where less than first-class accommodations would:
(1) Require circuitous routing, (2) require travel during unreasonable hours, (3) greatly increase the duration of the flight, (4) result in additional costs which would offset the transportation savings, or (5) offer accommodations which are not reasonably adequate for the medical needs of the traveler.

d. Costs of personnel movements of a special or mass nature are allowable only when authorized or approved in writing by the sponsoring agency or its authorized representative.

e. Foreign travel costs are allowable only when the travel has received specific prior approval. Each separate foreign trip must be specifically approved. For purposes of this provision, foreign travel is defined as "any travel outside of Canada and the United States and its territories and possessions."

f. Expenditures for domestic travel may not exceed $500, or 125 percent of the amount allotted for such travel by the sponsoring agency, whichever is greater, except with approval.

45. *Termination costs applicable to research agreements.* a. Termination of research agreements generally gives rise to the incurrence of costs or to the need for special treatment of costs, which would not have arisen had the agreement not been terminated. Items peculiar to termination are set forth below. They are to be used in conjunction with all other provisions of this Circular in the case of termination.

b. The cost of common items of material reasonably usable on the institution's other work will not be allowable unless the institution submits evidence that it could not retain such items at cost without sustaining a loss. In deciding whether such items are reasonably usable on other work of the institution, consideration should be given to the institution's plans and orders for current and scheduled work. Contemporaneous purchases of common items by the institution will be regarded as evidence that such items are reasonably usable on the institution's other work. Any acceptance of common items as allowable to the terminated portion of the agreement should be limited to the extent that the quantities of such items on hand, in transit, and on order are in excess of the reasonable quantitative requirements of other work.

c. If in a particular case, despite all reasonable efforts by the institution, certain costs cannot be discontinued immediately after the effective date of termination, such costs are generally allowable within the limitations set forth in this Circular, except that any such costs continuing after termination due to the negligent or willful failure of the institution to discontinue such costs will be considered unacceptable.

d. Loss of useful value of special tooling, and special machinery and equipment is generally allowable, provided: (1) Such special tooling, machinery, or equipment is not reasonably capable of use in the other work of the institution; (2) the interest of the Government is protected by transfer of title or by other means deemed appropriate by the contracting officer or equivalent; and (3) the loss of useful value as to any one terminated agreement is limited to that portion of the acquisition cost which bears the same ratio to the total acquisition cost as the terminated portion of the agreement bears to the entire terminated agreement and other Government agreements for which the special tooling, special machinery, or equipment was acquired.

e. Rental costs under unexpired leases are generally allowable where clearly shown to have been reasonably necessary for the performance of the terminated agreement, less the residual value of such leases, if: (1) The amount of such rental claimed does not exceed the reasonable use value of the property leased for the period of the agreement and such further period as may be reasonable; and (2) the institution makes all reasonable efforts to terminate, assign, settle, or otherwise reduce the cost of such lease. There also may be included the cost of alterations of such leased property, provided such alterations were necessary for the performance of the agreement, and of reasonable restoration required by the provisions of the lease.

f. Settlement expenses including the following are generally allowable: (1) Accounting, legal, clerical, and similar costs reasonably necessary for the preparation and presentation to contracting officers or equivalent of settlement claims and supporting data with respect to the terminated portion of the agreement, and the termination and settlement of subagreements; and (2) reasonable costs for the storage, transportation, protection, and disposition of property provided by the Government or acquired or produced by the institution for the agreement.

g. Claims under subagreements, including the allocable portion of claims which are common to the agreement and to other work of the institution, are generally allowable.

K. *Certification of charges.* To assure that expenditures for research grants and contracts are proper and in accordance with the research agreement documents and approved project budgets, the annual and/or final fiscal reports or vouchers requesting payment under research agreements will include a certification, signed by an authorized official of the university, which reads essentially as follows: "I certify that all expenditures reported (or payments requested) are for appropriate purposes and in accordance with the agreements set forth in the application and award documents."

PART II—PRINCIPLES FOR DETERMINING COSTS APPLICABLE TO TRAINING AND OTHER EDUCATIONAL SERVICES UNDER GRANTS AND CONTRACTS WITH EDUCATIONAL INSTITUTIONS

A. *Purpose.* This part extends the scope of Part I: To cover the determination of costs incurred by educational institutions under Federal grants and contracts for training and other educational services.

B. *Application.* The Director will use Parts I and II of this Appendix as a basis for determining allowable costs under grants and cost reimbursement type contracts with educational institutions for work performed under federally supported education service agreements.

C. *Terminology.* The following definitions are to be used in determining the indirect cost of federally sponsored training and other educational services under this Attachment:

1. *Educational service agreement* means any grant or contract under which Federal financing is provided on a cost reimbursement basis for all or an agreed portion of the costs incurred for training or other educational services. Typcial of the work covered by educational service agreements are summer institutes, special training programs for selected participants, professional or technical services to cooperating countries, the development and introduction of new or expanded courses, and similar instructional oriented undertakings, including special research training programs, that are separately budgeted and accounted for by the institution.

The term does not extend to: (a) Grants or contracts for organized research, (b) arrangements under which the Federal financing is exclusively in the form of scholarships, fellowships, traineeships, or other fixed amounts such as a cost of education allowance or the normal published tuition rates and fees of an institution, or (c) construction, facility and exclusively general resource or institutional type grants.

2. *Instruction* means all of the academic work other than organized research carried on by an institution, including the teaching of graduate and undergraduate courses, departmental research (see section B.2. of Part I) and all special training or other instructional oriented projects sponsored by the Federal Government or others under educational service agreements.

D. *Student administration and services.* In addition to the five major functional categories of indirect costs described in section F of Part I, there is established an additional category under the title "Student administration and services" to embrace the following:

1. The expenses in this category are those that have been incurred for the administration of student affairs and for services to students, including expenses of such activities as deans of students, admissions, registrar, counseling and placement services, student advisers, student health and infirmary services, catalogs, and commencements and convocations. The salaries of members of the academic staff whose academic appointments or assignments involve the performance of such administrative or service work may also be included to the extent that the portion so charged is supported pursuant to section J.2. The student administration and services category also includes the staff benefit and pension plan costs applicable to the salaries and wages included therein, an appropriate share of the cost of the operation and maintenance of the physical plant, and charges representing use allowance or depreciation applicable to the buildings and equipment utilized in the performance of the functions included in this category.

2. The expenses in this category are generally applicable in their entirety to the instruction activity. They should be allocated to applicable cost objectives within the instruction activity, including educational service agreements, when such agreements reasonably benefit from these expenses. Such expenses should be allocated on the basis of population served (computed on the basis of full-time equivalents including students, faculty, and others as appropriate) or other methods which will result in an equitable distribution to cost objectives in relation to the benefits received and be consistent with guides provided in section E.2. of Part I.

E. *Direct costs of educational service agreements.* Direct costs of work performed under educational service agreements will be determined consistent with the principles set forth in section D of Part I.

F. *Indirect costs of the instruction activity.* The indirect costs of the instruction activity as a whole should include its allocated share of administrative and supportive costs determined in accordance with the principles set forth in section D above and in section F of Part I. Such costs may include other items of indirect cost incurred solely for the instruction activity and not included in the general allocation of the various categories of indirect expenses. Costs incurred for the institutions by State and local governments are allowable as provided for in section C.6. of Part I.

G. *Indirect costs applicable to educational service agreements.* The individual items of indirect costs applicable to the instruction activity as a whole should be assigned to: (1) Educational service agreements, and (2) all other instructional work through use of appropriate cost groupings, selected distribution bases, and other reasonable methods as outlined in section E.2. of Part I. A single indirect pool may be used for all educational service agreements provided this results in a reasonably equitable distribution of costs among agreements in relation to indirect support services provided. However, when the level of indirect support significantly varies for work performed either on campus or off campus under a particular agreement or group of agreements, separate cost pools should be established consistent with the principles set forth in section G.1.b. of Part I. Where direct charges are provided for under educational service agreements for such things as commencement fees, student fees, and tuition, the related indirect costs, through separate cost groupings, should be excluded from the indirect costs allocable to the service agreements.

H. *Indirect cost rates for educational service agreements.* An indirect cost rate should be determined for the educational service agreement pool or pools, as established under section G above. The rate in each case should be stated as the percentage which the amount of the particular educational service agreement pool is of the total direct salaries and wages of all educational service agreements identified with such pool. Indirect costs should be distributed to individual agreements by applying the rate or rates established to direct salaries and wages for each agreement. When a fixed rate is negotiated in advance of a fiscal year, the over- or under-recovery for that year may be included as an adjustment to the indirect cost for the next rate negotiation as in sections G.4. and G.5. of Part I.

J. *General standards for selected items of cost.* The standards for selected items of cost as set forth in sections J.1. through J.46. of Part I applicable to research agreements will also be applied to educational service agreements with the following modifications:

1. *Commencement and convocation costs (J.5.).* Expenses incurred for convocations and commencements apply to the instruction activity as a whole. Such expenses are unallowable as direct costs of educational service agreements unless specifically authorized in the agreement or approved in writing by the sponsoring agency. For eligibility of allocation as indirect costs, see section D.

2. *Compensation for personal services (J.7.).* Charges to educational service agreements for personal services will normally be determined and supported consistent with the provisions of section J.7. of Part I. However, the provision for stipulated salary support will not be used for educational service agreements. Also, charges may include compensation in excess of the base salary of a faculty member for the conduct of courses outside the normal duties of such member provided that: (a) Extra charges are determined at a rate not greater than the basic salary rate of the member; (b) salary payments for such work follow practices consistently applied within the institution; and (c) specific authorization for such charges is included in the educational service agreement.

3. *Scholarships and student aid costs (J.35.).* Expenses incurred for scholarships and student aid are unallowable as either direct costs or indirect costs of educational service agreements, unless specifically authorized in the educational service agreement or approved in writing by the sponsoring agency.

4. *Student activity costs (J.40.).* Expenses incurred for student activities are unallowable as either direct costs or indirect costs of educational service agreements, unless specifically authorized in the educational service agreement or approved in writing by the sponsoring agency.

5. *Student services costs (J.41.).* Expenses incurred for student services are unallowable as direct costs of educational service agreements unless specifically authorized in the agreement or approved in writing by the sponsoring agency. For eligibility of allocation as indirect costs, see section D.

(OMB Circular A-21)

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

[7 CFR Parts 722, 1427]

EXTRA LONG STAPLE COTTON

Proposed Determinations Regarding 1973 Crop

The Secretary of Agriculture is preparing to make the following determinations and issue regulations with respect

V 38 - 4 JAN 8 73 XUM

to the 1973 crop of extra long staple cotton (referred to as ELS cotton):

a. Loan level and payment rate.

b. Detailed operating provisions to carry out the program.

The above determinations are to be made pursuant to the Agricultural Act of 1949, as amended (63 Stat. 1051, as amended; 7 U.S.C. 1421 et seq.):

a. *Loan level and payment rate.* Section 101(f) of the Act (7 U.S.C. 1441(f)) requires that price support shall be made available to cooperators for the 1968 and each subsequent crop of ELS cotton, if producers have not disapproved marketing quotas therefor, through loans at a level which is not less than 50 percent or more than 100 percent in excess of the loan level established for Middling 1-inch upland cotton of such crop at average location in the United States (except that such loan level for ELS cotton shall in no event be less than 35 cents per pound). On October 17, 1972, the Secretary announced the national average loan rate of 19.50 cents per pound for Middling 1-inch upland cotton (micronaire 3.5 through 4.9), at average location. Section 101(f) also provides for price support payments at a rate which, together with the loan level established for such crop, shall be not less than 65 percent or more than 90 percent of the parity price for ELS cotton as of the month in which the payment rate is announced. Section 401 of the Act (7 U.S.C. 1421) requires that, in determining the level of support in excess of the minimum level prescribed for ELS cotton, consideration shall be given to the supply of the commodity in relation to the demand therefor, the price levels at which other commodities are being supported, the availability of funds, the perishability of the commodity, the importance of the commodity to agriculture, and the national economy, the ability to dispose of stocks acquired through a price support operation, the need for offsetting temporary losses of export markets, and the ability and willingness of producers to keep supplies in line with demand.

b. *Detailed operating provisions to carry out the program.* Detailed regulations necessary to carry out the price support program on ELS cotton are also being reviewed for 1973. Provisions of this kind in effect under the current program may be found in the regulations providing the terms and conditions for payments on ELS cotton for 1968 and succeeding years (7 CFR 722.700–719 (1972 ed.), as amended by 37 FR 7147) and in the Cotton Loan Program Regulations (7 CFR 1427.1–28 and 1427.104 (1972 ed.), and as amended by 37 FR 13528).

Prior to making the foregoing determinations and issuing related regulations, consideration will be given to any data, views, and recommendations, which are submitted in writing to the Secretary, Commodity Credit Corporation, U.S. Department of Agriculture, Washington, D.C. 20250. In order to be sure of consideration, all submissions must be received not later than 30 days after publication of this notice in the FEDERAL REGISTER except that submissions relating to the Cotton Loan Program Regulations must be received not later than 90 days after publication. All written submissions made pursuant to this notice will be made available for public inspection from 8:15 a.m. to 4:45 p.m., Monday through Friday, in Room 4091, South Building, 14th and Independence Avenue SW., Washington, D.C.

Signed at Washington, D.C. on December 29, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

[7 CFR Part 1421]

FLAXSEED

1973 Crop Loan and Purchase Program

Notice is hereby given that the Secretary of Agriculture, under the authority of sections 301, 303, and 401 of the Agricultural Act of 1949, as amended (63 Stat. 1051, as amended; 7 U.S.C. 1447, 1449, and 1421), and sections 4 and 5 of the Commodity Credit Corporation Charter Act, as amended (62 Stat. 1070, as amended; 15 U.S.C. 714b and 714c), is considering a loan and purchase program for the 1973 crop of flaxseed. Such consideration includes determinations relative to (a) the national average loan and purchase rate for the 1973 crop of flaxseed; (b) the manner of making loans and purchases available to producers; (c) county loan rates; and (d) other flaxseed program matters.

The determinations specified above are to be based on the following:

(a) *The national average loan and purchase rate for the 1973 crop of flaxseed.* The Agricultural Act of 1949 authorizes the Secretary to make loans and purchases available to producers of flaxseed at a level not in excess of 90 percent of the parity price for the commodity. The Act requires that, in determining the level of such rate, consideration be given to the supply of the commodity in relation to the demand therefor, the price levels at which other commodities are being supported, the availability of funds, the perishability of the commodity, the importance of the commodity to agriculture and the national economy, the ability to dispose of stocks acquired through such an operation, the need for offsetting temporary losses of export markets, and the ability and willingness of producers to keep supplies in line with demand. In determining the loan and purchase rate, particular consideration is required to be given to the levels at which the prices of competing agricultural commodities are being supported.

(b) *The manner of making loans and purchases available to producers.* The Act authorizes the Secretary to make a program available to producers through loans, purchases, or other operations. Consideration is being given to making the program available through farm and warehouse storage loans to, and purchases from, producers. County loan rates and detailed operating provisions will also be reviewed. Program provisions for the 1972 crop of flaxseed may be found in 7 CFR 1421. County loan rates and additional provisions for the 1972 crop of flaxseed may be found in 37 FR 5504, March 16, 1972.

Prior to making any of the foregoing determinations, consideration will be given to any data, views, and recommendations which are submitted in writing to the Director, Oilseeds and Special Crops Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20250. In order to be sure of consideration, all submissions must be received by the Director not later than February 7, 1973.

All written submissions made pursuant to this notice will be made available for public inspection at the office of the Director during regular business hours (8:15 a.m. to 4:45 p.m.) (7 CFR 1.27(b)).

Signed at Washington, D.C., on December 29, 1972.

KENNETH E. FRICK,
Executive Vice President, Commodity Credit Corporation.

[7 CFR Part 1421]

RICE

Loan and Purchase Program for 1973 Crop

Notice is hereby given that the Secretary of Agriculture, under the authority of sections 101, 401, and 403 of the Agricultural Act of 1949, as amended (63 Stat. 1051, as amended; 7 U.S.C. 1441, 1421, and 1423), and sections 4 and 5 of the Commodity Credit Corporation Charter Act, as amended (62 Stat. 1070, as amended; 15 U.S.C. 714b, 714c), proposes to make determinations and issue regulations relative to a national average level of support and a loan and purchase program for 1973 crop rice. The program will include (1) loan and purchase rates (value factors), (2) the methods by which loans and purchases will be made, (3) eligibility requirements, (4) storage requirements, (5) sales provisions, (6) area and period of the program, and (7) other operating provisions necessary to carry out the program.

Section 101 of the Agricultural Act of 1949 directs the Secretary to make support available on rice to cooperators, if producers have not disapproved marketing quotas, at a level not in excess of 90 percent nor less than 65 percent of the parity price.

Section 401 of that act requires that, in determining a level of support in excess of the minimum level provided by law, consideration be given to the supply of the commodity in relation to the demand therefor, the levels at which other commodities are being supported,

the availability of funds, the perishability of the commodity, the importance of the commodity to agriculture and the national economy, the ability to dispose of stocks acquired through a support operation, the need for offsetting temporary losses of export markets, and the ability and willingness of producers to keep supplies in line with demand.

Current program provisions regarding the rice loan and purchase program may be found in regulations governing loans, purchases, and other operations for grain and similarly handled commodities which appear in Title 7, Part 1421 of the Code of Federal Regulations.

Prior to making any of the foregoing determinations, consideration will be given to data, views, and recommendations which are submitted in writing to the Director, Oilseeds and Special Crops Division, Agricultural Stablization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20250. In order to be sure of consideration, all submissions must be received by the Director not later than February 7, 1973.

All written submissions made pursuant to this notice will be made available for public inspection at the office of the Director during the regular business hours (8:15 a.m. to 4:45 p.m.) (7 CFR 1.27(b)).

Signed at Washington, D.C., on December 29, 1972.

KENNETH E. FRICK,
Executive Vice President, Commodity Credit Corporation.

RURAL TELEPHONE FACILITIES

Proposed New Specification for Two-Electrode Gas Tube Protectors

Notice is hereby given that, pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to issue REA Bulletin 345–68 to announce a new REA Specification PE–55 for two-electrode gas tube protectors. On issuance of REA Bulletin 345–68, Appendix A to Part 1701 will be modified accordingly.

Persons interested in the new specification may submit written data, views or comments to the Director, Telephone Operations and Standards Division, Rural Electrification Administration, Room 1355, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, not later than 30 days from the publication of this notice in the FEDERAL REGISTER. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Director, Telephone Operations and Standards Division during regular business hours.

A copy of the new REA Specification PE–55 may be secured in person or by written request from the Director, Telephone Operations and Standards Division.

The text of REA Bulletin 345–68 announcing the issuance of the new specification is as follows:

REA BULLETIN 345–68

SUBJECT: REA Specification for Two-Electrode Gas Tube Protectors

I. *Purpose:* To announce a new REA Specification PE–55 for Two-Electrode Gas Tube Protectors.

II. *General:* This specification covers requirements for two-electrode gas tube protectors used to protect communication circuits and equipments from damages due to foreign voltages and currents. REA Specification PE–55 becomes effective on June 15, 1973. All two-electrode gas tube protectors furnished for REA projects bid or on orders placed by REA borrowers after that date shall comply in all respects with the new REA Specification PE–55. This does not preclude the adoption of the new specification by manufacturers prior to the effective date.

III. *Availability of specification:* Copies of the new PE–55 will be furnished by REA upon request. Questions concerning the new specification may be referred to the Chief, Station Equipment and Protection Branch, Telephone Operations and Standards Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number 202—447–3173.

Dated: December 29, 1973.

R. W. LYNN,
Acting Assistant Administrator—Telephone.

[Docket No. 70–28; Notice 2]

NEW PNEUMATIC TIRES—PASSENGER CARS

Withdrawal of Proposed Modification of Strength Test

The purpose of this notice is to withdraw the proposed amendment to Standard No. 109 published November 10, 1970 (35 FR 17272). That proposal would have established new criteria for calculating the breaking-energy value for Tire Strength in paragraph S5.3 of the standard.

The standard presently requires that the average of five breaking-energy values be used to determine tire strength. This approach has been used for years by the tire industry as a means of comparing tires of different construction and design, and as a means of evaluating the cord strength of the tire casing. The NHTSA proposed in the November 10, 1970, notice that tire strength be based on the lowest value obtained in the test, as it believed using the lowest value would give a more accurate indication of the performance characteristics of the tire.

Comments received were generally opposed to the proposed rule. The major objections of the commenters were that variables such as plunger lubrication, tread element density, gage repeatability, cord splices, and temperature caused the breaking-energy value to vary in either direction.

Recent changes in the construction of passenger car tires, especially the addition of belts under the tread, have made the strength test specified in Standard No. 109 essentially obsolete, even if the test procedure were modified as proposed. According to NHTSA tests, most passenger car tires of these construction types are exceeding strength requirements by 200 to 300 percent.

Based on the comments received and this test data, the proposed rule establishing new criteria for determining tire strength will not be pursued further. The National Highway Traffic Safety Administration intends to pursue a research program which would include both static and dynamic methods for determining the strength of a tire, in order to establish the best method for measuring strength performance.

(Sections 103, 112, 119, 201, Public Law 89–563, 80 Stat. 718, as amended Public Law 91–265, 84 Stat. 262 (15 U.S.C. 1392, 1401, 1402, 1421), and delegations of authority at 49 CFR 1.51 and 49 CFR 501.8)

Issued on January 3, 1973.

ROBERT L. CARTER,
Associate Administrator, Motor Vehicle Programs.

FEDERAL POWER COMMISSION

[18 CFR Parts 154, 201, 260]

[Docket No. R–466]

ADVANCES TO SUPPLIERS FOR GAS OUTSIDE CONTINENTAL UNITED STATES

Accounting and Rate Treatment

DECEMBER 29, 1972.

Pursuant to 5 U.S.C. 553 and sections 4, 8, 10, and 16 of the Natural Gas Act (52 Stat. 822, 825, 826, 830; 15 U.S.C. 717c, 717g, 717i, and 717o) the Commission gives notice it proposes to amend, effective for the reporting year 1973:

A. The Uniform System of Accounts for Class A and Class B Natural Gas Companies, prescribed by Part 201, Chapter I, Title 18, CFR.

B. Certain scheduled pages of the Commission's Form No. 2, Annual Report for Natural Gas Companies (Class A and Class B) prescribed by § 260.1, Chapter I, Title 18, CFR.

C. Certain regulations prescribed by sections 154.63, in Part 154 Subchapter E—Regulations Under the Natural Gas Act, Chapter I, Title 18, CFR.

In our previous orders dealing with advances, we have not specifically con-

V38-4 JAN 8 73 XUM

sidered the question of advances made to producers operating outside the United States. Review of the history of advances and of the responses[1] to the renotice of Account 166 in Docket No. R–411 reveals that we should set firm guidelines in this area. This matter is an important policy question on which the Commission desires to receive comments by interested persons expressing their views of the appropriate treatment. The Commission has under consideration the following alternative methods of treating advances to producers operating in the North American Continent but outside the 48 States when such production will be accessible by pipeline to the lower 48 States for which a contractual agreement was made after the issuance of an order resulting from this notice:

Alternative 1. That such advances for gas be recorded in a new account 166.1, Advances for Gas Outside Lower Forty-Eight States, and the unrecovered portion of the advances be allowed in rate base as part of working capital. Under this proposal, the accounting and rate base treatment of such advances shall be the same for these advances as for advances subject to the provisions of Order No. 465, made to producers within the lower 48 States, except as noted herein.

Alternative 2. That such advances for gas be recorded in a new account 166.1, Advance for Gas Outside Lower Forty-Eight States, and carrying charges be capitalized until recovery of the advances commence. As found reasonable in a rate proceeding the unrecovered advance and related carrying charges would be allowed in rate base as part of working capital and the carrying charge component of recovered advances would be allowed as a cost of gas purchased.

If the advance payment fails to produce any gas, only the capitalized carrying charges may be assessed against the pipeline's customers. The capitalized charges shall not be included in rate base, but shall be amortized as a cost-of-service item over a period of 5 years, or such other time as the Commission may find reasonable.

If the advance payment produces gas, but none flows to the pipeline's customers, the pipeline will not be permitted to include the advance payment or the carrying charges in rate base or to amortize either item as a cost-of-service item. However, if some gas flows to the pipeline's customers, but not enough to cover the advance payment, pro rata share of the advance payment and of the capitalized carrying charges may be included in rate base and treatment the same as fully successful nondomestic advance payments.

Under both alternatives, all advances in this area made prior to the issuance of an order resulting from this notice shall be treated on a case by case basis.

The proposed amendments to Part 201 of the Commission's Uniform System of Accounts for Class A and Class B Natural Gas Companies, the Commission's regulations under the Natural Gas Act and the FPC Form No. 2 would be issued under the authority granted the Federal Power Commission by the Natural Gas Act as amended, particularly sections 4, 8, 10, and 16 (52 Stat. 822, 825, 826, 830; 15 U.S.C. 717c, 717g, 717i, and 717o).

[1] See responses associated with R–411 which are in the public file and available for public inspection in the Commission's Office of Public Information.

PART 154—RATE SCHEDULES AND TARIFFS

(A) It is proposed to amend Statement E—Working Capital, in paragraph (f) *Description of statements,* of § 154.63 in Part 154, Rates Schedules and Tariffs, Subchapter E—Regulations Under the Natural Gas Act, Chapter I, Title 18 of the Code of Federal Regulations by Adding "166.1" immediately following "Account 166" in the first sentence of the second paragraph. As so amended, that portion of § 154.63 will read as per one of the following alternatives:

§ 154.63 Changes in a tariff, executed service agreement or part thereof.

. . . . . .

(f) *Description of statements.* . . .

[*Alternative 1*] *Statement E—Working Capital.* . . .

The components of working capital may include (a) . . . (b) an allowance for the average of 13 monthly balances of materials and supplies, prepayments, the unrecovered portion of advances to suppliers in Account 166 and 166.1 made under contracts executed prior to January 1, 1974, and gas for current delivery from underground storage.

. . . . . .

or

[*Alternative 2*] The components of working capital may include (a) . . . (b) an allowance for the average of 13 monthly balances of materials and supplies, prepayments, the unrecovered portion of advances to suppliers in Account 166 made under contracts executed prior to January 1, 1974, the unrecovered portion of advances to suppliers outside the lower 48 States in Account 166, outstanding subsequent to the commencement of deliveries under the contract (including related carrying charges as defined in Account 166.1) and gas for current delivery from underground storage.

. . . . . .

(B) Under Alternative 1, no further amendments to § 154.63 are required. If the Alternative 2 method of treating advances to suppliers for gas outside the lower 48 States by accumulating carrying charges is adopted, the Commission proposes to amend § 154.63(f) of the regulations under the Natural Gas Act, Subchapter E, Chapter I, Title 18 of the Code of Federal Regulations by:

a. Inserting the following italicized language in the paragraphs describing Schedules E–1 and E–2.

b. Inserting the following new paragraph immediately following the first paragraph of Schedule H (1)–3.

As so amended, these portions of § 154.63 will read:

§ 154.63 Changes in a tariff, executed service agreement or part thereof.

. . . . . .

(f) *Description of statements.* . . .

Statement E—Working Capital . . .

. . . . . .

Schedule E–1 Setting forth monthly balances for materials and supplies, prepayments, and advances (*including related carrying charges as defined in Account 166.1*), in such detail as to disclose either by subaccounts regularly maintained on the books or by analysis of the principal items included in the main account, the nature of the charges included therein.

Schedule E–2 Setting forth monthly balances of materials and supplies, prepayments and advances (*including related carrying charges as defined in Account 166.1*), in such detail as to disclose either by subaccounts regularly maintained on the books or by analysis of the principal items included in the main account, the nature of the charges included therein.

. . . . . .

Statement H—(1) Operation and Maintenance expenses . . .

Schedule H(1)–3 . . .

If the company receives gas for which it has paid prior to commencement of deliveries under the contract, the carrying charge component of such gas (as defined in Account 166.1) may be included in this schedule

. . . . . .

PART 201—UNIFORM SYSTEM OF ACCOUNTS FOR NATURAL GAS COMPANIES

(C) The following are proposed amendments and revisions (which are the same for Alternative 1 and Alternative 2, except as otherwise noted) to the Uniform System of Accounts for Class A and Class B Natural Gas Companies in Part 201, Chapter I, Title 18 of the Code of Federal Regulations:

1. In the Chart of Balance Sheet Accounts, add a new account 166.1, Advances for Gas Outside Lower Forty-Eight States, immediately following account "166, Advances for Exploration, Development and Production." As revised, the chart of accounts will read:

Balance Sheet Accounts

. . . . . .

ASSETS AND OTHER DEBITS

. . . . . .

3. CURRENT AND ACCRUED ASSETS

. . . . . .

166.1 Advances for gas outside lower 48 States.

. . . . . .

2. In the text of the Balance Sheet Accounts, add a new account 166.1, Advances for Gas Outside Lower Forty-Eight States, immediately following account "166, Advances for Gas Exploration, Development and Production." As revised, the new account 166.1 will read:

Balance Sheet Accounts

ASSETS AND OTHER DEBITS

. . . . . .

3. CURRENT AND ACCRUED ASSETS

. . . . . .

166.1 Advances for gas outside lower 48 States.

A. This account shall include all advances made for gas (whether called "advances", "contributions", or otherwise) to producers or others operating outside the lower 48 States but within the North American Continent, whereas such production will be accessible by pipeline to lower 48 States, including advances to affiliated or associated companies, for exploration, development or production (but not to include lease acquisition) of natural gas, when such advances are to be repaid in full by either delivery of gas or other consideration. Under each agreement with payee, such payments must be made prior to initial gas deliveries, or if the agreement provides for advances on a well-by-well basis, each incremental payment must be made prior to deliveries from an incremental well, or prior to Federal and/or State authorization, as appropriate. Noncurrent advances not to be repaid within a 2-year period shall be reclassified and transferred to Account 124, Other Investments, for balance sheet purposes. This transfer is for reporting purposes only and has no effect on accounting or rate making.

B. When a pipeline obtains a working interest as a result of funds advanced to producers, such amounts shall be included in appropriate production accounts.

C. Outstanding advances shall be fully reduced within 5 years, or as otherwise authorized by the Commission, from the date gas deliveries commence or the date it is determined that recovery will be in other than gas. This account shall be credited with advances not fully recovered within the 5-year period, and the unrecovered portion charged directly to Account 426.5, Other Deductions. A sufficient portion of all gas taken should be credited to the related outstanding advance so as to eliminate the advance within the 5-year period or as otherwise authorized by the Commission upon request by the pipeline company. The reduction of the outstanding advance should not be dependent on a buyer purchasing more than 100 percent of the minimum take or pay quantity provided in the contract.

D. Where recovery is by gas, recovered advances shall be credited to this account and charged to the appropriate gas purchase account.

E. When an advance results in a source of proven reserves of natural gas, but none flows to the pipeline company making such advance, the amount of the advance shall be removed from this account and recorded in Account 167, Other Advances for Gas. Any revenues collected as a result of the advance being included in rate base shall be refunded by the pipeline company to their customers within 12 months after the removal of the advance from this account, unless otherwise directed by the Commission. Where there is partial recovery of the advance by gas in this situation, the amount of the advance transferred from this account to Account 167 and the amount of revenues refundable shall be appropriately apportioned.

F. However, if 5 years elapse from the time the advance has been included in this account and during such time no gas deliveries have commenced or no determination has been made that the recovery will be in economic consideration other than gas, the pipeline shall at the end of the 5-year period, transfer the advance from this account to account 167, and cease rate base treatment thereof, unless otherwise directed by the Commission. (Delete this paragraph under Alternative 2 and reletter following paragraphs accordingly.)

G. Whenever, as a result of an advance included in this account, a pipeline receives any amount in excess of a full recovery of the advance, such amount must be credited to Account 813, Other Gas Supply Expenses. If the income or return is received in other than money, it shall be included at the market value of the assets received.

H. If the recipient of an advance is unable to repay it in full, through no fault of the pipeline or contractual provisions, in gas or other assets, the unpaid or nonrecoverable portion must be credited to this account at the time such amount is recognized as nonrecoverable. Nonrecoverable advances significant in amount must be eliminated within 5 years from the date of determination as nonrecoverable by either a charge to Account 435, Extraordinary Deductions, or when authorized by the Commission, by a transfer to Account 186, Miscellaneous Deferred Debits, and amortization to Account 813, Other Gas Supply Expenses. Nonrecoverable advances insignificant in amount should be charged directly to Account 813 in the year recognized as nonrecoverable.

I. No transfers shall be made to or from this account unless otherwise provided herein, except as specifically authorized by the Commission upon request by the pipeline company.

J. Three copies of any agreement concerning advances will be filed with the Secretary within 30 days of the initial related entry in this account.

Note A: This account shall not include advances, as described above, for which a contractual agreement was made prior to the effective date of Order No. 465.

Note B: This account shall not include advances expended for delay rentals, nonproductive well drilling, or abandoned leases, where such advances are related to lease acquisition.

Note C: To keep the Commission informed when an advance is nonrecoverable by any means the company must submit the full details including copies of Federal and State plugging and abandonment reports involved as soon as such fact becomes known.

. . . . . .

(D) If Alternative 2, that of treating advances to suppliers for gas outside the lower 48 States accumulating carrying charges in lieu of rate base treatment, is adopted, the Commission proposes to add the following Note D to the proposed new Account 166.1, Advances for Gas Outside Lower 48 States.

NOTE D: This account may include accumulated carrying charges on advances made in accordance with the above paragraph A, provided such advances have not been afforded rate base treatment. These carrying charges shall be computed in the same manner as "allowance for funds used during construction" as defined in Gas Plant Instruction 3(17). The accumulation of carrying charges must cease upon delivery of the gas related to the advance.

PART 260—STATEMENTS AND REPORTS (SCHEDULES)

(E) Effective for the reporting year 1973, it is proposed to amend schedule pages 110, Comparative Balance Sheet—Statement A, and 210B. Advances for Gas Prior to Initial Deliveries or Commission Certification (Account 124, 166, and 167) of F.P.C. Form No. 2, Annual Report for Natural Gas Companies (Class A and Class B) prescribed by § 260.1, Chapter I, Title 18 of the Code of Federal Regulations, all as set out in Attachment A hereto.[1]

(F) It is proposed to amend paragraph (c) of § 260.1, Chapter I, Title 18 of the Code of Federal Regulations by revising the schedule title "Advances for Gas Prior to Initial Deliveries or Commission Certification (Accounts 124, 166, and 167)" to read "Advances for Gas Prior to Initial Deliveries or Commission Certification (Accounts 124, 166, 166.1, and 167)." As so amended, that portion of § 260.1(c) will read:

§ 260.1 Form No. 2, Annual report for natural gas companies (Class A and Class B).

. . . . . .

(c) . . .

Advances for Gas Prior to Initial Deliveries or Commission Certification (Accounts 124, 166, 166.1 and 167).

. . . . . .

Any interested person may submit to the Federal Power Commission, Washington, D.C. 20426, not later than February 12, 1973, data, views, comments, or suggestions in writing concerning all or part of the amendments and revisions proposed herein. Written submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Washington, D.C. 20426, during regular business hours. The Commission will consider all such written submittals before acting on the matters herein proposed. An original and 14 conformed copies should be filed with the Secretary of the Commission. In addition, interested persons wishing to have their comments considered in the clearance of the proposed revisions in the report forms pursuant to 44 U.S.C. 3501–3511 may, at the same time, submit a conformed copy of their comments directly to the Clearance Officer, Statistical Policy Division, Office of Management and Budget, Washington, D.C. 20503. Submittals to the Commission should indicate the name, title, mailing address and telephone number of the person to whom communications concerning the proposal should be addressed, and whether the person filing them requests a conference with the staff of the Federal Power Commission to discuss the proposed revisions. The Staff in its discretion, may grant or deny requests for conference.

[1] Appendix A filed as part of the original document.

V 38 - 4 JAN 8 73 XUM

The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

MARY B. KIDD,
Acting Secretary.

VETERANS ADMINISTRATION

[38 CFR Parts 1, 14]

LEGAL SERVICES, GENERAL COUNSEL

Litigation and Claims for Property Loss, Damage and Personal Injury

The following regulatory provisions provide a complete revision and updating of those regulations relating to litigation involving the Veterans' Administration or its personnel, and the disposition of administrative claims for personal injury, property loss, and damage.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans' Affairs (232H), Veterans' Administration, 810 Vermont Avenue NW., Washington, DC 20420. All revent material received not later than 30 days after publication of this notice in the FEDERAL REGISTER will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting central office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in Room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in central office and furnished the address and the above room number.

Notice is also given that it is proposed to make any regulations that are adopted effective the date of final approval by the Administrator of Veterans' Affairs.

It is proposed to amend Title 38, Code of Federal Regulations to read as follows:

1. In Part 1, § 1.511(a) is amended to read as follows:

§ 1.511 Judicial proceedings generally.

(a)(1) Where a suit has been threatened or instituted against the Government, or a prosecution against a claimant has been instituted or is being contemplated, the request of the claimant or his duly authorized representative for information, documents, reports, etc., shall be acted upon by the General Counsel in central office, or the Chief Attorney in the field station, who shall determine the action to be taken with respect thereto. Where the files have been sent to the Department of Justice in connection with any such suit, the request will be referred to the Department of Justice, Washington, D.C., through the office of the General Counsel, for attention. In all other cases where copies of documents or records are desired by or on behalf of parties to a suit, whether in a court of the United States or any other, such copies shall be furnished as provided in paragraph (d) of this section; otherwise to the court only, and on an order of the court or subpoena duces tecum addressed to the Administrator of Veterans' Affairs or the head of the field station in which the records desired are located requesting the same. The determination as to the action to be taken upon any order received in this class of cases shall be made by the service having jurisdiction over the subject matter in central office or the division having jurisdiction over the subject matter in the field station, except in those cases in which the records desired are to be used adversely to the claimant, in which latter event the order of the court or the subpoena will be referred to the General Counsel in Central Office or to the Chief Attorney in the field station for disposition.

(2) Where a claim under the provisions of the Federal Tort Claims Act has been filed or where such a claim can reasonably be anticipated, no information, documents, reports, etc., will be released except through the Chief Attorney of jurisdiction, who will be limited to release of information which would be available under discovery proceedings, were the matter in litigation. Any other information may be released only after concurrence by the General Counsel.

* * * * *

2. In Part 14, §§ 14.514 through 14.617 are revoked and §§ 14.514 through 14.618 are added to read as follows:

LITIGATION (OTHER THAN UNDER THE FEDERAL TORT CLAIMS ACT)

§ 14.514 Suits by or against United States or Veterans' Administration officials.

(a) *Suits against United States or Veterans' Administration officials.* When a suit is filed against the United States or the Administrator involving any activities of the Veterans' Administration, or a suit is filed against any employee of the Veterans' Administration in which is involved any official action of the employee, not covered by the provisions of §§ 14.600 through 14.617, a copy of the petition will be forwarded to the General Counsel who will take necessary action to obtain the pertinent facts, cooperate with or receive the cooperation of the Department of Justice and, where indicated, advise the Chief Attorney of any further action required.

(b) *Counsel and representation of employees.* The Department of Justice may afford counsel and representation to Government employees who are sued individually as a result of the performance of their official duties. A civil action commenced in a State court against an employee, as the result of an action under color of his office, may be removed to the applicable Federal district court. If a suit is filed against an employee as the result of the performance of his official duties, where the provisions of either 28 U.S.C. 2679 or 38 U.S.C. 4116 are not applicable (see § 14.610), and the employee desires to be represented by the U.S. attorney, the Chief Attorney will obtain a written request to this effect from the employee and furnish it together with a copy of the petition and two copies of a summary of pertinent facts to the General Counsel, who will transmit copies thereof to the Department of Justice for appropriate action.

(c) *Suits by the United States.* In any instance wherein direct submission to a U.S. attorney for institution of civil action has been authorized by the Department of Justice, the Chief Attorney will furnish the U.S. attorney a complete report of the facts and applicable law, documentary evidence, names and addresses of witnesses, and, in cases wherein Veterans' Administration action has been taken, a copy of any pertinent decision rendered. The Chief Attorney will forward two copies of such report and of any proposed pleading prepared by him to the General Counsel, and will render any practicable assistance requested by the U.S. attorney.

§ 14.515 Suits involving loan guaranty matters.

(a) In actions for debt, possession or actions similar in substance (including title actions) in which § 36.4282 or § 36.4319 of this chapter has been complied with, the Chief Attorney is authorized to enter the appearance of and represent the Administrator of Veterans' Affairs as his attorney and to file claims for debt in probate proceedings without prior reference to the General Counsel. Any such action will normally be taken within the time prescribed by law as though there had been valid service of process. In all other types of cases, the Chief Attorney will not enter an appearance or file any pleading on behalf of the Administrator except in imperative emergency until authorization is received from the General Counsel after submission of all relevant facts. In doubtful cases, the Chief Attorney will request instructions from the General Counsel, submitting copy of so much of the pleadings or other papers, together with a a sufficient recital of the facts as will make clear the background, the issues, and the relief sought. The submission also will include names and addresses of adverse parties and attorneys so that immediate action may be taken if injunctive relief seems proper. Where necessary in any case to preserve rights which might be lost by default if there had been proper service of process, appropriate action will be taken by a special appearance, or, in jurisdictions where a special appearance does not serve the purpose or under State statute or decisions will constitute a general appearance for a later date, by an appearance through amicus curiae, to obtain an extension of time, preferably 30 days or more, in which to appear and plead without prejudice. If not feasible to obtain an extension, the Chief Attorney will explain to adverse counsel by letter, and personally, if desirable, the necessity of

deferring all action and will see that the proper judge receives a signed copy of the letter before default day. The letter will point out that there is no valid service of process on the Administrator of Veterans' Affairs but will not base the delay on that alone.

(b) The General Counsel and each Chief Attorney representing the General Counsel is the attorney of the Administrator of Veterans' Affairs for all purposes of 38 U.S.C. 1820 and as such is authorized to represent the Administrator in any court action, or other legal matter arising under said statutory provisions. Said authorization is subject to any applicable statutes and executive orders concerning claims of the United States. A Chief Attorney may enter appearance in such cases, subject to the provisions of §§ 36.4282 and 36.4319 of this chapter and paragraph (a) of this section. Each Chief Attorney is authorized to contract for the employment of attorneys on a fee basis for conducting any action arising under guaranty or insurance of loans or direct loans by the Veterans' Administration; or for examination and other proper services with respect to title to and liens on real and personal property, material incident to such activities of the Veterans' Administration, when such employment is deemed by him to be appropriate. The authority delegated to the Chief Attorney may, with the approval of the General Counsel, be redelegated.

(c) The General Counsel and each Chief Attorney in carrying out his duties as authorized in paragraph (a) or (b) of this section is authorized (1) to contract for and execute for and on behalf of the Administrator, any bond (and appropriate contract or application therefor) which is required in or preliminary to or in connection with any judicial proceeding in which the Chief Attorney is attorney for the Administrator, and to incur obligations for premiums for such bonds and (2) to do all other acts and incur all costs and expenses which in his professional opinion are necessary or appropriate to further or protect the interests of the Administrator in or in connection with prosecuting or defending any cause in any court or tribunal within the United States, which cause arises out of or incident to the guaranty or insurance of loans, or the making of direct loans by the Veterans' Administration, pursuant to 38 U.S.C. Chapter 37.

(d) Except in an emergency, no Chief Attorney will initiate action for appellate review without prior approval by the General Counsel. These limitations do not preclude the filing of a motion for a new trial, appeal to intermediate court with hearing de novo, the giving of notice of appeal, reserving of bills of exception, or any other preliminary action in the trial court which may be necessary or appropriate to protect or facilitate the exercise of the right of appellate review, nor do they preclude the taking of appropriate steps on behalf of the Administrator as appellee (respondent) without prior reference to the General Counsel. Upon the conclusion of the trial of a case, the Chief Attorney will report the result thereof to the General Counsel with recommendation as to seeking appellate review if the result reported is adverse to the position of the Veterans' Administration in the litigation. The reporting Chief Attorney who recommends appellate review will include as a part of his communication, or in exhibits attached, (1) a summary of the evidence; (2) a summary of the law points to be reviewed; (3) citations of statutes and cases; (4) statements of special reasons for recommending appellate review; (5) time limitations for the action recommended; (6) requirements, if any, respecting printing of the record and briefs; (7) the estimated total expenses to be incurred by reason of the appeal, reporting separately the estimated costs for printing the brief and record so that authority for printing may be granted in accordance with prescribed procedure, MP–1, Part II, Chapter 9[1]; and (8) the recommendation by the Loan Guaranty Officer, or that he does not desire to make a recommendation.

§ 14.516 Escheat or post fund cases.

In any case in which the Veterans' Administration is entitled to possession of assets or property under the escheat provisions of 38 U.S.C. 3202(e), the gifts provisions of 38 U.S.C. Chapter 83 or the General Post Fund provisions of 38 U.S.C. Chapter 85, the Chief Attorney will endeavor to obtain possession of such assets or property in any manner appropriate under local procedure and practice, other than litigation. This procedure would include the making of exploratory inquiry of the person having custody or possession of the assets or property for the purpose of determining whether he would be willing to turn over the property to the Veterans' Administration without litigation. If unsuccessful in this effort, a complete report will be submitted by the Chief Attorney to the General Counsel so that appropriate action may be taken to obtain the assistance of the Department of Justice in the matter.

§ 14.517 Cases affecting the Veterans' Administration generally.

Chief Attorneys will establish and maintain such close liaison with the State and Federal courts as to insure that notice will be afforded the Veterans' Administration on all cases affecting the Veterans' Administration. Such information will be forwarded to the General Counsel promptly in every case.

§ 14.518 Habeas corpus writs.

Any director, manager, or other employee at a field station of the Veterans' Administration who is served with writ of habeas corpus concerning any beneficiary of the Veterans' Administration in his custody or with any other legal process involving his official actions, in addition to taking such steps as, in his judgment, are necessary to protect himself, will immediately notify the Chief Attorney of the region in which he is situated.

PROSECUTION

§ 14.560 Procedure where violation of penal statutes is involved.

(a) The submission to the appropriate U.S. attorney of a violation or suspected violation of the penal provisions of the statutes of the United States will be made by the Chief Attorney, regional office, or center, within whose jurisdiction the alleged offense appears to have been committed. Where the file or record which contains evidence of a penal offense is located in or forwarded to Central Office, the matter will be referred to the General Counsel for development and reference to the proper Chief Attorney or direct to the Department of Justice. Where the file or record is maintained in any other field station, it will be referred to the Chief Attorney of the regional office in whose area the station is located for development and determination as to whether prosecution is indicated and reference to the proper U.S. attorney if in order.

(b) In all instances where, in developing a necessary administrative investigation, there is evidence of a violation of the penal provisions of the Federal statutes, the case will be submitted to the appropriate U.S. attorney. In central office, investigation and security service reports showing any criminal acts will be reported by the General Counsel to the Department of Justice. If such offense seems probable, but an administrative investigation is not necessary, the matter will be reported, without investigation, to the U.S. attorney or the Department of Justice, as the case may be. The Department of Justice is charged with the duty and responsibility of interpreting and enforcing criminal statutes, and the final determination as to whether the evidence is sufficient to warrant prosecution in any case is a matter for that department. The function of any administrative official is to marshal all evidence within his posession and, when the evidence is sufficient to make a prima facie case of a violation of the statute, to transmit the same to the U.S. attorney for such action as the Department of Justice, acting through the U.S. attorney, may deem necessary. If the U.S. attorney decides to prosecute, the Chief Attorney will cooperate with him as may be requested. Cases deemed essential to protect Veterans' Administration interests or policy will be reported to the General Council if prosecution is delayed or declined.

(c) A report will be made to the Federal Bureau of Investigation concerning criminal matters arising under prior laws authorizing readjustment benefits and war orphans' educational assistance (see sec. 3, Public Law 85–857; 72 Stat. 1262) and current grants of readjustment and educational assistance as authorized in title 38, United States Code. In cases arising under the foregoing acts any evidence or information coming to the at-

[1] Available in any Veterans' Administration station.

V 38 - 4 JAN 8 73 XUM

tention of a Chief Attorney requiring determination as to whether there may be a violation of a Federal criminal statute will be brought promptly to the attention of the local office or agent of the Federal Bureau of Investigation without attempting to develop any criminal aspects, as will such facts or evidence subsequently discovered in administrative investigation or other action. Copy of the final investigation report in administrative investigation shall be forwarded to the U.S. attorney, if, in the opinion of the Chief Attorney, prosecutive action is necessary for administrative purposes. The Chief Attorney will bring to the attention of the General Counsel any case wherein he is of the opinion that criminal action should be initiated, notwithstanding adverse report or lack of report, by the Federal Bureau of Investigation.

§ 14.561 Administrative action prior to submission.

Before a submission is made to the U.S. attorney in cases involving personnel or claims, the General Counsel, if the file is in Central Office, or the Chief Attorney, regional office or center, if the file is in the regional office or other field station, will first ascertain that necessary administrative or adjudicatory (forfeiture (see Public Law 86–222; 73 Stat. 452), etc.), action has been taken; except that in urgent cases such as breaches of the peace, disorderly conduct, trespass, robbery, or where the evidence may be lost by delay, or prosecution barred by the statute of limitations, submission to the U.S. attorney will be made immediately.

§ 14.563 Collections or adjustments.

When it is determined that a submission is to be made to the U.S. attorney, no demand for payment or adjustment will be made without his advice. However, if, before or after submission, the potential defendant or other person tenders payment of the liability to the United States, payment will be accepted if the U.S. attorney states he has no objection. If the U.S. attorney determines that prosecution is not indicated, or when prosecution has ended, the file will be returned to the appropriate office with a report as to the action taken.

§ 14.583 Crimes or offenses on reservations.

Upon receipt by the Chief Attorney of a report from the Director of any Veterans' Administration hospital or domiciliary located in his regional office area, other than the District of Columbia, indicating a violation of any penal statutes occurring on such Veterans' Administration hospital or domiciliary reservation, he will extend full cooperation and advice to the Director. In so doing, the Chief Attorney will be guided by the provisions of 18 U.S.C. 13 and 3041, and 38 U.S.C. 625. Serious crimes (felonies or misdemeanors) committed on a hospital or domiciliary reservation will be reported direct to the U.S. attorney or local agent of the Federal Bureau of Investigation. The Chief Attorney will give every assistance to the Director in such cases.

FEDERAL TORT CLAIMS

§ 14.600 Federal Tort Claims Act.

(a) The Federal Tort Claims Act (28 U.S.C. 1291, 1346, 1402, 1504, 2110, 2401, 2402, 2411, 2412, and 2671 through 2680) prescribes a uniform procedure for the handling of claims against the United States, for money only, on account of damage to or loss of property, or on account of personal injury or death, caused by the negligent or wrongful act or omission of a Government employee while acting within the scope of his office or employment, under circumstances where the United States, if a private person, would be liable in accordance with the law of the place where the act or omission occurred.

(b) The act provides that: (1) No court action (except those involving a third party complaint, cross-claim, or counterclaim) shall be instituted unless the claimant shall have first presented his claim to, and it has been finally denied by, the appropriate Federal agency. The failure, however, of the agency to make final disposition of the claim within 6 months after it is filed may, at the option of the claimant, be deemed a final denial of the claim (28 U.S.C. 2675(a));

(2) Where a suit is filed after the denial of the administrative claim, the amount sought is limited to the amount of the claim presented to the Federal agency, except on proof of newly discovered evidence or intervening facts relating to the amount of the claim (28 U.S.C. 2675 (b));

(3) Suits are tried without a jury, and a district court judgment may be appealed to the appropriate U.S. Circuit Court of Appeals, or upon consent, to the Court of Claims of the United States;

(4) Administrative claims must be filed in writing with the appropriate Federal agency within 2 years from the date the claim accrues, and a suit must be filed within 6 months from the date of mailing of the final denial by the agency of the administrative claim (28 U.S.C. 2401(b));

(5) Section 2680 of title 28, United States Code, enumerates certain types of claims for which the United States is not liable under the Federal Tort Claims Act.

PREMATURE SUITS

§ 14.601 Dismissal action.

Where a tort suit against the United States (other than by third party complaint, cross-claim, or counterclaim) is filed without being preceded by an administrative claim (see § 14.600(b)(1)), the Chief Attorney shall promptly, upon receipt of notice of the action thereon, notify the U.S. attorney and the General Counsel, who will, in turn, notify the Department of Justice, that the provisions of 28 U.S.C. 2675(a) have not been complied with, and that the suit appears to be subject to a motion to dismiss for lack of jurisdiction. The General Counsel should be kept advised as to subsequent developments, and should be furnished a copy of any order of dismissal which may be entered by the court.

ADMINISTRATIVE CLAIMS

§ 14.602 Scope and authority to consider claims.

(a) The Administrator and those delegated such authority in § 2.6 (e) and (f) of this chapter are authorized to consider, ascertain, adjust, determine, compromise and settle claims for money damages against the United States in accordance with regulations prescribed by the Attorney General (28 CFR 14.1 et seq.). Any award, compromise, or settlement exceeding $25,000 shall be effected only with the prior written approval of the Attorney General or his designee. In addition, a claim may be compromised or settled only after consultation with the Department of Justice when:

(1) A new precedent or point of law is involved;

(2) A question of policy is or may be involved;

(3) The United States is or may be entitled to indemnity or contribution from a third party and the Veterans' Administration is unable to adjust the third party claim;

(4) For any reason, the compromise of a particular claim, as a practical matter, will, or may, control the disposition of a related claim in which the amount to be paid may exceed $25,000; or

(5) The United States, an employee, agent, or cost-plus contractor, is involved in litigation based on a claim arising out of the same incident or transaction.

(b) Authority is delegated by § 2.6(f) of this chapter to Chief Attorneys to act on claims not exceeding the specified dollar value, except that any claim which comes within the purview of the five categories stated in paragraph (a) of this section will be forwarded to the General Counsel, who will consult with the Department of Justice thereon.

(c) Where multiple claims (including claims of a subrogor and a subrogee) arise from the same incident, and the total of such claims exceeds the amount delegated Chief Attorneys by § 2.6(f) of this chapter, all such claims will be forwarded to the General Counsel for consideration.

(d) For the purpose of §§ 14.600 through 14.617, any reference to the General Counsel includes all other personnel in the General Counsel's office to which authority to handle Federal tort claims has been delegated by § 2.6(e) (1) and (2) of this chapter.

§ 14.603 Proper claimants.

(a) (1) A claim for damage to or loss of property may be presented by the owner of the property, his duly authorized agent or legal representative.

(2) A claim for personal injury may be presented by the injured person, his duly authorized agent, or legal representative.

(3) A claim based on death may be presented by the executor or administrator of the decedent's estate, or by any other person legally entitled to assert such a claim in accordance with applicable State law.

(4) A claim for loss wholly compensated by an insurer with the rights of a subrogee may be presented by the insurer. A claim for loss partially compensated by an insurer with the rights of a subrogee may be presented by the parties individually as their respective interests appear, or jointly. However, when an insurer presents a claim asserting the rights of a subrogee, he shall also present appropriate evidence to support his right.

(5) A claim presented by an agent or legal representative shall be presented in the name of the claimant, be signed by the agent or legal representative, show the title or legal capacity of the person signing, and be accompanied by evidence of his authority to present a claim on behalf of the claimant as agent, executor, administrator, parent, guardian, or other representative.

(b) State court procedures relating to the presentation of claims on behalf of mentally incompetent claimants will be complied with. Applicable statutes of limitation are not, however, tolled by the claimant's incompetency.

(c) State court procedures, other than statutes of limitation, relating to the presentation of claims on behalf of minors will be complied with where:

(1) The claimant is represented by an attorney who, at minimal expense and inconvenience, can easily obtain State court approval;

(2) The claimant is not a parent or is otherwise unrelated to the infant;

(3) The minor will reach majority before the expiration of the 2-year period of limitation prescribed by 28 U.S.C 2401(b); or

(4) The amount involved or the permanence and seriousness of personal injuries are of such magnitude as to warrant judicial approval in order to assure that the interests of the minor are fully protected.

§ 14.604 Filing a claim.

(a) Each person who inquires as to the procedure for filing a claim against the United States, predicated on a negligent or wrongful act or omission of an employee of the Veterans' Administration acting within the scope of his employment, will be furnished a copy of SF 95, Claim for Damage, Injury, or Death. The claimant will be advised to submit the executed claim directly to the Chief Attorney having jurisdiction of the area wherein the occurrence complained took place. He will also be advised to submit the information prescribed by § 14.607, to the extent applicable. If a claim is presented to the Veterans' Administration which involves the actions of employees or officers of other agencies, it will be forwarded to the Veterans' Administration General Counsel, and transmitted by him forthwith to the appropriate agency.

(b) A claim shall be deemed to have been presented when the Veterans' Administration receives from a claimant, his duly authorized agent or legal representative, an executed SF 95, or other written notification of an incident, together with a claim for money damages, in a sum certain, for damage to or loss of property or personal injury or death: *Provided, however,* That before compromising or settling any claim, an executed SF 95 shall be obtained from the claimant.

(c) A claim presented in compliance with paragraphs (a) and (b) of this section may be amended by the claimant at any time prior to final Veterans' Administration action or prior to the exercise of the claimant's option under 28 U.S.C. 2675(a). Amendments shall be submitted in writing and signed by the claimant or his duly authorized agent or legal representative. Upon the timely filing of an amendment to a pending claim, the Veterans' Administration shall have 6 months in which to make a final disposition of the claim as amended and the claimant's option under 28 U.S.C. 2675(a) shall not accrue until 6 months after the filing of the amendment. (See § 14.600(b)(1).)

§ 14.605 Investigation and development.

(a) *Development of untoward incidents prior to receipt of a claim.* (1) A report of any collision involving a Government-owned vehicle which results in property damage or personal injury or death will be made by the operator of the Government vehicle immediately following the accident, on SF 91, Operator's Report of Motor Vehicle Accident, and shall be submitted to the Manager or Director of the station involved. A copy of said report, accompanied by an executed copy of SF 91–A, Investigation Report of Motor Vehicle Accident, will be promptly submitted by the Manager or Director to the appropriate Chief Attorney, who will authorize such additional investigation as the circumstances of the case may warrant.

(2) (i) Any incident resulting in damage to, or loss of, property, other than personal effects of a patient in a Veterans' Administration facility, or in personal injury or death, due apparently or allegedly to the negligent or wrongful act or omission of an employee of the Veterans' Administration acting within the scope of his office or employment, or damage to or loss of Government-owned property caused by other than a Veterans' Administration employee acting within the scope of his office or employment, will be immediately reported on SF 92–A, Report of Accident Other Than Motor Vehicle. The Director of the station where such occurrence took place will promptly transmit a copy of the report to the appropriate Chief Attorney, who will authorize such additional investigation as the circumstances of the case may warrant.

(ii) Where the incident involves the loss of personal effects of a patient in a Veterans' Administration facility, the Director will assist the patient in completing a SF 95, Claim for Damage, Injury, or Death, and will advise the patient that it will be forwarded immediately to the appropriate Chief Attorney for consideration. The Director will forward along with the claim a brief summary of the facts, as well as his recommendation, to the Chief Attorney. The Chief Attorney will expedite his consideration and processing of claims of this nature.

(3) An employee will be designated at each station to investigate motor vehicle collisions and other incidents involving damage to, or loss of privately owned property or personal injury or death, apparently or allegedly resulting from the negligent or wrongful act or omission of an employee of the Veterans Administration acting within the scope of his employment, other than investigation of alleged malpractice, or damage to or loss of Government-owned property caused by other than Veterans Administration employees. In Central Office, the designation will be made by the Manager, Administrative Services, and at all other stations, by the Director.

(4) The Chief Attorney, Veterans Benefits Office, District of Columbia, or the Chief Attorney of the regional office for the area in which a field station is located will be the appropriate Chief Attorney within the purview of this section. The Chief Attorney will be responsible for processing claims involving motor vehicle collisions and other occurrences resulting in property damage, personal injury, or death, within such area. The Chief Attorney, Veterans Benefits Office, will also have jurisdiction, except as otherwise provided in subparagraph (3) of this paragraph over incidents occurring in Veterans Administration Central Office.

(b) *Postclaim requirements.* (1) Claims coming within the jurisdiction of the Chief Attorney (see § 2.6(f) of this chapter) shall be handled in accordance with the provisions of § 14.608;

(2) Where a claim is presented for an amount in excess of that for which authority has been delegated to the Chief Attorney, he will immediately forward a copy of the SF 95 (or other written statement of a claim), specifying the demand in a sum certain, to the General Counsel, along with any existing information concerning the claim. The Chief Attorney will notify the claimant of this referral and will commence his investigation and development. In the course of the investigation, any photographs or other graphic material which can be obtained should be included in the report to be submitted to the General Counsel;

(3) Within 60 days after receipt of a claim, the Chief Attorney will review all evidence available, and prepare a concise, complete report, including a summary of the evidence, his findings of essential facts, citations of applicable local laws, regulations, and decisions, and his conclusion as to the liability of the United States. This report will also include sufficient information so that a determination can be made as to the amount of damages for which the United States could be held responsible, and the Chief Attorney will state his conclusions and recommendations in this area. The Chief Attorney will transmit two copies of this report to the General Counsel,

V 38 - 4 JAN 8 73 XUM

along with the original and two copies of any applicable medical records which may be available, assembled so they are identical in arrangement with the originals. An extra complete copy of these medical records will be retained by the Chief Attorney which can be forwarded to the U.S. attorney together with the original report of investigation if the claim subsequently reaches the litigation stage. The report itself and the supporting materials, will be indexed, tabbed, and fastened so that it is one unit. If the claimant is a veteran, or the claim involves personal injury or death to a veteran, the veteran's claims folder will be forwarded to the General Counsel along with the report;

(4) In the consideration of claims involving a medical question, the General Counsel will be guided by the views of the Chief Medical Director as to the standard of medical care and treatment, and nature and extent of injuries, the degree of temporary or permanent disability, the prognosis, the necessity for future treatment or physical rehabilitation, and any other pertinent medical aspects of a claim. In claims of this nature, within the jurisdiction of the Chief Attorney, he will be guided by the views of the applicable hospital Director or Chief of Staff where the Director is not a physician.

§ 14.606 Requests for medical information.

(a) Where there is indication that a tort claim will be filed, medical records or other information shall not be released without approval of the Chief Attorney.

(b) Request for medical records, documents, reports, or other information shall be handled in accordance with the provisions of § 1.511(a) (2) of this chapter.

§ 14.607 Evidence to be submitted.

In conducting his investigation into the facts and circumstances giving rise to the claim, the Chief Attorney will consider the following guidelines to the extent applicable:

(a) *Death.* In support of a claim based on death, the claimant may be required to submit the following evidence or information:

(1) An authenticated death certificate or other competent evidence showing cause of death, date of death, and age of the decedent.

(2) Decedent's employment or occupation at time of death, including his monthly or yearly salary or earnings (if any), and the duration of his last employment or occupation.

(3) Full names, addresses, birth dates, kinship, and marital status of the decedent's survivors, including identification of those survivors who were dependent for support upon the decedent at the time of his death.

(4) Degree of support afforded by the decedent to each survivor dependent upon him for support at the time of his death.

(5) Decedent's general physical and mental condition before death.

(6) Itemized bills for medical and burial expenses incurred by reason of the incident causing death, or itemized receipts of payments for such expenses.

(7) If damages for pain and suffering prior to death are claimed, a physician's detailed statement specifying the injuries suffered, duration of pain and suffering, any drugs administered for pain, and the decedent's physical condition in the interval between injury and death.

(8) Any other evidence or information which may have a bearing on either the responsibility of the United States for the death or the damages claimed.

(b) *Personal injury.* In support of a claim for personal injury, including pain and suffering, the claimant may be required to submit the following evidence or information:

(1) A written report by his attending physician or dentist setting forth the nature and extent of treatment, any degree of temporary or permanent disability, the prognosis, period of hospitalization, and any diminished earning capacity. In addition, the claimant may be required to submit to a physical or mental examination by a physician employed by the agency or another Federal agency. A copy of the report of the examining physician shall be made available to the claimant upon the claimant's written request provided that he has, upon request, furnished the report referred to in the first sentence of this subparagraph and has made or agrees to make available to the agency any other physician's reports previously or thereafter made of the physical or mental condition which is the subject matter of his claim.

(2) Itemized bills for medical, dental, and hospital expenses incurred, or itemized receipts of payment for such expenses.

(3) If the prognosis reveals the necessity for future treatment, a statement of expected expenses for such treatment.

(4) If a claim is made for loss of time from employment, a written statement from his employer showing actual time lost from employment, whether he is a full- or part-time employee, and wages or salary actually lost.

(5) If a claim is made for loss of income and the claimant is self-employed, documentary evidence showing the amount of earnings actually lost.

(6) Any other evidence or information which may have a bearing on either the responsibility of the United States for the personal injury or the damages claimed.

(c) *Property damage.* In support of a claim for injury to or loss of property, real or personal, the claimant may be required to submit the following evidence or information:

(1) Proof of ownership.

(2) A detailed statement of the amount claimed with respect to each item of property.

(3) An itemized receipt of payment for necessary repairs or itemized written estimates of the cost of such repairs.

(4) A statement listing date of purchase, purchase price and salvage value, where repair is not economical.

(5) Any other evidence or information which may have a bearing on either the responsibility of the United States for the damage to or loss of property or the damages claimed.

§ 14.608 Disposition of claims.

(a) *Disallowance.* In the case of a claim where a determination is made that there is no liability on the part of the United States, the Chief Attorney (if he has jurisdiction under § 2.6(f) of this chapter), or the General Counsel will notify the claimant (or his attorney or legal representative) by certified or registered mail. Notification of final denial may include a statement of reasons for the denial and shall include a statement that, if the claimant is dissatisfied with the agency action, suit in an appropriate U.S. district court may be instituted not later than 6 months after the date of mailing of the notice of final denial.

(b) *Reconsideration of disallowance.* Prior to the commencement of suit and prior to the expiration of the 6-month period provided in 28 U.S.C. 2401(b), a claimant, his duly authorized agent, or legal representative, may file a written request with the agency for reconsideration of a final denial of a claim under paragraph (a) of this section. Upon the timely filing of a request for reconsideration, the agency shall have 6 months from the date of filing in which to make a final disposition of the claim, and the claimant's option under 28 U.S.C. 2675(a), shall not accrue until 6 months after the filing of a request for reconsideration. Final agency action on a request for reconsideration shall be effected by the Chief Attorney if the claim is one within his jurisdiction as authorized by § 2.6(f) (1) of this chapter, otherwise by the General Counsel. If the previous denial decision is upheld, the notice shall be by certified mail and the claimant will be advised of his right to bring suit within 6 months.

(c) *Allowance or compromise.* (1) In the case of a claim where a determination is made by the Chief Attorney (if the claim is one for which he has been delegated authority under § 2.6(f) (1) of this chapter), or by the General Counsel, that there is or could be liability on the part of the Government, an attempt will be made to obtain an agreement with the claimant, or his attorney, as to a fair and reasonable settlement or compromise;

(2) If the claim is one being handled by the Chief Attorney, and a tentative settlement agreement is reached, advice will be obtained from the General Counsel as to the availability of funds to pay the amount agreed upon. The claimant's signature, as well as that of his spouse if appropriate, shall then be obtained on SF 1145, Voucher for Payment Under Federal Tort Claims Act, and the Chief Attorney will indicate his approval in the area designated therefor. Where required by the applicable State law, approval of a court of competent jurisdiction will be obtained. He will then forward the voucher, and the order of approval if applicable, to the General Counsel for necessary action to effect payment;

(3) Where the claim is being handled by the General Counsel, and is to be settled or compromised, the appropriate voucher will be forwarded to and executed by the claimant, or his duly authorized agent, and by his spouse if appropriate. Where required by the applicable State law, approval of a court having jurisdiction will be obtained. The General Counsel will then take necessary action to effect payment.

(d) *Attorney fees.* In any claim administratively settled or compromised, no specific portion of the award shall be designated as an attorney fee. However, 28 U.S.C. 2678 prohibits an attorney from charging, demanding, receiving, or collecting for services rendered, fees in excess of 20 per centum of any award, compromise, or settlement made pursuant to 28 U.S.C. 2672. Violation of this prohibition will subject the attorney to a fine of not more than $2,000 or imprisonment for not more than 1 year, or both. When a claimant is represented by an attorney, the voucher for payment shall designate as "payee" both the claimant and his attorney and the check shall be delivered to the attorney whose address shall appear on the voucher.

(e) *Setoff for cost of unauthorized medical treatment.* In any tort claim administratively settled or compromised where the claimant owes the Veterans' Administration for unauthorized medical treatment, there will be set off against the tort claim award the amount of the claimant's indebtedness to the Government. The amout set off is for credit to the appropriation account from which the services were provided. The voucher prepared for settlement of the claim will specify that the amount of the setoff be deposited to the credit of the designated account and that the balance of the award be paid to the claimant.

LITIGATED CLAIMS

§ 14.609 Tort suits following denial of an administrative tort claim.

Where civil action against the United States follows denial of an administrative claim, the General Counsel, upon receipt of notice of the action, will furnish to the Department of Justice a copy of the investigation report and other related materials obtained in connection with the consideration of the administrative claim previously submitted to the agency. The General Counsel will instruct the Chief Attorney to forward to the appropriate U.S. attorney the investigation report and other related materials, including medical records and any other information, which may be appropriate to the litigation. The Chief Attorney will keep the General Counsel advised of subsequent developments, and will render assistance as requested by the U.S. attorney and the General Counsel with respect to the defense of the suit.

§ 14.610 Suits against Veterans' Administration employees arising out of the operation of motor vehicles or based upon medical care and treatment furnished by or for the Department of Medicine and Surgery.

(a) (1) Section 2679 of title 28, United States Code, provides for the defense of suits against Federal employees or their estates arising out of their operation of motor vehicles in the scope of their office or employment with the Federal Government.

(2) Section 4116, title 38, United States Code, provides for the defense of suits, alleging malpractice or negligence in furnishing medical care and treatment, filed against physicians, dentists, nurses, pharmacists, or paramedical or other supporting personnel as a result of an act or omission which occurred while acting within the scope of their employment in or for the Department of Medicine and Surgery.

(b) Any Veterans' Administration employee against whom a civil action or proceeding is brought for damage to property, or for personal injury or death, on account of the employee's operation of a motor vehicle in the scope of his office or employment with the Government or on account of malpractice or negligence in furnishing medical care and treatment which occurred while acting within the scope of his employment in or for the Department of Medicine and Surgery, shall deliver all process and pleadings served upon him, or an attested true copy thereof, forthwith to the Chief Attorney having jurisdiction over the area in which the employee is employed. In addition, upon his receipt of such process or pleadings, or any prior information regarding the commencement of such a civil action or proceeding, he shall immediately so advise the Chief Attorney.

(c) Where civil action against an employee is covered by the provisions of either of the laws cited in paragraph (a) of this section, the Chief Attorney shall promptly, upon receipt thereof, furnish the U.S. attorney for the district embracing the place wherein the action or proceeding is brought, information concerning the commencement of such action or proceeding, and copies of all process and pleadings therein. In addition, the Chief Attorney shall submit a report to the U.S. attorney containing all available data bearing upon the question and state whether the employee was acting within the scope of his office or employment with the Federal Government at the time of the incident out of which the suit arose. Two copies of the report will be submitted to the General Counsel. In cases involving the operation of motor vehicles, the report shall include factual information bearing upon the nature of the employee's duties, his authorized destination, the conveyance authorized, whether he had departed from the route authorized or disobeyed the instructions given him, whether at the time of the incident he was engaged in the furtherance of his own personal interests, and any other relevant data. In cases involving allegations of malpractice or negligence in furnishing medical care and treatment, the report shall include factual information bearing upon the nature of the employee's duties and all available facts and circumstances surrounding the alleged act or omission, together with any other relevant information. The Chief Attorney will advise the U.S. attorney of the provisions of either 28 U.S.C. 2679 or of 38 U.S.C. 4116 and render such assistance as may be requested by the U.S. attorney or the General Counsel with respect to the defense of the suit.

ADMINISTRATIVE SETTLEMENT OF TORT CLAIMS ARISING IN FOREIGN COUNTRIES

§ 14.615 General.

(a) *Authority.* Section 236, title 38, United States Code, provides that the Administrator of Veterans' Affairs may pay tort claims, in the manner authorized in the first paragraph of section 2672 of title 28, United States Code, when such claims arise in foreign countries in connection with Veterans' Administration operations abroad.

(b) *Action by claimant.* Claims for property loss or damage may be filed by the owner of the property or his duly authorized agent or legal representative. If the property was insured and the insurer is subrogated, in whole or in part, and if both the owner and the insurer desire to file a claim for their respective losses, they should join in one claim. Claims for personal injury may be filed by the injured person or his agent or legal representative. Claims for death may be filed by the personal representative of the decedent or any other legally qualified person. When filed by an agent or legal representative, the claim must show the title or capacity of the person representing the claimant and be accompanied by evidence of the appointment of such person as agent, legal representative, executor, administrator, guardian, or other fiduciary.

(c) *Time for filing.* A claim may not be allowed under 38 U.S.C. 236 unless it is presented to the Administrator or his designee within 2 years after the claim accrues.

§ 14.616 Form and place of filing claim.

(a) *Form of claim.* Claims arising under 38 U.S.C. 236 will be prepared in the form of a sworn statement and submitted in duplicate. The original copy of the claim will be sworn to or affirmed before an official with authority to administer oaths or affirmations and will contain the following information, at least:

(1) The name and address of claimant;

(2) The amount claimed for injury or death, and for property loss or damage;

(3) If property was lost or damaged, the amount paid or payable by the insurer together with the name of the insurer;

(4) A detailed statement of the facts and circumstances giving rise to the claim, including the time, place, and date of the accident or incident;

V 38 - 4 JAN 8 73 XUM

(5) If property was involved, a description of the property and the nature and extent of the damage and the cost of repair or replacement based upon at least two impartial estimates;

(6) If personal injury was involved, the nature of the injury, the cost of medical and/or hospital services, and time and income lost due to the injury;

(7) If death is involved, the names and ages of claimants and their relationship to decedent;

(8) The name and official position of the employee of the United States allegedly responsible for the accident or injury, or loss or damage of property;

(9) The names and addresses of any witnesses to accident or incident; and

(10) If desired, the law applicable to the claim.

(b) *Place of filing claim.* Claims arising in the Philippines under 38 U.S.C. 236 will be filed with the Chief Attorney, Veterans' Administration Regional Office, Manila, Republic of the Philippines. Claims arising in other foreign countries will be filed with the American Embassy or Consulate nearest the place where the incident giving rise to the claim took place.

(c) *Evidence to be submitted by claimant*—(1) *General.* The amount claimed on account of damage to or loss of property or on account of personal injury or death shall, so far as possible, be substantiated by competent evidence. Supporting statements, estimates and the like will, if possible, be obtained from disinterested parties. All evidence will be submitted in duplicate. Original evidence or certified copies shall be attached to the original copy of the claim, and sample copies shall be attached to the other copy of the claim. All documents in other than the English language will be accompanied by English translations.

(2) *Personal injury or death.* In support of claims for personal injury or death, the claimant will submit, as may be appropriate, itemized bills for medical, hospital, or burial expenses actually incurred; a statement from the claimant's or decedent's employer as to time and income lost from work; and a written report by the attending physician with respect to the nature and extent of the injury, the nature and extent of treatment, the degree of disability, the period of hospitalization or incapacitation, and the prognosis as to future treatment, hospitalization and the like.

(3) *Damage to personal property.* In support of claims for damage to personal property which has been repaired, the claimant will submit an itemized receipt, or, if not repaired, itemized estimates of the cost of repairs by two reliable parties who specialize in such work. If the property is not economically repairable, the claimant will submit corroborative statements of two reliable, qualified persons with respect to cost, age of the property and salvage value.

(4) *Damage to real property.* In support of claims for damage to land, trees, buildings, fences, or other improvements to real property, the claimant will submit an itemized receipt if repairs have been made, or, if repairs have not been made, itemized estimates of the cost of repairs by two reliable persons who specialize in such work. If the property is not economically repairable, the claimant will submit corroborative statements of two reliable, qualified persons with respect to the value of the improvements both before and after the accident or incident and the cost of replacements.

(5) *Damage to crops.* In support of claims for damage to crops, the claimant will submit an itemized signed statement showing the number of acres, or other unit measure of crop damaged, the probable yield per unit, the gross amount which would have been realized from such probable yield and an estimate of the costs of cultivating, harvesting and marketing the crop. If the crop is one which need not be planted each year, the diminution in value of the land beyond the damage to the current year's crop will also be stated.

§ 14.617 Disposition of claims.

(a) *Disposition of claims arising in Philippines.* All claims arising under 38 U.S.C. 236 in the Philippines, including a complete investigation report and a brief résumé of applicable law, will be forwarded directly by the Chief Attorney to the General Counsel, together with his recommendation as to disposition.

(b) *Disposition of claims arising in foreign countries other than the Philippines.* When a claim is received in an American Embassy or Consulate, the Embassy or Consulate receiving such claim shall make such investigation as may be necessary or appropriate for a determination of the validity of the claim and thereafter shall forward the claim, together with all pertinent material, including a résumé of applicable law and a recommendation regarding allowance or disallowance of the claim, through regular channels of the Department of State to the General Counsel, Veterans' Administration Central Office, Washington, D.C.

(c) *Payment of claims.* Upon determining that there is liability on the part of the United States under 38 U.S.C. 236, the General Counsel, or such other personnel as may be designated by the Administrator, will take the necessary action to effect payment.

CLAIMS FOR DAMAGE TO OR LOSS OF GOVERNMENT PROPERTY

§ 14.618 Collection action.

(a) In a case where the Chief Attorney determines that damage to or loss of Government property under the jurisdiction of the Veterans' Administration resulted from the negligence or other legal wrong of a person other than an employee of the United States, and such damages do not exceed $20,000, he will request payment of the amount of damage from the person liable therefor or his insurer.

(b) The Chief Attorney may collect, compromise, suspend, or terminate collection action on any such claim as is authorized under § 2.6(f) of this chapter, in conformity with the standards in § 1.900 series of this chapter. Any such claim which is not compromised or on which collection action is not suspended or terminated, will be referred by the Chief Attorney direct to the appropriate U.S. attorney along with the information required by §§ 1.951 through 1.953 of this chapter. Any claim in excess of the authorized amount on which voluntary payment in full has not been made, will be transmitted along with the report required by § 14.605(a)(2)(i), a report on credit data (§ 1.952 of this chapter), and any other pertinent information, to the General Counsel for appropriate action.

(c) The General Counsel or those designated in § 2.6(e)(4) of this chapter will take action to collect, compromise, suspend, or terminate collection action on such claims not exceeding $20,000 in conformity with § 1.900 series of this chapter. Any such claims not compromised, or on which collection action is not suspended or terminated in accordance with § 1.900 series of this chapter, will be referred promptly to the Department of Justice for appropriate action.

(d) The provisions of paragraphs (a) through (c) of this section are not applicable to the collection of claims involving damage to General Services Administration Motor Pool System vehicles issued for Veterans' Administration use. Whenever there is any indication that a party other than the operator of a motor pool system vehicle is at fault in an accident, all documents and data pertaining to the accident and its investigation will be submitted to the General Services Administration Regional Counsel of the region that issued the vehicle who has jurisdiction over such matters. Whenever a motor pool system vehicle is involved in an accident, resulting in damage to the property of, or injury to the person of a third party, and the third party asserts a claim against the Veterans Administration based upon the alleged negligence of the vehicle operator, the claim will be considered under § 14.600 et seq.

3. In Part 14, §§ 14.664 through 14.670 are revoked and §§ 14.664 through 14.669 are added to read as follows:

PERSONNEL CLAIMS

§ 14.664 Scope of authority and effective date.

Public Law 88-558 (78 Stat. 767), approved August 31, 1964, authorizes the Administrator or his designee to settle and pay a claim for not more than $6,500 made by a civilian officer or employee of the Veterans' Administration for damage to, or loss of personal property incident to his service. Authority is delegated by § 2.6(e)(5) of this chapter to the General Counsel, Associate General Counsel, Assistant General Counsel (Professional Staff Group I), and the Deputy Assistant General Counsel, of said staff group, or those acting for them, to settle and pay such claims on behalf of the Administrator, and such settlement shall be final and conclusive. Authority is delegated to Chief Attorneys by § 2.6(f)(5) of this chapter to settle and pay on behalf of the Administrator a claim under the Military Personnel and Civilian Employees' Claims Act of 1964, not exceeding amounts authorized by said section, in accordance with instructions issued by the General Counsel.

§ 14.665 Claims.

(a) The claim must be presented in writing on VA Form 2-4760, Employee's Claim for Reimbursement for Personal Property Damaged or Lost Incident to Employment. It will be submitted to the personnel office where the claim originates within 2 years after it accrues, except that if the claim accrues in time of war or in time of armed conflict in which any armed force of the United States is engaged or if such war or armed conflict intervenes within 2 years after it accrues, and if good cause is shown, the claim may be presented not later than 2 years after that cause ceases to exist. The claim must be executed and certified by the officer or the employee suffering the loss or damage, or in the event of his death, by the surviving spouse, children, father or mother or both, or brothers or sisters or both. Claims of survivors shall be settled and paid in the order named. All claims must contain the following:

(1) The date, time, and place the loss or damage occurred and the circumstances surrounding such loss or damage, together with the supporting statements of any witnesses who can verify such facts.

(2) In the event of damage, the date of acquisition, original cost, condition before damage, and at least two estimates of the cost of repair or replacement. In the event of loss, the date of acquisition, the original cost, the condition, and an estimate of the reasonable market value of the article or articles.

(3) A statement as to any claims or potential claim he may have for indemnification of the loss or damage against other than the United States and whether he will assign such to the United States and cooperate in its prosecution. Where such claim or potential claim is against a carrier or insurer, evidence that a timely claim has been properly made. Where a recovery from the carrier or his insurer has been obtained or offered, such information shall be included.

(4) In cases involving damage or destruction of personal property by patients or domiciliary members, a statement as to whether a claim was filed pursuant to 38 U.S.C. 233(a)(5) and whether such claim has been finally denied.

(b) The Personnel Officer receiving the claim will forward same to the person designated to investigate accidents at the station pursuant to § 14.605 within 5 days after receipt.

(c) The employee designated pursuant to § 14.605 will ascertain if such claim is complete in all respects and conduct such investigation as is necessary to establish all facts required to properly evaluate the claim both as to merit and the reasonable amount payable for the loss or damage. Where it is indicated that the claimant may have a potential claim against other than the United States, he will secure a suitable assignment of all right and title to such claim, to the extent the United States makes reimbursement, and the agreement of the claimant to furnish such evidence as may be necessary to pursue such claim. If the potential claim is against a carrier or insurer, he will ascertain that the claimant has filed a timely proper claim and procure evidence thereof. He will also include information concerning any offer of settlement the carrier may have made. The completed investigation, original claim and supporting evidence will be forwarded to the appropriate Chief Attorney.

§ 14.666 Chief attorney responsibility.

(a) The Chief Attorney having jurisdiction will conduct such additional investigation as he deems necessary to establish all facts required. If the claimant has indicated he may have a potential claim for indemnification against other than the United States, the Chief Attorney will ascertain that a suitable assignment, legally enforceable, of all right and title to such claim, to the extent the United States makes reimbursement, and the agreement of the claimant to furnish such evidence as may be necessary to pursue such claim is of record. If such potential claim is against a carrier or insurer, he will ascertain that claimant has filed a timely proper claim against the carrier or insurer and review same for legal sufficiency.

(b) If the claim is for an amount within his jurisdiction, the Chief Attorney will take action thereon in accordance with §§ 14.664 through 14.667. If the claim exceeds an amount within his jurisdiction, the Chief Attorney will forward the original claim with the supporting evidence, the initial investigation report, the original of his investigation report, if any, and a recommendation as to disposition of the claim to the General Counsel.

§ 14.667 Claims payable.

(a) No claim shall be paid unless timely filed in proper form as provided in § 14.665 and the preponderance of the evidence establishes that the loss or damage:

(1) Actually occurred and the amount claimed is reasonable,

(2) Was incident to the employee's service and his possession of the property was reasonable, useful or proper under the circumstances,

(3) Did not occur at quarters occupied within the 50 States or the District of Columbia that were not assigned to the claimant or otherwise provided in kind by the United States.

(4) Was not caused wholly or partly by the negligent act of claimant, his agent, or his employee, and that the claimant has no right to indemnification for his loss or damage from other than the United States, except to the extent that he assigns such right to the United States and agrees to furnish evidence required to enable the United States to enforce such right. In the event he has a right to recovery for the loss or damage from a carrier or insurer he will be required to file a timely claim for such recovery before consideration of his claim against the United States.

(b) No claim for the cost of repair or replacement of personal property of employees damaged or destroyed by patients or domiciliary members while such employees are engaged in the performance of official duties shall be entertained under §§ 14.664 through 14.667, unless claim filed pursuant to 38 U.S.C. 233(a)(5) (§ 14.78 of this chapter) has been finally denied for the reason that such claim did not meet the criteria established by that law.

§ 14.668 Disposition of claims.

(a) *Disallowed claims.* Claimants will be promptly notified of the disallowance of a claim and the reasons therefor.

(b) *Allowed claims*—(1) *Reimbursement in kind.* Where a claim is allowed and it is determined to be to the advantage of the Government, reimbursement will be made in kind. The official authorizing settlement will request the Director, Supply Service, Department of Medicine and Surgery, to procure the necessary article or articles and deliver same to the claimant.

(2) *Reimbursement by check.* The official authorizing settlement will forward allowed claims, other than those requiring reimbursement in kind, to the Finance activity at the Veterans Administration installation where the claim arose. That activity will audit the claim, which if found proper for payment, will be scheduled on VA Form 4-1423, Voucher and Schedule of Payments, and forwarded to the appropriate Regional Disbursing Office for payment.

§ 14.669 Fees of agents or attorneys; penalty.

The Military Personnel and Civilian Employees' Claims Act of 1964 (Public Law 88-558; 78 Stat. 767) was amended by Public Law 89-185 (79 Stat. 789), on September 15, 1965, by adding a new section which provided that no more than 10 percent of the amount paid in settlement of each individual claim submitted and settled under the authority of the Act shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with that claim. Any person violating the provisions of this Act is deemed to be guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Approved: December 27, 1972.

By direction of the Administrator.

[SEAL] FRED B. RHODES,
Deputy Administrator.

Notices

DEPARTMENT OF JUSTICE

Law Enforcement Assistance Administration

[Order 499–72]

OFFICIAL SEAL

Notice of Establishment

By virtue of the authority vested in me by section 509 of title 28 and section 301 of title 5 of the United States Code, I hereby establish the attached seal as the official seal of the Law Enforcement Assistance Administration.

The seal is symbolic of the responsibilities and direction of the Law Enforcement Assistance Administration. The star represents the Law Enforcement agencies that are working diligently to bring crime under control in this country. The balance superimposed upon the star represents true equality in justice that can only be created by the proper balance in the criminal justice system of law enforcement, courts, and corrections at the local, State, and national levels. This is symbolic of the teamwork of the three great subdivisions working together to create an ideal criminal justice system within these United States.

Dated: December 20, 1972.

RICHARD G. KLEINDIENST,
Attorney General.

DEPARTMENT OF THE TREASURY

Bureau of Customs

STAINLESS STEEL WIRE RODS FROM FRANCE

Withholding of Appraisement Notice

Information was received on December 9, 1971, that stainless steel wire rods from France were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of February 17, 1972, on page 3553. The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States.

Pursuant to section 201(b) of the Act (19 U.S.C. 160(b)), notice is hereby given that there are reasonable grounds to believe or suspect that the purchase price (section 203 of the Act; 19 U.S.C. 162) of stainless steel wire rods from France is less, or is likely to be less, than the foreign market value (section 205 of the Act; 19 U.S.C. 164).

Statement of reasons. The information before the Bureau tends to indicate that the probable basis of comparison for fair value purposes will be between purchase price and the adjusted home market price of such or similar merchandise.

Preliminary analysis suggests that purchase price will probably be calculated by deducting from the U.S. f.o.b. inland carrier price, or the delivered customer's premises price, as applicable, U.S. inland freight, brokerage fees, U.S. Customs duties, loading charges, ocean freight, insurance, shipping charges, and inland freight in the home market, as appropriate.

The adjusted home market price will probably be based either on a weighted-average of delivered prices to home market customers or on an f.a.s. producer's warehouse price, as applicable, with a deduction for inland freight. Adjustments to this price will probably be made for differences in packing, credit terms, and commissions.

Using the above criteria, there are reasonable grounds to believe or suspect that purchase price will be lower than the adjusted home market price.

Customs officers are being directed to withhold appraisement of stainless steel wire rods from France in accordance with § 153.48, Customs regulations (19 CFR 153.48).

In accordance with §§ 153.32(b) and 153.37, Customs regulations (19 CFR 153.32(b), 153.37), interested parties may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any request that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 2100 K Street NW., Washington, DC 20226, in time to be received by his office by January 18, 1973.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than February 7, 1973.

This notice, which is published pursuant to § 153.34(b), Customs regulations (19 CFR 153.34(b)), shall become effective January 8, 1973. It shall cease to be effective July 8, 1973, unless previously revoked.

[SEAL] LEONARD LEHMAN,
Acting Commissioner of Customs.

Approved: January 4, 1973.

EUGENE T. ROSSIDES,
Assistant Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Idaho 2922; Powersite Cancellation]

IDAHO

Order Providing for Opening of Public Lands

DECEMBER 27, 1972.

By published notice (37 FR 226, Nov. 22, 1972) the U.S. Geological Survey canceled Powersite Classification No. 365 of August 10, 1944, as to the lands described therein.

The purpose of this order is to restore to the operation of applicable public land laws the public lands involved in that notice.

Under the authority delegated by the Bureau of Land Management Order No. 701, dated July 23, 1964 (29 FR 10526), as amended, it is ordered as follows:

1. Beginning at 10 a.m., March 15, 1973, the following described lands are restored to disposition under applicable public land laws, subject to valid existing rights, withdrawals and classifications:

BOISE MERIDIAN, IDAHO

T. 6 S., R. 6 E.,
Sec. 1, SW¼NW¼;
Sec. 2, N½SE¼.

The areas described aggregate 120 acres acres in Owyhee County, Idaho.

2. Lands described as N½S½, Section 5, T. 6 S., R. 6 E., Boise Meridian, are also included in Powersite Classification No. 275, but are patented lands.

VINCENT S. STROBEL,
Chief, Branch of L&M Operations.

Office of Oil and Gas

NATIONAL PETROLEUM COUNCIL

Notice of Cancellation of Meeting

The meeting of the Technical Subcommittee of the National Petroleum Council Committee on Petroleum Resources Under the Ocean Floor, January 9, 1973, 9:30 a.m. to 5:30 p.m., NPC Conference Room, 1625 K St., NW., Washington, D.C., is cancelled. Notice of this meeting was published in FR Doc. 72–22351, page 28768, on December 29, 1972.

DAVID R. OLIVER,
Acting Director.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

[NTIS Order EIS–72–5778–D]

PROPOSED COMMITMENT OF ACREAGE TO NEW BEET SUGAR PRODUCING AREA, HILLSBORO, N. DAK.

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Agricultural Stabilization and Conservation Service, Department of Agriculture, has prepared a draft environmental statement for the Proposed Commitment of Acreage to a New Beet Sugar Producing Area in the vicinity of Hillsboro, N. Dak., USDA–ASCS–ES (Adm.) 73–2. The 1971 amendments to the Sugar Act of 1948, in order to make acreage available for the growth and expansion of the beet sugar industry, provides that the Secretary of Agriculture shall allocate as needed the acreage required to yield not more than a total of 100,000 tons, raw value, of sugar for localities to be served by new or substantially enlarged existing sugar beet processing facilities. Allocations are to be for a period of 3 years and limited for any one processing facility to the acreage required to yield a maximum of 50,000 short tons, raw value, of sugar and a minimum of 25,000 short tons, raw value.

The environmental statement applies to the growing of approximately 30,000 acres of sugar beets in the Red River Valley of North Dakota and Minnesota near Hillsboro, N. Dak., in Traill County. The sugar beets will be planted on mostly dryland farming acreage used in rotation with other crops (primarily wheat, corn, and soybeans), the acreage having previously been devoted to such crops.

This draft environmental statement was filed with the Council on Environmental Quality on December 15, 1972.

Copies are available for inspection at USDA, Agricultural Stabilization and Conservation Service, Room 3658, 14th and Independence Avenue SW., Washington, D.C. 20250.

Copies may be obtained from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151. Please refer to the name and number of the statement above when ordering.

Comments concerning the proposed action and request for additional information should be addressed to the Director, Sugar Division, Agricultural Stabilization and Conservation Service, Room 3752, 14th and Independence Avenue SW., Washington, D.C. 20250. Comments should be received by February 7, 1973, in order to be considered in the preparation of the final environmental statement.

Signed at Washington, D.C., on December 29, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

[NTIS Order EIS–72–5777–D]

PROPOSED COMMITMENT OF ACREAGE TO NEW BEET SUGAR PRODUCING AREA, WAHPETON, N. DAK.

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Agricultural Stabilization and Conservation Service, Department of Agriculture, has prepared a draft environmental statement for the Proposed Commitment of Acreage to a New Beet Sugar Producing Area in the vicinity of Wahpeton, N. Dak., USDA–ASCS–ES (Adm.) 73–3. The 1971 amendments to the Sugar Act of 1948, in order to make acreage available for the growth and expansion of the beet sugar industry, provides that the Secretary of Agriculture shall allocate as needed the acreage required to yield not more than a total of 100,000 tons, raw value, of sugar for localities to be served by new or substantially enlarged existing sugar beet processing facilities. Allocations are to be for a period of 3 years and limited for any one processing facility to the acreage required to yield a maximum of 50,000 short tons, raw value, of sugar and a minimum of 25,000 short tons, raw value.

The environmental statement applies to the growing of approximately 30,000 acres of sugar beets in the Red River Valley of North Dakota and Minnesota near Wahpeton, N. Dak., in Dwight Township. The sugar beets will be planted on mostly dryland farming acreage used in rotation with other crops (primarily wheat, corn, and soybeans), the acreage having previously been devoted to such crops.

This draft environmental statement was filed with the Council on Environmental Quality on December 15, 1972.

Copies are available for inspection at USDA, Agricultural Stabilization and Conservation Service, Room 3658, 14th and Independence Avenue SW., Washington, D.C. 20250.

Copies may be obtained from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151. Please refer to the name and number of the statement above when ordering.

Comments concerning the proposed action and request for additional information should be addressed to the Director, Sugar Division, Agricultural Stabilization and Conservation Service, Room 3752, 14th and Independence Avenue SW., Washington, D.C. 20250. Comments should be received by February 7, 1973, in order to be considered in the preparation of the final environmental statement.

Signed at Washington, D.C., on December 29, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

Soil Conservation Service

OGUNQUIT SAND DUNE LAND STABILIZATION MEASURE THRESHOLD TO MAINE PROJECT, MAINE

Notice of Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Soil Conservation Service, Department of Agriculture, has prepared a draft environmental statement for the Ogunquit Sand Dune Land Stabilization Measure USDA–SCS–ES–RD–(ADM)–73–1–(D).

The environmental statement concerns a plan of stabilizing a 28-acre sand dune in the Ogunquit Village area, York County, Maine. The planned works of improvement include restoring and stabilizing a 28-acre barrier dune through the placement of sand, plantings of vegetation, and the installation of erosion and pedestrian control measures.

This draft environmental statement was filed with CEQ on December 29, 1972.

Copies are available for inspection during regular working hours at the following locations:

USDA, Soil Conservation Service, Washington Office, South Agriculture Building, Room 5105 A, 12th Street and Independence Avenue SW., Washington, D.C. 20250.
USDA, Soil Conservation Service, Federal Office Building, Orono, Maine 04473.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151 for $3 each. Please refer to the name and number of statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the Council on Environmental Quality Guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Donald T. Dinsmore, State Conservationist, USDA, Federal Office Building, Room 202A, Orono, Maine 04473.

V 38 - 4 JAN 8 73 XUM

Comments must be received within 30 days of the date of publication of this notice in order to be considered in the preparation of the final environmental statement.

KENNETH E. GRANT,
Administrator,
Soil Conservation Service.

DECEMBER 29, 1972.

DEPARTMENT OF COMMERCE

Maritime Administration

[Docket No. S-321]

SEA TANKERS, INC.

Notice of Application

Notice is hereby given that application has been filed under the Merchant Marine Act of 1936, as amended, for operating-differential subsidy with respect to bulk cargo carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics, to expire on June 30, 1973 (unless extended only for subsidized voyages in progress on that date). Inasmuch as the below listed Applicant, and/or related persons or firms, employ ships in the domestic intercoastal or coastwise service, written permission of the Maritime Administration under section 805 (a) of the Merchant Marine Act, 1936, as amended, will be required for each such Applicant if its application for operating-differential subsidy is granted.

The following Applicant has requested permission involving the domestic intercoastal or coastwise services described below:

Name of applicant. Sea Tankers, Inc. (Sea Tankers).

Description of domestic service and vessels. The applicant, Sea Tankers, is a subsidiary of Overseas Shipholding Group, Inc. (Shipholding), whose subsidiaries have engaged in domestic coastwise, intercoastal and noncontiguous petroleum trades with tanker vessels, and the applicant has requested written permission for it and its related companies to continue such operations. The following tanker vessels are owned by the applicant and related companies, all subsidiaries of Shipholding:

Ship	*Owner*
Overseas Alaska	Intercontinental Bulktank Corp.
Overseas Alice	Do.
Overseas Aleutian	Ocean Transportation Co., Inc.
Overseas Ulla	Do.
Overseas Artic	Overseas Bulktank Corp.
Overseas Valdez	Do.
Overseas Joyce	Overseas Oil Carriers, Inc.
Overseas Anchorage	Globe Seaways, Inc.
Overseas Vivian	Ocean Tankships Corp.
Overseas Rose (Alpha Reserve)	Sea Tankers.
Beta Reserve	Do.
Overseas Evelyn (Gamma Reserve)	Do.

Written permission is now required by the applicant, Sea Tankers, notwithstanding that a voyage in the proposed service for which subsidy is sought would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

Interested parties may inspect this application in the Office of the Secretary, Maritime Administration, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20235.

Any person, firm or corporation having any interest (within the meaning of section 805(a)) in any application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must, by close of business on January 12, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for 10 a.m., January 16, 1973, in Room 4896, Department of Commerce Building, 14 and E Streets NW., Washington, D.C. 20235. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the Act.

By order of the Maritime Administration.

Dated: January 4, 1973.

JAMES S. DAWSON, JR.,
Secretary.

[FR Doc.73-414 Filed 1-5-73;8:45 am]

Office of the Secretary

[Dept. Organization Order 30-3A]

PATENT OFFICE

Organization and Functions

This order effective December 15, 1972, supersedes the material appearing at 27 FR 11469 of November 21, 1962.

SECTION 1. *Purpose.* This order delegates authority to the Commissioner of Patents and prescribes the functions of the Patent Office.

SEC. 2. *Status and line of authority.* .01 The Patent Office is hereby continued as a primary operating unit of the Department of Commerce. First established as an independent bureau under the direction of a Commissioner of Patents by the general revision of patent laws enacted by Congress July 4, 1836 (5 Stat. 117), it became a bureau of the Department of Commerce by Executive Order of April 1, 1925, in accordance with the authority contained in the act of February 14, 1903 (32 Stat. 830). When the patent laws were codified as Title 35, United States Code, effective January 1, 1953, the Patent Office was continued as an office in the Department of Commerce.

.02 The Commissioner of Patents (hereinafter called the Commissioner), who is appointed by the President by and with the advice and consent of the Senate, shall be the head of the Patent Office. He shall be principally assisted by a Deputy Commissioner and four assistant commissioners, whose titles and status are specified below. The First Assistant Commissioner (Deputy Commissioner) and the first two assistant commissioners are provided for by 35 U.S.C. 3 and are appointed by the President by and with the advice and consent of the Senate.

a. The Deputy Commissioner (First Assistant Commissioner under 35 U.S.C. 3).

b. The Assistant Commissioner for Patents (an assistant commissioner under 35 U.S.C. 3).

c. The Assistant Commissioner for Trademarks (an assistant commissioner under 35 U.S.C. 3).

d. The Assistant Commissioner for Legal Affairs.

e. The Assistant Commissioner for Administration.

.03 The Deputy Commissioner or, in the event of a vacancy in that office, the assistant commissioner appointed under 35 U.S.C. 3 who is senior in date of appointment, shall act as Commissioner during a vacancy in that office until a Commissioner is appointed and takes office. In the absence of the Commissioner, the Deputy Commissioner shall act as Commissioner. If the Deputy Commissioner is likewise absent or that office is vacant, one of the assistant commissioners appointed under 35 U.S.C. 3 or the Assistant Commissioner for Legal Affairs or the Solicitor of the Patent Office shall act as Commissioner in an order of precedence prescribed by the Commissioner.

.04 The Commissioner shall report and be responsible to the Assistant Secretary for Science and Technology.

SEC. 3. Delegation of authority. .01 Pursuant to the authority vested in the Secretary of Commerce by 35 U.S.C. 3 and Reorganization Plan No. 5 of 1950, the functions of the Patent Office and its officers specified in Title 35 of the United States Code, as amended, are hereby vested in the Secretary of Commerce and redelegated to the Commissioner of Patents.

.02 Pursuant to the authority vested in the Secretary of Commerce by law, the Commissioner of Patents is hereby delegated authority to perform the following functions vested in the Secretary of Commerce.

a. The functions in Title 15, Chapter 22 of the United States Code, which pertain to trademarks.

b. The functions in Executive Order 10096 of January 23, 1950, and the Executive Order 10930 of March 24, 1961, which pertain to inventions made by Government employees.

c. The functions in 42 U.S.C. 2181 and 2182, which pertain to inventions relating to atomic weapons, and in 42 U.S.C. 2457, which pertain to property rights in inventions made in performance of work under contract for the National Aeronautics and Space Administration.

d. Such functions under other authorities of the Secretary of Commerce as are applicable to performing the functions assigned in this order.

.03 Exercise of the functions delegated in paragraphs .01 and .02 of this section shall be subject to such policies or directives as may be prescribed by the Secretary of Commerce or the Assistant Secretary for Science and Technology.

.04 The Commissioner of Patents may, except as precluded by law or regulation, redelegate his authority to employees of the Patent Office subject to such conditions in the exercise of the delegated authority as he may prescribe.

SEC. 4. *Functions.* The Patent Office shall perform the following functions:

.01 Examine applications for patent to determine if they meet the requirements of law for the issuance of patents and, upon such determination, granting patents.

.02 Administer special laws and regulations as to secrecy of certain inventions, licenses for foreign filing, and those relating to atomic energy and space technology.

.03 Decide the ownership of patents and the rights to inventions made by Government employees, as provided by Executive Orders 10096 and 10930.

.04 Provide for the publication, storage, dissemination, and exchange of patents and related documentation.

.05 Maintain systems and facilities providing appropriate access to United States and foreign patents and other technical literature for use of the examiners and the public.

.06 Examine applications for the registration of trademarks to determine their entitlement to registration under the law; give public notice of trademarks allowed for registration and publish registered trademarks; maintain the principal and supplemental registers of trademark registrations, and provide for public access to such registers and related trademark records.

.07 Issue patents and certificates of trademark registration.

.08 Reissue defective patents and issue certificates of correction of patents and trademark registrations.

.09 Maintain records as to proprietary interests in patents and trademarks and applications therefor.

.10 Carry on or authorize studies and programs, separately or in coordination with other United States, foreign, and international agencies, regarding domestic and international patent and trademark law.

.11 Perform other functions required, or which the Commissioner deems necessary and proper, in exercising the authority delegated herein.

Effective date: December 15, 1972.

GUY W. CHAMBERLIN, JR.,
Acting Assistant Secretary
for Administration.

[FR Doc.73-320 Filed 1-5-73;8:45 am]

[Dept. Organization Order 30-3B]

PATENT OFFICE

Organization and Functions

This order effective December 15, 1972, supersedes the material appearing at 36 FR 9078 of May 19, 1971.

SECTION 1. *Purpose.* This order prescribes the organization and assignment of functions within the Patent Office. Department Organization Order 30-3A prescribes the scope of authority and functions.

S53. 2. *Organization structure.* The principal organization structure and line of authority of the Patent Office shall be as depicted in the attached organization chart. A copy of the organization chart is attached to the original document on file in the Office of the Federal Register.

SEC. 3. *Office of the Commissioner.* The Commissioner determines the policies and directs the programs of the Patent Office and is responsible for the conduct of all activities of the Patent Office. He is principally assisted by a Deputy Commissioner and four Assistant Commissioners who shall have the main duties as specified below:

a. The Deputy Commissioner (First Assistant Commissioner under 35 U.S.C. 3) shall assist the Commissioner in the direction of the Patent Office with immediate responsibility for the Office of Petitions and shall perform the duties of the Commissioner in the latter's absence.

b. The Assistant Commissioner for Patents (an assistant commissioner under 35 U.S.C. 3) shall provide administrative and policy direction for the patent examining and related operations which consist of the organizational elements enumerated in section 5 of this order. He is assisted by a Deputy Assistant Commissioner who shall, among other duties, have immediate responsibility for the patent examining groups and shall perform the duties of the Assistant Commissioner during the latter's absence.

c. The Assistant Commissioner for Trademarks (an assistant commissioner under 35 U.S.C. 3) shall provide administrative and policy direction to the trademark registration and related operations which consist of the organizational elements enumerated in section 6 of this order.

d. The Assistant Commissioner for Legal Affairs shall be the chief law officer of the Patent Office and as applicable shall provide administrative and policy direction to the organizational elements enumerated in section 7 of this order. Pursuant to Department Organization Order 10-6, he shall be subject to the overall authority of the Department's General Counsel with respect to legal and legislative matters involving the Patent Office, other than in connection with the issuance of patents or the registration of trademarks.

e. The Assistant Commissioner for Administration shall be the principal advisor to the Commissioner on the formulation and application of management policies and shall provide administrative, management, and operational support services to components of the Patents Office. In addition, he shall provide administrative and policy direction to a staff assigned to his office as well as to the organizational elements enumerated in section 8 of this order. He shall be assisted by a Deputy Assistant Commissioner who shall perform the duties of the Assistant Commissioner during the latter's absence.

SEC. 4. *Offices reporting to the Commissioner.* .01 The Offices of Petitions shall receive, docket, maintain records, and take other appropriate action with respect to petitions to the Commissioner submitted under applicable law and regulations; assign petitions to appropriate officials for decision or recommend and prepare decisions for review and approval by the Deputy Commissioner; and recommend changes in office policy, practices, and procedures, where the need for such appears evident from the records of the office.

.02 The Office of Government Inventions and Patents shall administer Executive Order 10930 and related regulations, including the rendering of final decisions on the ownership of patents and the rights to inventions made by Government employees, and advise the Commissioner on matters involving the Committee on Government Patent Policy (of the Federal Council for Science and Technology). It shall also conduct research, liaison, and coordinate functions needed to carry out Executive Order 10096 and to advise the Commissioner on Committee matters; provide executive secretariat support to the Committee; and assist in the development and formulation, to the extent appropriate, of a uniform Government-wide policy.

.03 The Office of Advanced Systems Development shall apply analytical basic research techniques to the development of new machine-assisted experimental search, retrieval, and display systems; to the exploration and application of advanced technology for the betterment of operating systems; and to increasing

V38-4 JAN 8 73 XUM

the effectiveness of technical information dissemination and accessing measures. This work is directed primarily to providing solutions to hitherto unresolved problems and to the development of experimental or test applications, or simulations of original techniques or operations. It shall assist in the installation, pilot use, and evaluation of experimental systems in operating environments.

.04 The Office of Information Services shall advise and represent the Commissioner on information matters; conduct programs fostering public understanding of the American patent system and the functions, services and administrative publications of the Patent Office; develop publication policies; provide direction and assistance in developing new and revised publications; and assure conformity with policies, regulations, and standards concerning publications and publication practices.

SEC. 5. *Offices reporting to the assistant Commissioner for patents.* .01 The Office of Patent Program Control shall develop procedures for and establish quality, quantity, and other performance standards relating to the conduct of the patent examination and classification functions; establish program activity targets and continually evaluate status against program objectives; provide training to examiners in patent practices and procedures; and monitor compliance with examination and classification standards and procedures.

.02 The Office of Patent Classification shall develop, implement, and maintain subject matter classification systems for patent search files of prior art; evaluate and adapt experimental or other search systems developed elsewhere; determine requirements for and initiate procurement of foreign patent and literature abstracting services for use by examiners; and provide technical specifications, guidance, advice, and assistance to the contracting officer in such procurements; coordinate the classification of U.S. and foreign patent documents and nonpatent literature; and participate in developing and fostering harmonization of the United States and the International Patent Classification systems.

.03 The Examining Groups shall examine applications for patents to ascertain if the applicants are entitled to patents under the law and grant patents to those so entitled. Each examining group shall perform this function for patent applications falling within the generic category assigned to it. The number of examining groups and the coverage of the generic categories shall be determined by the Commissioner.

SEC. 6. *Offices reporting to the Assistant Commissioner for Trademarks.* .01 The Office of Trademark Program Control shall develop guidelines governing trademark examining procedures; establish program activity targets and continually evaluate status against program objectives; and provide instruction in trademark practice and procedures and coordinate trademark administrative support activities.

.02 The Trademark Trial and Appeal Board shall be responsible for hearing and deciding adversary proceedings involving interfering applications, oppositions to registration, cancellations, and concurrent use proceedings; and for hearing and deciding appeals from final refusals of the trademark examiners to allow the registration of trademarks.

.03 The Trademark Examining Operation shall be responsible for the classification of trademark applications into classes of goods and services, the examination and processing of these applications, and the registration of trademarks, service marks, and certification marks; and maintain the principal and supplemental registers of trademarks.

SEC. 7. *Offices reporting to the Assistant Commissioner for Legal Affairs.* .01 The Office of the Solicitor shall handle all litigation to which the Commissioner is a party and provide other legal services, including advice and assistance on legislative matters, and maintenance of the law library.

.02 The Examiners-in-chief sitting as a Board of Patent Appeals shall be responsible for hearing and deciding appeals from adverse decisions of examiners upon applications for patents.

.03 The Board of Patent Interferences shall conduct patent interference proceedings and make final determinations in the Patent Office as to priority of invention. The Board shall also hear and decide questions concerning property rights in inventions in the atomic energy and space fields brought before it under the provisions of sections 2182 and 2456 (d) and (e) of title 42, U.S.C.

.04 The Office of Legislation shall develop recommendations and advise policy and action concerning matters which may require changes in the patent and trademark laws; review and prepare analysis of bills or drafts of legislation concerning patent or trademark matters received for technical appraisal; prepare legislative proposals and, after appropriate clearance, draft legislation and supporting documentation for clearance with the Department's Office of the General Counsel and the Office of Management and Budget, for consideration by the Congress; and maintain liaison with patent and trademark bar associations, industry, and others concerned with proposed and pending legislation.

.05 The Office of International Affairs shall coordinate the development of policy and program recommendations or positions respecting international patent and trademark affairs, including all proposed new or modified agreements under the Paris Union, Patent Cooperation Treaty, or like treaties; maintain liaison in such matters with the Office of the Secretary, the Department of State, and concerned elements of the public; and participate in negotiating patent and trademark matters in establishing international agreements and in the implementation of programs affecting Patent Office commitments or responsibilities in these areas.

SEC. 8. *Offices reporting to the Assistant Commissioner for Administration.* .01 Management Planning Organizations:

a. The Office of Budget shall formulate, interpret, and execute budgetary and fiscal policies; establish and maintain a comprehensive budget program collaborating with cost center officials in developing budget and fiscal plans; develop and present budget requests; allocate and maintain budgetary accountability of available funds; maintain external liaison in budgetary matters; and review and evaluate the fulfillment of budget-based program commitments.

b. The Office of Management and Organization shall plan and conduct studies designed to improve organization, methods, procedures, workflow, work measurement, managerial techniques, and resource utilization, or otherwise increase efficiency, effectiveness and economy of operations; develop and manage a system for the issuance of internal administrative orders and instructions; promote development of the Patent Office management improvement program and coordinate the collection, review and submission of reportable plans and accomplishments thereon; coordinate a program for the management and control of external reports; and make special studies as required.

c. The Office of Program Planning and Evaluation shall formulate plans for and coordinate the development of Patent Office-wide long and short range program objectives within the framework of budgetary constraints; define, project, and allocate the manpower and other resources required to achieve Patent Office-wide objectives; develop and monitor a management information system which prescribes code structures for and consolidates all administrative management systems into a single integrated data base to provide information designed to measure performance and achievement against planned objectives; and develop and issue a wide variety of timely internal analytical and interpretive reports to the managers of the Patent Office.

.02 Public service organizations:

a. The Office of Publications shall schedule and manage the processing and movement of allowed patent application files in procuring the creation of full patent text machine language data base and the composition and printing of weekly patent issues and related announcements in the Official Gazette; provide requisition and scheduling services for trademark publications; monitor the quality or performance by contributing sources and maintain close liaison with U.S. Government Printing Office; and prepare and issue patent grants and periodic publications of patent indexes.

b. The Office of Patent and Trademark Services shall provide the materials and services offered directly to the public, many of which are provided on a fee basis. These shall include recording instruments that transfer property rights to patents and trademarks; furnishing copies of patents, trademark registrations, and office records to examiners and others in the Office, as well as to the public; providing drafting services; and maintaining appropriate collections of pertinent technical and scientific information such as United States and foreign patents, periodicals, books, and other publications for use by the public. It shall also conduct an initial examination of patent applications for compliance with law and regulation as to form and certain matters of factual content; grant or deny a filing date based on such examination and forward to the Examining Groups those granted a filing date; acknowledge the acceptance or rejection of applications for examination; originate documentation of pending applications; initially assign accepted applications to units of the examining groups for examination; and maintain records on the status and location of all applications.

.03 Administrative service organizations:

a. The Office of Computer Services shall be responsible for providing data processing services to other elements of the Patent Office. This shall include the conduct of systems analysis and equipment evaluation studies directly related to the design and development of systems and programs for applications of computer techniques; preparation or procurement and testing of computer programs, and supplemental data processing services; operation of all general purpose ADP equipment including that which may be approved for use within another organization unit as an integral part of its operations; and maintenance of a comprehensive library of programs, including those developed or procured by other organization units.

b. The Office of Finance shall develop and maintain the financial accounting system of the Patent Office, perform accounting operations for the revenue, trust funds, and appropriation of the Patent Office, including maintenance of general accounts and related fiscal records, preparation of financial statements and reports, audit and certification of vouchers for payment, issuance of deposit account statements, initiation of action to collect amounts due the Patent Office, and administration of the payroll system and related employee accounts; and provide financial advice and opinions.

c. The Office of General Services shall plan and administer a broad Office-wide program of general services, including procurement control; property, space, and facilities management; communications, records, files, mail, and forms management; administrative printing; and clearance of all requirements involving contractual procurements, including liaison with the Department, in connection therewith.

d. The Office of Personnel shall administer activities relating to recruitment, placement, employee relations, equal employment opportunity programs for employees, training and career development, incentive awards, performance rating, position classification and wage administration, group-management relations, and various employee benefit programs.

.04 The Office of Technology Assessment and Forecast shall continually assess the status of technological activities in all countries; compare inventive activity in the United States relative to other nations; and forecast developments on a world-wide basis.

Effective date: December 15, 1972.

GUY W. CHAMBERLAIN, JR.,
Acting Assistant Secretary for Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

OBSTETRICS AND GYNECOLOGY ADVISORY COMMITTEE

Notice of Meeting

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Public Law 92-463, 86 Stat. 770-776), the Food and Drug Administration announces the following public advisory committee meeting and other required information in accordance with provisions sets forth in section 10(a) (1) and (2) of the Act:

Committee Name	Date/time/place	Type of meeting and contact person
Obstetrics and Gynecology Advisory Committee.	Jan. 26, 9 a.m., Conference Room G, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.	Open—9 a.m. to 10 a.m., closed after 10 a.m.; Victor Berliner, M.D., Room 14B-04, 5600 Fishers Lane, Rockville, MD 20852, 301—443-3492.

Purpose. Advises the Commissioner of Food and Drugs regarding safety and efficacy of drugs employed in obstetrics and gynecology.

Agenda. Postcoital use of DES for contraception; biometric investigations for causal relationship between use of DES during pregnancy and incidence of vaginal cancer in offspring.

Agenda items are subject to change as priorities dictate.

During the open session shown above, interested persons may present relevant information or views orally to any committee for its consideration. Information or views submitted to any committee in writing before or during a meeting shall also be considered by the committee.

A list of committee members and summary minutes of meetings may be obtained from the contact person for the committee both for meetings open to the public and those meetings closed to the public in accordance with section 10(d) of the Federal Advisory Committee Act and the Secretary's notice of determination of September 27, 1972, published in the FEDERAL REGISTER of October 5, 1972 (37 FR 20995).

Dated: January 2, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

Office of Education

NATIONAL ADVISORY COMMITTEE ON THE EDUCATION OF SPANISH AND MEXICAN AMERICANS

Notice of Public Meeting

Notice is hereby given, pursuant to Executive Order 11671, that the next meeting of the National Advisory Committee on the Education of Spanish and Mexican Americans will be held on January 10, 1973, at 9 a.m., local time, in Room 1160, FOB-6, 400 Maryland Avenue SW., Washington, D.C.

The National Advisory Committee on the Education of Spanish and Mexican Americans is established under section 1 of Executive Order 11007, U.S.C. 20. The Committee is established to advise the Commissioner of Education on problems central to the education of Spanish speaking children and adults, particularly those of bilingual, bicultural families.

The meeting of the Committee shall be open. The proposed agenda includes a review of subcommittees reports for the total annual report to the Commissioner of Education. Records shall be kept of all committee proceedings (and shall be available for public inspection at the Office for Spanish Speaking American Affairs, located in Room 1155, FOB-6, 400 Maryland Avenue SW., Washington, D.C.).

Signed in Washington, D.C., on December 29, 1972.

GILBERT CHAVEZ,
Director for Spanish Speaking American Affairs.

NATIONAL ADVISORY COUNCIL ON VOCATIONAL EDUCATION

Notice of Public Meeting

Notice is hereby given, pursuant to Executive Order 11671, that the next meeting of the National Advisory Council on Vocational Education will be held on January 12, 1973, from 9 a.m. to 5 p.m. local time, and on January 13, 1973, from 9 a.m. to 12 noon, local time, at the Hotel Monteleon, 214 Royal Street, New Orleans, LA.

The National Advisory Council on Vocation Education is established under section 104 of the Vocational Education amendments of 1968 (20 U.S.C. 1244). The Council is directed to advise the Commissioner of Education concerning

V 38 - 4 JAN 8 73 XUM

the administration of, preparation of, general regulations for, and operation of, vocational education programs supported with assistance under the act, review the administration and operation of vocational education programs under the act, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations to the Secretary of HEW for transmittal to the Congress; and conduct independent evaluation of programs carried out under the act and publish and distribute the results thereof.

The meetings of the Council shall be open to the public. The proposed agenda includes:

Report on Project Baseline;
Report on "Occupational Education 1976";
Report on Conference on Continuing Education as a National Capital Investment by Herbert E. Striner;
Report on the Status of the Indian Education Study;
Office of Education Report on the Organizational Structure of the Deputyship for Occupational Education;
Presentation by Louisiana Advisory Council; and
Presentation by Louisiana State Government Officials on Occupational Education in Louisiana.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the Council's Executive Director, located in Suite 852, 425 13th Street NW., Washington, DC 20004.

Signed at Washington, D.C., on December 21, 1972.

CALVIN DELLEFIELD,
Executive Director.

Office of the Secretary

REVIEWING AUTHORITY (CIVIL RIGHTS)

Delegation of Authority Regarding Certain Administrative Proceedings

Section IB of the Delegation of Authority to the Reviewing Authority (Civil Rights) is amended to read as follows:

B. *Duties and Functions in regard to Administration of Executive Order 11246.* The Reviewing Authority (Civil Rights) shall have the authority to carry out the responsibilities of the "agency head" described in 41 CFR 60-1.26(b)(1), 41 CFR 60-1.26(b)(2)(v) as it relates to the imposition of sanctions where the contractor or subcontractor's answer does not raise issues of fact or law or where the contractor or subcontractor contests the allegations of the notice other than by filing an answer, and 41 CFR 60-1.26(b)(2)(vi), in connection with the administration of the provisions of Chapter 60 ("Office of Federal Contract Compliance, Equal Employment Opportunity, Department of Labor") of Title 41 of the Code of Federal Regulations (41 CFR Chapter 60); with the exceptions that the Secretary of Health, Education, and Welfare as agency head, shall retain the authority to prescribe procedural rules pursuant to 41 CFR 60-1.26(b)(1) and that decisions by the Reviewing Authority may be reviewed by the Secretary as provided by 45 CFR Part 82. The Reviewing Authority (Civil Rights) shall have the authority to convene hearings, to designate hearing officers, to select the time and place for hearings, to render final decisions in formal hearings held pursuant to 41 CFR 60-1.26(b) and to take actions consistent with the authority delegated to it.

Dated: December 28, 1972.

ELLIOT L. RICHARDSON,
Secretary.

DEPARTMENT OF TRANSPORTATION

Hazardous Materials Regulations Board

TRANSPORTATION OF HAZARDOUS MATERIALS

Special Permits Issued

Pursuant to Docket No. HM-1, rulemaking procedures of the Hazardous Materials Regulations Board, issued May 22, 1968 (33 FR 8277) 49 CFR 170, following is a list of new DOT Special Permits upon which Board action was completed during December 1972:

Special permit No.	Issued to—Subject	Mode or modes of transportation
6690	Shippers registered with this Board to ship a gas generator, and certain compressed gases in an inflator assembly patterned after DOT Specification 39.	Highway, rail Passenger-carrying aircraft, cargo only aircraft and cargo vessel.
6691	Union Carbide Corp., New York, N.Y., to ship compressed gases as prescribed in § 173.34(E)(15) except cylinders may be older than 35 years.	Highway, rail, passenger-carrying aircraft, cargo only aircraft, and cargo vessel.
6692	Shippers registered with this Board to ship a gas generator and argon-helium in an inflator assembly patterned after DOT Specification 39.	Highway.
6694	Intsel Corp., New York, N.Y., and Ugine Kuhlmann of America, Inc., New York, N.Y., to ship dichlorodifluoromethane in a non-DOT specification portable tank.	Highway, cargo vessel.
6695	Intsel Corp., New York, N.Y., and Ugine Kuhlmann of America, Inc., New York, N.Y., to ship monochlorodifluoromethane in a non-DOT specification portable tank.	Highway, cargo vessel.
6696	Trojan-U.S. Powder, Allentown, Pa., to ship surplus trinitrotoluene (TNT) in non-DOT specification fiberboard boxes built in compliance with military specification PPP-B-636.	Highway.
6698	Shippers registered with this Board to ship fissile and large quantities of radioactive materials, n.o.s. in NFS Fuel Cask, Model NFS-4.	Highway.
6699	Shippers registered with this Board to ship liquid caustic soda in DOT 111A100W1 tank car tanks having insulation covered with an elastomeric coating instead of a metal jacket.	Rail.
6700	Shippers registered with this Board to ship certain corrosive liquids in non-DOT specification reusable, molded, laminated polyethylene containers of 55-gallon capacity.	Highway, rail, cargo vessel.
6701	Shippers registered with this Board to ship hexafluoropropylene oxide in DOT 110A500-W tanks.	Highway, rail.
6705	Shippers registered with this Board to ship corrosive liquids in DOT 12B fiberboard boxes sealed with a specified tape.	Highway.

Following is a list of requests for special permits which were denied during December 1972:

Denied—Subject

1. Request by FMC Corp., New York, N.Y., for a special permit to ship phosphorous in rebuilt tank cars exceeding total car gross weight limitation specified in 49 CFR 179.13.

ALAN I. ROBERTS,
Secretary.

[Dockets Nos. 21446, 21447; Order 73-1-9]

HUGHES AIRWEST

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 3d day of January 1973.

By Order 69-12-94, dated December 23, 1969, the Board authorized Hughes Airwest (Airwest), to suspend service at Sun Valley-Hailey-Ketchum (Sun Valley), and Burley-Rupert (Burley), Idaho, for a period of 3 years. The Board provided that the suspension authority would terminate if an air taxi operator failed to provide at least one daily round trip between Sun Valley and Burley, on the one hand, and Boise and Twin Falls, on the other hand.

On October 20, 1972, Airwest filed an application for renewal of its suspension authorization at Sun Valley and Burley for an additional 3-year period.[1] In support of its application Airwest alleges, inter alia, that the factors which formed the basis for the Board's decision in 1969 are still applicable; in addition, there are presently no airports available to serve Sun Valley and Burley capable of accommodating aircraft of the size operated by the carrier; and that the acquisition of small aircraft capable of serving those points would be inordinately expensive and uneconomical.

No answers to Airwest's application have been filed.

Upon consideration of the pleadings and all the relevant facts, we have tentatively decided to authorize Airwest to suspend service at Sun Valley and Burley for an additional 3-year period, conditioned upon provision of replacement service by Trans Magic Airlines, an air taxi operator, subject to essentially the same conditions as are presently in effect. We have tentatively concluded that the suspension/substitution arrangement at Sun Valley and Burley continues to be in the public interest from an overall transportation standpoint.[2]

We have also examined the facts presented herein in light of findings in a recent court case[3] involving air taxi replacement services where the court indicated that the Board should consider whether the statutory conditions for exemption from certification continue to exist. As discussed below, we tentatively find that, with respect to Trans Magic, the statutory conditions and guidelines for exemption from certification continue to exist.[4]

Trans Magic, which provides commuter replacement services at Sun Valley and Burley, has conducted air taxi operations since February 17, 1969. As of December 31, 1971, Trans Magic provided short-haul commuter air services in a total of 28 markets, including Sun Valley and Burley. Trans Magic transported 11,643 passengers and performed 5,634 flights in 1971. Revenue passenger miles performed by Trans Magic for the calendar year 1971 were 1,926,963, as compared to the local service industry average for the same period of 872,373,888. Thus, Trans Magic's total RPM's for calendar year 1971 were approximately two-tenths of 1 percent of the average RPMS for each of the certificated local service carriers.[5] For the calendar year 1971, Trans Magic carried 251 passengers between Sun Valley and Boise, 64 passengers between Sun Valley and Twin Falls, 1,021 passengers between Burley and Boise, and 11 passengers between Burley and Twin Falls. In addition, the carrier maintains aircraft liability insurance required by the Board in Part 298 of the Board's Economic Regulations.

On the basis of the foregoing, and on the basis of our findings set forth in Order 72-9-39, September 12, 1972, and our conclusion therein that the certification process is generally inappropriate in a replacement commuter carrier, we tentatively conclude that it would not be in the public interest to require Trans Magic to undergo a certification proceeding in order to provide replacement services for Airwest at Sun Valley and Burley. Trans Magic's replacement services are neither of sufficient magnitude nor do they hold such prospects of economic success as to warrant their separate certification.

We further tentatively find that certification would be an undue burden on Trans Magic by reason of the limited extent of, and unusual circumstances affecting its operations. As described above, the carrier's operations are of limited extent in terms of both the replacement services involved and the overall scope of its operations. Furthermore, the very nature of the small aircraft to which Trans Magic is restricted makes the operations limited in extent. The accommodations of these aircraft not only limit the competitive capability of Trans Magic, but also limit the amount of traffic it can carry and the length of the markets it can serve, compared with a certificated carrier operating large aircraft. Thus, the cost of certification procedures would impose a severe financial burden on Trans Magic wholly disproportionate to its existing and proposed operations. Moreover, enforcement of section 401 requirements would be an undue burden not only because of the substantial cost of certification procedures, but also because certification would deprive Trans Magic of the necessary operating flexibility it must have to conduct non-subsidized services with small aircraft in short-haul, low-density markets.

We are also satisfied that there are no safety considerations which would warrant a determination that the substitution arrangement is contrary to the public interest. Trans Magic must conduct its operations in strict conformity with Federal Aviation Regulations promulgated by the Secretary of Transportation, who is charged by law with insuring the highest degree of safety in air transportation. Indeed, Trans Magic has had a successful operating history.[6]

Consequently, for the reasons set forth above, we tentatively find and conclude that:

1. Airwest should be authorized to suspend service temporarily at Sun Valley and Burley, subject to the condition that such suspension shall terminate if, at any time, Trans Magic fails to operate at least one daily round trip between Sun Valley and Burley, on the one hand, and Boise and Twin Falls, on the other hand;

2. The authority granted in paragraph 1 should expire 3 years from the date of the order finalizing this order.

Interested persons will be given 21 days following the service date of this order to show cause why the tentative findings and conclusions set forth herein should not be made final. We expect such persons to direct their objections, if any, to the specific facts in issue, and to support such objections with detailed economic or legal analysis.

Accordingly, it is ordered, That:

1. All interested persons are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and granting the requested suspension;

2. Any interested person having objection to the issuance of an order making final the proposed findings, conclusions, and suspension authorization set forth herein shall, within 21 days after service of a copy of this order, file with the Board and serve upon all persons listed in Appendix A attached hereto, a statement of objections, together with such statistical data and other materials in evidence relied upon to support the stated objections; answers to such objections shall be filed within 14 days thereafter;

3. Any interested person requesting an evidentiary hearing shall state in detail why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing. General, vague, or unsupported objections will not be entertained;

4. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;

5. In the event no objections are filed to any part of this order, all further procedural steps relating to such part

[1] Pursuant to § 377.10(a) of the Board's Special Regulations, the applicant stated its intention to rely upon 5 U.S.C. 558(c) for a continuation of its present authorization which expires, by its terms, on Dec. 23, 1972.

[2] Specifically, we adhere to our prior findings that the suspension would improve Airwest's financial posture and, in light of the air taxi substitute service, not adversely affect the traveling public.

[3] Air Line Pilots Association, International v. C.A.B. 458 F. 2d 846 (C.A.D.C. 1972).

[4] These statutory conditions and guidelines were discussed in Order 72-9-39, Sept. 12, 1972. This order was adopted in response to the remand to the Board from the U.S. Court of Appeals of the Board orders which were in issue in the ALPA case.

[5] The traffic statistics submitted by commuters are confidential for a period of 1 year. However, pursuant to section 298.66 of the Board's Economic Regulations, the Board, on its own motion, finds that it is in the public interest to disclose this information.

[6] We have informally checked with the FAA and they report that Trans Magic has excellent operations with good management, maintenance and training, and has had no safety or maintenance violations of FAA Regulations during the last 12 months.

V 38 - 4 JAN 8 73 XUM

or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

6. A copy of this order shall be served upon all persons listed in Appendix A, below.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] HARRY J. ZINK, *Secretary.*

[FR Doc.73-352 Filed 1-5-73;8:45 am]

[Dockets Nos. 21520, etc., Order 73-1-3]

MOHAWK AIRLINES, INC., ET AL.

Final Order Regarding Suspensions of Service

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 2d day of January 1973. Application of Mohawk Airlines, Inc., Dockets 21520, 21335, and 21533, Agreements CAB 21361 and 21371, for authority to suspend service at Poughkeepsie, Massena, and Ogdensburg, N.Y., and Rutland, Vt.; application of Northeast Airlines, Inc., Docket 21350, for authority to suspend service at Augusta/Waterville and Lewiston/Auburn, Maine; application of Allegheny Airlines, Inc., Docket 24020, Agreement CAB 22801, for authority to suspend service at Lancaster and Reading, Pa.; agreement between Texas International Airlines, Inc. and Metroflight Airlines, Inc., doing business as Houston Metro Airlines, Agreement CAB 22961.

The first two of the above-captioned cases were initially before the Board early in 1970, when we authorized Mohawk Airlines and Northeast Airlines to temporarily suspend service at the named New York and New England points subject to the provision of replacement air taxi services.[1] The Board's actions were reviewed by the United States Court of Appeals for the District of Columbia Circuit and remanded on January 14, 1972, for further proceedings to determine whether, under the circumstances, the replacement air taxi operations could be provided pursuant to the existing Part 298 exemption from certification or whether certification should be required.[2] On September 12, 1972, the Board issued an order to show cause (Order 72-9-39) wherein we tentatively determined that certification was not required in these cases and that the Mohawk and Northeast suspensions/substitutions should again be approved.[3]

Objections to the finalization of the show cause order have been received from the State of Maine and from the Air Line Pilots Association, International (ALPA); Allegheny Airlines, Inc., and Delta Air Lines, Inc., have filed responses to the objections.[4]

ALPA does not directly controvert the factual foundation of the order to show cause. Rather, it asserts that the Board is not in a position to determine the issues remanded by the Court of Appeals because there exist "many subsidiary factual disputes, inaccuracies or evidentiary gaps," and that evidentiary hearings are in any event required as a matter of law in light of the remand by the Court. ALPA renews its contentions that the Board has overstepped its statutory exemption authority and that the full panoply of certification-type proceedings is required to provide for the temporary suspension of certificated service in conjunction with substitution arrangements with Part 298 air taxi commuter operators. ALPA also objects to the Board's conclusion that labor protective provisions should not be imposed in the case of the suspension/substitute service arrangements remanded by the Court, and renews its request for such provisions, arguing that the Board may impose the standard labor protective formula without recourse to any further proceedings.

The basic thrust of ALPA's objections is a challenge to the Board's concept of Part 298 commuter carriers and their appropriate role within the air transportation system. As we noted in the show cause order, our tentative conclusions herein were reached in light of our recent review of this issue in the Part 298 Weight Limitation Investigation,[5] and the record developed therein in a full evidentiary hearing at which ALPA was a participant. For the reasons stated in Order 72-7-61 and in the show cause order, we reaffirm our determination that Part 298 exemption authority continues to be a lawful and appropriate means of regulation of the particular replacement services at issue herein.

Nothing in the Act or the Board's original action promulgating Part 298 warrants the conclusion that the impact of air taxi operations upon the certificated system must be measured by the economic circumstances of 1938 or 1952. On the contrary, it seems self-evident that any determination of the public interest and of "limited extent" or "unusual circumstances" causing "undue burden" must be made in the context of economic realities as known at the time of decision. And, given the circumstance that the role and impact of the scheduled noncertificated carriers as measured against the certificated carriers has remained essentially unchanged, as we have found to be the case, it is not contrary to the purposes of the Act to continue the exemptions here involved. If exemption was proper in 1952, when Part 298 was promulgated, it is equally proper now. This is the case whether we compare the industry as a whole or the individual carriers here involved.

Moreover, ALPA's position is burdened by a curious inconsistency. ALPA opposes replacement services in the three remanded cases and in 28 other dockets which it deems comparable (see Order 72-9-39 at 2, footnote 2). However, it has not specifically objected to replacement services by the Allegheny Commuter at 14 other points, even though it appears that the traffic in the Allegheny Commuter markets far outstrips the traffic in the other substitution instances.[6] Thus, its assertions of the widespread impact of replacement commuter carriers upon certificated operations have a hollow ring. Rather than being a "substantial * * * feature of the air transportation system," as charged by ALPA, the subject replacement arrangements (even when taken together with the other arrangements which, ALPA argues, require certification, and together with Allegheny Commuter operations) constitute a very modest part of commuter operations and an infinitesimal—albeit valued—portion of the scheduled air transportation system as a whole.[7]

With respect to the factual disputes and "evidentiary gaps" which assertedly preclude the Board's action herein, ALPA has made no offer of proof demonstrating that the factual findings upon which the Board relied are in error or otherwise inadequate. Most, if not all, of the issues which ALPA would have us explore in an evidentiary hearing are matters of either law, policy, or legislative fact, with respect to which a hearing would be either inappropriate or unnecessary. Moreover, we find that ALPA's contentions of evidentiary gaps are unfounded.

For example, ALPA questions our appraisal of the average costs of certification proceedings as these bear upon the issues of the public interest in, and the undue burden of, certification. However, it is evident, not only from the Reopened TAG-Wright Case but from the level and type of participation by air taxi operators in the Part 298 Weight Limitation Investigation, and from their generally meager financial status, that certificate procedures "would impose a substantial financial strain on air taxis," Order 72-7-61 at 34. ALPA has not shown that this conclusion is unreasonable or without basis.

Similarly, the weight to be accorded the relative stability of certificated service in general vis-a-vis commuter carrier service in general (with respect to frequency of service, fares, and the ability to weather financial crisis) is a largely irrelevant consideration here, contrary to ALPA's contentions. The simple reason is that the Board's approvals herein are conditioned upon the provision of stated levels of substitute service, with the certificated carrier retaining its obligation to step in should the commuter carrier falter in any way.[8] Moreover, support agreements between the certificated carriers and the commuter carriers, where applicable, provide a further measure of stability to the replacement services. In any event, we have found that the flexibility provided by Part 298 services is in the public interest in the case of the short-haul, low-density operations involved here, particularly where surface transportation is a viable alternative to air service. ALPA has made no showing that this finding is contrary to fact.

We find ALPA's other allegations of "gaps" equally unpersuasive, and believe that our findings with respect to the issues remanded by the Court of Appeals have an adequate basis, making further proceedings, such as evidentiary hearings or oral argument, unnecessary or inappropriate. Accordingly, we will reaffirm and make final our determinations set forth in the order to show cause.[9]

Turning to the issue of labor protective provisions, we tentatively concluded in our initial orders in the cases remanded by the Court of Appeals that the public interest did not require the imposition of labor protective provisions as a condition for approval of the suspension/substitution arrangements. The court, in remanding, did not pass on the question of whether the Board should have initially imposed conditions or ordered hearings thereon, nor did it give any independent grounds for remand of this issue. Rather, it stated there should now be available "hard evidence on which to make a determination," and thought that, in the event we again approved the suspension/substitutions, "ALPA would be entitled to demonstrate that a need for protective conditions exists," 458 F. 2d at 852.

The order to show cause reaffirmed our initial determination. However, we indicated our intention to rely upon the New England Service Investigation, in which evidentiary hearings were imminent, as a "forum and mechanism for considering the need for labor protective conditions" (Order 72-9-39 at 14).[10] We also invited the parties herein, in responding to the show cause order, to proffer facts to demonstrate the need for protective provisions.

ALPA, while arguing that we are in error, has failed to offer any facts to substantiate its claims that protective provisions are required. Instead, it simply reiterates the same contentions which we have previously considered and rejected. Thus, it asserts that the Mohawk and Northeast suspensions here at issue require the imposition of labor protective conditions in and of themselves, and, in any event, that the Board ought to consider the Northeast suspensions as part of a general pattern of suspensions of service by that carrier in New England, and therefore impose conditions pursuant to the Board's Seven States precedent.[11]

With respect to the latter point, ALPA has made no showing whatever in the New England Service Investigation relating to the need for labor protective provisions in the case of Northeast, despite ample opportunity to do so.[12] Nor has it made any serious attempt to do so in this proceeding, notwithstanding general allegations of an overall impact upon Northeast's employees. ALPA has yet to

---

[1] Orders 70-1-130 (Jan. 27, 1970), 70-2-23 (Feb. 6, 1970), and 70-3-62 (Mar. 13, 1970).

[2] Air Line Pilots Association, International v. CAB, 458 F. 2d 846 (C.A.D.C., 1972).

[3] We also consolidated therein and approved Allegheny Airlines' suspension and substitution at Lancaster and Reading, Pa., and a ground services agreement between Texas International Airlines (TXI) and Metroflight Airlines, Inc., an air taxi operator, in the Houston-Galveston market. While neither of these two latter cases was before the Court, we believed them to be properly considered in the context of the Court's opinion. Since the entry of the show cause order the arrangement between TXI and Metroflight has been terminated. Accordingly, the application for approval of Agreement CAB 22961 is moot and is hereby dismissed. We have in the interim issued an order to show cause tentatively proposing to delete Galveston from TXI's certificate of public convenience and necessity, as requested by TXI by an application dated July 7, 1972. See Order 72-11-26 (Nov. 9, 1972), finalized by Order 72-12-51 (Dec. 12, 1972).

[4] ALPA's objection was not timely filed. However, under all of the circumstances, we will grant its accompanying motion to file an otherwise unauthorized document. We will similarly grant Allegheny's and Delta's motions for leave to file their respective responses. Allegheny has also filed a motion to sever for separate decision the matters in Docket 24020. In light of the disposition we make herein, that motion is now moot and is hereby dismissed.

[5] Order 72-7-61 (July 18, 1972).

[6] Answer of Allegheny Airlines to response of ALPA to Order 72-9-39, filed Oct. 30, 1972, at 5. Allegheny asserts that the Allegheny Commuter carried 435,000 passengers in 1971 compared to a total of 166,000 passengers carried by the substitute commuter carriers to whose continued exemption ALPA objects.

[7] It is evident that the replacement Allegheny Commuter operations, in which the air taxi commuter operations are conducted pursuant to Part 298 authority, are subject to the same objections which ALPA makes against the other replacement arrangements. Thus, for present purposes we consider the Allegheny Commuter in the same light as other substitution services.

[8] While we have not generally conditioned our approvals on the maintenance of any particular fare levels, the Board retains power over the agreements and may amend or revoke its approval—thus, there is no need to prescribe detailed restrictions in this regard. See, e.g., Order 69-12-73 (Dec. 16, 1969) at 10-11. Moreover, we have previously determined that the possible detriment of higher fares by air taxis in some markets was outweighed by the public benefits of the suspension/substitutions, and by the fact that the issue of higher fares could be considered in the New England area in the New England Service Investigation (Order 72-6-63, June 15, 1972, at 5).

[9] ALPA also asserts that the Board failed to explore the possibility of requiring the certificated carriers to serve those short-haul, low-density markets with small aircraft such as the ones used by air taxi operators. It cites our staff's study, Service to Small Communities, for the proposition that such operations "will result in substantially superior financial results." However, the Court of Appeals, while remanding the Mohawk and Northeast cases, did not disturb the Board's findings that the air taxis would provide better and more economic service, see 458 F. 2d at 849. Moreover, the staff study itself concluded, as have we, that a commuter carrier would achieve better results with small aircraft in most situations than would a certificated carrier, Service to Small Communities, Part II, at 23, 25, 27, 100-117. See also, Order 72-7-61, wherein we concluded that "[a]ir taxis conduct nonsubsidized services of a kind that certificated carriers, by and large, have not been able to operate successfully even with Federal subsidy—i.e., services in extremely short-haul, low-density markets where surface transportation modes are often an attractive travel alternative," at 32-38.

[10] The question of labor protective provisions was included as an issue in the Investigation at the request of ALPA, made at the prehearing conference on Mar. 14 and 15, 1972. The hearings commenced on Sept. 20, 1972, 8 days after the show cause order herein was issued, and ended on November 3, 1972.

[11] Seven States Area Investigation, 30 CAB 473 (1960). The Board's imposition of protective conditions in that case, in the context of extensive suspensions, was predicated "upon an affirmative showing in the record that the suspensions and deletions with respect to these carriers are likely to cause substantial employee dislocation which should, in the public interest, be alleviated, and upon the lack of any evidence that such employee protection will be financially burdensome to either carrier. The existence of these factors differentiates this matter from two earlier suspension cases," in which, absent a genuine showing of need, the Board declined to fashion those protective conditions which we find to be required here.

"Southeast Renewal-United Suspension Case, 15 CAB 61 (1952), Frontier Certificate Renewal Case, 14 CAB 519 (1951)." (30 CAB at 475.

[12] In fact, ALPA did not even enter an appearance in the evidentiary hearings in that proceeding.

V 38 - 4 JAN 8 73 XUM

come forward with facts which would demonstrate that Northeast's New England suspensions were the cause of any substantial curtailment of employment, as contrasted to curtailment caused by that carrier's service retrenchment in other markets.[13] It has yet to address itself to the question of whether the imposition of labor protective provisions would have been unduly burdensome to Northeast, a particularly relevant consideration in light of Northeast's financial circumstances at that time.[13] Accordingly, we are not persuaded that the Seven States issue has been presented to us in any meaningful way.[14]

ALPA's contentions with respect to the Mohawk suspensions at Poughkeepsie, Massena, Ogdensburg, and Rutland are even less persuasive. Thus, ALPA points to a decline in Mohawk's pilot and copilot employment (from 401 on June 30, 1969, to 344 on December 31, 1971) as proof that the impact of the suspensions was such as to warrant labor protective provisions. However, whatever the figures cited by ALPA may show, they most certainly do not support the proposition that Mohawk's suspensions caused pilot unemployment. On the contrary, Form 41 reports would seem to indicate that the suspensions had no discernible effect whatever.[15]

[1] Order 69-4-137, ground services agreement.
[2] Order 69-12-73, route transfer with Northeast, plus suspensions/substitutions.
[3] Order 70-1-130, Poughkeepsie.
[4] Order 70-2-23, Massena, Ogdensburg, Rutland.
[5] Merger with Allegheny.

If any conclusion at all is permissable from this skeletal data, it might be that ALPA's strike was significantly more instrumental in reducing employment than any other single factor.

There remains the question of whether the Board should impose labor protective conditions, or institute hearings thereon, at this time. We find in the negative. To begin with, it seems apparent, as we have noted, that the suspensions herein for which ALPA seeks relief did not and do not in and of themselves have the type or extent of impact upon employees which would warrant labor protective provisions. Nor do we think that we are required, under the circumstances, to institute another proceeding simply on the basis of ALPA's allegations. Secondly, the Board would not be in a position to make a determination of the applicability of the Seven States policy in the case of Northeast (now Delta) without examining in depth the entire circumstances surrounding all of Northeast's suspensions, including those not in issue in this proceeding. We see no necessity for engaging in this type of investigation, however, in light of ALPA's failure to utilize the opportunity accorded it in the New England Service Investigation to make a showing in this regard. Finally, as we have noted, the circumstances surrounding Northeast have changed substantially with the Delta merger and the pendency of the New England Service Investigation.[16] The public interest standard governing that proceeding includes the question of whether, and to what extent, air carrier employees should be provided protection from the changes found to be required by the Board. In the absence of any showing that labor protective provisions are appropriate or required now, we leave that question to the Investigation. We are not disposed to impose retroactive and/or interim relief simply on the basis of unsubstantiated allegations.

In sum, nothing in the nature of the evidence which ALPA would seek to adduce in an evidentiary hearing persuades us that we have exceeded the boundaries of the Board's discretion in proceeding by way of the show cause order. On the contrary, it is evident that the issues herein are in sharp focus, and that the dispositive facts pertinent to their resolution have been more than adequately ascertained. And while we have not attempted to deal with each and every one of ALPA's allegations, suffice it to say that we have examined them all, and none of them persuade us that we will err by making final the findings and conclusions reached in the Order to Show Cause.

Turning to the objections of the State of Maine, it does not request an evidentiary hearing, nor does it controvert the suspension/substitution arrangements per se. Rather, Maine faults our tentative resolution in Docket 21350, insofar as the Board would approve the temporary replacement of Delta by Executive Airlines in the Augusta/Waterville and Lewiston/Auburn markets without (1) requiring separate substituted service by the commuter carrier at both Augusta and Waterville; (2) imposing an "Allegheny Commuter" type of arrangement; and (3) requiring the filing of joint fares between the air taxi and Delta and permitting joint fares with other connecting certificated carriers.[17]

Maine has not shown that the requested relief is required in the interim pending the final resolution of these and other basic issues of service to these communities in the New England Service Investigation. We think that the Investigation, rather than this proceeding, provides the proper opportunity for dealing with these issues and in the interim that

[13] See Order 70-3-62 (Mar. 13, 1970) at 2 Fn. 4, where we noted Northeast's uncontested assertion that the prime, if not sole, reason for the furloughs complained of by ALPA was the substantial reduction of schedules in certain Florida and other non-New England markets. Northeast's schedule reductions in other markets on their face were designed to ease a gross financial burden, and under these circumstances a strong showing would be required that the imposition of labor protective provisions with respect to employees affected thereby would be either appropriate or in the public interest. *Cf.*, Trans World Airlines, Inc., Capacity Limitation Agreement, Order 71-8-91 (Aug. 19, 1971).

[14] See, for example, Frontier Airlines, Inc., Suspensions, Order 72-1-100 (Jan. 28, 1972), where we denied a request for labor protective provisions on grounds, inter alia, "that such an action would tend to nullify one of the principal benefits of suspension, i.e., the reduction in costs which the carrier will experience" (at 11). We further noted that "Frontier's current financial position makes the financial savings that result from these suspensions of prime importance and may well, in fact, save more jobs in the long run than it loses" (at 12). Similarly, Northeast's financial position at the time of the suspensions was serious, if not critical, and the suspensions were aimed at ameliorating that situation; the imposition of labor protective conditions might well have obviated the benefits of the suspensions to Northeast and caused even greater dislocations to employees should Northeast have failed.

[15] Moreover, ALPA has not seriously controverted our conclusion that the suspensions at Augusta/Waterville and Lewiston/Auburn do not, in and of themselves, warrant protective conditions. Rather, it simply repeats its contention that these suspensions, plus others, demonstrate a "need," and now requests protective conditions on the basis of these speculative allegations, notwithstanding that ALPA has had a forum—the New England Service Investigation—wherein to substantiate its claims.

[16] Form 41 reports for Mohawk show the following pattern:

[16] The merger of Northeast into Delta has not only enhanced the Northeast employees' general opportunities but also provides that Delta offer reemployment to all Northeast personnel furloughed after Nov. 11, 1969, no matter when they were furloughed or for what reason, to the extent that openings occur. Delta-Northeast Merger Case, Orders 72-5-73/74 (served May 19, 1972), at 35. This provides some measure of protection to such members of ALPA as may in fact have been furloughed as a result of Northeast's New England suspensions.

[17] Maine also asserts that the order is unclear on the question of the termination date of the granted authority. However, our tentative findings were that the authority "should expire on Mar. 13, 1973" (Order 72-9-39, App. A at 4). We fail to see how we could have stated our intention any more clearly. Maine states that it does not object to this date, and we will thus not pursue this matter any further.

Delta simply stands in the shoes of Northeast.

For the reasons set forth in Order 72-9-39 and herein, and pursuant to the authority of sections 401(j), 408(a)(5), 412(b), 416, and other relevant provisions of the Federal Aviation Act of 1958 and the Board's regulations, *It is ordered*, That:

I. 1. CAB Agreement 21361 is approved, subject to compliance by Allegheny Airlines, Inc., with the Railway Labor Act, and subject further to the following conditions:

(a) Any financial transactions between Allegheny Airlines, Inc., and Command Airways, Inc., be appropriately appended to Allegheny's Form 41 reports and so footnoted;

(b) The information requested in (a) above must be shown separately from similar information regarding financial transactions between Allegheny and various other replacement carriers;

(c) Approval of this agreement does not constitute approval for ratemaking purposes, and in no event shall Allegheny Airlines receive any subsidy, directly or indirectly, for the financial guarantees paid by Allegheny or for the operations performed or the services provided by either party pursuant to the agreement;

(d) Air North will use the same formula as is used by certificated carriers (Order 69-9-68, dated September 12, 1969, or any subsequent amendments thereto) in making adjustments, if any, in fares and rates to be charged for services provided pursuant to the agreement herein;

(e) Air North shall, with respect to the operations concluded pursuant to this agreement, keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and The Hague Protocol approved by Board Order E-23680, dated May 13, 1966, and a signed counterpart of any amendment which may be approved by the Board and to which the holder becomes a party;

(f) Approval of the foregoing agreement does not constitute approval for ratemaking purposes, and in no event shall Allegheny receive any subsidy, directly or indirectly, for the operations performed or the services provided by either party pursuant to the agreement;

2. To the extent necessary to relieve Allegheny Airlines of its obligations to provide services in excess of two daily round trips, Monday through Friday, between Poughkeepsie and Binghamton, Allegheny Airlines is authorized to suspend service temporarily at Poughkeepsie, N.Y., subject to the conditions that:

(a) Allegheny shall not itself resume service at Poughkeepsie without Board approval during the period in which Command Airways is providing at least two daily round trips, Monday through Friday, between Poughkeepsie and Binghamton, N.Y., and Agreement CAB 21361 is in effect; and

(b) Such suspension shall immediately terminate if Command Airways ceases to provide regularly the service in (a) above; and

3. The authority in paragraphs 1 and 2, above, shall expire on January 27, 1973, 3 years from the effective date of the original order granting such authority.

II. 1. Agreement CAB 21371, is approved, subject to compliance by Allegheny Airlines, Inc., with the Railway Labor Act and subject further to the following conditions:

(a) Any financial transactions between Allegheny Airlines and Air North, including but not limited to such matters as payment by Allegheny Airlines of underwriting costs, and the amounts and nature thereof, shall be appropriately appended to the Form 41 reports of Allegheny Airlines and so footnoted;

(b) The information requested in (a) above must be shown separately from similar information regarding financial transactions between Allegheny and various other replacement carriers;

(c) Approval of this agreement does not constitute approval for ratemaking purposes, and in no event shall Allegheny Airlines receive any subsidy, directly or indirectly, for the financial guarantees paid by Allegheny or for the operations performed or the services provided by either party pursuant to the agreement;

(d) Air North will use the same formula as is used by certificated carriers (Order 69-9-68, dated September 12, 1969, or any subsequent amendments thereto) in making adjustments, if any, in fares and rates to be charged for services provided pursuant to the agreement herein;

(e) Air North shall, with respect to the operations concluded pursuant to this agreement, keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680, dated May 13, 1966, and a signed counterpart of any amendment which may be approved by the Board and to which the holder becomes a party;

4. The authority in paragraphs 1 and 2 above shall expire on March 13, 1973, 3 years from the effective date of the original order granting such authority.

IV. 1. Agreement CAB 22801, is approved subject to the following conditions:

(a) Any financial transactions between Allegheny Airlines, Inc., and Reading Aviation Service, Inc., be appropriately appended to Allegheny's Form 41 reports and so footnoted;

(b) The information requested in (a) above must be shown separately from similar information regarding financial transactions between Allegheny and various other replacement carriers;

(c) Approval of this agreement does not constitute approval for ratemaking purposes, and in no event shall Allegheny receive any subsidy, directly or indirectly, for the operations performed or the services provided by either party pursuant to the agreement;

(d) Reading Aviation Service shall, with respect to the operations conducted pursuant to this agreement, keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and The Hague Protocol approved by Board Order E-23680, dated May 13, 1966, and a signed counterpart of any amendment which may be approved by the Board and to which the holder becomes a party;

2. Pursuant to section 408(a)(5) of the Federal Aviation Act of 1958, as amended, the acquisition by Allegheny of control over Reading Aviation Service, is temporarily exempted from the requirements of section 408 of the Act to the extent necessary for the implementation of Agreement CAB 22801;

III. 1. Delta Air Lines, Inc., in authorized to suspend service at Augusta/Waterville and Lewiston/Auburn, Maine, conditioned upon compliance by Delta with the Railway Labor Act;

2. The authority granted herein shall be subject to the condition that such suspension shall immediately terminate if at any time during the 3-year period the air taxi service to Augusta/Waterville and/or Lewiston/Auburn should for any reason cease or fall below the levels of service described below:

(a) Eight daily round-trip flights, Monday through Friday, in the Boston-Augusta/Waterville market for the period May 1 through October 31;

(b) Six daily round-trip flights, Monday through Friday, in the Boston-Augusta/Waterville market for the period November 1 through April 30;

(c) Four daily round-trip flights Saturday and Sunday in the Boston-Augusta/Waterville market for the period May 1 through October 31;

(d) Three daily round-trip flights Saturday and Sunday in the Boston-Augusta/Waterville market for the period November 1 through April 30;

(e) Five daily round-trip flights in the Boston-Lewiston/Auburn market;

3. Executive Airlines shall keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680, dated May 13, 1966, and a signed counterpart of any amendment which may be approved by the Board and to which the holder becomes a party;

4. The authority in paragraphs 1 and 2 above shall expire on March 13, 1973, 3 years from the effective date of the original order granting such authority.

V 38 - 4 JAN 8 73 XUM

3. Reading Aviation Service is temporarily exempted from the provisions of Part 298 of the Board's Economic Regulations to the extent that it would otherwise prevent that carrier from transporting mail in conformance with the provisions of Agreement CAB 22801;

4. The entire compensation for the transportation of mail to be received by Reading Aviation shall be the compensation payable by Allegheny as provided by the subject agreement. Reading Aviation shall not be eligible for additional mail compensation under section 406 for services rendered between the points specified in the agreement;

5. To the extent necessary to relieve Allegheny of its obligation to provide service in excess of those provided for by Agreement CAB 22801, Allegheny is authorized to temporarily suspend service at Lancaster and Reading, Pa., subject to the conditions that:

(a) Allegheny shall not itself resume service to Lancaster and Reading, without Board approval, during the period in which Reading Aviation is providing at least four daily round trips 7 days a week between Lancaster/Reading and Philadelphia, and at least two daily round trips 7 days a week between Lancaster/Reading and Newark; and

(b) Such suspension shall terminate immediately if Reading Aviation Service ceases to provide regularly the service specified in (a) above;

6. The authority granted in ordering paragraphs 1, 2, 3, 4, and 5, above is effective for a period of 10 years, unless sooner terminated by the Board.

V. Agreement CAB 22961 between Texas International Airlines, Inc., and Metroflight Airlines, Inc. doing business as Houston Metro Airlines, be and it hereby is dismissed.

VI. The Motion of Allegheny Airlines to Sever, dated October 12, 1972, be and it hereby is denied (all Dockets except Agreement CAB 22961).

VII. The Motion of the Air Line Pilots Association, International to file an otherwise unauthorized document, dated October 16, 1972, be and it hereby is granted (all dockets).

VIII. The Motion of Allegheny Airlines for leave to File, dated October 30, 1972, be and it hereby is granted (Dockets 21520, 21335 and 21533, Agreements CAB 21361 and 21371; Docket 24020, Agreement CAB 22801).

IX. The Contingent Motion for Leave to File of Delta Air Lines, Inc., dated October 30, 1972, be and it hereby is granted (Docket 21350).

X. A copy of this order shall be served upon all persons listed in Appendix B to Order 72-9-39.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.73-351 Filed 1-5-73;8:45 am]

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Notice of Public Availability

Environmental Impact statements received by the council from December 26 through December 29, 1972.

NOTE: At the head of the listing of statements received from each agency is the name of an individual who can answer questions regarding those statements.

DEPARTMENT OF AGRICULTURE

Contact: Dr. T. C. Byerly, Office of the Secretary, Washington, D.C. 20250, 202—388–7803.

ANIMAL AND PLANT HEALTH SERVICE

Draft, December 27

Fire Ant Control Program. The statement refers to the imported Fire Ant Cooperative Federal-State Control and Regulatory Program for 1973, under which 24 million acres (in the States of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Texas), will be aerially treated. The agent to be used is mirex, at a dosage rate of one-seventeenth of an ounce per acre. Nontarget species will be affected. (ELR Order No. 05818, 51 pages) (NTIS Order No. EIS–72 5818–D)

AGRICULTURAL STAB. AND CONSERV. SERVICE

Draft, December 22

Rural Environmental Assistance Program. The statement refers to a program under which the Federal Government shares with farmers and ranchers the cost of carrying out approved soil, water, woodland, and wildlife conservation and pollution abatement practices on their land. Adverse effects may occur during the construction of water-storage and other facilities, or result from the improper use of chemical control agents. (ELR Order No. 05805, 120 pages) (NTIS Order No. EIS–72 5805–D)

Draft, December 15

New Beet Sugar Area, Wahpeton, N. Dak. and Minnesota. The proposed action is the commitment (under the Sugar Act of 1948) of 30,000 acres of the Red River Valley to the production of sugar beets, which will serve a new beet processing facility in Wahpeton, N. Dak. Counties involved are Richland in North Dakota and Wilkins in Minnesota. (ELR Order No. 05777, 20 pages) (NTIS Order No. EIS–72 5777–D)

New Beet Sugar Area, Hillsboro, N. Dak. and Minnesota. The proposed action is the commitment (under the Sugar Act of 1948) of 30,000 acres of the Red River Valley to the production of sugar beets, which will serve a new beet processing facility in Hillsboro, N. Dak. Counties involved are Traill, Cass, and Walsh in North Dakota, and Norman in Minnesota. (ELR Order No. 05778, 21 pages) (NTIS Order No. EIS–72 5778–D)

ATOMIC ENERGY COMMISSION

Contact: For Non-Regulatory Matters: Mr. Robert J. Catlin, Director, Division of Environmental Affairs, Washington, D.C. 20545, 202—973–5391.

For Regulatory Matters: Mr. A. Giambusso, Deputy Director for Reactor Projects, Directorate of Licensing, Washington, D.C. 20545, 202—973–7373.

Draft, December 21

Calcined Solida Storage Additions, Idaho; county: Butte. The statement refers to the construction of long-term storage bins for radioactive wastes solidified in the Waste Calcinating Facility of the Nuclear Reactor Testing Station. A small amount of radioactive particulate matter will be discharged during operation of the transport facility from the calciner. The radiation exposure at the site boundary is estimated to be less than one mRem/yr. (ELR Order No. 05803, 64 pages) (NTIS Order No. EIS–72 5803–D)

Draft, December 22

Donald C. Cook Station, Michigan; county: Berrien. The statement concerns the proposed continuation of construction permits and the issuance of operating licenses to the Indiana & Michigan Electric Co., and the Indiana & Michigan Power Co., for the start-up and operation of the station. Each of the two units will employ a pressurized-water reactor to produce 3,250 MWt and 1,100 MWe. Discharge of heat will be made to Lake Michigan by a 1,645,000 g.p.m. once-through cooling system, with measurable effects upon aquatic biota expected. Approximately 650 acres of lakeshore dune-land have been committed to the station, precluding recreational use. Construction of the station has started industrialization of an ecologically unique area which should be perserved. (ELR Order No. 05815, 264 pages) (NTIS Order No. EIS–72 5815–D)

Draft, December 21

Future High Level Waste Facilities, South Carolina; counties: Aiken and Barnwell. The statement refers to the proposed addition to present radioactive waste management facilities of 4, 1.3 million gallon tanks, a waste evaporator, and associated auxiliaries at the Savannah River Plant. The tanks will be constructed of stainless steel and will be enclosed in a steel-lined underground concrete containment vessel. They will be used for interim storage of radioactive wastes generated by the production of nuclear materials. The evaporator will be used to dewater the wastes by a factor of one third. There will be temporary construction disruptions. Small amounts of radioactivity will be released during operation of the evaporator. (ELR Order No. 05801, 76 pages) (NTIS Order No. EIS–72 5801–D)

DEPARTMENT OF DEFENSE, AIR FORCE

Contact: Colonel Cliff M. Whitehead, Room 5E 425, The Pentagon, Washington, D.C. 20330, 202—695–2889.

Final, December 22

Air Force Academy Airmanship Program, Colorado; county: El Paso. The statement refers to the proposed construction of new facilities at the USAF Academy Airstrip, in order to allow the relocation of an existing program at Peterson Field, where heavy aircraft operations create a hazardous condition for student pilots. The new facilities would include an additional parallel taxiway (75 feet by 3,500 feet), a crosswind runway (75 feet by 2,500 feet), a parking apron and three "T" hangars, an operations building, and a 42 foot-high tower. Comments made by: UPA, DOI, DOT, State agencies and concerned citizens. (ELR Order No. 05813, 235 pages) (NTIS Order No. EIS–72 5813–F)

DEPARTMENT OF DEFENSE, ARMY CORPS

Contact: Mr. Francis X. Kelly, Director, Office of Public Affairs, Attn: DAEN–PAP, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, DC 20314, 202—693–7168.

Draft, December 20

New Haven Harbor, Conn. The proposed navigational maintenance project consists of dredging the main channel from Long Island Sound to the Tomlinson Bridge to its authorized depth of 35 feet and disposal of an estimated 800,000 cubic yards of spoil material. Spoil will be deposited in the New Haven Dump Grounds. Adverse environmental effects include alteration of pelagic and benthic habitat, temporary increases in turbidity and siltation, and resuspension of nonbiodegradable chemical pollutants. (ELR Order No. 05798, 65 pages) (NTIS Order No. EIS–72 5798–D)

Draft, December 27

Aquatic Plant Control Program, Florida. The statement refers to the proposed use of the chemical 2, 4–D in order to control the growth and dispersal of water hyacinth in the water of the State of Florida. The action will result in a temporary deterioration of water quality, with the amount of dissolved oxygen available for other life being reduced; nontarget (broadleaf) species will be affected; the elimination of hyacinth could provide an opportunity for the spread of other problem plants; sports fishing in the vicinity of treated plant may be temporarily curtailed. (ELR Order No. 05817, 149 pages) (NTIS Order No. EIS–72 5817–D)

Draft, December 19

Chagrin River, Ohio; county: Lake. The purpose of this action is to alleviate flooding at the city of Eastlake and to provide recreation facilities. The proposed project involves construction of two breakwaters and a system of levees, extensive channel enlargement and realinement, two groins and some beach fill, all to be provided by the Corps of Engineers; and some parking, boat launching, and other recreational facilities to be provided by local interests. Adverse effects include disruption during construction and damage to the fishery habitat by channelization. (ELR Order No. 05790, 14 pages) (NTIS Order No. EIS–72 5790–D)

Draft, December 12

Union City Dam, Pa.; county: Erie. The statement refers to the proposed construction of a 580-acre conservation pool at the existing detention reservoir. Approximately 5.8 miles of stream environment will be eliminated. Wildlife habitat would be eliminated on the inundated 580 acres, and reduced on 2,120 acres of surrounding Federal land. (ELR Order No. 05768, 22 pages) (NTIS Order No. EIS–72 5768–D)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Mr. Sheldon Meyers, Director, Office of Federal Activities, Room 3630, Waterside Mall, Washington, D.C. 20460, 202—755–0940.

Draft, December 29

Wastewater Treatment, North Broward, Fla.; county: North Broward. The statement refers to the proposed construction of wastewater master pumping stations, wastewater transmission mains a wastewater treatment plant and an ocean outfall. The facilities will result in the elimination of raw sewage discharge in Pompano Beach. (ELR Order No. 05830, 90 pages) (NTIS Order No. EIS–72 5830–D)

FEDERAL POWER COMMISSION

Contact: Dr. Richard F. Hill, Acting Advisor on Environmental Quality, 441 G Street NW., Washington, DC 20426, 202—386–6084.

Draft, December 13

Saluda Project 516 (Lake Murray), S.C.; counties: several. The statement refers to an application filed by the South Carolina Electric & Gas Co. for permission to grant easements to Watergate Partnership for the use of 2.83 acres of land in the Lake Murray Reservoir. Watergate Partnership proposes to develop four causeways, one of which incorporates a bridge section; and a pipeline along a portion of the lake bottom for discharge of treated domestic waste. The bridge and causeways will provide access to five islands consisting of 43.85 acres. (ELR Order No. 05771, 60 pages) (NTIS Order No. EIS–72 5771–D)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Environmental and Land Use, Planning Division, Washington, D.C. 20410, 202—755–6186.

Draft, December 12

Fairmont Estates, Texas; county: Harris. The statement refers to the proposed acquisition and development of 1,320 acres funded by a mortgage to be insured under the provisions of title X of the National Housing Act (Public Law 73–479). The site, located in the city of Pasadena, will be developed to provide living accommodations for 17,500 people, with shopping facilities and supportive facilities. Development of the area will result in decreased water quality and the need to provide solid waste and sewage disposal systems (ELR Order No. 05767, 22 pages) (NTIS Order No. EIS–72 5767–D)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Quality, 400 Seventh Street SW., Washington, DC 20590, 202—426–4355.

Federal Aviation Administration

Draft, December 22

Tierra Rejada Airport, Calif.; county: Ventura. The statement refers to the proposed construction of a new general aviation airport in the Tierra Rejada Valley. The total project includes the acquisition of 170 acres of land, the relocation of the Moorpark Road and its associated telephone and powerlines, and the construction of flood control facilities. Initial development of the facility will consist of a single main runway 3,700 feet by 75 feet, a parallel taxiway, and approximately 50,000 sq. yds. of aircraft parking apron. There will be increases in noise and air pollution. (ELR Order No. 05814, 124 pages) (NTIS Order No. EIS–72 5814–D)

Draft, December 12

Duplin County Airport, N.C.; county: Duplin. The proposed project contemplates the construction of a new general aviation airport in the town of Kenansville. Initial construction will include a paved and marked 3,700 feet by 75 feet runway; a stub taxiway with edge lighting; a 200 feet by 300 feet aircraft parking apron; and installation of medium intensity lighting, rotating beacon, wind sock and segmented circle. Approximately 185 acres of rural land have already been acquired for the airport site. There will be increases in noise levels and air pollution due to aircraft operation. (ELR Order No. 05761, 45 pages) (NTIS Order No. EIS–72 5761–D)

FEDERAL HIGHWAY ADMINISTRATION

Draft, December 27

County Road 63, Alabama; county: Marshall. The statement considers two alternate locations for the improvement of 4.6 miles of Route 63, beginning at U.S. 431 and ending south of the city of Grant. Adverse effects of the project are the acquisition of several acres of land, dislocation of several families, some erosion and water pollution and a change in some small wildlife habitat. (ELR Order No. 05820, 16 pages) (NTIS Order No. EIS–72 5820–D)

Alabama 35, Alabama; counties: Jackson and DeKalb. The statement refers to the proposed widening, improving, and relocating of Alabama Highway No. 35. Project length is 5.3 miles. The amount of land required for right-of-way and the number of displacements will depend upon the route selected. (ELR Order No. 05821, 33 pages) (NTIS Order No. EIS–72 5821–D)

Draft, December 8

Long Island Sound Bridge, New York; counties: Westchester and Nassau. The proposed project is the construction of a bridge crossing of Long Island Sound with approaching highways connecting I–287 and I–95; length is 16.5 miles. The number of displaced families and businesses will depend upon the alternate chosen. The facility will result in regional growth changes to Westchester, Nassau, and Suffolk Counties, N.Y.; and Fairfield County, Connecticut. The project will require a section 4(f) review to obtain land from the Playland Park in Rye. Wetlands traversed by the project are Kirby Pond and areas surrounding Manurseny Island. There will be increases in noise pollution that will effect 3 area schools. Increases in air and water pollution will occur. (ELR Order No. 05748, 318 pages) (NTIS Order No. EIS–72 5748–D)

Draft, December 12

Dakota Street, South Dakota; county: Brown. The statement refers to a proposed comprehensive street system for the city of Aberdeen. The project contemplates reconstructing a 2-mile segment of Dakota Street, extending from U.S. 12 to Fairground Road, and improving a 1-mile rural section, extending from Fairground Road to FAS 845. A bicycle path and improved sidewalks are proposed for the entire project. Three structures and the Chicago-North Western Depot will be displaced. Increased noise and air pollution may affect an elementary school. (ELR Order No. 05759, 111 pages) (NTIS Order No. EIS–72 5759–D)

Final, December 21

L.R. 16059—Cook Forest State Park, Pa.; county: Clarion. The project is the improvement of L.R. 16059 which travels through Cook Forest State Park; length is 5.7 miles. A section 4(f) statement will be required to obtain 0.23 acre from the State park. Comments made by: USDA, DOI, DOT, EPA, HEW, regional and State agencies. (ELR Order No. 05800, 105 pages) (NTIS Order No. EIS–72 5800–F)

BRIAN P. JENNY,
Acting General Counsel.

V38-4 JAN 8 73 XUM

FEDERAL POWER COMMISSION

TONGASS NATIONAL FOREST ET AL.

Order Vacating Land Withdrawals

JANUARY 2, 1973.

The Alaska Power Administration, U.S. Department of the Interior, has reviewed the land withdrawals created for the 38 projects designated above and recommended revocation of these withdrawals in their entirety which are described below, thereby requiring Commission consideration under section 24 of the Federal Power Act.

The estimated prime power potential of the subject power sites ranges from 0 to 470 kw.

Proceedings for 14 of the 38 projects ended without issuance of a license while 24 of the projects were licensed. Project No. 1880 (335 horsepower) was the only project which had an authorized installed capacity over 200 horsepower. All licenses and permits have expired, been terminated, or surrendered, and the subject lands are no longer utilized for hydroelectric development.

Sixteen of the 24 projects that were licensed served fish canneries, four served mining operations, two served sawmills, one served the town of Hyder (1970 population 49), and one was never constructed. Many of the enterprises which were served by the projects have been discontinued. Those that are still operating receive power from other sources. The town of Hyder obtains power from diesel generation in Stewart, B.C.

Most of the projects were located in isolated areas and some were abandoned years ago without proper restoration of the Federal lands involved. Enforcement of any regulation pertaining to land restoration would not appear to be impaired by the proposed revocation of the subject land withdrawals.

Development, or redevelopment, of these small hydroelectric sites is considered unlikely because electric energy is available from other existing sources or equivalent power could be obtained at less cost from portable diesel generators. In any event, revocation of the withdrawals would not prevent future use of the lands for hydroelectric development.

The U.S. Geological Survey has concurred with the Alaska Power Administration's recommendations.

The Commission finds:

The withdrawals of the subject lands pursuant to the applications for Projects Nos. 63, 207, 212, 241, 297, 353, 402, 404, 511, 580, 599, 731, 783, 793, 794, 807, 812, 840, 876, 954, 1023, 1043, 1082, 1085, 1098, 1162, 1204, 1207, 1230, 1286, 1315, 1322, 1357, 1429, 1880, 1947, 1969, and 2046 serve no useful purpose and should be vacated in their entirety.

The Commission orders:

The withdrawals of the subject lands pursuant to the applications for Projects Nos. 63, 207, 212, 241, 297, 353, 402, 404, 511, 580, 599, 731, 783, 793, 794, 807, 812, 840, 876, 954, 1023, 1043, 1082, 1085, 1098, 1162, 1204, 1207, 1230, 1286, 1315, 1322, 1357, 1429, 1880, 1947, 1969, and 2046 are hereby vacated in their entirety.

By the Commission.

[SEAL] MARY B. KIDD, *Acting Secretary.*

1. PROJECT NO. 63

Tongass National Forest, Alaska; Beardslee Creek, tributary to William Henry Bay, on the west side of Lynn Canal

All lands enclosed by a line 200 feet outside the high water mark of the reservoir of approximately 175 acres formed by a log dam about 12 feet high, all lands within 100 feet of the center line of a conduit consisting of wood-stave pipe, 4,400 feet in length, extending from said dam, all lands within 100 feet of the powerhouse, and within 100 feet of a channel approximately 1,100 feet in length along North Fork of Beardslee Creek, by which water is returned from said powerhouse to Beardslee Creek, all as more fully shown and described on a map entitled "Alaska Endicott Mining & Milling Co.—Application for Preliminary Permit—Exhibit B," as filed in the office of the Federal Power Commission on January 3, 1922.

(Approximately 260 acres.)

2. PROJECT NO. 207

Little Susitna River Basin, near Palmer, Alaska

All lands within one-fourth mile of Fishhook Creek lying between the 1400- and 1550-foot contours (datum mean sea level).

All lands within one-fourth mile of Little Susitna River lying between the 1000- and 1550-foot contours (datum mean sea level).

(Approximately 850 acres.)

3. PROJECT NO. 212

Tongass National Forest, Alaska; Chichagof Island

All lands below the 150-foot contour, draining into two unnamed lakes and into a short stream connecting the two lakes, all located between one-half mile and 1½ miles inland from the head of Didrickson Bay; and all lands within 500 feet of the middle course of the stream approximataely one-half mile long which forms the outlet of the lower of the two lakes and drains into the tidal arm at the northwest corner of Didrickson Bay; a strip of land 500 feet in width extending along the easterly shore of the tidal arm from its southerly point to the outlet of the above-mentioned creek. These features are shown on a map designated as "Exhibit 'A'" and entitled "Proposed Power Development, Hirst-Chichagof Mining Co.," filed in the office of the Federal Power Commission on May 10, 1921.

(Approximately 250 acres.)

4. PROJECT NO. 241

Tongass National Forest, Alaska; Stream at head of Pavlof Harbor, Freshwater Bay Chichagof Island

All lands within the surveyed boundary of the reservoir or within 50 feet outside thereof, and all lands within 50 feet of the center line of the conduit location, all as shown and more particularly described on a map designated as "Exhibit F" and entitled "Map to Accompany Application to U.S. Forest Service for Final Permit for Water Power Project at Pavlof Harbor—Freshwater Bay—Alaska, by Freshwater Bay Lumber Co. of Douglas, Alaska," and filed in the office of the Federal Power Commission on August 18, 1921.

(Approximately 15 acres.)

5. PROJECT NO. 297

Craigie Creek, tributary to Willow Creek, Susitna River Basin, near Palmer, Alaska

All lands within one-eighth of Craigie Creek between elevations 2,200 feet and 2,700 feet (datum mean sea level).

(Approximately 160 acres.)

6. PROJECT NO. 353

Tongass National Forest, Alaska

All lands of the United States lying within 50 feet of the center line of the transmission line location 21,500 feet in length, extending from the town limits of Skagway, along the Skagway River, in a northerly direction to the powerhouse location, all as shown on a map designated "Exhibits J and K" and entitled "Home Power Co., Skagway, Alaska," and filed in the office of the Federal Power Commission on May 21, 1927.

(Approximately 29 acres.)

7. PROJECT NO. 402

Archangel Creek, tributary to Little Susitna River, near Palmer, Alaska

All lands lying within one-fourth mile of Archangel Creek from the mouth of Reed Creek downstream to the junction of Archangel Creek with Little Susitna River.

(Approximately 480 acres.)

8. PROJECT NO. 404

Chugach National Forest, Alaska; Port Wells, Prince William Sound

All lands within 50 feet of the centerline of the pipeline, approximately 4,100 feet in length, extending westerly from the powerhouse on the west shore of Harrison Lagoon to the outlet of an unnamed lake on Lagoon Creek; all lands within a radius of 200 feet of the center of the powerhouse, all lands within 200 feet of the shores of the lake; all as shown on an amended map entitled "Preliminary Application for License for Minor Power Projects at Harrison Lagoon, Alaska"; filed in the office of the Federal Power Commission on December 8, 1924, and made a part of the license by Amendment No. 1, dated February 7, 1925.

(Approximately 20 acres.)

All lands of the United States lying within 50 feet of the centerline of the constructed transmission line location, approximately 6,300 feet in length, extending southwesterly from the powerhouse on the west shore of Harrison Lagoon to the Granite mine stampmill as shown on the above-described map.

(Approximately 14 acres.)

9. PROJECT NO. 511

Tongass National Forest; Thumb Creek, tributary to Salmon River, near Hyder, Alaska

Project No. 511 affected lands lying along Thumb Creek from its mouth to a point about three-fourths mile upstream. A precise boundary was not established for this project.

(Acreage not determined.)

10. PROJECT NO. 580

Tongass National Forest, Fish Creek, tributary to Salmon River, near Hyder, Alaska

All lands within .2 of a mile of that section of Fish Creek between the south line of

surveyed Fish Creek Lode Claim No. 5 (Survey No. 1482) and the Salmon River Highway, a distance of approximately .6 mile.

(Approximately 183 acres.)

11. PROJECT NO. 599

Archangel Creek, tributary to Little Susitna River, near Palmer, Alaska

All lands lying within 100 feet of "Lower Lake" located approximately 2 miles up Archangel Creek from its confluence with Reed Creek; also all other lands lying within the project area shown on a map designated "Exhibit F" and entitled: "Map Accompanying Application of Fern Gold Mining Co., for License for Water Power Project, Archangel Creek, Willow Creek Mining District, Territory of Alaska," filed in the office of the Federal Power Commission on April 10, 1925.

(Approximately 6 acres.)

12. PROJECT NO. 731

Tongass National Forest, Alaska; Kupreanof Island, Gunnock Creek, near Kake

All lands within the triangular shaped "Power Location" and all lands within 50 feet of the center line of the constructed conduit location 2,308 feet in length extending from said "Power Location" along Gunnock Creek northerly to the dam site; and all lands within 50 feet of the 1¼ acre storage reservoir above the dam, all as shown on a map entitled "Water Power Project, Sanborn-Cutting Co., Kake, Alaska," and filed in the office of the Federal Power Commission on July 28, 1926.

(Approximately 8 acres.)

All lands lying within 50 feet of the center line of the transmission line location extending approximately 3,740 feet between the powerhouse on Gunnock Creek and the north boundary of the patented tract known as U.S. Survey No. 963, as shown on the above described map.

(Approximately 8 acres.)

13. PROJECT NO. 783

Tongass National Forest, Alaska; Prince of Wales Island

All lands within 200 feet of the reservoir above the constructed dam on Chomly Creek and all lands within 50 feet of the center line of that portion of the constructed conduit extending 2,250 feet from said dam to the south boundary of the Chomly cannery site, all as shown on a certain map designated "Exhibit F" which formed a part of the license issued by the Federal Power Commission on May 24, 1927.

(Approximately 12 acres.)

14. PROJECT NO. 793

Tongass National Forest, Alaska; Baranof Island

All lands lying within 200 feet of the marginal limits of Deep Lake, and all lands lying within 50 feet of the centerline of the flume and conduit locations extending along Red Bluff Creek for a distance of approximately 1,200 feet to the Wakefield Fisheries cannery on Red Bluff Bay, all as shown on a map designated "Exhibit F" and entitled "Map showing project boundary accompanying application for license of Wakefield Fisheries, situated on north shore of Red Bluff Bay 1½ nautical miles northwest from entrance, Baranof Island," and filed in the office of the Federal Power Commission on April 12, 1927.

(Approximately 24 acres.)

15. PROJECT NO. 794

Tongass National Forest, Alaska; Chichagof Island

All lands within 50 feet of the centerline of the flume and conduit location extending from the 2-foot dam across Margaret Creek for a distance of approximately 3,800 feet to the point of intersection of the pipeline with the south boundary of U.S. Survey No. 1657, the trade and manufacturing site for which patent has been applied for by the Deep Sea Salmon Co., all as shown on a map designated "Exhibit F" and entitled "Map showing project boundaries accompanying application for license of Deep Sea Salmon Co., situated on Margaret Creek, Port Althorp, No. end of Chichagof Island, Alaska," and filed in the office of the Federal Power Commission on April 12, 1927.

(Approximately 9 acres.)

16. PROJECT NO. 807

Chugach National Forest, Alaska; Knight Island

All lands within 25 feet of the centerline of the conduit location extending 1,300 feet upstream along the unnamed creek on south side of Drier Bay, Knight Island, as shown on a map designated "Exhibit E" and entitled "Map accompanying application of Gorman Packing Corp. for license for water power project, Unnamed Creek on Drier Bay, Knight Island, Alaska," and filed in the office of the Federal Power Commission on May 18, 1927.

(Approximately 2 acres.)

17. PROJECT NO. 812

Tongass National Forest, Alaska, Prince of Wales Island

All lands of the United States lying within 200 feet of the marginal limits of a reservoir formed by a 7-foot dam across Harris Creek, and all lands of the United States lying within 50 feet of the centerline of the flume location extending 1,286 feet downstream from said dam along Harris Creek to the powerhouse location on the bank of the creek, all as shown on a map designated "Exhibit J" and entitled "Map showing Project Boundaries accompanying application for license of Kassan Gold Co., situated on Harris Creek, 1.7 miles southwest of Hollis, Twelvemile Arm, Kassan Bay, Prince of Wales Island, Alaska," and filed in the office of the Federal Power Commission on June 3, 1927.

(Approximately 10 acres.)

18. PROJECT NO. 840

Tongass National Forest; Spruce Creek, at the head of Windham Bay on the mainland of southeastern Alaska

All lands within 50 feet of the centerline of a proposed pipeline to extend 1,956 feet in a southerly direction from the point of intake (elevation 1,775 feet) at the 20-foot dam to be built at the outlet of a small basin in the creek valley, to the delivery point at the northwest corner of the Jacob Marty amalgamating and concentrating mill, and all lands within 50 feet of the maximum flow line of the reservoir to cover approximately 40 acres above said dam, all as shown on a map designated "Exhibit E" and entitled "Spruce Creek Power Project, Windham Bay, Tongass National Forest, Alaska, map to accompany application of Jacob Marty mines for license for minor project," and filed in the office of the Federal Power Commission on October 8, 1927.

(Approximately 57 acres.)

19. PROJECT NO. 876

Tongass National Forest, Alaska, Prince of Wales Island

All lands within 50 feet of the maximum flow line of a small reservoir of 300 feet elevation, created by a constructed dam 50 feet long and 8 feet high on an unnamed creek entering the North Arm of Moira Sound adjacent to the west side of applicant's salmon cannery at latitude 55°07' N., longitude 132°08' W., and all lands within 50 feet of the centerline of the conduit line location extending 2,200 feet from said dam to a water wheel located at slightly more than tidewater elevation in the cannery building, all as shown on a map designated "Exhibit E" and entitled "The Starr Collinson Packing Co., North Arm Moira Sound, Tongass National Forest, Alaska, Map to accompany application for license for Minor Project," and filed in the office of the Federal Power Commission on February 4, 1928.

(Approximately 6 acres.)

20. PROJECT NO. 954

Tongass National Forest; Granite Creek, tributary to Salmon River, near Hyder, Alaska

This project was redesignated as Project No. 1043 (described below) after a transfer of ownership.

(Acreage not determined.)

21. PROJECT NO. 1023

Tongass National Forest, Alaska, Baranof Island

All lands within the powerhouse site and dam site; all lands within 25 feet of the centerline of the pipeline location from the dam site to the powerhouse site, and approximately 1,000 feet in length; all lands within 50 feet of the maximum flow line of Cliff Lake Reservoir; all as shown on a map designated "Exhibit F" and entitled "Deep Cove Power Project, Baranof Island, Tongass National Forest, Alaska, Map to Accompany Application of the Atlas Packing Corporation for License for Minor Project, Surveyed October 3, 1928, by Wellman Holbrook," and filed in the office of the Federal Power Commission on October 3, 1929.

(Approximately 13 acres.)

22. PROJECT NO. 1043

Tongass National Forest; Granite Creek, tributary to Salmon River, near Hyder, Alaska

All lands within the power house site, 200 feet-square, and all lands within 50 feet of the constructed diversion dam on Granite Creek; all lands within 50 feet of the centerline of the flume and pipeline extending from the diversion dam to the powerhouse; all lands lying within 50 feet of the centerline of the transmission line location extending from the power house to the town of Hyder, all as shown on a map designated "Exhibit F" and entitled "Granite Creek Project, Tongass Power and Light Co., Hyder, Alaska," and filed in the office of the Federal Power Commission on December 16, 1929.

(Approximately 33 acres.)

23. PROJECT NO. 1082

Tongass National Forest, Alaska, Prince of Wales Island

All lands lying within the project boundaries surrounding the small diversion dam on

V 38 - 4 JAN 8 73 XUM

Linkum Creek and all lands lying within 50 feet of the centerline of the pipeline location along said creek between the dam and the boundary line of U.S. Survey No. 280; all as shown on a map designated "Exhibit F" and entitled "Map showing project boundaries accompanying application for license of Booth Fisheries Co. situated on Linkum Creek, Kasaan Bay, East Coast of Prince of Wales I., Southeast Alaska," and filed in the office of the Federal Power Commission on April 15, 1930.

(*Approximately 1 acre.*)

All lands of the United States on the North Shore of Kasaan Bay lying within 50 feet on either side of the pipeline location and extending approximately 200 feet beyond the diversion dam on Linkum Creek, all as shown on a map designated "Exhibit F" and entitled "Map accompanying Application of the Pacific American Fisheries, Inc., for Amendment of License No. 1082 for a Water Power Project on Linkum Creek, Kasaan Bay, East Coast of Prince of Wales Island—Territory of Alaska," and filed in the office of the Federal Power Commission on April 30, 1937.

(*Approximately 7.60 acres.*)

24. PROJECT NO. 1085

Tongass National Forest; Glory Creek, near Port Houghton on the mainland of southeastern Alaska

All lands of the United States lying within 100 feet of Glory Creek from its mouth to the proposed dam site, a distance of approximately three-quarters of a mile; and all lands of the United States lying within 750 feet of Glory Creek from the proposed dam site to a point three-quarters of a mile above the dam site; all as shown on a map designated and entitled "Exhibits H and I, Glory Creek Project," and filed in the office of the Federal Power Commission on April 21, 1930.

(*Approximately 154 acres.*)

25. PROJECT NO. 1098

Snowbird Creek, a tributary of Anchorage Bay, an arm of Chignik Bay, on the south coast of the Alaska Peninsula

All United States lands lying within 100 feet of the timber diversion dam on Snowbird Creek, and within 100 feet of the center line of a wood pipeline 1,480 feet in length from diversion dam to the boundary of trade and manufacturing site (U.S. Survey No. 306), all as shown on a map designated "Exhibit F" and entitled "Map Showing Project Boundaries Accompanying Application for License of Booth Fisheries Co. Situated on Snowbird Creek, Anchorage Bay, an arm of Chignik Bay, Alaska Peninsula, Alaska," and filed in the office of the Federal Power Commission on June 5, 1930.

(*Approximately 4 acres.*)

26. PROJECT NO. 1162

Tongass National Forest, Alaska, Baranof Island

All lands within 100 feet of the flume pipeline, and all lands within 100 feet of the unnamed creek between the diversion dam and a point 200 feet upstream, except lands included within the Northwestern Herring Company cannery site; all as shown on a map designated "Exhibits C & F" and entitled "Northwestern Herring Co., Port Conclusion, Alaska," and filed in the office of the Federal Power Commission on April 9, 1931.

(*Approximately 7 acres.*)

27. PROJECT NO. 1204

Chugach National Forest; Hanley Creek, tributary to McClure Bay, Port Nellie Juan, Alaska

All lands within 50 feet of the centerline of the flume and pipeline extending from the present diversion dam to the east boundary of cannery site of the Copper River Packing Co., under special use permit by the Forest Service, and all lands within 50 feet of Hanley Creek between Hanley Lake and the present diversion dam; all as shown on a map designated "Exhibit F" and entitled "Map Showing Project Boundaries Accompanying Application for License (Minor Project) of Copper River Packing Co.," and filed in the office of the Federal Power Commission on April 2, 1932.

(*Approximately 5 acres.*)

28. PROJECT NO. 1207

Chugach National Forest; Sahlin Creek, tributary to Sheep Bay, about 13 miles northwest of Cordova, Alaska

All lands within 25 feet of the centerline of the flume and pipeline extending from Sahlin Creek to a sawmill on the shore of Sheep Bay, and all lands embraced in the powerhouse site on Sheep Bay adjacent to the mouth of Sahlin Creek; all as shown on a map designated "Exhibit E" and entitled "Sahlin Creek Power Project, Sheep Bay, Chugach National Forest, Alaska, map to accompany application of H. G. Cloes for license for minor project," and filed in the office of the Federal Power Commission on May 9, 1932.

(*Approximately 1 acre.*)

29. PROJECT NO. 1230

Chugach National Forest; Stevens Creek, tributary to Orca Inlet, Alaska

All lands within 50 feet of the centerline of the tunnel, flume, and pipeline, extending from an intake on Stevens Creek to and beyond the shore of Orca Inlet, and all lands within 50 feet of the intake and main water wheel; all as shown on a map designated "Exhibit E" and entitled "Premier Salmon Co., Alaska, Chugach National Forest, Map to accompany application for license for minor project," and filed in the office of the Federal Power Commission on December 13, 1932.

(*Approximately 2 acres.*)

30. PROJECT NO. 1286

Tongass National Forest, Prince of Wales Island, Tunnel Creek, near Dolomi Bay, Alaska

All lands of the United States lying within 200 feet of the normal water levels of Upper and Lower Lakes; and all lands of the United States lying within 1,000 feet of the normal water level of Paul Lake from the old mouth of the creek to a point 3,500 feet eastward therefrom; all as shown on a map entitled "General Map & Profile, Tunnel Creek Project, Dolomi, Alaska, of the B. C. Alaska Mines American Inc., Ketchikan, Alaska, dated July 1934," and filed in the office of the Federal Power Commission on August 6, 1934.

(*Approximately 46 acres.*)

31. PROJECT NO. 1315

Dahl Creek, near Hood Bay, Admiralty Island, Alaska

All lands of the United States on the north shore of Hood Bay included within the project boundaries surrounding the powerhouse site and the intake dam on Dahl Creek; also all lands within 20 feet of each side of the centerline of the pipeline location between the dam and powerhouse; all as shown on the project map designated "Exhibit A" and filed in the office of the Federal Power Commission on May 23, 1935.

(*Approximately 1 acre.*)

32. PROJECT NO. 1322

Unnamed Lake near Port Hobron, Sitkalidak Island, Alaska

All lands of the United States lying within the project boundary as shown on a map designated "Exhibit H" and entitled "Map Accompanying Application of Chirikof Island Cattle Company for Preliminary Permit for Water Power Project on a Small Unnamed Lake on Sitkalidak Island, Alaska," and filed in the office of the Federal Power Commission on July 23, 1935.

(*Acreage not determined.*)

33. PROJECT NO. 1357

Tongass National Forest, Goemere Creek (Box Canyon), Tributary to Washington Bay, Kuiu Island, Alaska

All lands of the United States on the north shore of Washington Bay lying within 50 feet of the dam on Box Canyon and all lands lying within 50 feet of the centerline of each of two pipeline locations leading from the diversion dam to the fish-packing plant, all as shown on a map designated "Exhibit F" and entitled "Storfold & Grondahl Packing Company, Kuiu Island, Alaska, Tongass National Forest, Map to accompany application for license for minor project, Survey by J. M. Wyckoff, F. R. May 25, 1932," and filed in the office of the Federal Power Commission on December 18, 1935.

(*Approximately 1.5 acres.*)

34. PROJECT NO. 1429

Kodiak Island, Alaska

All lands of the United States on the west shore of Uyak Bay lying within 50 feet on either side of the pipeline location and extending 50 feet beyond the flood area above the diversion dam, as shown on a map entitled "Domenici Power Project, Uyak Bay, Kodiak Island, Alaska, Map to accompany application of Herbert T. Domenici for license for minor project, Surveyed July 20, 1936, by Harold E. Smith, Dist. Ranger," and filed in the office of the Federal Power Commission on March 31, 1937.

(*Approximately 3.26 acres.*)

35. PROJECT NO. 1550

Chugach National Forest, Hanley Creek Tributary to McClure Bay, Port Nellie Juan, Alaska

All lands lying within a strip 100 feet in width embracing the dam, pipeline, powerhouse and transmission line right-of-way locations, and all lands lying within a line parallel to and 50 feet distant, horizontal measurement, from the mean high water level of Hanley Lake, all as shown on a revised map designated "Exhibit J, K, & L" and entitled "Map Showing Project Boundaries Accompanying Application for License (Major Project) of Copper River Packing Company," and filed in the office of the Federal Power Commission on January 26, 1943.

(*Approximately 45.9 acres.*)

36. PROJECT NO. 1947

Gull Rock Creek (Johnson Creek), Tributary to Turnagain Arm of Cook Inlet, About 6 Miles Northwest of Hope, Alaska

All lands of the United States lying within the project boundary surrounding the dam, flume, penstock, pipelines, powerplants, and tailraces, as shown on a map designated "Exhibit K" and entitled "Map to Accompany Application for License for Minor Project of E. M. Turpin on Gull Rock Creek—Turnagain Arm, Alaska," filed in the office of the Federal Power Commission on March 15, 1946.

(*Approximately 1.582 acres.*)

37. PROJECT NO. 1969

Chena Slough, Near Fairbanks, Alaska

All lands of the United States lying within the project boundary as shown on a map designated "Exhibit K" and entitled "Power Project of Cline S. Koonz, Fairbanks, Alaska," and filed in the office of the Federal Power Commission on June 3, 1947.

(*Acreage not determined.*)

38. PROJECT NO. 2046

Unnamed Stream at the Head of Bear Cove, an Arm of Kachemak Bay, Kenai Peninsula, Alaska

Project No. 2046 affected lands lying along the unnamed stream at the head of Bear Cove. A precise boundary was not established for this project.

(*Acreage not determined.*)

[General Order 464]

ESTABLISHMENT OR MANAGEMENT OF ADVISORY OR INTERAGENCY COMMITTEES

Administrative Manual

DECEMBER 19, 1972.

Federal Power Commission Administrative Manual—Establishment or Management of Advisory Committees or Interagency Committees, Instruction No. AM 1X60.1, Date: December 19, 1972; Supersedes: AM 1X60.1 dated August 14, 1964, 1X31.1 dated May 2, 1972.

1. *Purpose.* The purpose of this general order instruction is to implement the Commission's administrative and policy responsibilities relative to the establishment and management of advisory committees or interagency committees pursuant to the provisions of the Federal Power Act, 16 U.S.C. 791(a) et seq., the Natural Gas Act, 15 U.S.C. 717(a) et seq., the Federal Advisory Committee Act, 86 Stat. 770, and Office of Management and Budget Circular A–63, "Committee Management", draft November 27, 1972, copy attached.[1] Both types of committees are defined infra, section 3.

Federal Power Commission Administrative Manual Instruction AM 1X60.1, dated August 14, 1964, provided guidelines for the establishment and management of committees of various types, including interagency committees, public advisory committees, international commissions, councils, boards, and internal Commission staff committees involving two or more offices or bureaus. That Instruction was designed to meet the requirements of inter alia Bureau of the Budget Circular A–63 dated March 2, 1964, and Executive Order No. 11007 dated February 26, 1962, 27 FR 1875. That Circular is superseded by Circular A–63 draft November 27, 1972.[2] Executive Order No. 11007 is superseded by Executive Order No. 11671 dated June 5, 1972, 37 FR 11307. Executive Order No. 11671 is superseded in part by Executive Order No. 11686 dated October 7, 1972, 37 FR 21421, which order is, in turn, to be superseded January 5, 1973, by reason of the provisions of the Federal Advisory Committee Act.

Instruction No. 1X31.1 dated May 2, 1972, sets forth the legal framework for various advisory committees established under the National Gas Survey pursuant to Executive Order Nos. 11007 and 11671.

In addition to advisory committees established under the National Gas Survey, the Commission has established various advisory committees under the National Power Survey and the Alaska Power Survey pursuant to Executive Order No. 11671. Exhibit I hereto lists the various advisory committees established by the Commission under the three surveys.

Exhibit II hereto[2] lists various interagency committees upon which a Federal Power Commission member or staff representative serves. None of these committees were established by this Commission or its Chairman.

The President directed as follows in Executive Order No. 11686, section 2: "The Director of the Office of Management and Budget shall * * * (3) prescribe administrative guidelines and management controls for * * * committees composed wholly of full-time officers or employees of the Federal Government (interagency committees not subject to the provisions of the (Federal Advisory Committee) Act), as well as for advisory committees covered by the act." Circular A–63, draft November 27, 1972, adopts a number of the statutory requirements which are applicable to advisory committees and applies them to interagency committees. The Circular is organizationally divided into Parts I and II, one part being specifically directed to each of the two types of committees. Circular A–63 states in part as follows:

ADVISORY COMMITTEES

Part I, section 7a. The head of each agency shall insure compliance with the (Federal Advisory Committee) Act and this circular and shall issue appropriate implementing regulations * * * to all advisory committees established or used by the agency and shall be consistent with the agency's regulations implementing the Freedom of Information Act.

Each agency may establish (as a part of its regulations or otherwise) additional administrative guidelines and management controls for advisory committees established by the agency.

INTERAGENCY COMMITTEES

Part II, section 4(c). Each agency shall establish uniform administrative guidelines and management controls for interagency committees established by that agency.

As will be seen infra, the application of these general requirements of Circular A–63 produces a number of common provisions equally applicable to the management of advisory committees and interagency committees. Accordingly, this instruction has been prepared to simplify Commission requirements by using common provisions where possible and to distinguish between the two types of committees where necessary.

Additionally, it is important to note that advistory committees, established and utilized by the Commission in the conduct of the Alaska Power Survey, the National Gas Survey, and the National Power Survey, are subject to specific orders, rules, and regulations of the Commission in each instance. Nothing in this general order supersedes those requirements and constraints; rather, it sets forth, in summary form, general policy considerations and requirements arising from the provisions of Circular A–63. Congressional policies reflected in the Federal Advisory Committee Act, 86 Stat. 770, include the following purposes (Circular A–63, part I, section 2):

(a) Limiting the number of advisory committees to those that are essential and terminating any advisory committees which are not fulfilling their purposes;

(b) Insuring effective use of advisory committees and their recommendations, while assuring that decisional authority is retained by the responsible Federal officers;

(c) Providing standards and uniform procedures with respect to creation, operation, and duration of advisory committees;

(d) Insuring that adequate information is provided to the Congress and the public regarding advisory committees and insuring adequate opportunities for access by the public to advisory committee meetings.

The basic organic statutory authority of the Commission for the establishment and utilization of advisory committees in the conduct of the three surveys is as set forth in the Federal Power Act, 16 U.S.C. 791(a) et seq., and the Natural Gas Act, 15 U.S.C. 717(a) et seq. To those engaged in survey work and advisory committee activities, Freedom of Information Act, 5 U.S.C. 552, provisions apply as do requirements of the antitrust laws, and most recently, the Federal Advisory Committee Act provisions, 86 Stat. 770.[3]

2. *Scope.* This instruction applies to all advisory committees established or utilized by the Commission, as well as to all interagency committees upon which a

[1] The covering memorandum of the Office of Management and Budget, dated November 27, 1972, indicates that the draft Circular is to be interpreted as an interim regulation of the Director pursuant to the Federal Advisory Committee Act. Accordingly, the provisions of regulations prescribed by this order are subject to possible change upon the issuance of any final regulations by the Director, Office of Management and Budget. The draft circular is referred to hereinafter as Circular A–63, without reference to its interim status, except where contextual relationship make a more definitive reference appropriate.

[2] Exhibits I–IV and a copy of Circular A–63 draft filed as part of the original document.

[3] In the context of the Commission's prior actions and established administrative regulations governing advisory committees utilized in the National Gas Survey (Instruction 1X31.1 (section 3)), the Commission gave general guidance relative to general legal principles applicable to advisory committee meetings, which guidance is equally applicable herein and should be recognized. See Exhibit III, filed as part of the original document.

V 38 - 4 JAN 8 73 XUM

Federal Power Commission member or staff representatives serves. Federal Power Commission internal committees established within a single office or bureau of the Commission are the responsibility of the concerned Commission office or bureau head, and those involving two or more offices or bureaus are the responsibility of the Commission's executive director. Both of these types of internal Commission committees are excluded from this instruction.

3. *Designations and Definitions.* (a) The Chairman of the Federal Power Commission is the designated Advisory and Interagency Committee Management Officer of the Commission (Circular A-63, Part I, sections 7 b, c, d, 8, 9, 10, 11, 12, 13; Part II, sections 4, 5, 6, 7). In the exercise of that responsibility, the executive director of the Commission shall assist the chairman so as to:

(i) Exercise control and supervision over the establishment, procedures, and accomplishments of all advisory committees established or utilized by the Commission, as well as all interagency committees upon which a Federal Power Commission member or staff representative serves;

(ii) Assemble and maintain within the files of the Commission committee reports, records, and other papers;

(iii) Carry out upon behalf of the Commission the Freedom of Information Act provisions as they relate to the activities of such committees;

(iv) Provide administrative remedies for noncompliance with the provisions of the Federal Advisory Committee Act and Circular A-63; and

(v) Discharge all reporting, review and budgetary requirements arising from activities of the Commission and advisory committees and interagency committees with respect to the Director, Office of Management and Budget, Committee Management Secretariat, Department of Justice, Office of Legal Counsel.

(b) The Office of Public Information of the Federal Power Commission is the designated office for public inspection and copying of advisory committee records, reports, transcripts, minutes, appendices, working papers, drafts, studies, agendas, or other documents which were made available to or prepared for or by advisory committees, all subject to the Freedom of Information Act provisions, section 1.36, Public Information and Requests, of the Commission's rules of practice and procedure, 18 CFR 1.36, and Part I, section 10b, Access to Records, Circular A-63. That office is also the designated office for public inspection and copying of records, reports, and documents of interagency committees, subject to Freedom of Information Act provisions and § 1.36 of the Commission's rules of practice and procedure. As a matter of convenience to the general public, a description of general file materials of this type shall be maintained at each of the five regional offices of the Federal Power Commission (Atlanta, Ga., Chicago, Ill., Fort Worth, Tex., New York, N.Y., and San Francisco, Calif.). The Commission's established procedures for duplication of materials available for public inspection and copying shall apply with respect to the foregoing advisory committee materials. The cost of reproduction shall be in accordance with established Commission charges, currently 8 cents per page.

(c) The term "advisory committee", as used herein, means any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee or other subgroup thereof (that is not composed wholly of full-time officers or employees of the Federal Government which is established or utilized by the Federal Power Commission in the interest of obtaining advice or recommendations to the Commission in connection with the performance of duties imposed upon the Commission by law and determined to be in the public interest by the Commission. (Federal Advisory Committee Act sections 3(2)(c), 9(a)(2), 86 Stat. 770, 773-4.) The term includes all advisory (including industry advisory and industrial advisory) committees listed on Exhibit I and previously established and utilized by the Commission in accordance with the provisions of Executive Orders 11007 and 11671. See Executive Order 11007, section 2(a)(b), 3 CFR 573; Executive Order 11671, section 1(6)(7), 3 CFR ——, 37 FR 11307; Circular A-63, part I, sections 3b, 4.

The term "advisory committee" is a generic term used to denote advisory groups, whether formal or informal, which are "established" or "utilized" by a Government agency "in the interest of obtaining advice or recommendations" and are possessed of some or all of the following characteristics: "fixed membership, usually selected by a Federal official or determined on the basis of Federal law"; "established by a Federal official or on the basis of Federal law • • • the initiative for its use as an advisory body • • • came from a Federal official"; "a defined purpose of providing advice regarding a particular subject • • • subjects"; "an organizational structure"; and "regular or periodic meetings" (Circular A-63, part I, section 4a(1)). The term includes subcommittees or subgroups of the foregoing, whether formal or informal; the formal type being "one which independently possesses most of the requisites of an advisory committee (fixed membership, separate staff, regular meetings, etc.)"; and the informal type being "one possessing few of those requisites (e.g., during a particular meeting, an advisory committee might divide itself into several subgroups to permit simultaneous discussion of several topics) • • • several committee members who confer informally with regard to a matter relating to the committee" (Circular A-63, part I, section 4a(4)). Operational groups are not covered by the term (Circular A-63, part I, section 4a(5)). Where a group is both operational and advisory, the group is to be treated as an advisory committee to the extent that the advisory functions are separable or not incidental to operational functions (ibid). The term does not include committees "composed wholly of full-time officers or employees of the Federal Government." (Circular A-63, part I, section 4b(1)). Also excluded are the Advisory Commission on Intergovernmental Relations, the Commission on Government Procurement, advisory committees established or utilized by the Central Intelligence Agency or the Federal Reserve System, local civic groups "whose primary function is that of rendering a public service with respect to a Federal program", State or local committees "established to advise State or local officials", or persons or organizations which have contractual relations with Federal departments or agencies and which do not have a substantive advisory relation with the agency of the type set out supra.[4] (Circular A-63, part I, section 4b (2)-(6)).

In the context of the Commission's prior actions and established administrative regulations governing advisory committees utilized in the National Gas Survey, Instruction No. 1X31.1 (section 2), the Commission gave specific guidance as to the definition of "advisory committee", which guidance is equally applicable herein and should be recognized.[5]

(d) The term "interagency committee" means any committee, board, commission, council, conference, panel, task force, or other similar group established by a Federal official, department or agency and providing advice or recommendations, for coordinating or operational purposes relative to respective activities of departments or agencies or for other stated purposes, and which has been or will be in existence more than 12 months, and all of whose membership consists exclusively of full-time Federal Government officers or employees, representing more than one department or agency (Circular A-63, part II, sections 2(a)(b); 3, 6).

(e) The term advisory committee "charter" means the Federal Power Commission order or orders establishing or utilizing an advisory committee (Circular A-63, part I, section 8(d)).

(f) The term interagency committee "charter" means the statements, orders, proclamations, or other documents establishing or continuing an interagency committee, issued by the Federal Power Commission, its Chairman, or by some other authorized department or agency of the Federal Government or official thereof, or any statute establishing such committee (Circular A-63, part II, section 6(b)).

4. *General Policy Guidelines and Directives of the Commission For Administrative Control Activation, Operation and Retention of Advisory Committees and Interagency Committees.*—(a) *Administrative.* Subject to applicable statutory requirements and guideline administrative authority and responsibilities of the Director, Office of Management and

[4] Circular A-63, part I, section 4b(6) states: "• • • For example, a consulting firm hired by an agency to provide advice regarding a matter would not be subject to the Act.• • •"

[5] See Exhibit IV, filed as part of the original document.

Budget, relative to the establishment or management of advisory committees or interagency committees, uniform administrative guidelines, and management controls shall be applied to such committees insofar as appropriate (Circular A-63, part I, sections 6a, 7; part II, section 4(a)(b)(c)(d)). To that end, the Advisory and Interagency Committee Management Officer of the Commission will maintain systematic information on the nature, functions, activities, operations, and accomplishments of each advisory committee established or utilized by the Commission as well as interagency committees upon which a Federal Power Commission member or staff representative serves.

(b) *Establishment in general.* Advisory committees and interagency committees should be established only when they are determined to be essential and their objectives cannot be accomplished within the framework of existing organization (Circular A-63, part I, sections 2, 8; part II, sections 3, 6). The number of committees shall be kept to the minimum necessary to the accomplishment of the foregoing, taking into consideration changes in assigned responsibilities, merger or abolition of, existing committee structures so as to determine whether—each such committee is carrying out its assigned purpose, and such purposes and assigned responsibilities are consistent with applicable statutes or Presidential directives. Committees should be revised, merged, or abolished when they are determined to be without purpose as established. (Federal Advisory Committee Act, sections 2, 5; 86 Stat. 770, 771-2). Unless otherwise provided by statutory requirement or Presidential directive, advisory committees and interagency committees should not continue in existence beyond 2 years from the respective dates of their formation, except where the establishing governmental authority renews such committee by appropriate action prior to the end of such period or a renewal thereof (Circular A-63, part I, section 9; part II, section 6).

(c) *Establishment of advisory committees.* Advisory committees should be established or utilized only when specifically authorized by statute or Presidential directive or specifically determined as a matter of formal record by an agency such as this Commission, and its Chairman, to be in the public interest in connection with the performance of duties imposed by law upon the Commission. (Federal Advisory Committee Act, section 9(a), 86 Stat. 773.) In the case of advisory committees to be established, such formal determination shall be completed after Commission consultation with the Director, Office of Management and Budget (Committee Management Secretariat of the Office of Management and Budget), concurrence in the proposal by the Secretariat, and timely notice published in the FEDERAL REGISTER by the Commission's Chairman certifying that the creation of such committee is in the public interest and providing a description of the purpose and nature of the proposed advisory committee. Unless otherwise permitted by the Committee Management Secretariat for good cause, 30 days published notice will be given prior to formal action of the Commission establishing or utilizing such advisory committee (Circular A-63, part I, section 8a).

As indicated in section 3(e) supra, the respective charters of advisory committees are the Commission order or orders establishing or utilizing such committees. Upon the issuance of such orders, the respective committee charters shall be deemed to be filed with the Commission and copies of each Commission order thereupon shall be transmitted by the Secretary of the Commission to the Chairman, Committee on Commerce, U.S. Senate, Chairman, Interstate and Foreign Commerce Committee, House of Representatives, and Librarian, Library of Congress (Circular A-63, part I, section 8d(1)).[6] Until the issuance of such Commission orders "no advisory committee shall meet or take any action" (Circular A-63, part I, section 8d(3)). Commission orders shall set forth the information as specified in section 9(c) of the Federal Advisory Committee Act, 86 Stat. 774.[7]

Advisory committees shall be established or utilized in accordance with advisory committee charters (Circular A-63, part I, section 8c). Unless otherwise specifically provided by statutory requirement or Presidential directive, the function of advisory committees is solely that of advising or recommending (Circular A-63, part I, section 8c (1)-(2)). Determinations of policy to be expressed or actions to be taken with respect to such advice or recommendations are matters solely for Federal governmental determination and expression by the appropriate governmental official, department or agency (ibid). Necessarily, the advice and recommendations of advisory committees should be the result of independent judgment of such committees and not inappropriately influenced by the appointing governmental authority or any special interest (Federal Advisory Committee Act, section 5(b)(3), 86 Stat. 771; Circular A-63, part I, section 8b (3)-(4)). The membership of advisory committees should be "fairly balanced in terms of the points of view represented and the committee's function • • • No strict rule of proportional representation • • • is applicable • • • there is to be no discrimination on the basis of race, color, national origin, religion, or sex." (ibid).

(d) *Establishment in interagency committees*—Interagency committees should be established or continued only when specifically authorized by statute or Presidential directive or specifically determined as a matter of formal record, by a department or agency such as this Commission, or its Chairman, to be in the public interest in connection with the performance of duties imposed by law upon the Commission (Circular A-63, part II, sections 5, 6(a)).

As indicated in section 3(f) supra, the respective charters of interagency committees are the statements, orders, proclamations or other documents issued by the Federal Power Commission, its Chairman, or some other authorized department or agency of the Federal Government or official thereof, or any statute, establishing or continuing such committees. Except where otherwise provided by statutory requirement, Presidential directive, or directive of the Director, Office of Management and Budget, any interagency committee to be established or continued by this Commission, or its Chairman, shall be deemed to have an approved charter of this Commission when such committee is specifically determined as a matter of formal record by this Commission, or its Chairman, to be in the public interest in connection with the performance of duties imposed upon the Commission by law (Circular A-63, part II, section 6(a)(b)). "[U]ntil after a committee charter has been approved by the head of • • • agency establishing" interagency committees, other than statutory or Presidential, shall not meet (Circular A-63, part II, section 6(b)).

Interagency committees shall be established or continued in accordance with interagency committee charters (Circular A-63, part II, section 6(b)). To the extent authorized by the Commission, or its Chairman, and as may be prescribed or permitted by statutory requirement, Presidential directive, or directives of the Director, Office of Management and Budget, such charters will disclose information as referred to in section 3(d)

[6] The Federal Advisory Committee Act, section 9(c), 86 Stat. 773-4, states in part: "No advisory committee shall meet or take any action until an advisory committee charter has been filed • • • with the standing committees of the Senate and of the House of Representatives having legislative jurisdiction of such agency. • • • A copy of any such charter shall also be furnished to the Library of Congress."

[7] Section 9(c) provides for disclosure of general types of information which may be described as follows: (i) The committee's official designation or name; (ii) The committee's objectives, scope of activity and defined purposes; (iii) The description of the committee's duties for which it is responsible, and, if not solely advisory, a specification of the specific authority for such nonadvisory functions; (iv) The membership roster of the committee; (v) The time duration of the committee or the period of time necessary for the discharge of the committee's purposes and the committee's termination date if less than 2 years from the date of the committee's establishment; (vi) The estimated number and frequency of committee meetings; (vii) The extent to which the Commission has assumed responsibility for providing financial or other material support for the committee, along with the estimated annual operating costs in dollars and man-years for committee operation so supported; (viii) The official or officials of the Commission to whom the committee reports; and (ix) The date of the Commission order or orders establishing or utilizing the committee, which constitute the date the advisory committee charter is filed with the Commission.

V 38 - 4 JAN 8 73 XUM

supra, and such other information comparable to that specified for advisory committees and referred to in section 4 (c) supra, insofar as the latter may be relevant and within the Commission's knowledge.

(e) *Termination of advisory committees and interagency committees.*—Unless otherwise provided by statutory requirement, advisory committees and interagency committees shall be established for periods of not more than 2 years from their respective dates of establishment. They should thereupon terminate unless otherwise renewed by appropriate action of the establishing governmental authority for a successive period of not more than 2 years (Circular A–63, part I, section 9; part II, section 6(c)). "Each • • • advisory committee which is in existence on January 5, 1973, shall terminate by January 5, 1975, unless it is renewed • • • prior to the latter date • • •. Before • • • renewed • • • the agency head must determine that such renewal is necessary • • •. Such determination shall be made not more than 60 days before the scheduled date of termination. • • • the agency head shall publish notice of the renewal in the FEDERAL REGISTER and shall file a new charter." (Circular A–63, part I, section 9a(1)). With respect to interagency committees, the circular states "an interagency committee shall terminate not later than 2 years from the date of its formation unless the establishing authority makes a formal determination not more than 60 days prior to the date of scheduled termination that its continued existence is in the public interest." (Circular A–63, part II, section 6(c)).

(f) *Advisory committee meetings, notice, public participation, conduct, access to data, reporting and record keeping.*—There shall be full public disclosure of information relative to the number, purpose, activities, functions, membership and costs of advisory committees. (Federal Advisory Committee Act, section 2, 86 Stat. 770). To this end and unless otherwise mandated to serve the purposes of a statutory requirement, Presidential directive, requirement or determination of the Director, Office of Management and Budget, provision of an advisory committee charter, rule, regulation, or order of the Commission, or its Chairman, the Commission will publish timely notice of each meeting of advisory committees established or utilized by the Commission, including the name of the committee, dates, times, places, agendas, and purposes of meetings and a summarization of the manner in which the public may participate therein; publication shall be made in the FEDERAL REGISTER, supplemented by such other forms of individual or public notification as the Commission, or its Chairman, determines appropriate or as may be prescribed or permitted by the Director, Office of Management and Budget (Circular A–63, part I, section 10a(2)).

The meetings of all advisory committees established or utilized by the Commission shall be open to the public, and interested persons shall be permitted to attend, appear before, or file statements with such committees unless otherwise required to serve the purposes of a statutory requirement,* Presidential directive, determinations of the Director, Office of Management and Budget, or provision of an advisory committee charter, rule, regulation, or order of the Commission or its Chairman.

The meetings of all advisory committees established or utilized by the Commission shall be under the chairmanship of, or in the presence of, a Federal governmental official, full-time salaried officer or employee. None of the advisory committees shall hold any meetings except at the call of, or with the advance approval of such Federal governmental official, in the presence of such official, and with an agenda approved by such official. The Federal governmental official has designated responsibilities for opening, assisting in the conduct of all advisory committee meetings and adjourning any meeting whenever he determines adjournment to be in the public interest (Federal Advisory Committee Act, section 10(e)(f), 86 Stat. 775; Circular A–63, part I, section 10a(1)(5)).

Any person appointed by the Commission to an advisory committee has the right to attend any duly called meeting of his particular committee. In addition, if such person is unable for any reason to attend a duly called meeting of his committee and desires to have someone else represent him at the meeting, he may submit the name of his delegate in advance to the Federal governmental official, the full-time salaried officer or employee of the Commission assigned to the committee as chairman or otherwise. The names of persons proposed for attendance should be submitted to such Commission officer or employee in advance of the meeting date, in order that appropriate arrangements may be made prior to the time of the meeting. Any person who is a committee member or delegate, as set forth above, who intends to present or submit a written report, study, or other document at any meeting of an advisory committee shall submit, in advance of the meeting date, if possible, but in any case prior to its presentation to other members of the committee, a copy of such report, study or document to the full-time salaried officer or employee of the Commission assigned to the committee. Copies of such report, study, or document may, with the advance approval of such officer or employee, be circulated among the other members of the committee concerned prior to the meeting, but discussion and comments among committee members with respect thereto shall be reserved for the advisory committee meeting. Circulation of any written materials among committee members arising from an advisory committee meeting shall be subject to advance approval of the full-time salaried officer or employee of the Commission assigned to the committee.

As provided in Circular A–63, part I, section 10a(3)(b)(iii)–(v): "Any member of the public who wishes to do so shall be permitted to file a written statement with the committee, before or after the meeting. • • • To the extent that the time available for the meeting permits, interested persons may be permitted by the committee or its chairman to present oral statements • • •. A committee may establish procedures requiring such persons to obtain advance approval for such participation • • •. Participation by • • • the public in committee meetings [except as set forth supra] or questioning of committee members or other participants shall not be permitted except in accordance with procedures established by the committee."

The meetings of all advisory committees established or utilized by the Commission shall be recorded in detailed minutes prepared, and certified as accurate, by the secretary or alternate secretary of the committee as appointed by the Chairman of the Commission, which person shall also be designated by the respective advisory committee chairman to record minutes (Circular A–63, part I, section 10a(4)). In addition to minutes, there shall be kept verbatim transcripts of all advisory committee meetings as may be required by the Commission or its Chairman. The minutes shall include:

(a) The time and place of the meeting, an explanation of the extent to which the meeting was open to the public, an identification and listing of committee members and all other persons present and participating in the meeting, together with the interests or affiliations they represent and an explanation of the manner and extent of public participation in the meeting by members of the public who attended but did not present oral or written statements to the committee, including an estimate of the number of such persons;

(b) A complete and accurate description of all matters discussed and all conclusions reached;

(c) The written information made available for consideration by the committee, including copies of all reports received, issued, or approved by the committee;

(d) All recommendations made and reasons therefor; and

(e) The respective advisory committee chairman's designation of a person to record the committee meeting minutes, which person shall be the same person as designated by the Chairman of the Commission as the Secretary or Alternate Secretary of the committee, and the advisory committee chairman's certification as to the accuracy of such minutes.

Advisory committees established or utilized by the Commission shall not be permitted to receive, compile, or discuss data or reports showing the current or projected commercial operations of identified business enterprises.

Subject to Freedom of Information Act provisions (5 U.S.C. 552), § 1.36, Public Information and Requests, of the Federal Power Commission Rules of Practice and Procedure, 18 CFR 1.36, and section 10b of the Office of Management and Budget Circular A–63, there shall be available for public inspection and copying in the Commission's Office of Public Information, the records, reports, transcripts, minutes, appendices, working papers, drafts, studies, agendas, or other documents which were made available to or prepared for or by each advisory committee established or utilized by the Commission, as they are contained within the files of the Commission. Referring to the Federal Advisory Committee Act, section 10(b), 86 Stat. 774, Circular A–63 states in part: "the quoted language shall be broadly construed. • • • Access to advisory committee documents is subject to the exemptions contained in 5 U.S.C. 552(b). When the only basis for denying access to a document is exemption (5) [interagency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency] access may not be denied unless the agency head • • • determines that such denial is essential to protect the free exchange of internal views and to avoid undue interference with agency (or advisory committee) operation." (part I, section 10b(2)(3)).

As pointed out further in Circular A–63, the Federal Advisory Committee Act does not require that transcripts be kept of advisory committee meetings.* "However, section 11(a) of the Act provides as follows: 'Except where prohibited by contractual agreements entered into prior to the effective date of this Act, agencies and advisory committees shall make available to any person, at actual cost of duplication, copies of transcripts • • • advisory committee meetings.' The requirement of availability of transcripts is subject to the exceptions discussed above in paragraph 10.b(3)." (Circular A–63, part I, section 10b(6)).

Subject to Freedom of Information Act requirements and national security considerations, all advisory committees shall provide to the Library of Congress copies of all reports made to the Commission by each advisory committee (copies to be supplied in octuplicate), together with background papers prepared by consultants for a committee, where appropriate, as determined by the Chairman of the Commission or the Committee Management Secretariat of the Office of Management and Budget (Circular A–63, part I, section 11d). These materials shall be forwarded to the Library of Congress, Exchange and Gift Division, Federal Advisory Committee Desk, Washington, D.C. 20540. Annually, each advisory committee shall compile and report publicly, its membership, functions and actions (Circular A–63, part I, section 8b(5)).

(g) *Interagency committee meetings, notice, public participation, conduct, access to data, reporting and record keeping.* The provisions governing committee activities of interagency committees established or continued by the Federal Power Commission, or its Chairman, shall be as set forth in the appropriate interagency committee charter.

Access to records, reports, and documents of interagency committees as contained within the files of the Commission shall be subject to Freedom of Information Act (5 U.S.C. 552) provisions and § 1.36, *Public Information and Requests,* Federal Power Commission rules of practice and procedure, 18 CFR 1.36.

(h) *Advisory committees, administrative remedies.* With respect to advisory committees established or utilized by the Commission, the following administrative procedural remedies shall obtain before the Commission with respect to complaints for alleged noncompliance with the provisions of the Federal Advisory Committee Act, Circular A–63, or other implementing regulations issued pursuant to authority of the Director, Office of Management and Budget, or any rule, regulation or order of this Commission (Circular A–63, part I, section 13):

(i) Requests for access to advisory committee documents shall be filed and processed procedurally in accordance with the provisions of § 1.36, *Public Information and Requests,* of the Commission's rules of practice and procedure, 18 CFR 1.36; and

(ii) All other requests, applications, complaints, or petitions in respect to advisory committees shall be filed and processed procedurally in accordance with the provisions of § 1.7, *Petitions,* of the Commission's rules of practice and procedure, 18 CFR 1.7.

Request for access to advisory committee documents pursuant to paragraph (i) may be tendered at any time and complaint filings pursuant to paragraph (ii) shall be tendered within 60 days of the date of the alleged noncompliance.

(i) *Support services, advisory committees, and interagency committees.* Unless otherwise provided by statutory requirement, Presidential directive, requirement of the Director, Office of Management and Budget, or provision of an interagency committee charter, the establishing governmental authority should determine the support services for the advisory committee or interagency committee's activities which that authority proposes to supply (Circular A–63, part I, section 11a; part II, section 6(d)). Where more than one department or agency establishes a committee or where any committee reports to more than one department or agency, only one department or agency should be responsible for support services at any one time. In order to strengthen interagency committee responsibilities, such a committee should have dual or rotating chairmanships only when the establishing governmental authority determines that such arrangement is required (Circular A–63, part II, section 6(e)). The term "support services" refers to such matters

---

*Examples may be helpful with reference to advisory committees as they have been established by the Commission in respect to the Alaska Power Survey, National Gas Survey, and National Power Survey and the provisions of the Federal Advisory Committee Act. In the several Commission orders establishing the survey advisory committees (see Exhibit I hereto), the Commission and its Chairman have determined as a matter of policy that—public notice of all meetings of survey advisory committees shall be given at least 7 days in advance of the meeting except where impracticable to do so or in an emergency situation, in which events shorter advance notice may be given, such notice to be given by publication in the FEDERAL REGISTER, by publication in local media as appropriate, by press releases, mail or in such other ways as may be prescribed or permitted by the Director, Office of Management and Budget, giving the name of the committee, dates, times, places, agendas, and purposes of all such meetings and a summarization of the manner in which the public may participate therein; and that all meetings of survey advisory committees shall be open to the public and any interested person may attend, appear, before, or file statements with any such committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee, its chairman or established committee procedures which may require advance committee approval of oral presentations and allow or preclude the questioning of committee members or other participants, all subject to reasonable rules or regulations as may be prescribed or permitted by the Director, Office of Management and Budget, the Federal Government official in whose presence such meeting is being held, or further administrative regulation, and all as may be appropriate for the conduct of the survey and committee affairs, considering the number of persons in attendance, the nature and extent of their proposed individual participation and the time, resources and facilities available to the Commission and the committee. Section 10(d) of the Federal Advisory Committee Act, 86 Stat. 775, provides that if the establishing governmental authority determines, in writing, supported by reasons that Freedom of Information Act requirements preclude public participation in any committee meeting, a written determination to that effect is to be made. The committee is then required to report at least annually, setting forth a summary of its activities and such related matters as would be informative to the public, consistent with the policy of the Freedom of Information Act provisions as set forth in 5 U.S.C. 552(b). Public notice of advisory committee meetings is not required when the Director, Office of Management and Budget determines that notice would be inconsistent with national security considerations (Circular A–63, part I, section 10a(2)(a)). Any request for such national security determination with respect to a meeting or series of meetings must be submitted in writing to the Director, normally 30 days or more in advance of any such meeting (Circular A–63, part I, section 10a(2)(d)). Specific requirements of the Director, Office of Management and Budget apply when an advisory committee meeting is to be closed in whole or part to public participation. They are set forth in Circular A–63, part I, section 10a(3)(c) and should be referred to in such instances.

*By specific orders of the Commission authorizing the Alaska Power Survey, the National Gas Survey, and the National Power Survey (Exhibit I hereto, filed as part of the original document), verbatim transcripts are required with respect to Executive Advisory Committee meetings.

V38-4 JAN 8 73 XUM

as "staff, quarters, supplies, and funds (including, where appropriate, funds for publication of reports)." (Circular A–63, part I, section 11a(3).)

5. The provisions of this order shall take effect January 5, 1973.

6. The Secretary of the Commission shall cause prompt publication of this order to be made in the FEDERAL REGISTER; and shall submit copies thereof to the Director, Office of Management and Budget, Committee Management Secretariat, and to the Department of Justice, Office of Legal Counsel.

By the Commission.

[Docket No. E-7798]

CENTRAL VERMONT PUBLIC SERVICE CORP.

Order Accepting for Filing and Suspending Proposed Increase in Rates, Providing for Hearing, Establishing Procedures, and Permitting Interventions

DECEMBER 29, 1972.

On November 1, 1972, Central Vermont Public Service Corp., a public utility subject to the jurisdiction of this Commission, tendered for filing a proposed increase in its wholesale electric rates. The increase totals $278,000 on a 1971 test year basis. Central Vermont has introduced into the proposed new rate, designated R–1, a delivery point charge, and has updated fuel cost adjustment clause factors to a 1971 basis. Central Vermont requests an effective date of January 1, 1973, except for the Vermont Electric Cooperative's Richmond and Williston delivery points. The company proposes that the R–1 rate become effective at these two delivery points upon expiration of the existing contracts on October 28, 1973.

Notice of Central Vermont's rate increase application was issued on November 27, 1972. Said notice provided that any protests or petitions to intervene should be filed on or before December 18, 1972. On December 18, 1972, petitions to intervene in opposition to Central Vermont's proposed rate increase were filed by the Vermon Electric Cooperative, Inc., of Johnson, Vermont, and by the villages of Hyde Park, Johnson, Ludlow, and Lyndonville, Vt.; Allied Power & Light Co.; and Rochester Electric Light & Power Co.

A review of Central Vermont's rate filing and the petitions to intervene indicates that the company's proposed rate increase should be accepted for filing and suspended, that the petitions to intervene should be granted, and that the issues raised by the pleadings should be resolved on the basis of an evidentiary record to be established upon hearing. Accordingly, the company's proposed rate increase will be suspended for a period of 5 months, and when placed into effect after the suspension period it will be subject to refund of all amounts found by the Commission after hearing not to be justified, together with interest on any amount refunded.

The Commission finds:

It is necessary and proper in the public interest and in carrying out the provisions of the Federal Power Act, that the Commission enter upon a hearing concerning the lawfulness of Central Vermont's proposed rate R–1, and that the proposed rate R–1 be suspended as herein provided.

The Commission orders:

(A) Pursuant to the authority of the Federal Power Act, particularly sections 205, 206, 301, 308, and 309 thereof, and the Commission's rules and regulations, a public hearing shall be held concerning the lawfulness of Central Vermont's proposed rate R–1, commencing with a prehearing conference to be held on May 22, 1973.

(B) Pending such hearing and decision thereon, Central Vermont's proposed rate R–1 is hereby accepted for filing, suspended, and its use deferred until June 1, 1973.

(C) At the prehearing conference on May 22, 1973, the direct evidence of the company and the staff shall be admitted into the record, and procedures adopted for an orderly and expeditious hearing.

(D) On or before May 15, 1973, the Commission staff shall serve its prepared testimony and exhibits if any. The prepared testimony and exhibits of the intervenors shall be served on or before June 5, 1973. Any rebuttal evidence by Central Vermont shall be served on or before June 26, 1973. Cross examination of the evidence filed shall commence at 10 a.m. on July 10, 1973, in a hearing room of the Federal Power Commission.

(E) Vermont Electric Cooperative, Inc.; the villages of Hyde Park, Johnson, Ludlow, and Lyndonville, Vt.; Allied Power & Light Co.; and Rochester Electric Light & Power Co. are hereby permitted to intervene in this proceeding subject to the Commisison's rules of practice and procedure.

(F) A presiding administrative law judge to be designated by the Chief Administrative Law Judge for that purpose shall preside at the hearing initiated by this order, and shall conduct such hearing in accordance with the Federal Power Act, the Commission's rules and regulations, and the terms of this order.

By the Commission.

[SEAL] MARY B. KIDD, *Acting Secretary.*

[FR Doc.73-367 Filed 1-5-73;8:45 am]

[Docket No. RP72-151]

EL PASO NATURAL GAS CO.

Order Accepting and Allowing Restructured Rates To Become Effective Subject to Hearing and Refund.

DECEMBER 29, 1972.

El Paso Natural Gas Co. (El Paso), on November 30, 1972, tendered for filing in Docket No. RP72–151 proposed changes in its FPC gas tariff, First Revised Volume No. 3, for its Northwest Division System,[1] to become effective on January 1, 1973, the date of termination of the suspension of its proposed increased rates in this docket. The proposed changes reflect a restructuring of rates to provide rate levels consistent with the Seaboard cost classification procedure and are to be substituted for the rates originally filed and suspended. Concurrently therewith, El Paso filed a motion to place the proposed changes into effect on January 1, 1973.

In its filing, El Paso refers to the following statement in the Commission's order issued November 7, 1972, in Dockets Nos. RP71–137 and RP72–151, in which the Commission conditionally approved El Paso's stipulation and agreement related to rate design in the former docket:

> • • • We recognize that the proposed rates in Docket No. RP72–151 are to become effective on January 1, 1973, subject to refund. To the extent that those rates do not recover fully allocated Seaboard costs, as may be impact of any undercollections under those determined after hearing and decision therein, El Paso may be required to absorb the rates as may have occurred.

El Paso states that inasmuch as the commodity charge under Rate Schedule PL–1 and the level of the interruptible rates under Rate Schedules IOS–1, I–1, and PL–5, as initially proposed in this proceeding, do not comport with the expressions of the Commission in its order of November 7, 1972. El Paso is submitting the restructured rates for protective purposes but without admitting the propriety of the position taken by the Commission respecting rate design in the November 7, 1972, order. El Paso says that the instant filing should not be construed as agreement on its part to such position or as waiver on the part of El Paso of its rights to propose a different rate design in any proceeding. In the event that El Paso's request to substitute the restructured rates for those originally suspended herein is not granted, it tenders an alternative tariff sheet, designated as Tenth Revised Sheet No. 10, containing the increased rates originally proposed in Docket No. RP72–151 and suspended until January 1, 1973.

In view of the fact that El Paso's proposed restructured rates are filed to protect it from being required to absorb the impact of any undercollections which might result from the originally filed increased rates in Docket No. RP72–151 to the extent that they do not recover fully allocated Seaboard costs, it is reasonable and appropriate to accept the tendered rates, subject to hearing and refund and further orders as may be issued in this proceeding.

[1] Substitute Tenth Revised Sheet No. 10.

The Commission orders:

El Paso's Substitute Tenth Revised Sheet No. 10 of its FPC gas tariff, First Revised Volume No. 3, tendered on November 30, 1972, is accepted for filing and allowed to become effective on January 1, 1973, subject to hearing and refund and to further orders as may be issued in Docket No. RP72–151.

By the Commission.

[SEAL] MARY B. KIDD, *Acting Secretary.*

[FR Doc.73-361 Filed 1-5-73;8:45 am]

[Dockets Nos. RP72–150, RP72–155.]

EL PASO NATURAL GAS CO.

Order Accepting and Allowing Restructured Rates To Become Effective Subject to Hearing and Refund

DECEMBER 29, 1972.

El Paso Natural Gas Co. (El Paso), on November 30, 1972, tendered for filing in Docket No. RP72–150 proposed changes in its FPC Gas Tariff, Original Volume No. 1, for its Southern Division System,[1] to become effective on January 1, 1973, the date of termination of the suspension of its proposed increased rates in that docket. The proposed changes reflect a restructuring of rates in the company's Rate Schedules G and G–X to provide rate levels consistent with the Seaboard cost classification procedure and are to be substituted for the rates originally filed and suspended under those schedules. Concurrently therewith, El Paso filed a motion to place into effect these proposed changes, together with the other proposed increased rates which are under suspension until January 1, 1973.

In its filing, El Paso refers to the following statement in the Commission's order issued November 7, 1972, in Dockets Nos. RP71–137 and RP72–151, in which the Commission conditionally approved El Paso's Stipulation and Agreement related to rate design in the former docket:

> • • • We recognize that the proposed rates in Docket No. RP72–151 are to become effective on January 1, 1973, subject to refund. To the extent that those rates do not recover fully allocated Seaboard costs, as may be determined after hearing and decision therein, El Paso may be required to absorb the impact of any undercollections under those rates as may have occurred.

El Paso states that inasmuch as the commodity charge for Rate Schedule G proposed in Docket No. RP72–150 and the related rate under Rate Schedule G–X are below the unit commodity cost resulting from the Seaboard cost classification, El Paso is submitting the restructured rates for protective purposes but without admitting the propriety of the position taken by the Commission respecting rate design in the above-mentioned order of November 7, 1972. El Paso says that the instant filing should not be construed as agreement on its part to such position or as waiver on the part of El Paso of its rights to propose a different rate design in any proceeding. In the event that El Paso's request to substitute the restructured G and G–X rates for those originally suspended in Docket No. RP72–150 is not granted, it tenders an alternative tariff sheet, designated as First Substitute Eighth Revised Sheet No. 3–B, containing the increased rates originally proposed in Docket No. RP72–150 and suspended until January 1, 1973.

In view of the fact that El Paso's proposed restructured rates are filed to protect it from being required to absorb the impact of any undercollections which might result from the originally filed increased rates in Docket No. RP72–151 to the extent that they do not recover fully allocated Seaboard costs, it is reasonable and appropriate to accept the tendered rates, subject to hearing and refund and further orders as may be issued in this proceeding.

The Commission orders:

El Paso's Substitute Tenth Revised Sheet No. 10 of its FPC Gas Tariff, First Revised Volume No. 3, tendered on November 30, 1972, is accepted for filing and allowed to become effective on January 1, 1973, subject to hearing and refund and to further orders as may be issued in Docket No. RP72–150 et al.

By the Commission.

[SEAL] MARY B. KIDD, *Acting Secretary.*

[FR Doc.73-365 Filed 1-5-73;8:45 am]

[Docket No. E-6577]

FALCON DAM PROJECT, TEXAS

Order Confirming and Approving Rates and Charges

DECEMBER 29, 1972.

The Secretary of the Interior (Secretary), acting on behalf of the Bureau of Reclamation (Bureau) and pursuant to Public Law 406, 83d Congress, approved June 18, 1954 (68 Stat. 255), as amended, known as the Falcon Dam Act of 1954 (Act), filed with the Federal Power Commission on August 7, 1972, a request in Docket No. E–6577 for confirmation and approval of a proposed rate schedule for wholesale electric service to Central Power and Light Co. (Central), Corpus Christi, Tex., from the U.S. share of electric power and energy generated at the international Falcon Dam Project (Project). The proposed rate schedule is designed to supersede the current rate schedule which was approved for the period ending December 31, 1972, by Commission order issued December 7, 1967, in Docket No. E–6577 (38 FPC 1133). Approval of the proposed rate schedule is requested for the 5-year period beginning January 1, 1973.

The Project is a multipurpose development located on the Rio Grande approximately 130 miles upstream from Brownsville, Tex. In addition to the dam, which crosses the international boundary between the United States and Mexico, the Project includes hydroelectric generating plants situated on the U.S. side and the Mexican side of the Rio Grande. The Project was constructed and is operated by the two nations through the International Boundary and Water Commission, United States and Mexico (IBWC), pursuant to the provisions of certain treaty arrangements. The output of the Project's generating plants is divided equally between the United States and Mexico. The Act provides that the U.S. share of the electric power and energy generated at the Project which is not required in its operation shall be marketed by the Secretary, who has delegated his marketing functions to the Bureau. Accordingly, the United States, acting through the Secretary and the Bureau, by contract dated December 19, 1967, designated as Contract No. 14–06–500–1479 (Contract), agreed to sell and deliver to Central for resale the aforementioned U.S. share of power and energy for a period of 10 years beginning January 1, 1968.[1] Delivery of that power and energy is made at the point in Texas where Central's transmission system interconnects with the bus of the Project's generating plant.

The treaty arrangements referred to above and the Act also made provisions for the construction and operation of the multipurpose Amistad Dam Project by IBWC and for the marketing of the U.S. share of its output of electric power and energy by the Secretary. The Amistad Dam Project is located on the Rio Grande approximately 300 miles upstream from the Falcon Dam Project. Although constructed and operational for certain purposes, including water storage, the Amistad Dam Project has no facilities for the generation of electric energy.

The proposed rate schedule provides for Central to pay the Bureau for wholesale electric service furnished from the Project at 4 mills per kilowatt-hour for energy delivered between the hours of

[1] The current rate schedule is included in the Contract. Under its provisions as well as those of the Commission's order of December 7, 1967, referred to above, the current rate schedule will not be effective after December 31, 1972. The Contract provides further that for the remaining 5 years of its term, beginning January 1, 1973, Central shall pay the Bureau at rates approved by the Department of the Interior and the Commission. Under these circumstances, the Bureau conducted rate negotiations with Central and obtained its agreement to the rates set forth in the proposed rate schedule, which the Secretary has submitted to the Commission for approval.

[1] Ninth Revised Sheet No. 3–B.

V 38 - 4 JAN 8 73 XUM

8:00 a.m. and 10:00 p.m. (Saturdays and Sundays excepted) and 1.75 mills per kilowatt-hour for energy delivered at any other time. The proposed rate schedule is the same as the current rate schedule except that the provisions limiting revenues to $300,000 for the first 100 million kilowatt-hours of energy delivered during any calendar year and to a 1-mill per kilowatt-hour charge for all energy delivered in excess of 100 million kilowatt-hours per year have been eliminated. Such changes will increase revenues for those years when deliveries to Central exceed 100 million kilowatt-hours.

Central is obligated under the Contract to deliver electric energy to the Bureau for the operation of the Project's facilities whenever energy is not available from the Project's generating plants for that purpose. The energy shall be returned by the Bureau to Central kilowatt-hour for kilowatt-hour at times and rates of delivery to be mutually agreed upon. Furthermore, Central, under the Contract, may demand and receive payment from the Bureau adequate to balance the interchange energy account under any or all of the following conditions: (1) Upon termination of the Contract, (2) by mutual agreement between the Bureau and Central at any time during the term of the Contract, or (3) when the account remains unbalanced for a period of 1 year. Settlement of the account by payment is to be at a net value of 3 mills per kilowatt-hour for all energy which may remain as a credit to Central in the account.

Public bodies and cooperatives must be given preference under the Act with respect to the Bureau's sale of electric power and energy generated at the Project. Generation by the Project's hydroelectric plants is not dependable, however, because of the peculiarities of the flow of the Rio Grande and the necessity to adhere to downstream flow requirements. In some years there have been as many as 60 days when no energy could be generated at the Project for those reasons. Consequently, the Project's dependable capacity is zero. It appears therefore that only an electric utility which has its own generating facilities, or other sources of electric supply sufficient to meet its system requirements when Project energy is unavailable, would seek to purchase the Project output. Public bodies and cooperatives operating in the area of the Project have rejected the Bureau's offers for the sale of Project energy.

The Bureau's rate schedule for the sale of electric power and energy generated at the Project is required by the Act to "be drawn having regard to the recovery * * * of the cost of producing and transmitting * * * electric energy, including the amortization of the capital investment allocated to power * * * over a reasonable period of years." The Bureau's Rate and Repayment Study, dated October 27, 1971, for the Project, a copy of which is on file with the Commission, contains revenue and cost data for the period from fiscal year 1955, when the Project began generation, through fiscal year 1971. The Study shows that during the subject period the total Project revenues were $4,512,950, while the total Project operating, maintenance and marketing expenses, together with the interest charges on the portion of the Project's capital investment allocated to electric facilities, were $5,665,724. Accordingly, at the end of fiscal year 1971, the Project was $1,152,774, in arrears with respect to the payment of such expenses and interest charges, apart from having made no payments toward amortizing the capital power investment in the Project during fiscal years 1955 to 1971, inclusive.

Information on file with the Commission or otherwise available to it for subsequent periods, commencing with fiscal year 1972, indicates that the average annual Project generation to be marketed by the Bureau will be an estimated 87.5 million kilowatt-hours,[2] the sale of which to Central under the proposed rate schedule will produce annual revenues of approximately $252,100 or an average of 2.88 mills per kilowatt-hour. Furthermore, according to the Commission's information, the estimated operating, maintenance and marketing expenses for the Project will aggregate approximately $156,000 annually, while $18,000 appears to be a reasonable estimate of the cost of the major replacements for the Project on an annual basis, making a total estimate of $174,000 for these annual expenditures. Therefore, the estimated annual Project revenues of $252,000 will be sufficient to cover the estimated annual Project expenditures listed above, totaling $174,000, and provide $78,100 annually toward the payment of Project interest charges. It is noted that these calculations afford no encouragement that the Project's financial situation will improve in the foreseeable future to the extent that amortization of its capital power investment, which at the end of fiscal year 1971 amounted to $8,195,466, including unpaid interest charges, may get underway.

The statutory payout requirements, referred to above, must, of course, be considered by the Commission in acting upon the Secretary's request for approval of the proposed rate schedule. Compliance with congressional directives should, however, be determined by practical considerations. It appears unrealistic to view the Bureau as having sufficient bargaining strength to improve the rates and charges it has negotiated with Central. According to Central's Annual Report, FPC Form No. 1, for 1971, Central can generate electric energy in its steam plants for only 2.785 mills per kilowatt-hour, whereas, as pointed out above, Central will be obliged to pay an average charge of 2.88 mills per kilowatt-hour for energy supplied from the Project by the Bureau under the proposed rate schedule. Since Central takes delivery of the energy at the bus of the Project's generating plant, it is not necessary for the Bureau to construct and operate transmission facilities for the purpose of making deliveries to Central. The Bureau has no prospective customer other than Central with its own electric transmission system in the vicinity of the Project. Although designated in the Act as preference customers, public bodies and cooperatives are not interested in purchasing the Project output, as noted above. Notwithstanding the anticipated revenue deficiencies discussed above, we conclude that the proposed rate schedule conforms as nearly to the Act's repayment objectives as can be negotiated in the existing circumstances, and accordingly we will approve it.

The Secretary of State, as contemplated by the Act, has concurred in the proposed rate schedule submitted by the Secretary of the Interior for the Commission's approval.

Written notice of the request for confirmation and approval of the Bureau's proposed rate schedule was sent to State officials and other interested persons. Notice of the request was also published in the FEDERAL REGISTER on October 27, 1972 (37 FR 23017), stating that any person desiring to make comments or suggestions for the Commission's consideration with respect to said rate schedule should submit the same in writing on or before November 10, 1972, to the Federal Power Commission, Washington, D.C. 20426. No comments or suggestions were received.

The Commission finds:

It is appropriate for purposes of the Act that the Bureau's proposed rate schedule be confirmed and approved for the period beginning January 1, 1973, and terminating not later than December 31, 1977, as hereinafter provided.

The Commission orders:

The proposed rate schedule of the Bureau of Reclamation for wholesale electric service to Central Power and Light Co. from the United States' share of electric power and energy generated at the international Falcon Dam Project, all as described above, is hereby confirmed and approved for the period beginning January 1, 1973, and terminating not later than December 31, 1977.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

[FR Doc.73-363 Filed 1-5-73;8:45 am]

[2] This estimate reflects 44.0 million kilowatt-hours of on-peak generation and 43.5 million kilowatt-hours of off-peak generation at the Project.

[Docket Nos. RP66-4, etc.]

FLORIDA GAS TRANSMISSION CO.

Order Denying Applications for Reconsideration, Issuing Temporary Certificate of Public Convenience and Necessity, Setting Date for Hearing and Establishing Procedures

DECEMBER 29, 1972.

On November 22, 1972, Plant City Natural Gas Co. (Plant City), Central Florida Gas Corp. (Central Florida), and Miller Gas Co. filed a joint petition for reconsideration of the Commission's order issued November 14, 1972, in Dockets Nos. RP66-4 and RP68-1, requiring Florida Gas Transmission Co. (Florida Gas) to file, inter alia, volumetric limitations for its firm resale (Rate Schedule G) customers based on its contractual obligations as of September 1, 1972, to be effective November 15, 1972.

On December 4, 1972, Florida Gas filed a motion for reconsideration and request to effectuate proposed service plan, requesting reconsideration of the Commission's aforesaid order requiring it to file proposed volumetric limitations based on its contractual obligations as of September 1, 1972, for its resale and direct customers. Florida Gas requests that the Commission after reconsideration accept with an effective date of January 1, 1973, a companion filing of December 4, 1972,[1] containing revised service volumes of its resale and direct customers, and superseding the service volumes submitted in compliance with the Commission's November 14, 1972, order by Florida Gas in its filing of December 1, 1972.[2]

On December 4, 1972, Florida Gas filed, additionally, a petition to amend its certificate of public convenience and necessity in Docket No. CP68-179, 42 FPC 121, in the event that further authorization is necessary to allow Florida Gas to render service at the volumetric levels set forth in its December 4, 1972 filing.

In their joint petition for reconsideration, Plant City et al. assert, inter alia, that Florida Gas' present contractual obligations are not reflected in the out-of-date service agreements that may be on file with the Commission, and that volumes purchased by Plant City and Central Florida subsequent to November 15, 1972, would be in excess of their contract quantities and subject to penalty charges. Petitioners further assert that Florida Gas should be required to file an appropriate section 7 application in the event that it decides to abandon its current "all requirements" authority and to substitute a contract quantity obligation.

In its motion for reconsideration, Florida Gas alleges that its October 16, 1972, filing which was rejected except as a compliance filing by the Commission represents a fair and equitable allocation of the system's sales capacity, reflecting current load conditions and supply availability, as well as the manner in which its pipeline system should be operated under present conditions. Florida Gas contends inter alia that (1) the only increases in deliveries over the September 1, 1972 levels of service contemplated by the October 16, 1972 tariff filing were for services under Rate Schedule G, for resale by distributing companies to small volume residential and commercial users; (2) the Company's operating practice over the years has been to add increments of capacity for its customers to provide to the extent possible the full requirements of its interruptible customers, together with those of its firm resale customers, in order that as additional firm loads are added under Rate Schedule G contracts and more I-service is approved, curtailments to the direct customers are lengthened until the next increment of capacity is added, and the cycle commences anew; [3] and (3) service of Rate Schedule G customers' load requirements at the levels established by the Commission's November 14, 1972 order will be very difficult, especially during the winter heating season.

An answer to Florida Gas' motion for reconsideration by Florida Public Utilities Co. and protests by Central Florida, Miller Gas Co., and Plant City were filed on December 20, 1972. Protests by City Gas Co. of Florida and West Florida Natural Gas Co. were filed on December 21, 1972. These comments by Florida Gas' customers generally reflect objections to the volumetric limitations in Florida Gas' December 1, 1972, filing and a view that proper volumetric limits should be determined after hearing in Docket No. CP68-179.

In view of the difficulties that Florida Gas' customers apparently will encounter during the 1972–73 heating season because of prior reliance upon volumes delivered by the Company above those set forth in their respective service agreements on file with this Commission,[4] we shall allow the increased contract volumes reflected in Florida Gas' December 4, 1972, submittal to go into effect pursuant to temporary authorization, without prejudice to the volume entitlements determined to be appropriate under permanent authorization.

The increased volume entitlements in the above-mentioned filing should enable Florida Gas' customers to meet essential load requirements, pending a final determination of the proper volumes to be allocated to those customers in Docket No. CP68-179. To avoid undue penalties to certain customers which would occur after the November 15, 1972 effective date for volumetric limitations set by our November 14, 1972 order, we will permit the aforesaid revised volumetric entitlements to be effective as of November 15, 1972. Since the filing of December 4, 1972, containing revised alternate tariff sheets is clearly designed to supplement Florida Gas' application to amend its certificate of public convenience and necessity, we shall accept it for filing as a supplement thereto.

In view of our action above, we shall deny the applications for reconsideration of our November 14, 1972, order in Dockets Nos. RP66-4 and RP68-1, and treat them instead as protests to Florida Gas' compliance filing of December 1, 1972.

Review of Florida Gas' filings herein and the comments thereon indicates that the proposed tariff provisions and amendment of its certificate of public convenience and necessity by Florida Gas raise issues which require development in evidentiary proceedings.

We believe that Florida Gas should be required to submit evidence in support of its tariff provisions pertaining to revised volume entitlements and the proposed amendment of its certificate of public convenience and necessity. We also are of the view that after an opportunity has been given for filing answering evidence, a conference should be held to attempt a settlement of the issues that have been raised herein. If the conference does not produce a settlement, we are directing the Administrative Law Judge to proceed immediately to schedule the distribution of rebuttal evidence and a hearing date for cross-examination.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the proposed changes in Florida Gas' FPC Gas Tariff pertaining to revised volume entitlements to resale and direct customers and the proposed amendment of its certificate of public convenience and necessity in Docket No. CP68-179 and that the issues in this proceeding be scheduled for hearing in accordance with the procedures herein set forth.

(2) The Commission finds that an emergency exists on Florida Gas' system and that a temporary certificate should be issued as hereinafter ordered and conditioned.

(3) Good cause exists to accept the December 4, 1972, filing as a supplement to Florida Gas' petition for an amendment to its certificate in Docket No. CP68-179.

(4) It is appropriate and in the public interest that the petition by Plant City et al., and the motion by Florida Gas for reconsideration of the Commission's order issued November 14, 1972, be treated as protests to Florida Gas' compliance filing of December 1, 1972, and that the applications for reconsideration otherwise be denied.

The Commission orders:

(A) Florida Gas' filing of December 1, 1972, is in compliance with the Commission's order issued November 14, 1972, but is superseded by Florida Gas' subsequent filing of December 4, 1972.

[1] Comprised of Frist Revised Sheets Nos. 22-F, 22-G, 22-H, 22-I, and 22-J; and a Statement of Volumetric Quantities of Direct Customers Contained in Contracts on File as of Oct. 16, 1972.

[2] Consisting of 12th Revised Sheet No. 4, 10th Revised Sheet No. 8, First Revised Sheets Nos. 5, 6, 9, 10, 13, 23, 24, 25, 28, and 29, and Original Sheets Nos. 9-A, 22-F, 22-G, 22-H, 22-I, 22-J, 22-K, and 22-L; and a Statement of Volumetric Quantities of Direct Customers Contained in Contracts on File as of Sept. 1, 1972.

[3] According to Florida Gas, the order of curtailment priority has provided the mechanism by which system capacity was gradually upgraded toward the firm service category for G customers, which is given top priority.

[4] For example, Florida Gas states, in its Motion, page 14, that 32 out of 55 resale distributing systems served have exceeded their daily contract entitlements and 23 of the group have exceeded their annual contract quantities as measured by service agreements on file with the Commission as of Sept. 1, 1972.

V 38 - 4 JAN 8 73 XUM

(B) The petition by Plant City et al., and the motion by Florida Gas for reconsideration of the Commission's aforesaid order issued November 14, 1972, shall be treated as protests to Florida Gas' compliance filing therewith of December 1, 1972, and otherwise are denied.

(C) The alternate tariff sheets filed by Florida Gas on December 4, 1972, in Dockets Nos. RP66–4 and RP68–1 are hereby accepted for filing as a supplement to its petition to amend its certificate of public convenience and necessity issued in Docket No. CP68–179, to be effective November 15, 1972.

(D) Section 154 of the Commission's regulations under the Natural Gas Act is hereby waived to permit the filing of Florida Gas' revised tariff provisions on December 4, 1972, to be effective November 15, 1972.

(E) Upon the terms and conditions of this order, a temporary certificate of public convenience and necessity is issued in Docket No. CP68–179 authorizing Florida Gas to deliver the revised volume entitlements to customers as set forth in its December 4, 1972, filing as hereinbefore described and as more fully set out in its petition for amendment of its certificate of public convenience and necessity.

(F) The temporary certificate issued above is conditioned as follows:

(1) Said temporary certificate shall take effect as of November 15, 1972, and remain in effect pending final resolution of the issues raised herein.

(2) The issuance of this temporary certificate and the acceptance of Florida Gas' submittal of December 4, 1972, are without prejudice to such final disposition of Florida Gas' application for an amendment of its certificate as the record may require.

(G) Florida Gas shall distribute on or before January 22, 1973, the evidentiary support for the proposed provisions in its December 4, 1972 filing pertaining to revised volume entitlements for its customers and the proposed amendment of its certificate of public convenience and necessity, all as indicated in the recital above.

(H) On or before February 12, 1973, any parties or the Commission's staff may serve prepared testimony and exhibits concerning the issues raised by the volume entitlements in Florida Gas' filing of December 4, 1972, and Florida Gas' proposed amendment of its certificate of public convenience and necessity.

(I) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 7, and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR, Chapter I), a public hearing shall be held in these proceedings to be presided over by the Presiding Administrative Law Judge which shall be held on February 20, 1973, at 10 a.m. (e.s.t.) in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, DC 20426, for the purpose of incorporating into the record the testimony and exhibits previously distributed. Immediately thereafter the Presiding Administrative Law Judge will convene a conference and in the event that a settlement of the issues does not result from said conference, the Presiding Administrative Law Judge will schedule dates for the distribution of rebuttal evidence, and the date for the commencement of hearings for the purpose of cross-examination and will rule on all data requests and other relevant matters presented at such hearing.

(J) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge [see Delegaton of Authority, 18 CFR, 3.5(d)] shall preside at, and control these proceedings in accordance with the policies expressed in the Commission's rules of practice and procedure and the purposes expressed in this order.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

[Docket No. E-7805]

GULF STATES UTILITIES CO.

Order Authorizing Issuance of Promissory Notes, Granting Intervention, and Consolidation of Proceedings

DECEMBER 29, 1972.

Gulf States Utilities Co. (Applicant), a corporation organized under the laws of the State of Texas and doing business in the States of Texas and Louisiana, filed an application on November 6, 1972, seeking an order pursuant to section 204 of the Federal Power Act authorizing it to issue promissory notes to commercial banks and commercial dealers in the aggregate principal amount not to exceed $125 million outstanding at any one time. The application requests that all notes be issued on or before December 31, 1973, with final maturity dates of all notes to be not later than December 31, 1974.

The interest rate on all borrowings from commercial banks will be at the prime rate of the lender at the time of each borrowing and may be adjusted periodically. Notes issued in the form of commercial paper to established investment banking firms will be issued on various dates and will have a maximum maturity of 9 months. The interest costs (discount rate) on the commercial paper notes will depend upon the money-market conditions, length of time to maturity, and their acceptance by buyers of commercial paper. This rate is anticipated to be below rates on commercial bank borrowings. Notes issued in the form of commercial paper will be limited to an amount not to exceed 50 percent of the Applicant's most recent 6 months' gross revenues.

The Applicant states that the proceeds from the issuance from the notes will be used to provide interim funds for the Applicant's construction expenditures. The estimated expenditures for the 2-year period 1973 and 1974 will be approximately $305 million.

Written notice of the application has been given to the Louisiana Service Commission, the Texas Railroad Commission, and to the Governor of each of those States. Notice has also been given by publication in the FEDERAL REGISTER on November 30, 1972 (37 FR 25415), stating that any person desiring to be heard or to make any protest with reference to the application, should file petitions or protests on or before December 11, 1972, with the Federal Power Commission, Washington, D.C. 20426. On December 11, 1972, the cities of Lafayette and Plaquemine, La. (Cities) filed a protest and petition to intervene in the proceeding alleging violation of antitrust laws. Cities incorporate by reference the protests and petitions to intervene filed by the Cities previously in Dockets Nos. E–7567, E–7663, E–7696, and E–7682. In addition the Cities incorporate by reference the pleadings in Docket No. E–7676. On December 11, 1972, Dow Chemical Co. (Dow) also filed a protest and petition to intervene alleging in general antitrust violations and more specifically that the construction of a certain transmission line as one step in all alleged conspiracy to suppress competition.

Both petitions to intervene request that the respective parties be permitted to intervene in the proceeding and be treated as a party thereto and that the matter be set for hearing.

On December 18, 1972, Applicant filed an answer to both protests and petitions to intervene. Applicant incorporated by reference its responses to all of the petitions and protests to intervene filed previously in the above-mentioned dockets, and further generally denied petitioners contentions.

This application for authorization of securities filed by Applicant must be considered in the light of other previous proceedings. Applicant has previously filed applications for authorization of various types of security issues in Dockets Nos. E–7567, E–7682, E–7663, and E–7751. Protests and petitions to intervene alleging antitrust violations were filed in every docket except E–7751 by the cities of Lafayette and Plaquemine, La.

Docket No. E–7567 was appealed to the United States Court of Appeal for the District of Columbia. On October 12, 1971, the Court for Appeals issued a decision, City of Lafayette, Louisiana v. SEC, 454 CADC 9421, wherein it remanded to the Commission for further proceedings not inconsistent therewith the order issued by the Commission. On May 30, 1972, the Supreme Court granted a writ of certiorari to Gulf States Utilities to review the Court of Appeals decision.

After decision of the Court of Appeals for the District of Columbia in the City of Lafayette case, but before the Supreme Court granted a writ of certiorari in that case, Gulf States filed two additional applications pursuant to section 204 (Dockets Nos. E–7663 and E–7682). The Commission in following the guidelines of the Court of Appeals decision approved the securities issuance but severed the antitrust allegations into a separate complaint proceeding under section

306 of the Federal Power Act (Docket No. E–7676). Pursuant to the grant of the writ of certiorari the Commission by order issued in Docket No. E–7676 on June 1, 1972, stayed all further proceedings in docket before the Commission until the Supreme Court entered its decision on appeal of the City of Lafayette case.

The Commission in its order issued November 4, 1971, in Docket No. E–7663 stated:

> The Commission in reviewing Cities' contentions as set forth in their petition has done so in the light of its overall responsibilities under the Federal Power Act. The Commission is aware of its responsibilities with regards to interconnection and coordination of the facilities, for purposes of assuring an abundance of supply of electric energy throughout the United States with the greatest possible economy and with regard to proper utilization and conservation of natural resources. Further the Commission is aware of its responsibilities to enhance optimum interconnection and interchange of electric energy as well as other activities in furtherance of electric energy capabilities. All of the Commission's responsibilities being directed toward safeguarding cost, rates and reliability.
>
> At the same time the Commission realizes that security issues to provide funds for utility construction and financing programs must be decided in a time frame much more limited than that contemplated for consideration of the alleged anticompetitive activities.
>
> With an awareness of its responsibilities the Commission, however, is unable to determine the merits of Cities' contention and the Commission's authority to grant relief sought without further proceedings and the benefit of a hearing in which evidence is presented and legal authority is cited to grant the relief sought.

The issues presented by the Cities and Dow in this proceeding involve the same subject matter as those presently being considered in Docket No. E–7676. The Commission therefore feels that it is appropriate to consider the petitions to intervene filed in this docket as complaints under section 306 of the Federal Power Act and to consolidate those complaints with the complaints previously filed in Docket No. E–7676.

The Commission finds:

(1) The Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act subject to the jurisdiction of this Commission as heretofore determined and set forth in the Commission order issued November 27, 1957, in the Matter of Gulf States Utilities Company Docket No. E–6785 (18 FPC 701).

(2) The proposed issuance of promissory notes to commercial banks and commercial paper dealers in the aggregate principal amount of $125 million, all as described above, will constitute an issuance of securities within the purview of section 204 of the Act.

(3) The proposed issuance of promissory notes will be in excess of 5 percent of the par value of the other securities of Applicant, and therefore, will not be exempt by virtue of section 204(e) from the requirements of section 204(a) of the Act.

(4) Applicant is not organized and operating in a State, under the laws of which the issue herein involved is regulated by a State Commission within the meaning of section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that section from the requirements of section 204 of the Act.

(5) The proposed issuance of promissory notes will be exempted from the competitive bidding requirements of § 34.1a of the Commission's regulations under the Federal Power Act by reason of paragraph 34.1a(a)(2) thereof.

(6) The proposed issuance of securities as hereinafter authorized, will be for a lawful object within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with proper performance of service by Applicant as a public utility, and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(7) The period of public notice given in this matter is reasonable.

(8) Intervention by the cities of Lafayette and Plaquemine, La., and Dow Chemical Co. may be in the public interest for purposes of Commission consideration of the petitions.

(9) The matters asserted and activities alleged in the filed Protest and Petitions to Intervene by the Cities of Lafayette and Plaquemine, La., and Dow Chemical Company raise issues which should be heard in a proceeding separate from this docket.

(10) The protest and petitions to intervene filed in this docket by the cities of Lafayette and Plaquemine, La., and Dow Chemical Co. should be considered as a complaint filed under section 306 of the Federal Power Act.

(11) The protest and petitions to intervene filed in this docket by Lafayette and Plaquemine, La., and Dow Chemical Co. raise issues which are identical to those being considered in Docket No. E–7676, a complaint proceeding now before the Commission, and is therefore appropriate that the complaints filed in this docket should be consolidated with Docket No. E–7676 for purposes of hearing and decision.

The Commission orders:

(A) The above-mentioned petitioners are hereby permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however,* The admission of the aforementioned petitioners shall not be construed as recognition by the Commission that the petitioners might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The proposed issuance and sale of promissory notes upon the terms and conditions and for the purposes specified in the application as described above, is hereby authorized subject to the provisions of this order.

(C) This authorization is expressly conditioned upon all notes being issued on or before December 31, 1973, and having final maturity dates of not later than December 31, 1974.

(D) This authorization is expressly conditioned upon all promissory notes being issued in the form of commercial paper not exceeding 50 percent of the Applicant's most recent 6 months' revenues from the sale of electricity, gas and steam products.

(E) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates, or determination of cause or any other matter whatsoever now pending or which may come before this Commission.

(F) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

(G) Pursuant to the authority of the Federal Power Act, particularly sections 202, 306, and 307 thereof in the Commission's rules of practice and procedure, an investigation is hereby instituted to determine the justification of the Protest and Petitions to Intervene by the Cities of Lafayette and Plaquemine, Louisiana and Dow Chemical Co. and, if necessary, to prescribe such relief as is appropriate within the boundaries of the Federal Power Act.

(H) All further proceedings in this docket shall be consolidated with the complaint proceeding previously instituted in Docket No. E–7676.

(I) Inasmuch as Louisiana Power & Light Co. and Central Louisiana Electric Co. as well as Gulf States Utilities Co. were named as parties in Docket No. E–7676, with which this proceeding will be consolidated, a copy of the Cities and Dow's complaints shall be served on Louisiana Power & Light Co. and Central Louisiana Electric Co. and their response thereto shall be filed with the Commission by January 15, 1973.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

[FR Doc.73-364 Filed 1-5-73;8:45 am]

[Docket No. E-7806]

ILLINOIS POWER CO.

Order Accepting Rate Schedules for Filing, Reserving Issue for Hearing and Order To Show Cause

DECEMBER 29, 1972.

On November 6, 1972, Illinois Power Co. (Illinois Power) tendered for filing proposed changes in its rates and charges applicable to nine electric cooperatives to be effective as of January 1, 1973. The tendered contracts are proposed to supersede Illinois Power's FPC Rate Schedule Nos. 36, 37, 38, 39, 40, 41, 42, 43, and 44.[1]

The changes include (1) an increase in the demand charge from $1.32 to $1.40 per Kva. of maximum demand; (2) an increase in the energy charge from 50 to 57 cents per Kwh delivered; (3) a modification in the fuel adjustment provision; and (4) a revision of the low-voltage metering charge. The filing purports to

V 38 - 4 JAN 8 73 XUM

show that approximately $295,706 additional revenues will result from the increased rates based on unadjusted 1971 calendar year operations.

The fuel clause establishes a new cost of 24 cents per million B.t.u. with the same 11 cents increase or decrease for each upward or downward change of 1 cent or major fraction thereof in the average cost of fuel. That fuel cost is based on the average costs during the 2 calendar months immediately preceding the beginning of the monthly period for which the service is billed. The proposed rate results in an increase in jurisdictional revenues of 7.07 percent which the company indicates results in a realized rate of return of 4.92 percent.

Our review of Illinois Power's cost of service included with its filing indicates that the costs are not excessive. Accordingly, we shall accept the filing without suspension. However, it is our belief that the provision containing the 25-month moratorium on initiating a new rate may not be in the public interest. We shall therefore reserve this matter for hearing pursuant to the procedures prescribed herein.

It appears that the development of the fuel adjustment factor in the rate is such that Illinois Power's own fuel expense variation may be imputed to purchased energy and interchange receipts. This is inconsistent with the Commission's policy and recent opinion with respect to fuel adjustment clauses[2] and Illinois Power should be required to show cause why its fuel adjustment clause should be at variance with that policy.

The filing also contains a provision for an increase or decrease in rate level to coincide with a change in taxes. We shall provide that upon invocation of such change Illinois Power shall submit to the Commission the appropriate data and computations and showing the basis for the calculations change in rate.

Notice of the filing was issued on November 21, 1972. The Cooperatives filed a response in which they request acceptance of the filing and approval of its provisions without hearing. No other comments were filed.

The Commission finds:

It is reasonable and appropriate and in the public interest pursuant to the provisions of the Federal Power Act that Illinois Power's filing tendered on November 6, 1972, be accepted for filing and be permitted to be effective without suspension as hereinafter ordered and conditioned.

The Commission orders:

(A) The proposed rates tendered herein on November 6, 1972, are accepted for filing to be effective as of January 1, 1973, subject to the terms and conditions of this order.

(B) Parties supporting the provision containing a 25-month moratorium on the filing of a new rate by Illinois Power shall serve evidence on January 24, 1973; parties opposing such provisions shall serve evidence on February 7, 1973; supporting parties shall serve rebuttal evidence on February 14, 1973. Hearing and cross-examination on all evidence shall commence on February 21, 1973.

(C) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (see Delegation of Authority, 18 CFR 3.5(d)) shall preside at the hearing in this proceeding and shall prescribe relevant procedural matters not herein provided.

(D) Pursuant to sections 205, 206, and 309 of the Federal Power Act, the Commission's Regulations issued thereunder, and the Commission's rules of practice and procedure, Illinois Power on or before January 31, 1973, shall show cause why its Fuel Adjustment Clause should not be made to conform to the principles set forth in the Commission's Opinion No. 633.

(E) Prior to Illinois Power affecting any change in rate pursuant to the tax clause described herein, Illinois Power shall submit appropriate data and computations showing the basis for the change in rate.

(F) This order is without prejudice to any findings or orders which have been or may hereafter be made by this Commission in this or any other proceeding instituted by or against Illinois Power Co. or any other person or party affected by the rates hereby permitted to become effective.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

CERTIFICATION OF PRICE INCREASE, ILLINOIS POWER CO. E-7806

(1) The former price, before the increase granted herein, the new prices as granted, and the percentage increase in price are as follows (based on test year operations, 12 months ended December 31, 1971):

Revenues:	
Former price	$4,180,057
New price	$4,475,763
Percent of increase	7.1

(2) The rate increase is expected to provide increased annual revenues of $295,706 from the wholesale customers.

(3) The increase in the Company's profits will be $147,616, or stated in terms of percentage of its total jurisdictional sales, will be 3.26 percent.

(4) The increase in the Company's overall rate of return on capital (rate base) will be from 7.68 percent to 7.71 percent, .03 percentage point or 0.39 percent.

(5) Sufficient evidence was taken during the course of this proceeding to determine whether or not the criteria set forth in paragraphs (d) (1) through (4) of § 300.16 of the Rules and Regulations of the Price Commission have been met.

(6) The rate increase granted in this proceeding meets the criteria set out in paragraphs (d) (1) through (4) of § 300.16 of the Rules and Regulations of the Price Commission.

[Docket No. CI73-420]

LOUISIANA LAND AND EXPLORATION CO.

Notice of Application; Correction

DECEMBER 27, 1972.

In the notice of application, issued December 20, 1972 and published in the FEDERAL REGISTER December 27, 1972 (37 FR 28554): Paragraph 2, Line 12, Add "subject to upward and downward B.t.u. adjustment," after "Mcf".

MARY B. KIDD,
Acting Secretary.

[FR Doc.73-358 Filed 1-5-73;8:45 am]

[Docket No. CP73-161]

LOWELL GAS CO.

Notice of Petition

DECEMBER 29, 1972.

Take notice that on December 18, 1972, Lowell Gas Co. (Petitioner), 95 East Merrimack Street, Lowell, MA 01853, filed in Docket No. CP73-161 a petition for waiver of jurisdiction over the over-the-road transportation of liquefied natural gas (LNG) by Petitioner or, in the alternative, for a certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act authorizing said transportation, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Petitioner states that it transported 218 truckloads of its own LNG during July and August 1972 from Hopkinton and Tewksbury, Mass., to the facilities of Connecticut Natural Gas Corp. at Rocky Hill, Conn., for storage necessitated by Petitioner's inability to store the LNG in its own facilities. Petitioner requests that the Commission waive jurisdiction over this over-the-road transportation, or, in the alternative, issue a certificate of public convenience and necessity therefor. Petitioner alleges that it is an intrastate distributor of natural gas and requests that, if a certificate is issued, that it be limited to the subject transportation and not otherwise alter Petitioner's exempt status under the Natural Gas Act.

Any person desiring to be heard or to make any protest with reference to said petition for waiver or for a certificate should on or before January 22, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, if a waiver is not granted, a hearing will be held without further notice before the Commission on the request for a certificate if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[FR Doc.73-357 Filed 1-5-73;8:45 am]

[Docket No. CI73-432]

MARATHON OIL CO.

Notice of Application

JANUARY 2, 1973.

Take notice that on December 14, 1972, Marathon Oil Co. (Applicant), 539 South Main Street, Findlay, OH 45840, filed in Docket No. CI73-432 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Natural Gas Pipeline Company of America from the Sand Dunes (Atoka) Field, Eddy County, N. Mex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of natural gas on November 1, 1972, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and that it proposes to continue said sale for 1 year from the end of the 60-day emergency period within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Applicant proposes to sell up to an average of 2,500 Mcf of gas per day at 35.0 cents per Mcf at 14.65 p.s.i.a., subject to upward and downward B.t.u. adjustment.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before January 17, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Report 629]

COMMON CARRIER SERVICES INFORMATION [1]

Domestic Public Radio Services Applications Accepted for Filing [2]

JANUARY 2, 1973.

Pursuant to §§ 1.227(b)(3) and 21.30 (b) of the Commission's rules, an application, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business 1 business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cutoff dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60-day period, only if the Commission has not acted upon the application by that time pursuant to the first alternative earlier date. The mutual exclusivity rights of a new application are governed by the earliest action with respect to any one of the earlier filed conflicting applications.

The attention of any party in interest desiring to file pleadings pursuant to section 309 of the Communications Act of 1934, as amended, concerning any domestic public radio services application accepted for filing, is directed to § 21.27 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

[1] All applications listed in the appendix are subject to further consideration and review and may be returned and/or dismissed if not found to be in accordance with the Commission's rules, regulations and other requirements.

[2] The above alternative cutoff rules apply to those applications listed in the appendix as having been accepted in Domestic Public Land Mobile Radio, Rural Radio, Point-to-Point Microwave Radio and Local Television Transmission Services (Part 21 of the Rules).

APPENDIX

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

4611-C2-P-73—Santa Cruz Telephone Answering and Radio Service (KMD683), for additional facilities to operate on 152.12 MHz at Palomar Hotel, 1344 Pacific Avenue, Santa Cruz, CA.

4613-C2-AL-(2)-73—Kalamazoo Telephone Answering Service, consent to assignment of license from Ruth Harper, doing business as Kalamazoo Telephone Answering Service, assignor, to Mobile Radio Telephone and Paging Service, Inc., assignee. Stations: KQK720 and KRM951 (1-way) Kalamazoo, Mich.

4614-C2-AL-73—Big Eddy Telephone Co., consent to assignment of license from Big Eddy Telephone Co., assignor, to Quaker State Telephone Co., assignee station: KGH858 Yalilee, Pa.

4630-C2-P-73—Bexar Communications, Inc.—(New), for a new 2-way station to operate on 454.300 MHz at 2.4 miles northeast of Seguin, Tex.

4631-C2-P-73—Massachusetts-Connecticut Mobile Telephone Co. (KCA514), change the antenna system operating on 152.09 MHz at Montevideo Road, Avon, Conn.

4632-C2-P-(2)-73—Mobilfone (KIF649), for additional facilities to operate on 454.025 and 454.350 MHz at 3101 North "R" Street, Pensacola, Fla.

4665-C2-P-(3)-73—Tel-Illinois, Inc. (KSJ627), replace transmitters operating on 152.06, 152.09 and 152.18 MHz at 2424 West Skyline Drive, Champaign, Ill.

POINT-TO-POINT MICROWAVE RADIO SERVICE

4569-C1-P-73—American Telephone & Telegraph Co. (KZA49), 2.75 miles west of Attica, N.Y. C.P. to add 3970H MHz toward Byron, N.Y.

4570-C1-P-73—Same as above (KZA50), 2.1 miles east of Byron, N.Y. C.P. to add 4010H MHz toward Attica and Rochester, N.Y.

4571-C1-P-73—Same (KEG84), 95 North Fitzhugh Street, Rochester, N.Y. C.P. to add 3970H MHz toward Byron, N.Y.

4572-C1-P-73—American Telephone & Telegraph Co. C.P.'s (19) for an additional pair of Type TD-2 telephone channels between Adams, Tex. and Hillsboro, Mo.

4572-C1-P-73—(KKH66), 3.5 miles northeast of Frisco, Adams, Tex. Add 3890H MHz toward Whitewright, Tex.

4573-C1-P-73—(KLS77), 2.6 miles south-southwest of Whitewright, Tex. Add 3930H MHz toward Adams, Tex. and Achille, Okla.

4574-C1-P-73—(KLS78), 2.3 miles south-southeast of Achille, Okla. Add 3890H MHz toward Whitewright, Tex. and Bennington, Okla.

4575-C1-P-73—(KLS79), 7.6 miles north of Bennington, Okla. Add 3930H MHz toward Achille and Kiowa, Okla.

4576-C1-P-73—(KLS80), 6.3 miles south of Kiowa, Okla. Add 3890H MHz toward Bennington and Krebs, Okla.

4577-C1-P-73—(KLS81), 6 miles east-northeast of Krebs, Okla. Add 3930H MHz toward Kiowa and Kinta, Okla.

4578-C1-P-73—(KLS82), 4.8 miles north of Kinta, Okla. Add 3890H MHz toward Krebs and Gans, Okla.

4579-C1-P-73—(KLS83), 1.4 miles north of Gans, Okla. Add 3930H MHz toward Kinta and Natural Dam.

4580-C1-P-73—(KLS84), 6.5 miles north-northwest of Natural Dam, Ark. Add 3890H MHz toward Gans, Okla., and Durham, Ark.

4581-C1-P-73—(KLS85), 3.5 miles south of Durham, Ark. Add 3930H MHz toward Natural Dam and Berryville, Ark.

4582-C1-P-73—(KLS86), 7.3 miles south-southeast of Berryville, Ark. Add 3890H MHz toward Durham, Ark. and 3890V MHz toward Hollister, Mo.

4583-C1-P-73—(KBD32), 5 miles south-southwest of Hollister, Mo. Add 3930V MHz toward Berryville, Ark., and Goodhope, Mo.

4584-C1-P-73—(KBD34), 5.7 miles west-northwest of Goodhope, Mo. Add 3890V MHz toward Hollister and Mansfield, Mo.

4585-C1-P-73—(KBD35), 4 miles east-southeast of Mansfield, Mo. Add 3930V MHz toward Goodhope and Bendavis, Mo.

4586-C1-P-73—(KBD36), 0.7 mile east-southeast of Bendavis, Mo. Add 3890V MHz toward Mansfield and Lenox, Mo.

4587-C1-P-73—(KBD37), 0.7 mile south of Lenox, Mo. Add 3930V MHz toward Bendavis and Cherryville, Mo.

4588-C1-P-73—(KBD38), 7.6 miles southwest of Cherryville, Mo. Add 3890V MHz toward Lenox and 3890H MHz toward Shirley, Mo.

4589-C1-P-73—(KBD39), 5.6 miles north-northwest of Shirley, Mo. Add 3930H MHz toward Cherryville and Hillsboro, Mo.

4590-C1-P-73—(KAQ78), 6.5 miles north-northeast of Hillsboro, Mo. Add 3890H MHz toward Shirley, Mo.

POINT-TO-POINT MICROWAVE RADIO SERVICE—Continued

4674-C1-MP-73—Interdata Communications, Inc. (WIU92), 117 South 17th Street, Philadelphia, Pa. Modification of C.P. to change antenna system, antenna location, frequency, points of communication, power and alarm center location and replace transmitter on frequency 11,265H MHz and 11,605H MHz toward Roxborough, Pa.

4675-C1-P-73—Same as above (New), 8200 Ridge Avenue, Roxborough, Pa. at latitude 40°03'33" N., longitude 75°14'20" W. Frequencies 6197.2H MHz on azimuth 12°03' toward Plumsteadville, Pa. and 10.775H MHz and 11.175H MHz on azimuth 153°42' toward Philadelphia, Pa.

4676-C1-P-73—Same (New), 0.4 mile north-northeast of Plumsteadville, Pa. at latitude 40°23'37" N., longitude 75°08'44" W. C.P. for a new station. Frequencies 5945.2H MHz on azimuth 76°29' toward Neshanic, N.J. and 5974.8H MHz on azimuth 192°06' toward Roxborough, Pa.

4677-C1-P-73—Same (New), 2 miles south-southwest of Neshanic, N.J. at latitude 40°-28'10" N., longitude 74°43'43" W. C.P. for a new station. Frequencies 6286.2H MHz on azimuth 87°52' toward South Amboy, N.J. and 6226.9H MHz on azimuth 256°45' toward Plumsteadville, Pa.

4678-C1-MP-73—Same (WIU95), 0.5 mile west of South Amboy, N.J. Modification of C.P. to change antenna system, antenna location, frequency, points of communication, power and alarm center location and replace transmitter on 5974.8H MHz toward New York, N.Y. and frequency 6034.2V MHz toward Neshanic, N.J.

4679-C1-MP-73—Interdata Communications, Inc. (WIU98), 55 Water Street, New York, N.Y. Modification of C.P. to change antenna system, antenna location, frequency, points of communication, power and alarm center location and replace transmitter on frequency 6226.9H MHz toward South Amboy, N.J.

4680-C1-MP-73—Southern Pacific Communications Co. (WQE91), Seventh & Bay Streets, Oakland, Calif. Modification of C.P. to change transmitters and to increase output power to 10 watts on radio path toward San Francisco, Calif.

4681-C1-MP-73—Same as above (WQE92), One Market Street, San Francisco, Calif. Modification of C.P. to change transmitters and to increase output power to 10 watts on radio path toward Oakland, Calif.

4683-C1-MP-73—Western Tele-Communications, Inc. (WOI59), Saddle Peak, 3.5 miles northeast of Malibu Beach, Calif. Latitude 34°04'32" N., longitude 118°39'30" W. Modification of C.P. 4269-C1-P-70 to change frequency 3770V to 10,976H toward Los Angeles, Calif. on azimuth 115°19'.

4684-C1-MP-73—Same as above (WOI60), modification of C.P. 4270-C1-P-70 to relocate station to 12030 Beatrice, Los Angeles, CA. latitude 33°58'46" N., longitude 118°24'54" W. Change frequency 3730V to 11385V MHz toward Saddle Peak, Calif., on Azimuth 295°27'.

4685-C1-P-73—Video Microwave, Inc. (New), C.P. for a new station at WTVR-TV studios at Tilden Street and Cutshaw Avenue, Richmond, Va., at latitude 37°34'00" N., longitude 77°28'36" W. Frequency 0286.2H MHz on azimuth 119°08' toward Charles City, Va.

4686-C1-P-73—Same as above (New), C.P. for a new station at Charles City, 2.9 miles south-southwest of Roxbury, Va., at latitude 37°25'33" N., longitude 77°09'39" W. Frequency 6152.8H MHz on azimuth 142°50' toward Runnymede, Va.

4687-C1-P-73—Video Microwave, Inc. (New), C.P. for a new station at Runnymede, 4 miles north of Runnymede, Va., on Route 622, Surry County, Va., at latitude 37°05'31" N., longitude 76°50'43" W. Frequency 6226.9H MHz on azimuth 132°07' toward WYAH tower, Shoulders Hill, Va.

4688-C1-P-73—Same (New), C.P. for a new station at the WYAH tower, 0.4 mile east of Shoulders Hill on Route 337, Nansemond County, Va., at latitude 36°48'47" N., longitude 76°27'45" W. Frequency 10815V MHz on azimuth 73°03' toward WTAR-TV studios in Norfolk, Va. (Informative: Applicant proposes a microwave system for the purpose of providing one-way common carrier network television relaying from Richmond, Va., to Norfolk, Va.

4689-C1-P-73—Video Microwave, Inc. (New), C.P. for a new station at WCAU-TV studios at City Line and Monument Avenue, Philadelphia, Pa., at latitude 40°00'26" N., longitude 75°12'54" W. Frequency 6034.2H MHz on azimuth 323°26' toward Norriton, Pa.

POINT-TO-POINT MICROWAVE RADIO SERVICE—Continued

4591-C1-P-73—The Mountain States Telephone & Telegraph Co. (KLC49), 120 Fourth Street NW., Albuquerque, N. Mex. Add 10,915V and 11,155H MHz toward Albuquerque Junction, N. Mex.

4592-C1-P-73—Same as above (KNZ49), Albuquerque Junction, 10.4 miles west-southwest of Albuquerque, N. Mex. Add 11,365V and 11,605H MHz toward Albuquerque, and 11,245V and 11,486H MHz toward Correo, N. Mex.

4593-C1-P-73—Same (KTF35), 4 miles north of Correo, N. Mex. C.P. add 10,785V and 11,035H MHz toward Albuquerque Junction and 10,835V and 11,075H MHz toward McCartys, N. Mex.

4594-C1-P-73—Same (KTF32), 6 miles west of McCartys, N. Mex. C.P. add 11,285V and 11,525H MHz toward Correo and add 11,325H and 11,565V MHz toward Grants, N. Mex.

4595-C1-P-73—Same (New), 324 North Third, Grants, N. Mex. C.P. for a new station. Frequencies: 10,975H and 11,115V MHz toward McCartys, N. Mex.

4615-C1-P-73—New England Telephone and Telegraph Co. (KCL85), 25 Concord Street, Manchester, N.H. C.P. change frequencies 10,895 and 10,975 MHz to 11,095H and 11,175H MHz toward Dunbarton, N.H., and replace transmitters for same also 10,815V MHz.

4616-C1-P-73—Same as above (KZI59), 1 mile north of Dunbarton, N.H. C.P. to replace transmitters and change frequencies 11,225 and 11,465 MHz to 11,585H and 11,665H MHz and change polarity from H to V on 11,385 MHz toward Manchester, N.H. Change frequencies 11,245 and 11,685 MHz to 11,365H and 11,605V MHz toward Concord, N.H.

4617-C1-P-73—Same (KCK52), 12 South Street, Concord, N.H. C.P. replace transmitters for 10,915H and 11,155V MHz toward Dunbarton, N.H. (Note: this changes frequency 10,715 MHz to 10,915 MHz.)

American Telephone & Telegraph Co.—Modification of C.P.'s (10) to change equipment from Farinon SS4000A to Farinon FM4000KA-01 between Hillsboro, Mo., and Cherry Valley, Ark., and Farinon FM2000KA-01 between Cherry Valley and Forrest City, Ark. The proposed transmitters will be used in a protected configuration as opposed to hot standby protection.

4618-C1-MP-73—(KAQ78), 6.5 miles north-northeast of Hillsboro, Mo. Frequency 4190H MHz toward Lawrenceton, Mo.

4619-C1-MP-73—(KAS37), 2.5 miles south of Lawrenceton, Mo. Frequency 4198H MHz toward Hillsboro and Alliance, Mo.

4620-C1-MP-73—(KAS38), 4.2 miles north-northeast of Alliance, Mo. Frequency 4190H MHz toward Lawrenceton and Cape Girardeau Junction, Mo.

4621-C1-MP-73—(KAL47), 0.5 mile east of Jackson, Mo. Frequency 4198H MHz toward Alliance and Bloomfield, Mo.

4622-C1-MP-73—(KAS40), 3 miles northeast of Bloomfield, Mo. Frequency 4190H MHz toward Cape Girardeau Junction and Campbell, Mo.

4623-C1-MP-73—(KAS39), 3 miles northeast of Campbell, Mo. Frequency 4198H MHz toward Bloomfield, Mo., and Marmaduke, Ark.

4624-C1-MP-73—(KLD98), 4.8 miles north-northwest of Marmaduke, Ark. Frequency 4190H MHz toward Campbell, Mo., and Bay, Ark.

4625-C1-MP-73—(KLD99), 1 mile southeast of Bay, Ark. Frequency 4198H MHz toward Marmaduke and 4198V MHz toward Cherry Valley, Ark.

4626-C1-MP-73—(KLN73), 2.8 miles east of Cherry Valley, Ark. Frequency 4190V MHz toward Bay and frequency 2120H MHz toward Forrest City, Ark.

4627-C1-MP-73—(KLN72), 7 miles northeast of Forrest City, Ark. Frequency 2170H toward Cherry Valley, Ark.

All other particulars same as Files Nos. 7524 through 7533-C1-P-72.

4628-C1-P-73—The Mountain States Telephone & Telegraph Co. (KYJ55), 7.5 miles north of Leadore, Idaho. C.P. to add 10,755V and 10,995H MHz toward Mill Creek, Idaho, via a passive reflector.

4629-C1-P-73—Same as above (KPH61), 9.5 miles north of Missoula, TV Mountain, Mont. C.P. to add 2170V MHz toward Lolo, Hot Springs, Mont.

4666-C1-P-73—MCI Texas-Pacific, Inc. (New), station location: 1.5 miles south of Burleson, Tex. C.P. for frequency 5945.2H MHz on azimuth 43°42' toward Arlington, Tex. and frequency 5974.8H MHz on azimuth 358°55' toward Fort Worth, Tex. (Informative: The above application was filed by MCI Texas-Pacific, Inc. to maintain on file those facilities deleted from application File No. 6346-C1-P-72.)

V38-4 JAN 8 73 XUM

POINT-TO-POINT MICROWAVE RADIO SERVICE—Continued

7958-C1-P-72—Same (New), 4 miles northeast of Pegram (Davidson), Tenn., latitude 36°07'11" N., longitude 86°59'02" W. Adding frequency of 4130V MHz toward Nashville, Tenn., and Dickson, Tenn., on azimuth of 74°54' and 266°36' respectively. Also to change polarization of the following frequencies to read 3750V, 3830V, 3910V, 3990V, 4070V, 4150V, and 3730H toward Dickson, Tenn.

7957-C1-P-72—Same (KJG67), approximately 3 miles northwest of Dickson (Dickson), Tenn., latitude 36°05'50" N., longitude 87°25'58" N. (a) Adding frequency of 4170H MHz toward Lobelville, Tenn., and Pegram, Tenn. (b) Change polarization of the following frequency to read 3770H, 3710V, 3790V, 3870V, 3950V, 4030V, and 4110V MHz toward Lobelville, Tenn., and Pegram, Tenn.

7958-C1-P-72—Same (KJG56), approximately 4 miles southwest of Lobelville (Perry), Tenn., latitude 35°37'03" N., longitude 88°48'56" W. (a) Adding frequency of 4130H MHz toward Lexington, Tenn., and Dickson, Tenn. (b) Change polarization of the following frequencies to read 3730H, 3750V, 3830V, 3910V, 3990V, 4070V, and 4150V toward Lexington, Tenn., and Dickson, Tenn.

7959-C1-P-72—Same (KJG55), approximately 7 miles south of Lexington (Henderson), Tenn., latitude 35°33'01" N., longitude 88°23'29" W. (a) Adding frequency of 4170H MHz toward Jackson, Tenn., and Lobelville, Tenn. (b) Change polarization of the following to read 3710V, 3790V, 3870V, 3950V, 4030V, 4110V, and 3770H MHz toward Lobelville, Tenn.

7960-C1-P-72—Same (KJG61), 334 North Cumberland Street, Jackson (Madison), Tenn., latitude 35°37'03" N., longitude 88°48'56" W. (a) Adding frequency of 4130H MHz toward Lexington, Tenn. (b) Add point of communication to Brownsville, Tenn., on frequency 4050H MHz, on azimuth 264°41'.

3400-C1-P-71—GTE Satellite Corp. (New), change geographic coordinates to latitude 28°51'15" N., longitude 82°31'52" W.; change azimuth toward Lecanto, Fla., to 60 145°25'; change frequency 11,115H MHz toward Lecanto, Fla., to 2167.2H MHz.

3401-C1-P-71—GTE Satellite Corp. (New), change geographic coordinates to latitude 28°45'13" N., longitude 82°27'09" W.; change azimuth toward Homosassa, Fla., to 316°54'; change frequency 11,645H MHz toward Homosassa, Fla., to 2117.2H MHz; add Brooksville, Fla., as a point of communication on frequencies 2126.8H, 5060.0V, 6019.3V, and 6078.6V MHz.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (73-2)]

AD HOC PANEL ON ADVANCED REACTOR SPACE POWER TECHNOLOGY

Notice of Meeting

The NASA Research and Technology Advisory Council, Committee on Space Propulsion and Power, Ad Hoc Panel on Advanced Reactor Space Power Technology will meet at 9 a.m., January 9, 1973, in the Cherry L-Emerson building, School of Nuclear Engineering, Georgia Institute of Technology, Atlanta, Ga. The room number will be available from the office of Dr. L. Weaver, Room 201, Cherry L-Emerson building, School of Nuclear Engineering, area code 404—894-3720. Members of the public will be admitted to the meeting on a first-come, first-served basis up to the seating capacity of the room which is about 20 persons. All visitors must report to Dr. Weaver's office, Room 201, Cherry L-Emerson building.

The NASA Research and Technology Advisory Council, Committee on Space Propulsion and Power, Ad Hoc Panel on Advanced Reactor Space Power Technology serves in an advisory capacity only. In this capacity the panel is concerned primarily with thermoelectric, thermionic and gas turbine conversion systems and the associated reactor heat sources. The panel is comprised of seven members and is chaired by Dr. Lynn E. Weaver. For further information please call Mr. William Woodward, area code 202—755-2377 or Mr. David Gabriel, area code 301—973-3927.

Originally formed on January 25, 1972, the panel prepared a draft report on

POINT-TO-POINT MICROWAVE RADIO SERVICE—Continued

4600-C1-P-73—Same as above (New), C.P. for a new station at Norrtion, Montgomery County, Pa., 0.3 mile north of intersection of Route 422 and Potshop Road on Potshop Road, Norrtion, Pa., at latitude 40°09'35" N., longitude 75°21'45" W. Frequency 6404.8V MHz on azimuth 265°19' toward Welsh Mountain, Pa.

4691-C1-P-73—Same as above (New), C.P. for a new station at Welsh Mountain, 2.7 miles north-northeast of Honeybrook, Pa., at latitude 40°07'29" N., longitude 75°53'59" W. Frequency 6093.5V MHz on azimuth 259°56' toward Highmount, Pa.

4692-C1-P-73—Same (New), C.P. for a new station at Highmount, 1.6 miles north-northeast of Hellam, York County, Pa., at latitude 40°01'37" N., longitude 76°36'02" W. Frequency 6404.8V MHz on azimuth 341°37' toward Middletown, Pa., and 6404.8H MHz on azimuth 221°23' toward York, Pa.

4693-C1-P-73—Same (New), C.P. for a new station at Derry, Dauphin County, Pa., 0.5 mile southwest of Waltonville, 3.5 miles northeast of Middletown, Pa., at latitude 40°14'09" N., longitude 76°41'28" W. Frequency 11385V MHz on azimuth 81°16' toward Mount Gretna, Pa., and on azimuth 280°24' toward Harrisburg, Pa., to receiver located at 240 Third Street, Harrisburg at latitude 40°15'43.8" N., longitude 76°53'01" W. to WHP-TV studios located at 218 Locust Street, Harrisburg, Pa. (Informative: Applicant proposes a microwave system for the purpose of providing one-way common carrier network television relaying from Philadelphia, Pa., to Harrisburg, Pa., with an intermediate service drop at Lebanon and York, Pa.)

4710-C1-ML-73—American Telephone & Telegraph Co. (KCA46), Modification of License to change polarity from H to V on frequency 3710 MHz toward Bald Hill, Conn. Station located at John Tom Hill, 7 miles east of Glastonbury, Conn.

4596-C1-MP-73—MCI Michigan, Inc. (WOE46), 2.3 miles west of Chelsea, Mich. Latitude 42°18'35" N., longitude 84°04'54" W. Modification C.P. to add frequencies 10775H and 11175H to Bridgewater, Mich. azimuth 138°58'.

4597-C1-MP-73—Same (WOE49), modification C.P. to relocate station to 2.6 miles southwest of Lennon, Mich. Latitude 42°56'00" N., longitude 83°58'20" W. Change azimuths to Fowlerville and Flint, Mich., to 194°25' and 76°21', respectively.

4598-C1-MP-73—Same (WOE50), One East 1st Street, Flint, Mich. Latitude 43°01'00" N., longitude 83°41'23" W. Modification C.P. to change azimuth to Lennon, Mich., to 256°32', change frequency 11,165H MHz toward Lennon, Mich., to 2167.2H MHz.

4599-C1-MP-73—Same (WOE51), 555 East William Street, Ann Arbor, Mich. Latitude 42°16'39" N., longitude 83°44'34" W. Modification C.P. to change azimuth to Northville, Mich., to 35°31'.

4600-C1-MP-73—Same (WOE52), 2.5 miles northwest of Bridgewater, Mich. Latitude 42°11'07" N., longitude 83°56'10" W. Modification C.P. to add frequencies 11265H and 11665H toward Chelsea, Mich., azimuth 319°03'.

4601-C1-MP-73—Same (WOE55), 28 North Saginaw Street, Pontiac, Mich. Latitude 42°38'14" N., longitude 83°17'30" W. Modification C.P. to change azimuth to Northville, Mich., to 228°48'.

4602-C1-MP-73—Same (WOE56), modification C.P. to relocate station to 1.5 miles east of Dearborn, Mich. Latitude 42°19'10" N., longitude 83°09'06" W. Change azimuths to Northville and Detroit, Mich., to 293°54' and 82°29', respectively.

4603-C1-MP-73—Same (WOE57), 500 Griswood Street, Detroit, Mich. Latitude 42°19'47" N., longitude 83°02'46" W. Modification C.P. to change azimuth to Dearborn, Mich., to 262°34'.

4604-C1-MP-73—Same (WIV82), modification C.P. to relocate station to 4.8 miles westnorthwest of Northville, Mich. Latitude 42°27'22" N., longitude 83°34'14" W. Change azimuths as follows: 215°37' to Ann Arbor, Mich., 46°37' to Pontiac, Mich., and 113°37' to Dearborn, Mich.

4605-C1-MP-73—Same (WIV83), 1.5 miles North of Fowlerville, Mich. Latitude 42°41'04" N., longitude 84°04'14" W. Modification C.P. to change azimuth to Lennon, Mich., to 14°21'.

Major Amendments

7955-C1-P-72—South Central Bell Telephone Co. (New), 605 33d Avenue North, Nashville (Davidson) Tenn., latitude 36°09'16" N., longitude 86°49'27" W. Application amended to relocate station to the above coordinates on frequencies 3710V, 3790V, 3950V, 3870V, 4030V, 4110V, and 3770H MHz toward Pegram, Tenn., on azimuth 255°3'. Also adding frequency of 4170H MHz toward Pegram, Tenn.

the NASA–AEC advanced reactor space power technology program and submitted it to the NASA Committee on Space Propulsion and Power for review at its December 13 and 14, 1972, meeting. As a result of the committee's review, there is need to expand and clarify the draft report. The purpose of the January 9, 1973, meeting of the panel is to discuss the committee's recommendations and to begin preparation of the necessary revisions.

AGENDA

January 9, 1973

Time	*Topic*
9 a.m.	Review by the Chairman of the comments made by the Committee on Space Propulsion and Power and suggested procedure and schedule for revising panel draft report.

January 9, 1973

Time	*Topic*
9:30 a.m.–5 p.m.	Panel discussions leading to preparation of revised report.

HOMER E. NEWELL,
Associate Administrator, National Aeronautics and Space Administration.

SECURITIES AND EXCHANGE COMMISSION

[812-3347]

BIRR, WILSON & CO., INC.

Notice of Filing of Application for Order of Exemption

JANUARY 2, 1973.

Notice is hereby given that Birr, Wilson & Co., Inc., 155 Sansome Street, San Francisco, CA 94104 (Applicant), prospective representative of a group of underwriters of a proposed offering of shares of common stock of AU/AG Corp. (the Fund), a registered closed end, nondiversified investment company, has filed an application pursuant to section 6(c) of the Investment Company Act of 1940 (Act) for an order exempting Applicant and its counderwriters from section 30(f) of the Act to the extent that such section adopts section 16(b) of the Securities Exchange Act of 1934 (Exchange Act) in respect of their transactions incident to the distribution of the Fund's shares. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Shares of the Fund are to be purchased by the underwriters pursuant to an underwriting agreement to be entered into between the Fund and the underwriters represented by the Applicant. The several underwriters will be obligated to make a public offering of all of the shares of common stock of the Fund which such underwriters purchase under the underwriting agreement, at the price therein specified, as soon on or after the effective date of the Fund's Registration Statement on Form S–4 (the Form S–4) as the Applicant deems advisable, and such shares are initially to be offered to the public at the per share public offering price and underwriting commissions to be specified in the underwriting agreement, and the dealer concessions and additional compensation to be specified in the agreement among underwriters, at the time the Form S–4 becomes effective under the Securities Act of 1933.

Section 30(f) of the Act subjects every person who is directly or indirectly the beneficial owner of more than 10 percent of any class outstanding securities of the Fund to the same duties and liabilities as those imposed by section 16 of the Exchange Act. It is possible that the Applicant and other members of the underwriting group may individually become obligated to purchase more than 10 percent of the initial amount of common stock of the Fund to be outstanding upon the completion of the initial public offering, thereby becoming "insiders" subject to section 16(b) of the Exchange Act.

Rule 16b–2 under the Exchange Act exempts certain underwriters from the operation of section 16(b) of the Exchange Act. Applicant states that the purpose of the purchase by the Applicant and the other underwriters is for resale in connection with the initial distribution of shares of the Fund. It will thus be a transaction effected in connection with a distribution of a substantial block of securities within the purpose and spirit of the Commission's Rule 16b–2.

The Applicant and their counderwriters, however, may not be exempted from section 16(b) by Rule 16b–2. They may not meet the requirement stated in paragraph (a) (3) of Rule 16b–2 that the aggregate participation of underwriters not within the purview of section 16(b) of the Exchange Act be at least equal to the participation of underwriters receiving the exemption under Rule 16b–2, since it is possible that one or more of the underwriters who take more than 10 percent of the shares may be obligated to purchase more than 50 percent of the shares of the Fund which will be outstanding at the time of the closing.

In addition to purchases from the Fund and sales to customers, there may be the usual transactions of purchase or sale incident to a distribution such as stabilizing purchases, purchase to cover overallotments or other short positions created in connection with such distribution, and sales of shares purchased in stabilization.

Applicant states that to the best of their knowledge no underwriter has any inside information, that there is no possibility of using inside information and, in fact, that there is no inside information in existence. An employee of Applicant is a director of the Fund, but otherwise no director, officer, or employee of any underwriter is a director, officer, or employee of the Fund.

Applicant represents that the requested exemption from the provision of section 30(f) of the Act is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. The Applicant states that the transactions sought to be exempted cannot lend themselves to the practices to which section 16(b) of the Exchange Act was enacted to apply.

Section 6(c) authorizes the Commission to exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from the provisions of the Act and Rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than January 17, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission by the Division of Investment Company Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT,
Secretary.

NATIONAL POULTRY AND TURKEY IMPROVEMENT PLANS AND AUXILIARY PROVISIONS

Proposed Rule Making

No. 4—Pt. II——1

V 38 - 4 JAN 8 73 XUM

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

[9 CFR Parts 445, 446, 447]

NATIONAL POULTRY AND TURKEY IMPROVEMENT PLANS AND AUXILIARY PROVISIONS

Notice of Proposed Rule Making

Notice is hereby given, under the administrative procedure provisions of 5 U.S.C. 553, that the Department of Agriculture has under consideration proposed amendments of the National Poultry and Turkey Improvement Plans and Auxiliary Provisions recommended by the 1972 conference of representatives of the State agencies cooperating in the administration of the plans,[1] and that, pursuant to section 101(b) of the Department of Agriculture Organic Act of 1944, as amended (7 U.S.C. 429), it is proposed to revise Parts 445, 446, and 447 of Title 9, Chapter IV, Subchapter A, Code of Federal Regulations, to incorporate such recommended amendments and to make incidental changes for clarity and consistency.

Parts 445, 446, and 447 would be amended in the following respects:

PART 445—NATIONAL POULTRY IMPROVEMENT PLAN

1. Section 445.1 would be amended by revising paragraph (d) to read as follows:

§ 445.1 Definitions.

• • • • •

(d) *Service.* The Agricultural Research Service of the Department.

• • • • •

2. Section 445.4 would be amended by revising paragraph (d) to read as follows:

§ 445.4 General provisions for all participants.

• • • • •

(d) Participants may not buy, sell, or receive for any purpose products from nonparticipants, except turkey breeding stock, hatching eggs, and poults produced in a State qualified for phase I or II of the Pullorum-typhoid eradication program of the Animal and Plant Health Inspection Service of the Department: *Provided,* That with the permission of the official State agency and approval of the Service, other products may be bought or received for use in breeding flocks or for experimental purposes.

• • • • •

3. Section 445.5 would be amended by revising paragraph (c) to read as follows:

§ 445.5 Specific provisions for participating flocks.

• • • • •

(c) A flock shall be deemed to be a participating flock at any time only if it has qualified for the U.S. Pullorum-Typhoid Clean classification, as prescribed in Subpart B, C, D, or E of this part.

4. Section 445.10 would be amended to read:

§ 445.10 Terminology and classification; flocks and products.

Participating flocks, and the products produced from them, which have met the respective requirements specified in Subpart B, C, D, or E of this part may be designated by the following terms or illustrative designs:

(a) *U.S. Approved.* (See § 445.23(a), § 445.33(a), and § 445.53(a).)

FIGURE 4

(d) *U.S. Typhimurium Controlled.* (See § 445.23(d) and § 445.43(d).)

FIGURE 5

5. Section 445.11 would be amended by revising paragraph (a) and adding a new paragraph (c) to read as follows:

§ 445.11 Supervision.

(a) The official State agency may designate qualified persons as authorized agents to do the sample collecting and blood testing provided for in §§ 445.5 and 445.14, and the selecting required for the U.S. approved classification provided for in § 445.10(a).

• • • • •

(c) Authorities issued under the provisions of this section shall be subject to cancellation by the official State agency on the grounds of incompetence or failure to comply with the provisions of the plan or regulations of the official State agency. Such actions shall not be taken until a thorough investigation has been made by the official State agency and the authorized person has been given notice of the proposed action and the basis therefor and an opportunity to present his views.

6. Section 445.14 would be amended by revising subparagraph (1) of paragraph (a) and the introductory statement and subdivision (ii) of subparagraph (2) of paragraph (a) to read:

§ 445.14 Blood testing.

(a) *For Salmonella.* (1) The official blood tests for pullorum-typhoid shall be the standard tube agglutination test, the microagglutination test, or the rapid serum test for all classes of poultry or the stained antigen, rapid whole-blood test for all classes of poultry except turkeys. The recommended procedures for conducting such tests are described in §§ 447.1, 447.2, 447.3, and 447.5 of this chapter. Each lot of antigen used for the whole-blood test shall be approved by the Department and shall be of the polyvalent type.

(2) The official blood tests for typhimurium shall be the standard tube agglutination test or the microagglutination test as described in §§ 447.4 and 447.5 of this chapter: *Provided,* That, if the following conditions are fulfilled, the tests for pullorum-typhoid and typhimurium may be combined:

• • • • •

(ii) A single combination antigen composed of equal quantities of pullorum antigen and typhimurium antigen is used at a dilution not exceeding 1:25 as a screening test in accordance with procedures described in § 447.1 or § 447.5 of this chapter.

• • • • •

§ 445.21 [Amended]

7. Section 445.21 would be amended by deleting paragraphs (d) and (e).

8. Section 445.22 would be amended by adding a new paragraph (d) to read:

§ 445.22 Participation.

• • • • •

[1] A copy of the recommended changes as adopted by the 1972 National Plan Conference is filed as part of the original document.

(d) Hatching eggs produced by primary breeding flocks shall be fumigated according to the procedures described in § 447.25(a) of this chapter.

§ 445.23 [Amended]

9. Section 445.23 would be amended by deleting paragraphs (a), (b), and (c) and redesignating paragraphs (d), (e), and (f) as (a), (b), and (c), respectively.

10. Section 445.23 would be further amended by revising the introductory portion of the redesignated paragraph (d) to read:

(b) *U.S. Pullorum-Typhoid Clean.* A flock in which freedom from pullorum and typhoid has been demonstrated to the Official State Agency under the criteria in one of the following subparagraphs (1) through (5) of this paragraph: *Provided,* That a flock qualifying by means of a blood test shall be tested within the past 12 months, except that the retesting of a participating flock which is retained for more than 12 months shall be at the discretion of the Official State Agency with the concurrence of the Service. (See § 445.14 relating to the official blood test where applicable.)

11. Section 445.23 would be further amended by deleting the phrase "within the past 12 months" from subparagraph (1), subdivision (iii) of subparagraph (2), and subparagraph (5) of the redesignated paragraph (b).

12. Section 445.23 would be further amended by revising subdivision (i) and the introductory portion of subdivision (ii) of subparagraph (1) of the redesignated paragraph (c) to read:

(i) It is a flock in which all birds, or a sample of at least 500 birds, in the flock have been tested for M. gallisepticum as provided in § 445.14(b) when more than 4 months of age: *Provided,* That to retain this classification, all birds or a sample of at least 500 birds shall be tested at intervals of not more than 90 days; or

(ii) It is a multiplier breeding flock which originated as U.S. M. Gallisepticum Clean chicks from primary breeding flocks and all birds, or a sample of at least 500 birds, in the flock have been tested for M. gallisepticum as provided in § 445.14(b) when more than 4 months of age: *Provided,* That to retain this classification, the flock shall be subjected to one of the following procedures:

13. Section 445.23 would be further amended by adding a new paragraph (d) to read:

(d) *U.S. Typhimurium Controlled.* (1) A flock in which freedom from S. typhimurium has been demonstrated under the criteria specified in subdivision (i) or (ii) of this subparagraph.

(i) All birds have been tested within the past 12 months for S. typhimurium as provided in § 445.14(a) and no reactors were found on the first test, or

(ii) A sample of at least 500 birds in the flock has been tested within the past 12 months for S. typhimurium as provided in § 445.14(a) and environmental samples or cloacal swabs collected by a State inspector or authorized agent as described in § 447.12 of this chapter have been examined for S. typhimurium by an authorized laboratory, and no evidence of the disease was found.

(2) In order to sell hatching eggs or chicks of this classification, all hatching eggs and chicks handled shall meet the requirements for this classification.

14. Section 445.32 would be amended by adding a new paragraph (c) to read:

§ 445.32 Participation.

• • • • •

(c) Hatching eggs produced by primary breeding flocks shall be fumigated according to the procedures described in § 447.25(a) of this chapter.

§ 445.33 [Amended]

15. Section 445.33 would be amended by deleting paragraphs (a) and (b), and redesignating paragraphs (c), (d), and (e) as (a), (b), and (c), respectively.

16. Section 445.33 would be further amended by revising the introductory portion of the redesignated paragraph (b) to read:

(b) *U.S. Pullorum-Typhoid Clean.* A flock in which freedom from pullorum and typhoid has been demonstrated to the official State agency under the criteria in one of the following subparagraphs (1) through (5) of this paragraph: *Provided,* That a flock qualifying by means of a blood test shall be tested within the past 12 months, except that the retesting of a participating flock which is retained for more than 12 months shall be at the discretion of the official State agency. (See § 445.14 relating to the official blood test where applicable.)

17. Section 445.33 would be further amended by deleting the phrase "within the past 12 months" from subparagraph (1), subdivision (iii) of subparagraph (2), and subparagraph (5) of the redesignated paragraph (b).

18. Section 445.33 would be further amended by revising subdivision (i) and the introductory portion of subdivision (ii) of subparagraph (1) of the redesignated paragraph (c) to read:

(i) All birds have been tested for M. gallisepticum as provided in § 445.14(b) when more than 4 months of age: *Provided,* That to retain this classification, a random sample of at least 5 percent of the flock shall be tested at intervals of not more than 90 days; or

(ii) It is a multiplier breeding flock which originated as U.S. M. Gallisepticum Clean chicks from primary breeding flocks and a sample of at least 5 percent of the birds in the flock has been tested for M. gallisepticum as provided in § 445.14(b) when more than 4 months of age: *Provided,* That to retain this classification, the flock shall be subjected to one of the following procedures:

§ 445.42 [Amended]

19. Section 445.42 would be amended by deleting paragraph (a) and redesignating the introductory paragraph as paragraph (a).

§ 445.43 [Amended]

20. Section 445.43 would be amended by deleting the present provisions contained in paragraph (a) and marking paragraph (a) as "[Reserved]," and by revising the introductory portion of paragraph (b) to read:

(a) [Reserved]

(b) *U.S. Pullorum-Typhoid Clean.* A flock in which freedom from pullorum and typhoid has been demonstrated to the official State agency under the criteria in one of the following subparagraphs (1) through (5) of this paragraph: *Provided,* That a flock qualifying by means of a blood test shall be tested within the past 12 months, except that the retesting of a participating flock which is retained for more than 12 months shall be at the discretion of the official State agency. (See § 445.14 relating to the official blood test where applicable.)

21. Section 445.43 would be further amended by deleting the phrase "within the past 12 months" from subparagraph (1), subdivision (iii) of subparagraph (2), and subparagraph (5) of the redesignated paragraph (b).

22. Section 445.43 would be further amended by revising subdivision (i) of subparagraph (1) of paragraph (d) to read:

(i) *(a)* All birds have been tested within the past 12 months for S. typhimurium as provided in § 445.14(a) and no reactors were found on the first test: *Provided,* That the retesting of participating flocks which are moved from one premises to another or kept beyond 12 months after testing shall be at the discretion of the official State agency, or

(b) A sample of at least 500 birds in the flock has been tested within the past 12 months for S. typhimurium as provided in § 445.14(a) and environmental samples or cloacal swabs collected by a State inspector or authorized agent as described in § 447.12 of this chapter have been examined for S. typhimurium by an authorized laboratory and no evidence of the disease was found: *Provided,* That the retesting of participating flocks which are moved from one premises to another or kept beyond 12 months after testing shall be at the discretion of the official State agency.

23. Section 445.43 would be further amended by revising the second sentence of subdivision (ii) of subparagraph (1) of paragraph (d) to read:

"All eggs used for hatching shall be visibly clean and fumigated as described in § 447.25(a) of this chapter as soon as possible after collection: *Provided,* That alternative sanitizing procedures may be used with the approval of the official State agency in each specific instance and general concurrence by the Service in the policy adopted by the official State agency."

24. Section 445.53 would be amended by revising subparagraphs (1) and (2) of paragraph (c) to read as follows:

§ 455.53 Terminology and classification.

• • • • •

(c) *U.S. M. Gallisepticum Clean.* (1) A flock maintained in compliance with the

V 38 - 4 JAN 8 73 XUM

provisions of § 447.26 of this chapter and in which no reactors were found when all birds, or a sample of at least 500 birds, in the flock were tested when more than 4 months of age in accordance with the procedures described in § 445.14(b): *Provided*, That to retain this classification, all birds, or a sample of at least 500 birds, in the flock shall be tested at intervals of not more than 90 days.

(2) A participant handling U.S. M. Gallisepticum Clean products shall keep these products separate from other products in a manner found satisfactory by the official State agency in each specific instance and general concurrence by the Service in the policy adopted by the official State agency.

• • • • •

PART 446—[RESERVED]

25. The title of Part 446 would be amended by changing from "National Turkey Improvement Plan (Turkeys and Certain Other Poultry)" to "Reserved."

PART 447—AUXILIARY PROVISIONS ON NATIONAL POULTRY IMPROVEMENT PLAN

26. Part 447, Subpart A, Table of Contents would be amended by adding a reference to a new § 447.5 to read:

Sec.
447.5 The microagglutination test for pullorum-typhoid and thyphimurium.

27. Part 447, Subpart A would be amended by adding a new § 447.5 to read:

§ 447.5 The microagglutination test for pullorum-typhoid and typhimurium.

(a) The procedure for the collection and delivery of blood samples in the microagglutination test is the same as that described in § 447.1(a).

(b) Stained microagglutination test antigens for pullorum-typhoid, typhimurium, or combined pullorum-typhoid and typhimurium are supplied as concentrated stock suspensions and must be approved by the Department.[1] Directions for diluting will be provided with the antigens. The stock as well as the diluted antigen prepared each day should be kept sealed in the dark at 5° to 10° C. when not in use.

(c) The maximum serum dilution employed for pullorum-typhoid must not exceed 1:50 for chickens, nor 1:25 for turkeys. The maximum serum dilution for typhimurium and the combined test shall not exceed 1:25. In all official reports on the blood test, the serum dilutions shall be indicated.

(d) The recommended procedure for the 1:25 dilution is as follows:

[1] Information as to criteria and procedures for approval of concentrated stock suspensions of stained microagglutination test antigens may be obtained from the National Poultry Improvement Plan Staff, Building 265, Agricultural Research Center, Beltsville, Md. 20705.

(1) Add 50 microliters (0.05 cc.) of 0.25 percent phenolized saline to each microwell of the microplate.

(2) Using a microdiluter, transfer 10 microliters (0.01 cc.) of the serum sample from the collected specimen to the corresponding well of the microplate. This is accomplished by touching the surface of the serum sample with the microdiluter and then transferring and mixing the serum with the diluent in the microplate well. The microdiluter is removed, blotted, rinsed in saline, and again blotted. Other acceptable methods of serum delivery are described in "Applied Microbiology," volume 21, No. 3, March 1971, pages 394–399.

(3) Dilute the microagglutination test antigen with 0.25 percent phenolized saline and add 200 microliters (0.2 cc.) to each microplate well.

(4) Seal each plate with a plastic sealer or place unsealed in a tight incubation box as described in "Applied Microbiology," volume 23, No. 5, May 1972, pages 931–937. Incubate at 37° C. for 18–24 hours.

(5) Read the test results with the aid of a reading mirror. Results are interpreted as follows:

(i) N, or — (negative) when the microplate well has a large, distinct button of stained cells.

(ii) P, or + (positive) when the microplate well reveals no antigen button.

(iii) S, or ? (suspicious) when the microplate well has a small button. Suspicious reactions may tend to be more positive than negative [±] or vice versa [∓] and can be so noted, if desired.

27. Part 447, Subpart B, table of contents would be amended by adding a reference to a new § 447.12 to read:

447.12 Procedures for collecting environmental samples and cloacal swabs for bacteriological examination.

28. Part 447, Subpart B would be amended by adding a new § 447.12 to read:

§ 447.12 Procedures for collecting environmental samples and cloacal swabs for bacteriological examination.

Information concerning the pen arrangement and number of birds per pen should be obtained from the owner so that the required number of samples per pen and per flock can be determined. A means of identifying each sample by pen of origin should be provided. The vehicle transporting the personnel taking the samples should be left as far as practical from the poultry pens. Sanitary precautions, including personal cleanliness, should be observed during the sampling procedure. The hands should be carefully washed with a sanitizing soap prior to the sampling. Outer clothing, including gloves, should be changed between visits to different premises so that clean clothing is worn upon entering each premises. The used and clean apparel should be kept separate. Boots or footwear should be cleaned and disinfected between visits to different premises. Disposable caps should be provided and discarded after use on each premises. After collection, the samples should be protected from drying, light, and excessive temperatures and delivered to the laboratory within 1 day. If delivery is delayed, samples should be refrigerated.

(a) *Environmental samples.* Fecal material, litter, or dust to be submitted for bacteriological examination should be collected in accordance with the procedures described in paragraph a (1) or (2) of this section:

(1) *Procedure for sampling in broth.* Authorized laboratories will provide capped tubes 1–2 cm. in diameter and 15–20 cm. in length which are two-thirds full of a recently made, refrigerated, sterile enrichment broth (Selenite Brilliant Green Sulfapyridine or Tetrathionate Brilliant Green) for each sample. Sufficient tubes should be taken to the premises to provide at least one tube per pen or one tube per 500 birds, whichever is greater. At least one sterile, cotton-tipped applicator will be needed for each tube. The dry applicator is first placed or drawn through fresh manure (under roost, near water troughs, cecal droppings, or diarrhetic droppings). After this and each subsequent streaking, the cotton-tipped applicator is placed in the tube of broth and swirled to remove the collected material. The applicator is then withdrawn and is used for taking additional specimens by streaking on or through areas where defecation, trampling of feces, or settling of dust are common; i.e., on or near waterers, feeders, nests, or rafters, etc. When the volume of material collected equals approximately 10 percent of the volume of the broth (usually 10–12 streakings), the applicator is placed in the tube and the stick is broken in half. The lower or cotton-tipped half is left in the broth, and the upper half is retained for future disposal. The cap is then replaced on the inoculated tube, and the sampling procedure is continued in other areas of the pen.

(2) *Procedure for sampling in dry containers.* A sample of fecal material, litter, or dust, is placed in a sterile, sealable container. The sample shall consist of several specimens of material taken from a representative location in the pen. At least 10 grams (approximately a heaping tablespoonful) of material shall be collected for each sample. The specimens in each sample shall be collected with a sterile tongue depressor or similar uncontaminated instrument. The samples should vary in type and consistency. Half of the samples should be comprised of material representing defecated matter from a large portion of the flock; i.e., trampled, caked material near waterers and feeders. The minimum number of samples to be taken shall be determined by the following:

Five samples from pens of up to 500 birds;
Ten samples from pens of 500 to 2,500 birds;
Fifteen samples from pens with more than 2,500 birds.

(b) *Cloacal swabs.* Cloacal swabs for bacteriological examination are taken from each bird in the flock or from a minimum of 500 birds in accordance with the procedure described in paragraph (a)(1) of this section.

(1) *Procedure for taking cloacal swabs.* The authorized laboratory will provide sterile capped tubes or other suitable containers and cotton-tipped applicators for use in taking the cloacal swabs. The cotton-tipped applicator is inserted into the cloaca and rectum in such a manner as to insure the collection of fecal material. The swab and adhering fecal material is then placed in the tube and the stick is broken in half, with the upper half retained for future disposal. The cloacal swabs may be combined in the sterile tubes in multiples of five or in combinations specified by the authorized laboratory.

Any person who wishes to submit written data, views, or arguments, concerning the proposed amendments of the National Poultry and Turkey Improvement Plans and Auxiliary Provisions may do so by filing them with the Chairman, Animal Physiology and Genetics Institute, Building 265, Agricultural Research Center, Beltsville, Md. 20705, by February 7, 1973.

All written submissions made pursuant to this notice will be made available for public inspection at said institute at times and in a manner convenient to the public business (7 CFR 1.27(b)).

Done at Washington, D.C., this 2d day of January 1973.

PAUL D. DELAY,
Acting Administrator,
Agricultural Research Service.

An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

$3.00 per copy.
Paperbound, with charts

federal register

TUESDAY, JANUARY 9, 1973

WASHINGTON, D.C.

Volume 38 ■ Number 5

Pages 1109–1165

NOTICE TO AGENCIES

Agencies preparing documents for publication in the FEDERAL REGISTER are reminded that the revised rules of the Administrative Committee of the Federal Register are in effect as of January 3, 1973. (1 CFR Chapter I, 37 F.R. 23602, November 4, 1972.)

These revised rules include the following significant changes:

1. Requirement for a preamble in each proposed rule making and final rule making document that describes the contents of the document in a manner sufficient to apprise a reader who is not an expert in the subject area of the general subject matter of the document.
2. Requirement for setting forth specific effective dates and action dates.
3. Change in publication dates of the daily FEDERAL REGISTER (Monday through Friday instead of Tuesday through Saturday). See 1 CFR 17.2, 18.12, and 18.17.

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

PESTICIDE CONTROL PROGRAM—EPA notice of implementation plan 1142

SECURITIES—SEC proposal to define and limit trustee's completion of open contractual commitments; comments by 2–10–73 1125

FISH—Proposed Commerce Dept. standards for grades of whole or dressed fish; comments within 45 days 1122

BANK INCOME AND CONDITION REPORTS—FDIC issues notice of requirements (3 documents) 1145

Guide to Record Retention Requirements

[Revised as of January 1, 1972]

This useful reference tool is designed to keep businessmen and the general public informed concerning the many published requirements in Federal laws and regulations relating to record retention.

The 92-page "Guide" contains over 1,000 digests which tell the user (1) what type records must be kept, (2) who must keep them, and (3) how long they must be kept. Each digest carries a reference to the full text of the basic law or regulation providing for such retention.

The booklet's index, numbering over 2,200 items, lists for ready reference the categories of persons, companies, and products affected by Federal record retention requirements.

Price: $1.00

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration

Order from Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

FEDERAL REGISTER

Area Code 202 Phone 962-8626

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., Ch. 15), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for filing, publishing, and making available to the public, regulations and legal notices issued by the Executive Branch of the Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Title 6—ECONOMIC STABILIZATION

Rulings—Internal Revenue Service, Department of the Treasury

[Price Commission Ruling 1972–286; Cost of Living Council Ruling 1972–121]

APPLICATION OF SMALL BUSINESS EXEMPTION TO COFFEE MANUFACTURERS

Price Commission and Cost of Living Council Ruling

Facts. A Company is a firm with fewer than 60 employees and among the goods it produces are coffee products.

A Company meets the requirements of Economic Stabilization Regulations, 6 CFR 101.51(a) (1972), and thereby qualifies for the exemption for firms with 60 or fewer employees. However, Price Commission Order No. 9C, 37 FR 18595 (1972), by its terms, imposes controls on all manufacturers of coffee. No provision is made for different treatment of different firms based on the number of employees.

Issue. Does A Company still qualify for the small business exemption under § 101.51(a)?

Ruling. Yes. A Company is exempt under § 101.51(a).

Section 8(c) of Executive Order No. 11640, 37 FR 1213 (1972), states that the Price Commission "• • • shall perform such functions with respect to the stabilization of prices and rents as the Council delegates to the Commission." The specific grant of authority to delegate the Council's powers to the Price Commission may be found in section 4 (a) of the above Executive order. That order makes no direct grant of any authority to the Price Commission. The only authority held by the Price Commission is that which has been delegated by the Cost of Living Council under the previously cited sections 8(c) and 4(a).

Cost of Living Council Order No. 7, 37 FR 2678 (1972), which was meant to reaffirm and clarify the authority delegated to the Price Commission, refers to Cost of Living Council Order No. 4, 36 FR 20202 (1972). Section 1(b) of Order No. 4 limits the Price Commission to acting within the "• • • coverage determinations developed by the Council."

In recognition of the foregoing, Price Commission Regulations, § 301.1(b), 37 FR 27615 (1972), states, "This part does not apply to the sale or lease of any property or service that is exempted by Part 101 of this title." It is clear then that the Price Commission intended no more by its regulations than to control those subjects which it was delegated the authority to control.

The Commission was within the coverage determined by the Cost of Living Council when it promulgated Price Commission Order No. 9C, 37 FR 18595 (1972). The language immediately preceding the numbered paragraphs in that order states "• • • notwithstanding any other provision of Part 300 of the Price Stabilization Regulations of the Commission (6 CFR Part 300), it is hereby ordered • • •." The specific reference to Part 300 clearly indicates that the order was meant to modify only the coverage of Part 300 and was not intended to modify Cost of Living Council Regulations, 6 CFR Part 101 (1972).

Since the small business exemption is a Part 101 exemption and Price Commission Order No. 9C does not modify Part 101 coverage, A Company, which otherwise qualifies for the exemption, does not lose it by operation of Price Commission Order No. 9C.

This ruling has been approved by the General Counsels of the Price Commission and Cost of Living Council.

LEE H. HENKEL, Jr.,
Chief Counsel,
Internal Revenue Service.

Approved: December 29, 1972.

SAMUEL R. PIERCE, Jr.,
General Counsel,
Department of the Treasury.

Title 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Lemon Reg. 566, Amdt. 1]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

This regulation increases the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period December 31, 1972–January 6, 1973. The quantity that may be shipped is increased due to improved market conditions for California-Arizona lemons. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of lemons available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Lemon Regulation 566 (37 FR 28890). The marketing picture now indicates that there is a greater demand for lemons than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of lemons to fill the current market demand thereby making a greater quantity of lemons available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication hereof in the FEDERAL REGISTER (5

V 38 - 5 JAN 9 73 XUM

U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of lemons grown in California and Arizona.

(b) *Order, as amended.* The provision in paragraph (b)(1) of § 910.866 (Lemon Regulation 566, 37 FR 28890) is hereby amended to read as follows:

§ 910.866 Lemon Regulation 566.

* * * * *

(b) *Order.* (1) * * * 200,000 cartons.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: January 4, 1973.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-398 Filed 1-8-73;8:45 am]

[Amdt. 1]

PART 971—LETTUCE GROWN IN LOWER RIO GRANDE VALLEY IN SOUTH TEXAS

Limitation of Shipments

This amendment to the Limitation of Shipments regulation relieves the Sunday packaging holiday for South Texas lettuce for 1 day, Sunday, January 7, 1973. This amendment is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order 971. Rain has impeded the harvest of lettuce in the Lower Rio Grande Valley. The suspension of the packaging holiday for Sunday, January 7, 1973, will permit growers to catch up on their harvesting.

Findings. (a) Pursuant to Marketing Agreement No. 144 and Order No. 971 (7 CFR Part 971), regulating the handling of lettuce grown in the Lower Rio Grande Valley in South Texas (Cameron, Hidalgo, Starr, and Willacy Counties), effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and upon the basis of the recommendation and information submitted by the South Texas Lettuce Committee, established pursuant to said marketing agreement and order, and upon other available information, it is hereby found that the amendment to the limitation of shipments hereinafter set forth will tend to effectuate the declared policy of the act.

(b) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, or engage in public rule making procedure, and that good cause exists for not postponing the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, (2) compliance with this amendment will not require any special preparations on the part of handlers, (3) information regarding the committee's recommendation has been made available to producers and handlers in the production area, and (4) this amendment relieves the restriction that no person may package lettuce on Sunday, January 7, 1973.

Regulation, as amended. In § 971.313 (37 FR 24114) the introductory paragraph is hereby amended to read in part as follows:

§ 971.313 Limitation of shipments.

* * * Further, no person may package lettuce during the period ending March 31, 1973, on any Sunday, with the exception of Sunday, January 7, 1973.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Issued January 4, 1973, to become effective upon issuance.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-457 Filed 1-8-73;8:45 am]

Title 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Animal and Plant Health Inspection Service, Department of Agriculture

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS; EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES

[Docket No. 73-500]

PART 76—HOG CHOLERA AND OTHER COMMUNICABLE SWINE DISEASES

Areas Quarantined and Released

These amendments quarantine an additional portion of Southampton County in Virginia; a portion of Hertford County in North Carolina; portions of Charles, Prince Georges, and St. Marys in Maryland; and portions of Bristol and Plymouth Counties in Massachusetts because of the existence of hog cholera. This action is deemed necessary to prevent further spread of the disease. The restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas as contained in 9 CFR Part 76, as amended, will apply to the quarantined areas.

The amendments exclude a portion of Jefferson County in Georgia from the areas quarantined because of hog cholera. Therefore, the restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas contained in 9 CFR Part 76, as amended, do not apply to the excluded area, but will continue to apply to the quarantined areas described in § 76.2(e). Further, the restrictions pertaining to the interstate movement of swine and swine products from nonquarantined areas contained in said Part 76 apply to the excluded area. No area in Georgia remains under quarantine.

Therefore, pursuant to provisions of the Act of May 29, 1884, as amended, the Act of February 2, 1903, as amended, the Act of March 3, 1905, as amended, the Act of September 6, 1961, and the Act of July 2, 1962 (21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f), Part 76, Title 9, Code of Federal Regulations, restricting the interstate movement of swine and certain products because of hog cholera and other communicable swine diseases, is hereby amended in the following respects:

1. In § 76.2, paragraph (e)(10) relating to the State of Virginia is amended to read:

(e) * * *

(10) *Virginia.* That portion of Southampton County bounded by a line beginning at the junction of the Virginia-North Carolina State line and Secondary Road 701; thence, following Secondary Road 701 in a northerly direction to State Highway 195; thence, following State Highway 195 in a northeasterly direction to State Highway 35; thence, following State Highway 35 in a southerly direction to Secondary Road 670; thence, following Secondary Road 670 in a southeasterly direction to Secondary Road 743; thence, following Secondary Road 743 in a southeasterly direction to Secondary Road 716; thence, following Secondary Road 716 in a northeasterly, then northwesterly direction to Secondary Road 665; thence, following Secondary Road 665 in an easterly direction to Secondary Road 672; thence, following Secondary Road 672 in a northeasterly direction to Secondary Road 673; thence, following Secondary Road 763 in a northwesterly direction to Secondary Road 671; thence, following Secondary Road 671 in a northeasterly direction to Secondary Road 749; thence, following Secondary Road 749 in a northeasterly direction to Secondary Road 731; thence, following Secondary Road 731 in a southeasterly direction to Secondary Road 674; thence, following Secondary Road 674 in a northeasterly direction to Secondary Road 680; thence, following Secondary Road 680 in a southeasterly direction to Secondary Road 671; thence, following Secondary Road 671 in a northeasterly direction to the west bank of the Nottoway River; thence, following the west bank of the Nottoway River in a generally southeasterly direction to U.S. Highway 258; thence, following U.S. Highway 258 in a southwesterly direction to the Virginia-North Carolina State line; thence, following the Virginia-North Carolina State line in a westerly direction to its junction with Secondary Road 701.

2. In § 76.2, in paragraph (e)(6) relating to the State of North Carolina, a new subdivision (ii) relating to Hertford County is added to read:

(e) * * *

(6) *North Carolina.* * * *

(ii) That portion of Hertford County bounded by a line beginning at the junction of the North Carolina-Virginia State line and U.S. Highway 258; thence, following U.S. Highway 258 in a southwesterly direction to Secondary Road 1317; thence, following Secondary Road 1317 in a northwesterly direction to Secondary Road 1310; thence, following Secondary Road 1310 in a northerly direction to Secondary Road 1311; thence, following Secondary Road 1311 in a generally northwesterly direction to the east bank of the Meherrin River; thence, following the east bank of the Meherrin River in a generally northwesterly direction to the North Carolina-Virginia State line; thence, following the North Carolina-Virginia State line in an easterly direction to its junction with U.S. Highway 258.

* * * * *

3. In § 76.2, paragraph (e)(1) relating to Georgia is deleted and new paragraphs (e)(1) relating to Maryland and (e)(2) relating to Massachusetts are added respectively to read:

(e) * * *

(1) *Maryland.* The adjacent portions of Charles, Prince Georges, and St. Marys Counties bounded by a line beginning at the junction of the west bank of the Patuxent River and State Highway 472 in St. Marys County; thence, following State Highway 472 in a southwesterly direction to State Highway 235; thence, following State Highway 235 in a northwesterly direction to State Highway 247; thence, following State Highway 247 in a southwesterly direction to State Highway 5; thence, following State Highway 5 in a northwesterly direction to State Highway 238; thence, following State Highway 238 in a southwesterly direction to State Highway 234; thence, following State Highway 234 in a northwesterly direction to State Highway 232 in Charles County; thence, following State Highway 232 in a northwesterly direction to State Highway 6; thence, following State Highway 6 in a northwesterly direction to U.S. Highway 301; thence, following U.S. Highway 301 in a northwesterly direction to State Highway 225; thence, following State Highway 225 in a northwesterly direction to the northeastern boundary of the U.S. Naval Ordnance Station; thence, following the northeastern boundary of the U.S. Naval Ordnance Station; in a northwesterly direction to the east bank of the Potomac River; thence, following the east bank of the Potomac River in a generally northeasterly direction to Interstate Highway 495 in Prince Georges County; thence, following Interstate Highway 495 in a northeasterly direction to State Highway 4; thence, following State Highway 4 in a southeasterly direction to U.S. Highway 301; thence, following U.S. Highway 301 in a southwesterly direction to State Highway 382; thence, following State Highway 382 in a southeasterly direction to Magruder Landing Road (also Magruder Ferry Road); thence, following Magruder Landing Road (also Magruder Ferry Road) in an easterly direction to the west bank of the Patuxent River; thence, following the west bank of the Patuxent River in a generally southeasterly direction to its junction with State Highway 472 in St. Marys County.

(2) *Massachusetts.* The adjacent portions of Bristol and Plymouth Counties bounded by a line beginning at the junction of State Highway 123 and State Highway 106 in Bristol County; thence, following State Highway 106 in a southeasterly direction to State Highway 24 in Plymouth County; thence, following State Highway 24 in a southeasterly then, southwesterly direction to U.S. Highway 44 in Bristol County; thence, following U.S. Highway 44 in a southwesterly direction to State Highway 140; thence, following State Highway 140 in a northwesterly direction to State Highway 123; thence, following State Highway 123 in a northeasterly direction to its junction with State Highway 106 in Bristol County.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; sec. 1, 75 Stat. 481; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f; 37 FR 28464, 28477)

Effective date. The foregoing amendments shall become effective January 3, 1973.

Insofar as the amendments impose certain further restrictions necessary to prevent the interstate spread of hog cholera, they must be made effective immediately to accomplish their purpose in the public interest. Insofar as the amendments relieve restrictions presently imposed, they are no longer deemed necessary to prevent the spread of hog cholera, and they should be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rule making proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable, unnecessary and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 3d day of January 1973.

F. J. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

[FR Doc.73-458 Filed 1-8-73;8:45 am]

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Airworthiness Docket No. 72NW8AD, Amdt. 39-1582]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 707–300, 707–300B, 707–300C, and 707–400 Series Airplanes

Amendment 39-931 (35 FR 1158), AD 70-2-11, as amended by Amendment 39-1011 (35 FR 9921), as amended by Amendment 39-1450 (37 FR 10068) as amended by Amendment 39-1574 (37 FR 26293), requires inspection of the stabilizer center section front spar terminal fitting lug on the Boeing Model 707-300, 707-300B, 707-300C, and 707-400 series airplanes. After issuing Amendment 39-1574, the agency determined that correction of the AD is necessary, therefore, the AD is being further amended to provide for this correction.

Since this amendment provides a correction only, and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39-931 (35 FR 1158), AD 70-2-11, as amended by Amendment 39-1011 (35 FR 9921), as amended by Amendment 39-1450 (37 FR 10068) as amended by Amendment 39-1574 (37 FR 26293) is further amended to substitute a new paragraph (B)(1) for the existing paragraph (B)(1), as follows:

(B)(1) The stabilizer front spar fitting has been modified in accordance with Boeing Service Bulletin 2959, Revision 1, dated January 15, 1970, or later FAA approved revision, or an equivalent method approved by the Chief, Engineering and Manufacturing Branch, FAA, Northwest Region, or

This amendment becomes effective January 18, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; Sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Seattle, Wash., on December 29, 1972.

C. B. WALK, Jr.,
Director, FAA Northwest Region.

[Airspace Docket No. 72-WE-44]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On November 17, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (37 FR 24443) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Yuma, Ariz., transition area.

Interested persons were given 30 days in which to submit written comments, suggestions or objections. No objections have been received and the proposed amendment is hereby adopted without change.

Effective date. This amendment shall be effective 0901 G.m.t., March 2, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Los Angeles, Calif., on December 26, 1972.

ARVIN O. BASNIGHT,
Director, Western Region.

In § 71.181 (38 FR 435) the description of the Yuma, Ariz., transition area as amended by (37 FR 22576) is further amended by adding "• • •, that airspace extending upward from 9,000 feet MSL bounded on the west by the west edge of V–135, on the east by R–2306C and R–2306A, extending from 20 miles north of the Yuma VORTAC to the arc of a 20-mile radius circle centered on the Blythe, Calif. VORTAC."

[Airspace Docket No. 72-RM-28]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Control Zone and Alteration of Transition Area

On November 16, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (37 FR 24367) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would establish a control zone at Glasgow AFB, Glasgow, Mont., and alter the description of the transition area at Glasgow, Mont.

Interested persons were given 30 days in which to submit written comments, suggestions, or objections. No objections have been received, and these proposed amendments are hereby adopted subject to the following changes:

In the proposed amendments to the control zone and transition area, change "Glasgow AFB TACAN" to read, "Cherry Creek TACAN".

A name other than "Glasgow" for the military TACAN is required, due to FAA policy of prohibiting duplicate names for Navaids located within an Air Route Traffic Control Center's area.

Effective date. These amendments shall be effective 0901 G.m.t., March 1, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Aurora, Colo., on December 26, 1972.

I. H. HOOVER,
Acting Director,
Rocky Mountain Region.

In § 71.171 (38 FR 351) the following control zone is added:

GLASGOW, MONT. (GLASGOW AFB)

Within a 5-mile radius of Glasgow AFB (latitude 48°25'21" N., longitude 106°31'55" W.); within 2 miles each side of the Cherry Creek TACAN 292° radial extending from the 5-mile radius zone to 7 miles northwest of the TACAN; and within 2½ miles north and 2 miles south of the Cherry Creek TACAN 125° radial extending from the 5-mile radius zone to 7 miles southeast of the TACAN.

In § 71.181 (38 FR 435) the description of the Glasgow, Mont., transition area is amended to read:

GLASGOW, MONT.

That airspace extending upward from 700 feet above the surface within a 9-mile radius of Glasgow International Airport (latitude 48°11'50" N., longitude 106°37'10" W.); within a 9-mile radius of Glasgow AFB (latitude 48°25'21" N., longitude 106°31'55" W.); and that airspace extending upward from 1,200 feet above the surface within 4½ miles southwest and 9½ miles northeast of the Glasgow VOR 127° radial, extending from the VOR to 19½ miles southeast of the VOR; within a 25-mile radius of the Cherry Creek TACAN; within 9½ miles north and 5½ miles south of the Cherry Creek TACAN 125° radial extending from the 25-mile radius area to 33½ miles southeast of the TACAN; within 9½ miles south and 5½ miles north of the Cherry Creek TACAN 292° radial extending from the 25-mile radius area to 33½ miles northwest of the TACAN.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to designate a 700-foot transition area at Stephenville, Tex.

On November 8, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (37 FR 23731) stating the Federal Aviation Administration proposed to designate the Stephenville, Tex., transition area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., March 1, 1973, as hereinafter set forth.

In § 71.181 (38 FR 435), the following transition area is added:

STEPHENVILLE, TEX.

That airspace extending upward from 700 feet AGL within a 5-mile radius of Clark Field, Tex. (latitude 32°13'00" N., longitude 98°10'42" W.), and within 3 miles each side of the Acton, Tex., VORTAC 244° radial extending from the 5-mile radius area to 27 miles from the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Fort Worth, Tex., on December 21, 1972.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc. 73-378 Filed 1-8-73;8:45 am]

[Airspace Docket No. 72-RM-29]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On November 16, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (37 FR 24367) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would establish a transition area at Mohall, N. Dak.

Interested persons were given 30 days in which to submit written comments, suggestions, or objections. No objections have been received and the proposed amendment is hereby adopted without change.

Effective date. This amendment shall be effective 0901 G.m.t., March 1, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Aurora, Colo., on December 26, 1972.

I. H. HOOVER,
Acting Director,
Rocky Mountain Region.

In § 71.181 (38 FR 435) the description of the Mohall, N. Dak., transition area is designated to read:

MOHALL, N. DAK.

That airspace extending upward from 700 feet above the surface within a 7½-mile radius of Mohall Municipal Airport (latitude 48°46'01" N., longitude 101°32'04" W.).

Chapter II—Civil Aeronautics Board

SUBCHAPTER E—ORGANIZATION REGULATIONS

[Reg. OR-67, Amdt. 29]

PART 385—DELEGATIONS AND REVIEW OF ACTION UNDER DELEGATIONS; NONHEARING MATTERS

Delegations of Authority

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 3d day of January 1973.

The Board's Bureau of Accounts and Statistics recently has been reorganized. As a result of this reorganization, the Board has determined to simplify and reassign Delegations of Authority to various divisions within the Bureau so as to conform with the reorganized functions and responsibilities, and to relieve the Director of the Bureau from direct responsibility for certain decisions which can more appropriately be performed by certain of his subordinates.

The Board has also determined to amend current § 385.17(d), which delegates to the Director authority to grant or deny requests for confidential treatment of preliminary yearend financial reports with the concurrence of the General Counsel, the Director, Bureau of Economics, and the Director, Bureau of Operating Rights. The Board has determined that the concurrences required by § 385.17(d) are not necessary, and that the authority to act upon such requests should rest solely with the Director, Bureau of Accounts and Statistics.[1]

In addition, the Board has determined to delete from current § 385.17(k) the sentence pertaining to furnishing copies of Board magnetic tapes containing international origin and destination statistics to the Air Transport Association of America (ATA). By OR–68, issued contemporaneously herewith, the Board is amending § 389.14a(b) of Part 389 of this chapter, which deals with furnishing magnetic tapes for copying. The Part 389 amendment authorizes the furnishing of any Board magnetic tapes containing data exempt from disclosure to an ADP servicing agent having the capacity to properly house and secure these tapes. This new general authority under Part 389 is broad enough to encompass the existing specific authority with respect to ATA, under § 385.17(k), so that the latter provision is rendered superfluous.

Since the amendments provided for herein are rules of agency organization, the Board finds that notice and public procedure are not necessary, and that the amendments may be made effective immediately.

Accordingly, the Civil Aeronautics Board hereby amends §§ 385.17 and 385.18 of Part 385 of its Organization Regulations (14 CFR Part 385), and adds thereto a new § 385.18a, effective January 3, 1973, the sections as amended to read as follows:

1. Amend the Table of Contents of Subpart B of Part 385 by changing the heading of § 385.18 and by adding a new § 385.18a, the table as amended to read as follows:

Sec.
385.18 Delegation to the Chief, Accounting Regulation Division, Bureau of Accounts and Statistics.
385.18a Delegation to the Chief, Statistical Division, Bureau of Accounts and Statistics.

2. Amend § 385.17 to read as follows:

[1] Board policy on the granting of such requests is set forth at § 399.51 of Part 399 of this chapter.

§ 385.17 Delegation to the Director, Bureau of Accounts and Statistics.

The Board hereby delegates to the Director, Bureau of Accounts and Statistics, the authority to:

(a) Except as authority is otherwise specifically delegated, waive any of the accounting and reporting requirements upon a showing of the existence of such facts, circumstances or other grounds, and subject to such limitations or conditions, as may be prescribed for waivers in the applicable regulations.

(b) Interpret the Board's accounting and reporting requirements. This authority may not be redelegated.

(c) Establish detailed standard accounting and reporting practices required to achieve conformance with regulations promulgated by the Board.

(d) Dismiss petitions for Board action with respect to accounting and reporting matters when such dismissal is requested or consented to by the petitioner.

(e) Require monthly balance sheets and income statements of any supplemental air carrier, where he finds that such reports are necessary for the purpose of determining whether such carrier meets the standards of continuing fitness required by section 401(n)(4) of the Act.

(f) Grant or deny requests for confidential treatment of preliminary yearend financial reports.

3. Amend § 385.18 to read as follows:

§ 385.18 Delegation to the Chief, Accounting Regulation Division, Bureau of Accounts and Statistics.

The Board hereby delegates to the Chief, Accounting Regulation Division, Bureau of Accounts and Statistics, the authority to:

(a) Require submission by carrier of special statements necessary to an explanation of any carrier accounting or reporting practice.

(b) Grant or deny requests by air carriers for substitution of their own forms or adaptation of Board forms to meet special needs where Board approval of such form is required by the Economic Regulations.

(c) Prescribe, in specific instances, different passenger weight standards to approximate variations in actual experience, for reporting passenger ton-miles and available ton-miles.

(d) Establish record-retention practices required to achieve conformance with regulations promulgated by the Board.

(e) Interpret the Board's record-retention requirements.

(f) Waive any of the record-retention requirements as warranted, consistent with the provisions of §§ 249.4 and 249.28 of Part 249 of this chapter.

(g) Extend, with the concurrence of the Director, Bureau of Enforcement, the time period for the preservation of records relating to errors, oversales, irregularities, and delays in handling of passengers (§ 249.13(f) of this chapter. Category No. 303(a) of the Schedule of Records to Part 249 of the Economic Regulations.)

4. Add a new § 385.18a to read as follows:

§ 385.18a Delegation to the Chief, Statistical Division, Bureau of Accounts and Statistics.

The Board hereby delegates to the Chief, Statistical Division, Bureau of Accounts and Statistics, authority to:

(a) Establish classification of aircraft types for reporting financial data and traffic and capacity statistics.

(b) Grant or deny requests for use of service segment data in accordance with the limitations on the availability of these data contained in section 19–6 of Part 241 of this chapter.

(c) Grant or deny requests for use of international origin and destination statistics in accordance with Board policy as set forth in § 399.100 of this chapter.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324. Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5989; 49 U.S.C. 1324 (note))

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.73-445 Filed 1-8-73;8:45 am]

[Reg. OR-68, Amdt. 14]

PART 389—FEES AND CHARGES FOR SPECIAL SERVICES FURNISHING MAGNETIC TAPES FOR COPYING

Release of Service Segment Data

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 3d day of January 1973.

By OR–67 (Part 385), the Board revised various of its Delegations of Authority to the Director and the Divisions of the Bureau of Accounts and Statistics. One of the provisions affected, § 385.18a (b), involves the release of service segment data furnished to the Board by the certificated carriers. Section 389.14a(b) provides that only the nonconfidential portion of tapes containing data exempt from public disclosure shall be copied. However, since section 19–6 of Part 241 of this chapter exempts service segment data from public disclosure, except as provided for therein, the authority to have those tapes copied is not completely clear. The purpose of the within amendment is to remove from § 389.14a(b) the restriction which only permits the copying of nonconfidential portions of tapes containing data exempt from disclosure, so as to eliminate any necessity for the staff to review the tapes prior to copying in order to sepaarte the confidential from the nonconfidential data. Of course, only those data subject to disclosure would be released following the copying of the tapes.

The within amendments also provide that the Director of the Bureau rather than the Board itself may designate an outside contractor for the copying of tape. This authority is being delegated to relieve the Board from direct responsibility for decisions that can more appropriately be made by the staff.

V 38 - 5 JAN 9 73 XUM

Finally, the Board has determined to include in section 389.14a(b) authority for the Director of the Bureau to furnish ADP servicing agents having the capacity to properly store and secure magnetic tapes, copies of Board magnetic tapes.

Since this amendment is procedural in nature, the Board finds that notice and public procedure hereon are not necessary, and that the amendment should be effective immediately.

Accordingly, the Civil Aeronautics Board hereby amends § 389.14a(b) of Part 389 of its Organization Regulations (14 CFR Part 389), effective January 3, 1973, to read as follows:

§ 389.14a Furnishing magnetic tapes for copying.

* * * * *

(b) Where the tape contains data exempt from disclosure pursuant to 5 U.S.C. 552(b) or which have been withheld from public disclosure by the Board, the Director, Bureau of Accounts and Statistics, may arrange for the copying of the tape, at the applicant's expense, by the Board facilities or by an outside contractor which he may designate. When the copying is performed by the Board, the charge for copying will be seventy-five dollars ($75.00) per computer metered hour or fraction thereof. Whenever the authority provided by this paragraph is invoked, the applicant shall also pay the fee set forth in paragraph (a) of this section for the privilege of copying. Copies of the Board's magnetic tapes may be furnished to an ADP servicing agent having the capacity to house the tapes according to the best practices for industrial/Governmental security and capable of copying magnetic tapes as authorized.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324)

By the Civil Aeronautics Board.

Title 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket No. C-2331]

PART 13—PROHIBITED TRADE PRACTICES

H. Groner & Co., Inc., and Henry Groner

Subpart—Importing, manufacturing, selling or transporting flammable wear: § 13.1060 *Importing, manufacturing, selling, or transporting flammable wear.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, 67 Stat. 111, as amended; 15 U.S.C. 45, 1191) [Cease and desist order, H. Groner & Co., Inc. et al., Chicago, Ill., Docket No. C-2331, Dec. 12, 1972]

In the Matter of H. Groner & Co., Inc., a Corporation, and Henry Groner, Individually and as an Officer of Said Corporation

Consent order requiring a Chicago, Ill. importer and jobber of various products, including scarves among other things, to cease selling, importing, or distributing any product, fabric, or related material which fails to conform to an applicable standard of flammability or regulation issued under the provisions of the Flammable Fabrics Act, as amended.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents H. Groner & Co., Inc., a corporation, its successors and assigns, and its officers, and Henry Groner, individually and as an officer of said corporation, and respondents' agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, do forthwith cease and desist from selling, offering for sale, in commerce, or importing into the United States, or introducing, delivering for introduction, transporting or causing to be transported in commerce, or selling or delivering after sale or shipment in commerce any product, fabric or related material; or selling or offering for sale any product made of fabric or related material which has been shipped or received in commerce, as "commerce", "product", "fabric" and "related material" are defined in the Flammable Fabrics Act, as amended, which product, fabric or related material fails to conform to an applicable standard or regulation continued in effect, issued or amended under the provisions of the aforesaid Act.

It is further ordered, That respondents notify all of their customers who have purchased or to whom have been delivered the products which gave rise to this complaint of the flammable nature of said products, and effect recall of said products from such customers.

It is further ordered, That the respondents herein either process the products which gave rise to the complaint so as to bring them into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or destroy said products.

It is further ordered, That the respondents herein shall, within ten (10) days after service upon them of this order, file with the Commission a special report in writing setting forth the respondents' intentions as to compliance with this order. This special report shall also advise the Commission fully and specifically concerning: (1) The identity of the products which gave rise to the complaint, (2) the number of said products in inventory, (3) any action taken and any further actions proposed to be taken to notify customers of the flammability of said products and effect the recall of said products from customers, and of the results thereof, (4) any disposition of said products since March 19, 1971, and (5) any action taken or proposed to be taken to bring said products into conformance with the applicable standard of flammability under the Flammable Fabrics Act, as amended, or to destroy said products, and the results of such action. Such report shall further inform the Commission as to whether or not respondents have in inventory any product, fabric, or related material having a plain surface and made of paper, silk, rayon and acetate, nylon and acetate, rayon, cotton, or any other material or combinations thereof in a weight of 2 ounces or less per square yard, or any product, fabric, or related material having a raised fiber surface. Respondents shall submit samples of not less than 1 square yard in size of any such product, fabric, or related material with this report.

It is further ordered, That the respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale, resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the individual respondent named herein promptly notify the Commission of the discontinuance of his present business or employment and of his affiliation with a new business or employment. Such notice shall include respondent's current business or employment in which he is engaged as well as a description of his duties and responsibilities.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which they have complied with this order.

Issued: December 12, 1972.

By the Commission.

In the Matter of Strassberg and Tama, Inc., a Corporation, and Maurice Strassberg and Solomon Tama, Individually and as Officers of Said Corporation

Consent order requiring a New York City manufacturer of fur products, among other things to cease misbranding and falsely invoicing its fur products.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That Strassberg and Tama, Inc., a corporation, its successors and assigns, and its officers, and Maurice Strassberg, and Solomon Tama, individually and as officers of said corporation, and respondents' representatives, agents and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the introduction, or manufacture for introduction, into commerce, or the sale, advertising or offering for sale in commerce, or the transportation or distribution in commerce, of any fur product; or in connection with the manufacture for sale, sale, advertising, offering for sale, transportation or distribution, of any fur product which is made in whole or in part of fur which has been shipped and received in commerce, as the terms "commerce," "fur" and "fur product" are defined in the Fur Products Labeling Act, do forthwith cease and desist from:

A. Misbranding any fur product by:

1. Representing directly or by implication on a label that the fur contained in such fur product is natural when such fur is pointed, bleached, dyed, tip-dyed, or otherwise artificially colored.

2. Failing to affix a label to such fur product showing in words and in figures plainly legible all of the information required to be disclosed by each of the subsections of section 4(2) of the Fur Products Labeling Act.

B. Falsely or deceptively invoicing any fur product by:

1. Failing to furnish an invoice, as the term "invoice" is defined in the Fur Products Labeling Act, showing in words and figures plainly legible all the information required to be disclosed by each of the subsections of section 5(b)(1) of the Fur Products Labeling Act.

2. Representing directly or by implication on an invoice that the fur contained in such fur product is natural, when such fur is pointed, bleached, dyed, tip-dyed, or otherwise artificially colored.

It is further ordered, That respondents notify the Commission at least 30 days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That the individual respondents named herein promptly notify the Commission of the discontinuance of their present business or employment and of their affiliation with a new business or employment. Such notice shall include respondents' current business or employment in which they are engaged as well as a description of their duties and responsibilities.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

Issued: December 12, 1972.

Title 17—COMMODITY AND SECURITIES EXCHANGES

Chapter II—Securities and Exchange Commission

[Release 34-9924]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Reporting of Market Information on Transactions in Listed Securities; Extension of Deadline

The Securities and Exchange Commission has extended from December 26, 1972, until January 26, 1973, the deadline by which each registered national securities exchange and national securities association must file with the Commission a plan pursuant to Rule 17a-15 (17 CFR 240.17a-15) under the Securities Exchange Act of 1934[1] (the Rule) for the reporting of prices and volume of completed transactions in listed securities (last sale reports). The Commission has also extended from January 22, 1973, until February 26, 1973, the Rule's prohibition against releasing last sale reports on a current and continuing basis without an effective plan. The Commission has determined to extend these deadlines in view of the complexities involved in developing such plans and after having been advised that substantial progress has been made in this regard.

(Secs. 10(b), 15(c), 17(a), 23(a), 48 Stat. 891, 895, 897, 901, 49 Stat. 1377, 1379, 52 Stat. 1075, 1076, 78 Stat. 570, 84 Stat. 1653, 15 U.S.C. 78j(b), 78o(c), 78q, 78w)

[1] Adoption of the Rule was announced on November 8, 1972, in Securities Exchange Act Release No. 9850, published in the FEDERAL REGISTER for November 15, 1972, at 37 FR 24172.

V38-5 JAN 9 73 XUM

Proposed Rule Making

DEPARTMENT OF THE INTERIOR

National Park Service

[36 CFR Part 7]

GUADALUPE MOUNTAINS NATIONAL PARK, TEX.

Cave Entry and Exploration

Notice is hereby given that pursuant to the authority contained in section 3 of the Act of August 25, 1916 (39 Stat. 535, as amended; 16 U.S.C. 3), and the Act of October 15, 1966 (80 Stat. 920), it is proposed to establish a § 7.93 within Part 7, Special Regulations, Areas of the National Park System to deal with Guadalupe Mountains National Park.

The purpose of this section is to establish restrictions on entry and exploration of all cave formations now known or to be found within the park. Wording and intent of the section conforms almost exactly to that already existing for Carlsbad Caverns National Park under § 7.47. Guadalupe Mountains National Park is situated just south of Carlsbad Caverns National Park in the same Capitan Reef geological formation. Several caves are already known, and explored and indexed in the area. It is safe to assume that with the same geological background more caves will be found as the area comes under increased visitor use. The same requirements for visitor safety, scientific exploration and research, and protection of delicate cave formations are necessary to assure effective management and protection.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding the proposed amendment to the Superintendent, Guadalupe Mountains National Park, 3225 El Paso Road, Carlsbad, NM 88220, by February 8, 1973.

The section reads as follows:

§ 7.93 Guadalupe Mountains National Park.

(a) *Cave entry*—(1) *Closed areas.* No person shall enter any cave or passageway of any cave without a written permit from the Superintendent.

(2) *Permits.* The Superintendent may issue written permits for cave entry to persons engaged in scientific investigations, and educational investigations. The Superintendent shall approve issuance of a permit: *Provided:*

(i) That the investigation planned will have demonstrable value to the National Park Service in its management or understanding of park resources, and

(ii) That the permit applicant is adequately equipped and experienced so as to assure the protection and preservation of park resources, and personal safety.

(iii) Solo exploration or investigation is not permitted in any cave or passageway of any cave within the park.

Dated: January 2, 1973.

LAWRENCE C. HADLEY,
Director.

[FR Doc.73-435 Filed 1-8-73;8:45 am]

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[50 CFR Part 275]

WHOLE OR DRESSED FISH

Proposed Standards for Grades

DECEMBER 27, 1972.

Notice is hereby given that pursuant to the authority vested in the Secretary of the Department of Commerce, it is proposed to amend Title 50 Code of Federal Regulations by the addition of a new Part 275. The purpose of this amendment is to issue standards for grades of whole or dressed fish as set forth below, in accordance with the authority contained in title II of the Agricultural Marketing Act of August 14, 1946, as amended (7 U.S.C. 1621-1627).

The authority for the Department of Commerce to develop and promulgate fishery product standards is based on Reorganization Plan No. 4 of 1970 (84 Stat. 2090), which, among other things, abolished the Bureau of Commercial Fisheries in the Department of the Interior, and transferred its functions, including development of fishery product standards, to the Department of Commerce.

It is the policy of the Department of Commerce whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions, or objections, with respect to the proposed amendment to the Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, DC 20235, by February 23, 1973.

ROBERT M. WHITE,
Administrator.

Title 50, Chapter II, of the Code of Federal Regulations is hereby proposed to be amended by the addition of a new Part 275, reading as follows:

PART 275—U.S. STANDARD FOR GRADES OF WHOLE OR DRESSED FISH [1]

Sec.

275.1 Scope and product description.
275.2 Presentation.
275.3 Grades—essential quality factors.
275.4 Determination of grade.
275.6 Hygiene.
275.8 Certification of officially drawn samples.

§ 275.1 Scope and product description.

This standard shall apply to whole or dressed fish of any species suitable for use as human food and processed and maintained in accordance with good manufacturing practices.

§ 275.2 Presentation.

Whole or dressed fish may be glazed or not and shall be presented in accordance with the following types and styles.

(a) *Types.* (1) Fresh;
(2) Frozen solid pack;
(3) Frozen individually.
(b) *Styles.* (1) Skin-on, unscaled;
(2) Skin-on, scaled;
(3) Semi-skinned;
(4) Skinless.

§ 275.3 Grades—Essential quality factors.

(a) *U.S. Grade A.* Whole or dressed fish shall:

(1) Possess good flavor and odor and;

(2) Comply with the limits for defects for U.S. Grade A quality in accordance with Table 1 of the standard.

(b) *U.S. Grade B.* Whole or dressed fish shall:

(1) Possess reasonably good flavor and odor and;

(2) Comply with the limits for defects for U.S. Grade B quality in accordance with Table 1 of the standard.

(c) *Substandard.* Whole or dressed fish does not possess reasonably good flavor and odor and/or exceeds the limits for defects for U.S. Grade B quality in accordance with Table 1 of the standard.

[1] Compliance with the provisions of this standard shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

TABLE 1

Quality and degree of defect	Minor [1]	Major [2]	Severe
Abnormal condition:			
Moderate		201	
Excessive			301
Appearance:			
Slight	102		
Moderate		202	
Excessive			302
Discoloration:			
Slight	103		
Moderate		203	
Excessive			303
Dehydration:			
Moderate—3 percent or more area affected		204	
Excessive—less than 3 percent area affected		205	
Excessive—greater than 3 percent area affected			304
Surface defects:			
Area affected—3 to 10 percent	104		
Area affected—greater than 10 percent		206	
Cutting and trimming:			
Body cuts	105		
Heading:			
Small	106		
Large		207	
Evisceration:			
Slight	107		
Moderate		208	
Excessive			305
Improper washing	108		
Belly burn		209	
Texture:			
Moderate	109		
Excessive		210	

[1] Four or more minor defects reduce product to U.S. Grade B.
[2] Four or more major defects reduce product to U.S. Substandard. Eight or more minor defects reduce product to Substandard. Six minor defects and one major defect reduce product to substandard.

*Any major defect shall reduce product to U.S. Grade B.

§ 275.4 Determination of grade.

The grade shall be determined by evaluating the flavor and ordor of the fish and the degree of severity of the following defects as classified in Table 1 and defined in Table 2: Abnormal condition; appearance; discoloration; dehydration; surface defects; cutting and trimming; texture. Defects are classified as minor, major, and severe.

TABLE 2

DEFINITIONS OF DEFECTS IN WHOLE OR DRESSED FISH

1. "Abnormal condition" means that the normal physical and/or chemical structure of the fish flesh has been sufficiently changed so that the usability and/or desirability of the fish is adversely affected. It includes, but is not limited to, the following examples:

a. Jellied refers to the abnormal condition wherein a fish is partly or wholly characterized by a gelatinous, glossy, translucent appearance.

b. Milky refers to the abnormal condition wherein a fish is partly or wholly characterized by a milky-white, excessively mushy, pasty, or fluidized appearance.

c. Chalky refers to an abnormal condition wherein a fish is partly or wholly characterized by a dry, chalky, granular appearance, and fiberless structure.

"Moderate" refers to a condition that is distinctly noticeable but does not seriously affect the appearance, desirability and/or the eating quality of the product.

"Excessive" refers to a condition which is both distinctly noticeable and seriously objectionable.

2. "Appearance" shall refer to the overall general appearance of the fish (consistency of the flesh, odor, eyes, gills, and skin) and presence of excessive blood or drip and appearance of the package.

"Slight" refers to an appearance defect that is slightly noticeable but does not affect the appearance, desirability and/or eating quality of the fish.

"Moderate" refers to an appearance defect that is conspicuously noticeable but does not seriously affect the appearance, desirability and/or eating quality of the fish.

"Excessive" refers to an appearance defect that is conspicuously noticeable and that does seriously affect the appearance, desirability and/or eating quality of the fish.

3. "Discoloration" refers to any color not characteristic of the species used.

"Slight" dislocation of significant intensity involving up to 10-percent skin area.

"Moderate" discoloration of significant intensity involving over 10 percent up to 50-percent skin area.

"Excessive" discoloration of significant intensity involving over 50-percent skin area.

4. "Dehydration" refers to loss of moisture from the fish surfaces during frozen storage.

"Moderate" dehydration is color masking and can easily be scraped off with a blunt instrument.

"Excessive" dehydration is deep color masking and requires a knife or other hard instrument to scrape it off.

5. "Surface defects" shall refer to the following where applicable:

a. Scales. An occurrence of attached or loose scales in any sample unit (where applicable).

b. Blood spot. An accumulation of coagulated opaque, masses of blood on a fish.

c. Fins or pieces of fin. An occurrence or absence of attached or loose fins or pieces of fin in any sample unit (where applicable). Dorsal spine shall be removed (where applicable).

d. Skin refers to the presence of the dark or light inner layers of skin for Style 4. For semiskinned Style 3, reference is to the presence of the dark outside layers.

e. Bruises. An accumulation of damaged portions of fish muscle, red and opaque in appearance (on a fish).

f. Damage to protective coating refers to voids in ice glaze or tears in covering membrane, also to breaks or splits in the skin which are readily discernible and not normally part of the processing.

6. "Cutting and trimming" refers to the following:

a. Heading (as specified) refers to the presence of pieces of gills, gill cover, pectoral fins (spine), or collarbone after the fish have been headed. No ragged cuts should be evident after heading.

b. Body cavity cuts—misplaced cuts made during evisceration.

c. Evisceration—inadequate cleaning of the belly cavity of the fish. All viscera, kidney, spawn, and blood should be removed.

d. Improper washing—inadequate removal of slime, blood, and bits of viscera from the surface of the fish and from the body cavity.

7. *Texture*—tough, dry, fibrous, watery, rubbery, or mushy, not characteristic of species involved.

(a) *Tolerances for microbiological and/or chemical contaminants.* In order to be eligible for certification of grade under this subpart, whole or dressed fish shall comply with the current and applicable limits for microbiological and/or chemical contaminants as prescribed by regulations or guidelines issued pursuant to the Food, Drug and Cosmetic Act as amended.

(b) *Evaluation of flavor and odor.* (1) Evaluation of the odor of the raw fish shall be carried out as follows:

(i) For the examination of small units, break the flesh or thawed sample either with the thumbs or by cutting with a knife in several places. Hold the cut or broken flesh close to the nose for evaluation.

(ii) For the examination of large units, a core may be used. Drill a hole into the hard frozen fish with a high-speed quarter inch drill. As soon as the drill is withdrawn, the hole and "shavings" are smelled.

(2) If the results of the raw odor evaluation indicate the existence of any off odors, the sample shall be cooked by any of the methods set forth below to verify the flavor and odor.

(i) *Boil in bag method.* Insert the sample into a boilable film-type pouch; fold the open end of the pouch over a suspension bar and clamp in place to provide a loose seal after evacuating the air by immersing the pouch into boiling water. Cook the contents for 20 minutes (until the internal temperature of the product reaches 160° F.).

(ii) *Steam method.* Wrap the sample in a single layer in aluminum foil, and place on a wire rack suspended over boiling water in a covered container. Steam the packaged product for 20 minutes.

(iii) *Bake method.* Package the product as previously described. Place the packaged product on a flat cookie sheet or shallow flat-bottom pan of sufficient size so that the packages can be evenly spread on the sheet or pan. Place the pan and frozen contents in a properly ventilated oven preheated to 400° F. for 20 minutes.

(3) The amount of material to be cooked shall be based on the results of the raw odor evaluation. A minimum of 25 percent of the sample except that not less than 3 sample units shall be used.

§ 275.4 Hygiene.

Whole or dressed fish shall be processed and maintained in accordance with the applicable requirements of the good manufacturing practice regulations contained in Part 128 of Title 21 CFR and

V 38 - 5 JAN 9 73 XUM

the applicable requirements of the regulations contained in §§ 260.96 to 260.103 in Part 260 of this chapter.

§ 275.5 Certification of officially drawn samples.

(a) The sampling rate of specific lots for all inspections, other than for military procurement, shall be in accordance with the sampling plans contained in Part 260 of this chapter except that the sample unit is ten (10) fish for fish weighing up to 10 lbs. Fish weighing over ten (10) up to fifty (50) lbs.—the sample shall be five (5) fish. For fish weighing over fifty (50) lbs., the sample shall be a minimum of three (3) fish.

(b) Sampling for inspection for military procurement shall be in accordance with MIL–STD–105. Lot size shall be expressed in terms of pounds. The sample size shall be in accordance with Inspection Level S–3.

Acceptable Quality Levels shall be expressed in terms of defects per hundred units. The AQL's shall be 4.0 for major and 6.5 for minor.

DEPARTMENT OF LABOR

Office of Federal Contract Compliance

[41 CFR Part 60–1]

EQUAL EMPLOYMENT OPPORTUNITY

Definition of Agency

Notice is hereby given that pursuant to Executive Order 11246 (30 FR 12319), as amended by Executive Order 11375 (32 FR 14303), the Department of Labor proposes to amend 41 CFR Part 60–1 in the manner set forth below.

This proposed amendment concerns matters relating to public contracts. While public participation in this rule making is not required by 5 U.S.C. 553, the Department wishes to invite written comments, suggestions, or objections, regarding this proposed amendment. Accordingly, interested persons are invited to submit written comments regarding the proposed amendment to Philip J. Davis, Acting Director, Office of Federal Contract Compliance, U.S. Department of Labor, 14th Street and Constitution Avenue NW., Washington, D.C. 20210, by February 8, 1973.

It is proposed that 41 CFR 60–1.3(b) be revised to read as follows:

§ 60–1.3 Definitions.

• • • • •

(b) The term "agency" means any contracting, compliance or administering agency of the Government.

• • • • •

Signed at Washington, D.C., this 21st day of December 1972.

J. D. HODGSON,
Secretary of Labor.

DEPARTMENT OF TRANSPORTION

Federal Aviation Administration

[14 CFR Part 39]

[Airworthiness Docket No. 72–WE–21–AD]

McDONNELL DOUGLAS MODEL DC–8 AND DC–9 SERIES AIRPLANES

Proposed Airworthiness Directive

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to McDonnell Douglas Model DC–8 and DC–9 series airplanes. There has been a failure of the rudder pedal casting boss on a Model DC–8. (The DC–9 rudder pedal is identical to the DC–8). The failure resulted from a fatigue crack. Since this condition is likely to exist or develop in other airplanes of the same type design, the proposed airworthiness directive would require an inspection of the affected area of all Model DC–8 and DC–9 rudder pedals within 1,000 hours' time in service.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments, as they may desire. Communications should identify the docket number and be submitted in duplicate to the Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rules Docket, Post Office Box 92007, Worldway Postal Center, Los Angeles, CA 90009. All communications received on or before February 10, 1973, will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Airworthiness Rules Docket for examination by interested persons.

This amendment is proposed under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend § 39.13 of Part 39 of the Federal Aviation Regulations by adding the following new airworthiness directive:

McDONNELL DOUGLAS. Applies to all Model DC–8 and DC–9 series airplanes.

Compliance required within the next 1,000 hours' time in service after the effective date of this AD, unless already accomplished.

To detect cracks and prevent failure of the rudder pedals, conduct a dye penetrant inspection of the rudder pedals in accordance with the instructions in McDonnell Douglas All Operators Letter 8–629 issued September 22, 1972, and 9–731 issued September 22, 1972, or later FAA-approved revisions, or equivalent inspection technique approved by the Chief, Aircraft Engineering Division, FAA Western Region.

NOTE: The agency is examining the possibility of incorporating a repetitive inspection program into this AD. The manufacturer is now performing tests for this purpose. The AD may be amended based on data obtained.

Issued in Los Angeles, Calif., on December 21, 1972.

ROBERT O. BLANCHARD,
Acting Director,
FAA Western Region.

[FR Doc.73–380 Filed 1–8–73;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 72–SW–82]

CONTROL ZONE

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations to alter the Fayetteville, Ark., control zone.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, Post Office Box 1689, Fort Worth, TX 76101. All communications received by February 8, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested persons at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, Forth Worth, Tex. An informal docket will also be available for examination at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

It is proposed to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth.

In § 71.171 (37 FR 2056), the Fayetteville, Ark., control zone is amended by adding "and within 2 miles each side of the Fayetteville ILS localizer north course 342° M (349° T) bearing extending from the 5.5-mile radius zone to 11.5 miles north of the localizer site (latitude 35°59'37.5" N., longitude 94°10'02" W.).

The proposed alteration will provide controlled airspace to accommodate the ILS approach procedure serving Drake Field Airport, Fayetteville, Ark.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Fort Worth, Tex., on December 19, 1972.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc.73–381 Filed 1–8–73;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 72–RM–25]

TRANSITION AREA

Proposed Establishment

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would establish a transition area at Madison, S. Dak.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station P.O. Box 7213, Denver, CO 80207. All communications received by February 8, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 10455 East 25th Avenue, Aurora, CO 80010.

A non-Federal NDB is being installed and a runway 14 instrument approach is being developed for the Madison Municipal Airport, Madison, S. Dak. Accordingly, it is necessary to establish a transition area to provide controlled airspace protection for aircraft executing this procedure.

In consideration of the foregoing, the FAA proposes the following airspace action:

In § 71.181 (37 FR 2143) the description of the Madison, S. Dak., transition area is designated to read:

MADISON, S. DAK.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Madison Municipal Airport (latitude 44°00'54" N., longitude 97°04'45" W.); within 3 miles each side of the 346° bearing from the Madison Municipal Airport, extending from the 5-mile radius to 8½ miles north of the airport; and that airspace extending upward from 1,200 feet above the surface within 6½ miles east and 9½ miles west of the 346° and 166° bearings from the Madison Municipal Airport; extending from 7 miles south of the airport to 18½ miles north of the airport.

This amendment is proposed under authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Aurora, Colo., December 27, 1972.

R. J. VAN VUREN,
Acting Director,
Rocky Mountain Region.

[FR Doc.73–382 Filed 1–8–73;8:45 am]

CIVIL AERONAUTICS BOARD

[14 CFR Part 241]

[Docket No. 24999; EDR–238A]

RECEIVABLES DUE FROM AIR FREIGHT FORWARDERS, INTERNATIONAL AIR FREIGHT FORWARDERS AND FOREIGN AIR FREIGHT FORWARDERS

Supplemental Proposed Schedule B–15

The Board by notice of proposed rule making EDR–238 dated December 12, 1972, and published at 37 FR 26835, gave notice that it had under consideration a proposed amendment of Part 241 of the Board's Economic Regulations which would require route air carriers to report monthly the amounts due from air freight forwarders, international air freight forwarders and foreign indirect air carriers of property only which hold a section 402 permit (foreign air freight forwarders), and an aging of these amounts, on a new Schedule B–15 of the CAB Form 41 report. Interested persons were invited to participate by the submission of twelve (12) copies of written data, views or arguments pertaining thereto to the Docket Section of the Board on or before January 15, 1973.

Counsel for various carriers have now requested an extension of time for filing comments to January 31, 1973. It is asserted that the additional time is needed in order for the affected carriers to thoroughly analyze and review the Board's proposal and to coordinate the carriers' positions thereon, thereby leading to the filing of an industry response.

The undersigned finds that good cause has been shown for a grant of the additional time requested for the filing of comments. Accordingly, pursuant to the authority delegated in § 385.20(d) of the Board's Organization Regulations, the undersigned hereby extends the time for submitting comments to January 31, 1973.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324)

Dated: January 3, 1973.

[SEAL] ARTHUR H. SIMMS,
Associate General Counsel,
Rules and Rates.

FEDERAL POWER COMMISSION

[18 CFR Part 260]

[Docket No. R–308]

NATURAL GAS PIPELINE COMPANIES

Annual Report of Total Gas Supply; Proposed Form; Notice of Conference

JANUARY 4, 1973.

Take notice that a conference open to the public will be held by the Commission's Staff in this proceeding at 10 a.m., e.s.t., on January 10, 1973, in Room 2043, of the General Accounting Office Building, 441 G Street NW., Washington, D.C.

The purpose of the conference is to provide all parties with an opportunity to explain and clarify points set out in their filed comments to the proposed revisions of Form 15, "Natural Gas Companies Annual Report of Gas Supply" as contained in the Commission's Formal Notice issued October 31, 1972, in Docket No. R–308 (37 FR 23550, Nov. 4, 1972).

All parties interested in the proceeding are invited to attend this session and are urged to have in attendance those persons on their Staffs who are responsible for annually preparing the Form 15 for their company.

KENNETH F. PLUMB,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Parts 240, 249a]

[Release No. SIPA–2]

SECURITIES INVESTOR PROTECTION ACT

Trustee Completion of Open Contractual Commitments of a SIPC Act Debtor

Notice is hereby given that the Securities and Exchange Commission has under consideration a proposal to adopt Rule S6d–1 (17 CFR 240.206d–1) under the Securities Investor Protection Act of 1970 (SIPC Act). The rule would be adopted under sections 6(d) (1) and (2) of the SIPC Act (15 U.S.C. 78fff(d)).

Proposed Rule S6d–1 would provide that it would be in the public interest for the trustee of a SIPC Act debtor to complete the debtor's open contractual commitments consisting of fails to receive, fails to deliver and unsettled transactions relating to transactions in securities between the debtor and a broker-dealer made in the ordinary course of business which were executed on or within 37 calendar days prior to the "filing date" as defined in section 5(b)(4)(B) of the SIPC Act, as to which the settlement date occurs or has occurred no later than 15 calendar days after the filing date. Only

V 38 - 5 JAN 9 73 XUM

those fails in which the respective obligations of the parties remained outstanding on their settlement date and until the close of business on the filing date would be completed. In addition, irrespective of whether a customer of the debtor had an interest in the transaction, the trustee would complete only such fails and unsettled transactions which the other broker-dealer can establish to the satisfaction of the trustee were executed as agent on behalf of customers of that broker-dealer. Further, the trustee would not be permitted to pay a broker-dealer regarding money differences arising as a result of closing out of these transactions more than $20,000 with respect to any separate customer account.

The rule would not affect the rights and responsibilities of the trustee regarding the completion of those open contractual commitments under section 6(d) of the SIPC Act which do not fall within the category of fails to receive, fails to deliver, and unsettled transactions as defined in paragraph (a) of the proposed rule.

As the legislative history of the SIPC Act indicates, Congress provided that the entire matter of the handling of open contractual commitments by trustees should be subject to Commission rulemaking authority so as to afford the legislation the necessary flexibility in furthering the public interest.[1]

The operation and interpretation of sections 6d (1) and (2) present a great deal of difficulty, not only in determining the limits and conditions upon which specific types of open contractual commitments may be completed by the trustee but also in assessing and determining what constitutes an open contractual commitment for purposes of these sections. Therefore, the Commission is of the view that those open contractual commitments which present the most immediate and urgent necessity of clarification and limitation, i.e., fails to receive, fails to deliver, and unsettled transactions, should be within the authority of the trustee to complete only under the strict limitations set forth in the proposed rule.

In this proposed rule the Commission is seeking to close off stale transactions from receiving recognition, other than as a possible claim against the debtor's estate. Discouraging open fails has been an objective of the Commission in numerous other rules recently promulgated by it, and proposed Rule S6d–1 further implements that concept. At present, section 6(d) contains no specific limitation on the amount which the trustee shall expend upon the completion of open contractual commitments. The Commission and SIPC have been concerned that without the $20,000 limitation proposed in the rule, the fund administered by SIPC consisting of assessments upon broker-dealer members with a one billion dollar back-up by the U.S. Treasury, as provided for in sections 4 (g) and (h) of the SIPC Act, could be seriously eroded by the need for monies to complete open contractual commitments, the requirement with regard to which presently have no express dollar limitation. It is doubtful that Congress intended that a customer of another broker-dealer should receive unlimited protection when it provided that customers of the debtor were to receive from SIPC advances not more than $50,000 with regard to unsatisfied claims for securities and cash, and not in excess of $20,000 when the unsatisfied claim was based upon cash as distinct from securities. Accordingly, with the concurrence and approval of SIPC, the Commission is proposing, pursuant to the authority and responsibility conferred upon it under section 6(d) of the SIPC Act, the $20,000 limitation on separate customer accounts of a broker-dealer having an open contractual commitment with the debtor.

The proposed rule would further limit the open contractual commitments consisting of fails to deliver, fails to receive, and unsettled transactions which would fall within the purview of those transactions to be completed to those for which the broker-dealer on the other side acted as agent for a customer who is (1) not a broker-dealer, (2) not a person with a relationship to the debtor nor with such broker-dealer as set forth in section 6(f)(1)(C) of the Act, or (3) not a person who had a claim for property which property was part of the capital of such broker-dealer or was subordinated to the claims of the creditors of such broker-dealer. In order to meet the difficulty of establishing whether an agency relationship exists, the rule would provide that before a claim must be paid by the trustee of the debtor, the broker-dealer on the other side must establish to the satisfaction of the trustee that he was acting on behalf of a customer. Additionally, all broker-dealers on the other side would be required as a matter of course to supply appropriate documentation to such effect when filing their final summary of open contractual commitments closed out. The Commission feels that these provisions will substantially alleviate the problems incurred in determining whether the broker-dealer is in fact acting on behalf of a customer.

In order to avoid the expenditure of substantial amounts of SIPC funds on "stale" transactions of the type with which the rule deals, only those open contractual commitments (as covered by the rule) which were executed on or within 37 calendar days prior to the filing date and which have a settlement date occurring no later that 15 calendar days after the filing date would be completed by the trustee. Additionally, the trustee's completion of any qualified open contractual commitment for any separate customer's account would be conditioned upon the broker-dealer on the other side either completing or correctly closing out all qualified open contractual commitments in that separate customer's account. Finally, as previously discussed, the amount payable by the trustee for the total completions in any separate customer's account would not exceed $20,000. These limitations would not be construed to limit the right of a broker-dealer on the other side to effect a general claim against the debtor's separate estate for the difference owed the broker-dealer on open contractual commitments.

Procedurally, qualified open contractual commitments would be completed by (1) optional completion of the transaction by the trustee, (2) close-out of the transaction by the broker-dealer on the other side by usual trade procedures initiated by the broker-dealer within or promptly upon the expiration of 30 calendar days after settlement date, or (3) completion of the transaction by the trustee any time after the settlement date. If the broker-dealer on the other side completes and closes out all qualified open contractual commitments of any specific separate customer's account, then the money difference, whether owing to the trustee or to the broker-dealer on the other side, would be payable.

All broker-dealers who have executed transactions which constitute qualified open contractual commitments would be required to file with the trustee as soon as practical after the publication of notice of the commencement of proceedings in which a trustee is appointed, a report which would list, summarize, and give up-to-date status information as to those specific transactions. (Forms S6(d) A–1 and 2). Also all such broker-dealers would be required to file promptly upon the expiration of 45 days from the filing date or if by the expiration of such 45-day period notice of the commencement of proceedings in which a trustee is appointed has not been published, then as soon as practical after such publication, a report with the trustee summarizing their close-outs of open contractual commitments (Form S6(d) B).

Despite any payment made by the trustee on these postfiling close-outs, or the transmittal by the trustee or SIPC of cash or securities to the broker-dealer in completion of open contractual commitments, the trustee would be entitled to recover such sums and securities from the other broker-dealer in the context of a court proceeding if the court should find that a transaction was not entered into by the debtor, the customer, or the other broker-dealer in the ordinary course of business or was entered into by any of the parties for the purpose of creating a commitment in contemplation of a possible SIPC Act liquidation proceeding in order to subject the transaction to the completion provisions of section 6(d) of the SIPC Act.

Irrespective of the various prescribed conditions and procedures of the rule, upon application that a specified open contractual commitment should be completed in order to avoid substantial detriment to the financial condition of one or more broker-dealers on the other side of such transaction, the Commission could, upon a finding to that effect and to the effect that it is in the public interest, order completion of such transactions which it determines to be in the public interest. Moreover, it is specified in the proposed rule that its provisions are not to be considered to alter the rights of customers under the last sentence of section 6(d) of the Act regarding specifically identifiable property.

Commission action. Pursuant to the authority in section 6(d) of the Securities Investor Protection Act of 1970 (15 U.S.C. 78fff(d)), the Securities and Exchange Commission proposes to amend Part 240 of Chapter II of Title 17 of the Code of Federal Regulations by adding at the end thereof a new Subpart B and a new § 240.206d–1 under said Subpart B, and by adding a new Part 249a, and new §§ 249a.6d–1, 249a.6d–2, 249a.6d–3, 249a.6d–3a and 249a.6d–3b thereunder, all to read as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Subpart B—Rules and Regulations Under the Securities Investor Protection Act of 1970

Sec.
240.201–240.205 [Reserved]
240.206d–1 Completion of open contractual commitments.

AUTHORITY: Sec. 6(d), Securities Investor Protection Act of 1970 (15 U.S.C. 78fff(d)).

Subpart B—Rules and Regulations Under the Securities Investor Protection Act of 1970

§§ 240.201–240.205 [Reserved]

§ 240.206d–1 Completion of open contractual commitments.

(a) Definitions: For the purpose of this section, adopted pursuant to subsection 6(d) of the Securities Investor Protection Act of 1970 (hereinafter referred to as the Act):

(1) The term, "failed to receive", shall mean a contractual commitment of the debtor made in the ordinary course of business, to pay to another broker or dealer (hereinafter referred to as a broker-dealer), the contract price in cash on delivery for securities purchased by the debtor from such broker-dealer, provided that the respective obligations of the parties remained outstanding on the settlement date of the transaction and until the close of business on the filing date (hereinafter referred to as the filing date), as defined in section 5(b)(4)(B) of the Act.

(2) The term, "failed to deliver", shall mean a contractual commitment of the debtor, made in the ordinary course of business, to deliver securities to another broker-dealer against payment of the contract price in cash to the debtor by such broker-dealer: *Provided*, That the respective obligations of the parties remained outstanding on the settlement date of the transaction and until the close of business on the filing date.

(3) The term, "unsettled transaction", shall mean a contractual commitment between the debtor and a broker-dealer, made in the ordinary course of business, for the purpose or sale of securities, involving delivery of the securities against payment of the contract price in cash or the making of payment of the contract price against receipt of the securities, in respect of which the filing date antedates the settlement date of the transaction.

(4) The term, "open contractual commitment", shall mean a failed to receive or failed to deliver or an unsettled transaction of the debtor.

(5) The term, "customer", shall mean a person (other than a broker-dealer) in whose behalf a broker-dealer has executed a transaction with the debtor, out of which arose a failed to receive, failed to deliver or an unsettled transaction, but shall not include any person to the extent that such person at the filing date (i) had a claim for property which by contract, agreement or understanding or by operation of law, was a part of the capital of the broker-dealer who executed such transaction with the debtor or was subordinated to the claims of creditors of such other broker-dealer, or (ii) had a relationship with the debtor which is specified in section 6(f)(1)(G) of the Act, or had a corresponding relationship with such other broker-dealer.

(b) It is hereby determined to be "in the public interest", within the meaning of section 6(d)(2) of the Act, for a trustee to complete such open contractual commitments as are specified in paragraph (c) of this section in accordance with the procedures prescribed in this section, irrespective of whether a customer of the debtor did or did not have an interest therein; and, except as otherwise provided in paragraphs (h) and (i) of this section, it is also hereby determined to be "not in the public interest", within the meaning of section 6(d)(1) of the Act, for a trustee to complete such open contractual commitments as are described in paragraph (a)(4) of this section, other than those specified in paragraph (c) of this section.

(c) The determination under paragraph (b) of this section that completion of an open contractual commitment is "in the public interest" applies only to such open contractual commitments as result from any transaction (1) which the other broker-dealer can establish to the satisfaction of the trustee was executed as agent for the account of his customer, (2) which was executed on or within 37 calendar days prior to the filing date, and (3) as to which the settlement date occurs or has occurred no later than 15 calendar days after the filing date.

(d)(1) The completion of an open contractual commitment meeting the requirements of paragraph (c) of this section shall be effected only

(i) By the close out of the transaction by the other broker-dealer in accordance with the usual trade procedures, initiated by the other broker-dealer within or promptly upon the expiration of a period of 30 calendar days after the settlement date, or by the trustee at any time after the settlement date, or

(ii) Unless previously closed out, by completion of the transaction, at the option of the trustee, by the delivery of securities against payment of the contract price or by making payment of the contract price against receipt of the securities.

(2) In the event of a closeout of an open contractual commitment pursuant to subdivision (i) of paragraph (d)(1) of this section, the money difference resulting from such closeout shall be payable by the other broker-dealer to the trustee or by the trustee to the other broker-dealer, whichever would be entitled to receive such difference under the usual trade procedures: *Provided, however*, (i) That prior to the payment of any such money difference by the trustee to such other broker-dealer with respect to transactions executed by him for any separate customer account, all open contractual commitments with respect to such account which meet the requirements of paragraph (c) of this section must have been completed by the delivery of securities against payment of the contract price, or by making payment of the contract price against receipt of the securities, or by closeout procedures in conformity with subdivision (i) of paragraph (d)(1) of this section, and (ii) that the amount so payable by the trustee to the other broker-dealer shall not exceed $20,000 with respect to any separate customer account.

(e)(1) As soon as practical after publication of notice of the commencement of proceedings under section 5 of the Act in which a trustee is appointed, a broker-dealer who has executed transactions in securities with the debtor out of which arose a failed to receive or failed to deliver or unsettled transaction shall furnish the trustee such information with respect to all open contractual commitments meeting the requirements of paragraph (c) of this section (including any of such commitments as have been closed out by the broker-dealer), as is called for by Forms S6(d)A–1 and S6(d)A–2 (§ 249a.6d–1, 249a.6d–2 of this chapter).

(2) Promptly upon the expiration of 45 calendar days after the filing date, or if by the expiration of such 45-day period notice of the commencement of proceedings under section 5 of the Act in which a trustee is appointed has not been published, then as soon as practicable after publication of such notice such broker-dealer shall furnish to the trustee such information with respect to his closeout of open contractual commitments meeting the requirements of paragraph (c) of this section as is called for by Form S6(d)B (§ 249a.6d–3 of this chapter).

(f) Nothing stated in this section shall be construed to prejudice the right of a

[1] "Experience may show that there are certain types of customer transactions which should not be completed, and certain types of noncustomer transactions which should be completed. The Commission is therefore given rulemaking authority to prohibit or direct completion of these types of transactions." H.R. Rep. 91–1613, 91st Cong. 2d sess. (1970), p. 9.

V 38 - 5 JAN 9 73 XUM

broker-dealer to any claim against the debtor's estate, or the right of the trustee to make any claim against a broker-dealer, with respect to a commitment of the debtor which was outstanding on the filing date, but (1) which is not described in paragraph (a)(4) of this section, or (2) which, although described in paragraph (a)(4) of this section, does not meet the requirements specified in paragraph (c) of this section or was not completed in conformity with paragraph (d)(1) of this section or was not reported to the trustee in conformity with paragraph (e) of this section. In addition, nothing stated in this section shall be construed to prejudice the right of a broker-dealer to a general claim against the debtor's estate for the amount by which the money difference due the broker-dealer upon a closeout may exceed the amount paid by the trustee to such broker-dealer.

(g) Notwithstanding the fact that an open contractual commitment described in paragraph (a)(4) of this section meets the requirements of paragraph (c) of this section or the fact that such a commitment has been completed in conformity with paragraph (d) of this section or has been reported by such broker-dealer in conformity with paragraph (e) of this section, a court shall not be precluded from awarding damages or granting such other remedy as it shall deem fair and equitable if, on application of the trustee or the Securities Investor Protection Corporation ("SIPC"), it determines that such commitment was not entered into in the ordinary course of business or was entered into by the debtor, or the broker-dealer or his customer, for the purposes of creating a commitment in contemplation of a liquidation proceeding under the Act. Such a determination shall be made after notice and opportunity for hearing by any broker-dealer, and any customer of a broker-dealer, who may be affected by the action of the Court, and may be made before or after the delivery of securities or payment of the contract price or before or after any closeout of the transaction by the other broker-dealer.

(h) Upon application to the Commission, the Commission may, after notice to and opportunity for hearing by the trustee and SIPC and those persons who have filed claims against the estate of the debtor or with respect to property held by the trustee, determine, provided it finds it to be in the public interest, that in order to prevent a substantial detrimental impact upon the financial condition of one or more broker-dealers, the trustee complete an open contractual commitment, irrespective of whether it is described in paragraph (a)(4) of this section and even though it does not meet the requirements of paragraph (c) of this section or has not been closed out in conformity with paragraph (d)(1)(i) of this section or has not been reported to the trustee in conformity with paragraph (e) of this section.

(i) Nothing contained in this section shall be construed as affecting in any way the power of the trustee (1) to complete, in such manner as may be approved by the Court, an outstanding contractual commitment of the debtor not described in paragraph (a)(4) of this section the completion of which, apart from this section, is authorized or required by section 6(d) of the Act, or (2) to complete an open contractual commitment of the debtor, regardless of whether it is described in paragraph (a)(4) of this section or meets the requirements of paragraph (c) of this section or has been reported to the trustee in conformity with paragraph (e) of this section if it is completed solely with specifically identifiable securities or cash of the customer of the debtor for whose account the commitment was made, to the extent that such commitment is completed with property which constituted specifically identifiable property of such customer on the filing date, or was paid or delivered by or for the account of such customer to the debtor or trustee after the filing date.

PART 249a—FORMS, SECURITIES INVESTOR PROTECTION ACT OF 1970

Sec.

249a.1—249a.5 [Reserved]

249a.6d-1 Form S6(d)A-1 for notification of open contractual commitments at filing dates consisting of fails to deliver and unsettled trades.

249a.6d-2 Form S6(d)A-2 for notification of open contractual commitments at filing dates consisting of fails to receive and unsettled trades.

249a.6d-3 Form S6(d)B for summary of closeouts of open contractual commitments in accordance with § 240.206(d)(1)(i).

249a.6d-3a Schedule 1 to be attached to Form S6(d)B (17 CFR 249a.6d-3).

249a.6d-3b Schedule 2 to be attached to Form S6(d)B (17 CFR 249a.-6d-3).

AUTHORITY: Sec. 6(d), 84 Stat. 1646, 15 U.S.C. 78fff(d)).

§§ 249a.1–249a.5 [Reserved]

§ 249a.6d–1 Form S6(d)A–1 for notification of open contractual commitments at filing date consisting of fails to deliver and unsettled trades.

This form shall be filed as required by § 240.206d–1(e) of this chapter, as soon as practical after publication of notice of commencement of a proceeding under section 5 of the Securities Investor Protection Act of 1970 in which a trustee is appointed, with such trustee by a broker-dealer who has executed transactions in securities with the debtor in such proceeding, out of which arose a failed to deliver or unsettled trade as defined in § 240.206d–1(a) of this chapter.

§ 249a.6d–2 Form S6(d)A–2 for notification of open contractual commitments at filing date consisting of fails to receive and unsettled trades.

This form shall be filed as required by § 240.206d–1(e) of this chapter, as soon as practical after publication of notice of commencement of a proceeding under section 5 of the Securities Investor Protection Act of 1970 in which a trustee is appointed, with such trustee by a broker-dealer who has executed transactions in securities with the debtor in such proceeding, out of which arose a fail to receive or unsettled trade as defined in § 240.206d–1(a) of this chapter.

§ 249a.6d–3 Form S6(d)B for summary of close-outs of open contractual commitments in accordance with § 240.206(d)(1)(i).

This form shall be filed as required by § 240.206d–1(e)(2) of this chapter, promptly upon expiration of 45 days after the filing date as defined in section 5(b)(4) of the Securities Investor Protection Act of 1970 (SIPC Act), or if by that time notice of commencement of proceedings under section 5 of SIPC Act in which a trustee is appointed has not been published then as soon as practical after such publication of notice, with such trustee by a broker-dealer who has executed transactions in securities with the debtor in such proceedings, in which shall be furnished to the trustee information with respect to his close out of open contractual commitments meeting the requirements of paragraph (c) of § 204.206d–1 of this chapter.

§ 249a.6d–3a Schedule 1 to be attached to Form S6(d)B (17 CFR 249a.6d–3).

§ 249a.6d–3b Schedule 2 to be attached to Form S6(d)B (17 CFR 249a.6d–3).

All interested persons are invited to submit their views and comments on the proposed rule. Written statements of views and comments should be submitted to Ronald F. Hunt, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, on or before February 10, 1973. All such communications should bear the File No. S7–466 and will be available for public inspection.

By the Commission.

[SEAL] RONALD F. HUNT,
Secretary.

DECEMBER 21, 1972.

(Authorized signature and title)

FOOTNOTES TO FORM S6(d)A-1 AND FORM S6(d)A-2

NOTE 1: Similar Forms are required for Fails to Receive and Fails to Deliver.

NOTE 2: The Act defines the "filing date" as the date on which an application is filed initiating a liquidation proceeding under the Act, except that if—

(i) a petition was filed before such date by or against the Debtor under the Bankruptcy Act, or

(ii) the Debtor is the subject of a proceeding pending in any court or before any agency of the United States or any State in which a receiver, trustee or liquidator for the Debtor was appointed which proceeding was commenced before the date on which such an application was filed,

then the "filing date" is the date on which such petition was filed or such proceeding was commenced.

NOTE 3: Include only items relating to trades in the ordinary course of business which, in conformity with Paragraph (c) of Rule S6d–1 of the Securities and Exchange Commission (17 CFR 240.206d–1) (i) were *executed* by you as agent for the account of a customer (other than a broker-dealer or a person described in the sentence in he Form which immediately precedes your signature), (ii) were *executed on or* within 37 calendar days prior to the filing date; and (iii) had a settlement date no later than 15 calendar days after the filing date.

NOTE 4: Show separately, but in a group, trades in behalf of each separate customer account.

NOTE 5: A. If the trade has been fully performed by delivery of securities against payment of the contract price or by making payment of the contract price against receipt of the securities, state "Completed".

B. If the trade has been closed out by you in accordance with the usual trade procedures *initiated within or promptly upon the expiration of a period of 50 calendar days* after the settlement date for the trade, state "Closed Out".

C. If the trade has been closed out by you in accordance with the usual trade procedures *which were not initiated within or promptly upon the expiration of a period of 50 calendar days* after the settlement date for the trade, state "Delayed Closeout".

D. If the trade has not been closed out by you in accordance with the usual trade procedures, state "Open".

NOTE 6: The relationship with the Debtor specified in section 6(f)(1)(C) of the Act is that of "a general partner, officer, or director of the Debtor, the beneficial owner of 5 percent or more of any class of equity security of the Debtor (other than a nonconvertible stock having fixed preferential dividend and liquidation rights) or limited partner with a participation of 5 percent or more in the net assets or net profits of the Debtor."

FORM S6(d)B

SUMMARY OF CLOSEOUTS OF OPEN CONTRACTUAL COMMITMENTS IN ACCORDANCE WITH PARAGRAPH (d)(1)(I) OF RULE S6d–1 OF SECURITIES AND EXCHANGE COMMISSION

(Schedules 1 and 2 to be attached)

DATE: .....

To: ....., Trustee of ....., Debtor,
From: ..... Address: ..... Telephone No.: .....
Person or persons to call for further information: .....

RESULTS OF CLOSEOUTS

Name of customer	Closeout gains (owing to Trustee)		Closeout losses (owing by Trustee)		Net money difference owing	
	Fails to deliver (Per schedule 1)	Fails to receive (Per schedule 2)	Fails to deliver (Per schedule 1)	Fails to receive (Per schedule 2)	To Trustee	From Trustee
					(See note below)	

NOTE: If the schedules filed in support of this summary, when combines, show a net money difference owing to you from the Trustee in respect of trades *executed* with respect to any separate customer account, such money difference is payable only if, *within or promptly upon the expiration of a period of 30* calendar days after the settlement date, their was initiated, in the case of each trade in behalf of such account which is subject to Rule S6d–1 (other than trades completed by the delivery of securities or payment of the contract price), the closeout of all fails to deliver and fails to receive. The maximum amount payable by the Trustee to you on account of the closeout of trades with respect to any separate customer account is $20,000, subject to your right to assert a general claim against the Debtor's estate for any deficiency.

SCHEDULE 1

(TO BE ATTACHED TO FORM S6(d)B)

OPEN CONTRACTUAL COMMITMENTS AT FILING DATE CONSISTING OF FAILS TO DELIVER (INCLUDING THOSE RELATED TO UNSETTLED TRADES) CLOSED OUT IN ACCORDANCE WITH PARAGRAPH (d)(1)(i) OF RULE S6d–1 OF SECURITIES AND EXCHANGE COMMISSION

(See Note [1])

Date: .....

Name of Debtor in liquidation .....
Name of Broker-Dealer .....

At the close of business on ....., the "filing date" with respect to the liquidation proceeding for the above-mentioned Debtor,[2] we were failing to deliver (or were obligated to make delivery subsequently in unsettled trades of) the below-listed securities, with respect to trades executed with the Debtor in behalf of our customers, which we closed out, as indicated below, in accordance with Paragraph (d)(1)(i) of Rule S6d–1 of the Securities and Exchange Commission:

Customer [4]	Fail data [3]			Number of units	Unit price	Contract amount	Closeout data [3]				Closeout gains [4] (owing to Trustee)	Closeout losses [4] (owing from Trustee)
	Dates		Security description				Dates		Unit price	Sellout proceeds [4]		
	Trade	Settlement					Trade	Settlement				

The undersigned represents that none of the customers whose trades are listed above (i) had a claim for property which by contract, agreement or understanding, or by operation of law, was part of the capital of the undersigned or was subordinated to the claims of creditors of the undersigned, or (ii) had a relationship with the Debtor which is specified in section 6(f)(1)(C) of the Securities Investor Protection Act,[5] or had a corresponding relationship with the undersigned.

.....
(Authorized signature and title)

SCHEDULE 2

(TO BE ATTACHED TO FORM S6(d)B)

OPEN CONTRACTUAL COMMITMENTS AT FILING DATE CONSISTING OF FAILS TO RECEIVE (INCLUDING THOSE RELATED TO UNSETTLED TRADES) CLOSED OUT IN ACCORDANCE WITH PARAGRAPH (d)(1)(i) OF RULE S6d–1 OF SECURITIES AND EXCHANGE COMMISSION

(See Note [1])

Date: .....

Name of Debtor in liquidation .....
Name of Broker-Dealer .....
At the close of business on ....., the "filing date" with respect to the liquidation proceeding for the above-mentioned Debtor,[2] we were failing to deliver (or were obligated to make delivery subsequently in unsettled trades of) the below-listed securities, with respect to trades executed with the Debtor in behalf of our customers, which we closed out, as indicated below, in accordance with Paragraph (d)(1)(i) of Rule S6d–1 of the Securities and Exchange Commission:

Customer [4]	Fail data [3]			Number of units	Unit price	Contract amount	Closeout data [3]				Closeout gains [4] (owing to Trustee)	Closeout losses [4] (owing from Trustee)
	Dates		Security description				Dates		Unit price	Sellout proceeds [4]		
	Trade	Settlement					Trade	Settlement				

The undersigned represents that none of the customers whose trades are listed above (i) had a claim for property which by contract, agreement or understanding, or by operation of law, was part of the capital of the undersigned or was subordinated to the claims of creditors of the undersigned, or (ii) had a relationship with the Debtor which is specified in section 6(f)(1)(C) of the Securities Investor Protection Act,[5] or had a corresponding relationship with the undersigned.

.....
(Authorized signature and title)

FOOTNOTES TO SCHEDULES 1 AND 2 TO FORM S6(D)B

NOTE 1: Similar Schedules are required for the Closeout of Fails to Receive and Fails to Deliver.

NOTE 2: The Act defines the "filing date" as the date on which an application is filed initiating a Liquidation Proceeding under the Act, except that if—
(i) a petition was filed before such date by or against the Debtor under the Bankruptcy Act, or
(ii) the Debtor is the subject of a proceeding pending in any court or before any agency of the United States or any State in which a receiver, trustee or liquidator for the Debtor was appointed which proceeding was commenced before the date on which such application was filed,
then the "filing date" is the date on which such petition was filed or such proceeding was commenced.

NOTE 3: Include only closeouts initiated *within or promptly upon the expiration of a period of 30 calendar* days after the settlement date relating to trades in the ordinary course of business which, in conformity with Paragraph (c) of Rule S6d–1 of the Securities and Exchange Commission, (i) were *executed* by you as agent for the account of a customer (other than a broker-dealer or a person described in the sentence in the Schedule which immediately precedes your signature), (ii) were executed *on or within 37* calendar days prior to the filing date, and (iii) had a settlement date no later than 15 calendar days after the filing date.

NOTE 4: Show separately, but in a group, your gains and losses with respect to the closeout of trades in behalf of each separate customer account, and your net gain or net loss from such closeouts. Attach appropriate documentation to support agency-relationship for each customer account listed, together with confirmation and other documentation for each executed closeout.

NOTE 5: The relationship with the Debtor specified in section 6(f)(1)(C) of the Act is that of "a general partner, officer, or director of the Debtor, the beneficial owner of 5 percent or more of any class of equity security of the Debtor (other than a nonconvertible stock having fixed preferential dividend and liquidation rights) or limited partner with a participation of 5 percent or more in the net assets or net profits of the Debtor."

DIRECTOR OR ACTING DIRECTOR, KANSAS CITY COMMODITY OFFICE

Delegation of Authority

A Delegation of Authority was published in the June 23, 1972, issue of the FEDERAL REGISTER (37 FR 12413) to delegate to the Director or Acting Director, Kansas City ASCS Commodity Office the responsibility to register processors and industrial users under the Processor Wheat Marketing Certificate Program. The responsibility to register distributors was inadvertently omitted. Accordingly, the following delegation is issued in order to have all the registration functions in one office.

Delegation. Pursuant to the authority vested in me by the Processor Wheat Marketing Certificate Regulations (36 FR 21256), I hereby delegate the following responsibility to the Director or Acting Director, Kansas City ASCS Commodity Office:

Registration of distributors. Register distributors of flour second clears and issue notification of registration as described in §777.20.

The authority herein delegated shall be exercised in conformity with the requirements of the Processor Wheat Marketing Certificate Regulations and may not be redelegated.

(Secs. 379(a) to 379(j), 52 Stat. 31, as amended; 7 U.S.C. 1379 a to 1379 j)

Signed at Washington, D.C., on December 27, 1972.

PRUDENTIAL-GRACE LINES, INC. ET AL.

Notice of Application

Notice is hereby given that the following corporation has filed application for an operating-differential subsidy contract to carry bulk cargoes to expire on June 30, 1973 (unless extended only for subsidized voyages in progress on that date), for any of the five following LASH vessels which the applicant owns or leases, or will own or lease. The bulk cargo carrying vessels proposed to be subsidized and the trades in which each proposes to engage are as follows:

Applicant's name and address	Type of ship	Name of ship
Prudential-Grace Lines, Inc., 1 New York Plaza, New York, NY 10004.	LASH	SS LASH Atlantico.
Do	do	SS LASH Espana.
Do	do	SS LASH Italia.
Do	do	SS LASH Pacifico.
Do	do	SS LASH Turkiye.

The foregoing application may be inspected in the Office of the Secretary, Maritime Subsidy Board, Maritime Administration, U.S. Department of Commerce, Washington, D.C., during regular working hours.

These vessels are to engage in the carriage of export bulk raw and processed agricultural commodities in the foreign commerce of the United States (U.S.) from ports in the U.S. to ports in the Union of Soviet Socialist Republics (U.S.S.R.), or other permissible ports of discharge. Liquid and dry bulk cargoes may be carried from U.S.S.R. and other foreign ports inbound to U.S. ports during voyages subsidized for carriage of export bulk raw and processed agricultural commodities to the U.S.S.R.

Full details concerning the U.S.-U.S.S.R. export bulk raw and processed agricultural commodities subsidy program, including terms, conditions, and restrictions upon both the subsidized operators and vessels, appear in the regulations published in the FEDERAL REGISTER on November 16, 1972 (37 FR 24349).

For purposes of section 605(c), Merchant Marine Act, 1936, as amended (Act), it should be assumed that each vessel named will engage in the trades described on a full-time basis through June 30, 1973 (with extension to termination of approved subsidized voyages in progress on that date). Each voyage must be approved for subsidy before commencement of the voyage. The Maritime Subsidy Board (Board) will act on each request for a subsidized voyage as an administrative matter under the terms of the individual operating-differential subsidy contract for which there is no requirement for further notices under section 605(c) of the Act.

Any person having an interest in the granting of such application and who would contest a finding of the Board that the service now provided by vessels of U.S. registry for the carriage of cargoes as previously specified is inadequate, must, on or before January 17, 1973, notify the Board's Secretary in writing, of his interest and of his position, and file a petition for leave to intervene in accordance with the Board's rules of practice and procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Act and with as much specificity as possible the facts that the intervenor would undertake to prove at such hearing.

In the event a hearing under section 605(c) of the Act is ordered to be held with respect to the application, the purpose of such hearing will be to receive evidence relevant to (1) whether the application hereinabove described is one with respect to vessels to be operated in an essential service, served by citizens of the U.S. which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of U.S. registry is inadequate and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon.

If no request for hearing and petition for leave to intervene is received within

the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficient interest to warrant a hearing, the Board will take such action as may be deemed appropriate.

Dated: January 4, 1973.

By order of the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

Notice of Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-561; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the FEDERAL REGISTER.

Amended regulations issued under cited Act, as published in the February 24, 1972, issue of the FEDERAL REGISTER, prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C.

Docket No. 73-00258-00-66700. Applicant: Jacksonville Children's Museum, 1025 Gulf Life Drive, Jacksonville, FL 32207. Article: Planetarium Projector, MS-10. Manufacturer: Minolta, Japan. Intended use of article: The article is intended to be used to demonstrate astronomical phenomena and to allow student participation and involvement in the following courses:

Celestial navigation.
Principles of stellar photography.
General astronomy.
Concepts in contemporary astronomy.

Application received by Commissioner of Customs: November 22, 1972.

Docket No. 73-00264-33-46500. Applicant: University of Utah, 50 North Medical Drive, Salt Lake City, UT 84112. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of biological, mainly mammalian, tissues derived from experimental animals and tissue culture and exhibit both normal and pathologic structure. Experiments to be conducted include investigation of the normal, physiologic behavior of the aortic smooth muscle cell and its relation to vascular aging and atherosclerosis. In addition, the behavior of this cell in pathologic and deficiency status will be investigated. Application received by Commissioner of Customs: November 29, 1972.

Docket No. 73-00272-33-46500. Applicant: Frederick Cancer Research Center, P.O. Box B, Building 560 11-33, Frederick, MD 21701. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of several different DNA and RNA oncogenic viruses. Principally, methods of producing these viruses will be developed, primarily in tissue culture. Cell lines known to produce virus at low levels will be studied first. Using these lines, different parameters of culture will be followed. Also research will be directed toward a bitter elucidation of virus and viral components from and in cells. Application received by Commissioner of Customs: December 6, 1972.

Docket Number: 73-00273-33-46040. Applicant: Presbyterian Hospital, 622 West 168th Street, New York, NY 10032. Article: Electron Microscope, Elmiskop 1A and accessories. Manufacturer: Siemens AG, West Germany. Intended use of article: The article is intended to be used in research on the structure of normal and developing ocular tissues and of the pathology of the eye. Specific projects include:

(a) Determining how the neurons of the retina connect with each other;

(b) Studies of the developing retina particularly aimed at those cells containing neurofibrils and neurotubules; and

(c) Study of birth defects of the eye and the differentiation of the blood vessels of the choroid.

The article will also be used in the training program for residents in Ophthalmology. Application received by Commissioner of Customs: December 5, 1972.

Docket No. 73-00274-33-68495. Applicant: University of Cincinnati, Department of Pharmacology and Therapeutics, College of Medicine, Cincinnati, Ohio 45219. Article: Watson Marlow Micro Metering Pump and accessories. Manufacturer: Watson-Marlow, Ltd., United Kingdom. Intended use of article: The article is intended to be used for the infusion or injection of drugs with addictive potentials into rats with chronic electrodes during studies to compare the drug's effect on brainwaves. Application received by Commissioner of Customs: December 5, 1972.

Docket No. 73-00275-01-01100. Applicant: Michigan State University, East Lansing, Mich. 48823. Article: Solid State Nitrogen-15 Analyzer. Manufacturer: Breda, Holland. Intended use of article: The article is intended to be used for the following nitrogen studies:

(1) Quantitatizing and maximizing denitrification in land disposal systems for animal wastes.

(2) To assess the quantities of nitrogen being fixed by microorganisms in aquatic environments in order to determine their contribution to the nitrogen pollution of lakes.

(3) To quantitate the fate of nitrogen in fertilizers used in agriculture in order to evaluate their contribution to the nitrogen pollution of rivers and streams.

(4) To trace nitrogen metabolism in crop plants.

(5) To quantitatively evaluate the amount of nitrate being denitrified in the natural soil ecosystem.

(6) To study the effects of photorespiration inhibitors on nitrogen fixation by soybeans.

(7) To study the metabolism and cycling of nitrogen through soil microfauna in the forest litter.

The article will also be used for educational purposes in laboratories in Soil Microbiology and Soil Biochemistry to acquaint students with the use of ^{15}N as a tracer in studies on nitrogen cycles in soil, on nitrogen related pollution problems and on nitrogen metabolism in plants. Application received by Commissioner of Customs: December 4, 1972.

Docket No. 73-00277-90-14200. Applicant: IIT Research Institute, 10 West 35th Street, Chicago, IL 60616. Article: Image Analysing Computer System, Model Quantimet 720. Manufacturer: Metals Research Ltd., United Kingdom. Intended use of article: The article is intended to be used to characterize particulate matter which may be from any source: ambient air suspended particles, air pollutants, life science specimens, materials science specimens, powders, pharmaceuticals, slurries, pastes, pigments, etc. The properties investigated are particle number, particle size, size distribution, particle shape and shape distribution. Application received by Commissioner of Customs: December 7, 1972.

B. BLANKENHEIMER,
Acting Director,
Office of Import Programs.

STATE UNIVERSITY OF NEW YORK

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C.

V 38 - 5 JAN 9 73 XUM

Docket No. 73-00111-33-46500. Applicant: State University of New York, Research Foundation, College at Brockport, Brockport, N.Y. 14420. Article: Ultramicrotome, Model OM U2. Manufacturer: C. Reichert Optische Werke AG, Austria. Intended use of article: The article is intended to be used in experiments planned to examine the ultrastructure of "normal" nematodes during the molting processes which involves the synthesis and organization of precursors into a formed pattern. Experiments will also be carried out to evaluate the action of inhibitors of macromolecular biosynthesis (DNA, RNA, protein) and the formation of cuticle. The article will also be used for training graduate students in the techniques of ultramicrotomy.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: Examination of the applicant's thin sections under the electron microscope will provide optimal information when such sections are uniform in thickness and have smoothly cut surfaces. Conditions for obtaining high quality sections depend to a large extent on the properties of the specimen being sectioned (e.g., hardness, consistency, toughness, etc.), the properties of the embedding media and the geometry of the block. In connection with a prior case (Docket No. 69-00118-33-46500) which relates to the duty-free entry of an identical foreign article, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting (among such [other] obvious factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned." In connection with another prior case (Docket No. 69-00665-33-46500) relating to the duty-free entry of a similar foreign article, HEW advised that "The range of cutting speeds and a capability for the higher cutting speeds is • • • a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with still another prior case (Docket No. 70-00077-33-46500) relating to the duty-free entry of a similar foreign article, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness, etc." requires a maximum range in cutting speed and, further, that "The production of ultrathin serial sections of specimens that have great variation in physical properties is very difficult." The foreign article has a cutting speed range of 0.5 to 10 millimeters/second (mm./sec.). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm./sec. We are advised by HEW in its memorandum of December 8, 1972, that cutting speeds in the excess of 4 mm./sec. are pertinent to the applicant's research studies. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

B. BLANKENHEIMER,
Acting Director,
Office of Import Programs.

[FR Doc.73-455 Filed 1-8-73;8:45 am]

WAYNE STATE UNIVERSITY

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C.

Docket No. 72-00642-33-46040. Applicant: Wayne State University, Detroit, Mich. 48202. Article: Electron microscope, Model EM 201. Manufacturer: Philips Electronic Instruments NVD, the Netherlands. Intended use of article: The article is intended to be used in a graduate teaching-research program, specifically, to perform research dealing with the ultrastructural aspects of embryonic cell differentiation.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The applicant requires an electron microscope which is suitable for instruction of undergraduate and graduate students in the basic principles of electron microscopy. The foreign article is a relatively simple, medium resolution electron microscope designed for confident use by beginning students with a minimum of detailed programing. The most closely comparable domestic instrument is the Model EMU-4C electron microscope manufactured by the Forgflo Corp. The Model EMU-4C electron microscope is a relatively complex instrument designed for research, which requires a skilled electron microscopist for its operation. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated October 20, 1972 that the relative simplicity of design and ease of operation of the foreign article is pertinent to the applicant's educational purposes. We, therefore, find that the Model EMU-4C electron microscope is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

B. BLANKENHEIMER,
Acting Director,
Office of Import Programs.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

EARLY EDUCATION FOR HANDICAPPED CHILDREN

Notice of Closing Date for Receipt of Application for Grants

Pursuant to the authority contained in section 623, Early Education for Handicapped Children, of the Education of the Handicapped Act (84 Stat. 183, 20 U.S.C. 1423), notice is hereby given that the U.S. Commissioner of Education has established a final closing date for receipt of application for grants for Early Education for Handicapped Children, under Part C of the Act. Such applications must be postmarked on or before the 30th day following the publication of this notice in the FEDERAL REGISTER.

A notice of proposed rule making governing grants and contracts and other programs and projects for Early Education for Handicapped Children, authorized under Part C of the Act, was published in the FEDERAL REGISTER, Vol. 37, No. 80, pp. 8085-8093, April 25, 1972, and will govern the program when published in the FEDERAL REGISTER as regulations.

JOHN R. OTTINA,
Acting U.S. Commissioner of Education.

[FR Doc.73-411 Filed 1-8-73;8:45 am]

Office of the Secretary

ASSISTANT SECRETARY FOR EDUCATION

Delegation of Authority

The Assistant Secretary for Education serves as head of the Education Division which consists of the Office of the Assistant Secretary for Education, the Office of Education, and the National Institute of Education. Parts 2 and 7 of the Statement of Organization, Functions and Delegations of Authority for the Department of Health, Education, and Welfare will continue to be used for the Office of Education and the National Institute of Education respectively. Part 1 is hereby amended by addition of a new Chapter 1K, as follows:

SECTION 1K.00 *Mission.* The Assistant Secretary for Education is responsible for the general direction and supervision of the Education Division, provides leadership for the education activities of the Department, and serves as the key spokesman and advocate for assuring that the Department provides professional and financial assistance to strengthen education in accordance with Federal laws and regulations. In addition, serves as the principal advisor to the Secretary on education affairs.

SEC. 1K.10 *Organization.* A. The Office of the Assistant Secretary for Education is under the supervision of the Assistant Secretary for Education who heads the Education Division and reports directly to the Secretary.

B. The Office of the Assistant Secretary for Education includes:

Assistant Secretary for Education.
Deputy Assistant Secretary for Education.
Deputy Assistant Secretary (Policy Development).
Deputy Assistant Secretary (Policy Communication).
Director, Fund for the Improvement of Post-Secondary Education.

SEC. 1K.20 *Functions.* 1. "Assistant Secretary for Education" is the principal officer in the Department responsible to the Secretary for the direction and supervision of the Education Division; and for the coordination and general supervision of education activities wherever they are performed in the Department. Provides direct leadership for the administration of the Emergency School Aid Act.

2. "Deputy Assistant Secretary for Education" serves as the principal assistant to the Assistant Secretary for Education and acts for him during his absence or inability to act, or if a vacancy occurs in the position of Assistant Secretary for Education. In addition, provides executive secretariat services for the Education Division.

3. "Deputy Assistant Secretary (Policy Development)" coordinates the development of general policies in the Education Division including the formulation of program and legislative initiatives. Provides guidance in the determination of priorities, objectives, and goals for education including the formulation of recommendations to the Assistant Secretary. Provides articulation among components of the Division to insure effective implementation of short- and long-term policy decisions.

Coordinates 5-year plans, program evaluation, budget submissions, and operating plans for the Assistant Secretary for Education. Monitors research and statistical activities in the agencies comprising the Education Division, as they relate to policy development. Coordinates budget construction within components of the Division. Advises the Assistant Secretary for Education on key implementation issues. Develops budget positions and testimony for the ASE for presentation before OMB, Congress, and the public.

Recommends program and policy issues for analysis, coordinates the necessary studies, and actions to be undertaken within the Education Division, giving particular attention to articulating with National Council on Educational Research.

Coordinates program information systems used at the Assistant Secretary for Education level and within the agencies comprising the Education Division. Develops other major administrative proposals requested by the Assistant Secretary for Education with particular attention to Administrative initiatives.

4. "Deputy Assistant Secretary (Policy Communication)" represents the Assistant Secretary and interprets Federal education policies to the education community and the general public. Maintains a capability for monitoring the activities of the education community to provide timely accurate intelligence on their program and legislative objectives, and to assure that their views are reflected in the policymaking process of the Division.

Is responsible for the development and implementation of information strategies to assure that the programs and policies of the Education Division are effectively communicated to the education community and the general public. Supervises all activities of the Division affecting relationships with the education community including appropriate State agencies.

Provides the principal support and guidance to the Federal Interagency Committee on Education. Participates in shaping the input into policy development and implementing process as it pertains to the development of legislation. Advises and consults with the Assistant Secretary for Education and the public information offices of the agencies comprising the Education Division on new policy initiatives, the setting of priorities and the provision of policy guidance to Eduaction Division agencies' public information offices. Directs Federal Interagency Committee on Education, consistent with Executive Order No. 11185.

5. "Director, Fund for the Improvement of Post-Secondary Education" is responsible for the planning and administration of the Fund including the preparation of program and budgetary plans and supervision of staff necessary to implement those plans.

Dated: January 2, 1972.

ELLIOT L. RICHARDSON,
Secretary.

[FR Doc.73-451 Filed 1-8-73;8:45 am]

ASSISTANT SECRETARY (COMMUNITY AND FIELD SERVICES)

Statement of Organization, Functions, and Delegations of Authority

Part 1 of the statement of organization, functions, and delegations of authority of DHEW is amended to establish under the Assistant Secretary (Community and Field Services), Chapter 1L, an Office of Environmental Affairs as follows:

Under section 1L20B add:

8. Director of the Office of Environmental Affairs.

Under section 1L30 add a paragraph H as follows:

H. The Office of Environmental Affairs: Develops Department policy, procedures and criteria in implementation of the National Environmental Policy Act of 1969, and recommends the approval of such to the Assistant Secretary (Community and Field Services); coordinates the development of internal procedures and criteria; monitors compliance and approves the issuance of draft and final Environmental Impact Statements; and maintains liaison with the Council on Environmental Quality.

Dated: January 2, 1973.

STEVEN D. KOHLERT,
Deputy Assistant Secretary for Management.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration

[Docket No. N-73-134; Administrative Division Docket No. Z-157]

RESORT HOMES, INC. ET AL.

Notice of Hearing

Notice is hereby given that:

1. Resort Homes, Inc., its officers and agents, hereinafter referred to as "Respondent," being subject to the provisions of the Interstate Land Sales Full Disclosure Act (Public Law 90-448) (15 U.S.C. 1701 et seq.) received a notice of proceedings and opportunity for hearing dated November 22, 1972, which was sent to the developer pursuant to 15 U.S.C. 1706 (d) and 24 CFR 1710.45(b) (1) informing the developer of information obtained by the Office of Interstate Land Sales Registration showing that a change had occurred which affected material facts in the Developer's statement of record for Bethany West, Section 6 and the failure of the Developer to amend the pertinent sections of the statement of record and property report.

2. The Respondent filed an answer postmarked December 8, 1972, in answer to the allegations of the notice of proceedings and opportunity for a hearing.

3. In said answer the Respondent requested a hearing on the allegations contained in the notice of proceedings and opportunity for a hearing.

4. Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1720.160 (b), *It is hereby ordered*, That a public hearing for the purpose of taking evidence on the questions set forth in the notice of proceedings and opportunity for hearing will be held before David Knight in Room 7233, Department of

V 38 - 5 JAN 9 73 XUM

HUD Building, 451 Seventh Street SW., Washington, DC, on January 29, 1973, at 10 a.m.

The following time and procedure is applicable to such hearing:

All affidavits and a list of all witnesses are requested to be filed with the Hearing Clerk, HUD Building, Room 10150, Washington, D.C., 20410 on or before January 22, 1973.

5. The Respondent is hereby notified that failure to appear at the above scheduled hearing shall be deemed a default and the proceedings shall be determined against Respondent, the allegations of which shall be deemed to be true, and an order suspending the statement of record, herein identified shall be issued pursuant to 24 CFR 1710.45(b)(1).

This notice shall be served upon the Respondent forthwith pursuant to 24 CFR 1720.440.

By the Secretary.

GEORGE K. BERNSTEIN,
Interstate Land Sales Administrator.

Office of Assistant Secretary for Equal Opportunity

[Docket No. R-73-223]

AFFIRMATIVE FAIR HOUSING MARKETING

Clarification of Issues; Statement of Policy

The Department of Housing and Urban Development published Affirmative Marketing Regulations (24 CFR Part 200, Subpart M, §§ 200.600 et seq., 37 FR 75), effective February 25, 1972, and on the same date issued Circular 8000.4 entitled "Implementation of Affirmative Fair Housing Marketing Regulations." This circular, intended primarily to aid departmental staff in administering the new regulations, is available to interested persons and agencies and may be obtained from the Department's headquarters at 451 Seventh Street SW., Washington, DC 20410. Subsequent to issuance of the regulations and circular, various questions on policy and interpretation were raised by both HUD field offices and program applicants. To clarify policy on these and other possible areas of confusion, we are publishing representative questions and answers on Affirmative Fair Housing Marketing. This statement expresses existing policy and does not impose new requirements. It is therefore effective upon publication, and comment and public procedure are unnecessary.

The questions and answers are set forth below grouped under seven topical headings: Local areawide or institutional plans; scattered lot builders; use of multiple brokers; coverage and applicability of the regulations; characteristics of an acceptable plan pursuant to § 200.625 of the regulations; methods of approval of the plans; and general monitoring of the plans.

CLARIFICATIONS OF ISSUES RELATING TO AFFIRMATIVE MARKETING

A. *Local areawide or institutional plans*—1. *Question.* What are the characteristics of an institutional plan which is adequate to serve in lieu of a separate plan from each applicant? How is such a plan formulated?

Answer. An institutional plan is a plan agreed to jointly by HUD and members of the building and/or real estate industry which commits those members to collective action in support of affirmative marketing and other activities which can achieve the goal of equal housing opportunity. An institutional plan should be designed to enable individual firms to comply with the affirmative marketing requirements and to offer a mechanism which allows all or a portion of the industry in the SMSA or the housing market area to carry out affirmative marketing pursuant to a collective strategy. An institutional plan should be tailored to the specific housing market area and should encourage and permit the adoption of experimental, creative marketing procedures intended to achieve the objectives of the Affirmative Marketing Regulations, while consistent with the principles set forth below. Equal Opportunity personnel can assist home builders associations in developing such plans by sharing with them plans which have been previously approved by the Department.

Institutional plans must in all cases:

a. Be developed through discussions between representatives of HUD-Equal Opportunity and the building and/or real estate industry. The agreement or understanding resulting from such discussions shall be memorialized in a written plan and signed by the Director of the Area/Insuring Office and the participating industry representatives. In the process of developing the plan, the industry should consult with leadership of the minority communities.

b. Be approved by the regional and central offices.

c. Meet all the requirements of the Affirmative Fair Housing Marketing Regulations and Circular 8000.4.

d. Include collective obligations which may be in lieu of the individual actions required by the regulations and circular. Such collective responsibilities might include institutional advertising, some device for consultation and collaboration with the minority community in carrying out the plan, a group training program for real estate brokers and salesmen, and group affirmative employment efforts. Group goals for housing and employment should be developed if possible.

e. Provide for ongoing monitoring by both HUD and the industry and allow for annual renewal if both parties are in agreement that the plan is working.

f. Minority groups should have a clear mandate for assisting in the dissemination of information concerning housing opportunities to minority persons, and participating in the monitoring and review function if possible, and for consulting with industry representatives regarding possible renewal of the plan.

g. Provide for regular monthly reporting by each builder as required by Circular 8000.4. The plan should provide for the submission of baseline racial data on employment and occupancy of housing so that progress under the plan can be properly evaluated, and for such other periodic reports as are appropriate to assure that progress is being made toward achieving the plan's objectives (both individual and collective) and that problems are identified sufficiently in time to allow corrective action.

Institutional plans are encouraged to provide for:

a. Expanding the coverage of affirmative marketing to include all housing.

b. Conducting educational seminars (1) in the minority communities to acquaint those communities with the plan and with available housing opportunities, (2) for the housing industry to acquaint all parts of the industry—brokers, builders, lenders, mortgage bankers—with the need for and implications of affirmative marketing, and (3) for the general public to develop acceptance of and positive responsiveness to affirmative marketing.

c. Contracting with minority groups to (1) conduct educational programs in the minority community to acquaint that community with housing opportunities and/or (2) monitor progress with the plan.

B. *Scattered lot builders*—1. *Question.* How can applications be processed for builders who build and sell more than five units per year under FHA programs, but come in for one conditional commitment at a time and do not know where the rest of the units will be located or how many there will be?

Answer. For the builder in precisely the situation described above (the typical scattered lot builder) Equal Opportunity staff may proceed as follows:

a. At the discretion of the Area Office Equal Opportunity Director or Insuring Office Equal Opportunity Representative, the builder may submit and have approved an annual affirmative marketing plan for all the building he does in the ensuing 12 month period.

b. At the discretion of the Equal Opportunity Director or Representative, the plan may be limited to a maximum number of units.

c. In most cases the plan should cover only that activity which will take place in a single housing market area. However, in areas which are not highly built-up and in which building activity is widely scattered, e.g., rural counties, a plan may cover a larger area.

d. The plan would remain in effect for a year from the date of its approval subject to ongoing review of compliance with the plan.

e. The plan must meet all requirements of the Affirmative Fair Housing Marketing Regulations and the Circular 8000.4. If the units are likely to be built both in white areas and areas of minority concentration, the plan must contain two programs, one for units in white areas and one for units in minority areas.

2. *Question.* How are reporting requirements different for the scattered lot builder?

Answer. Scattered lot builders must report monthly, beginning at the end of the first month that sales occur, just as all other builders must. However, since the building is taking place in a variety of locations, the data should be broken out in categories by type of location: area of minority concentration, non-minority white area; and (as necessary) racially-mixed area.

Instructions to scattered lot builders on how to report should be included in the HUD letter of approval of the affirmative marketing plan.

C. *Use of multiple brokers*—1. *Question.* What requirements apply to a builder who uses several brokers in selling his houses?

Answer. If a builder utilizes several brokers in selling his houses, he must take all necessary steps to insure that minority brokers and salesmen have the opportunity to be involved and are specifically informed that the houses are available without discrimination. The applicant must provide information on the racial composition of the brokers he will use. Further, the applicant must indicate the affirmative outreach that will be made by himself or by the brokers.

The applicant's contract with the brokers should include the affirmative marketing plan. If there is no formal contract, the applicant should send the brokers a letter instructing them to carry out the specific provisions of his affirmative marketing plan. Each broker should then sign and return a copy of the letter indicating his agreement to follow the plan.

2. *Question.* How can affirmative marketing policy be implemented when a builder uses a multiple listing service to sell his houses?

Answer. If a builder chooses to use a multiple listing service to market his houses, all the members of the multiple listing must agree to do affirmative marketing. This can be achieved through a group plan or through separate individual affirmative marketing programs.

3. *Question.* Under what circumstances does a broker who sells a house which was under an affirmative marketing plan have to have his own affirmative marketing plan approved?

Answer. A broker is subject to affirmative marketing requirements indirectly through the applicant who obtained the FHA subdivision report or conditional commitment. In order to assist the applicant in demonstrating to HUD his affirmative marketing program, a broker or several brokers may develop and submit affirmative marketing plans, specific to one application or their total sales program on an annual basis.

D. *Coverage*—1. *Question.* Are nursing homes covered by the Affirmative Fair Housing Marketing Regulations?

Answer. Yes. However, Circular 8000.4 does not address itself to the particular needs and problems of nursing homes. Affirmative Marketing Plans from nursing homes should be approved if they address realistically the kinds of affirmative outreach necessary to insure equal opportunity for residence in the home. For example, if the nursing home does not expect to advertise but will receive referrals from nonminority white doctors and hospitals, then efforts should be made to inform minority doctors and staff at hospitals which serve substantial numbers of minority patients about the services and availability of the home. If the home expects to advertise, then the advertisements must include the Equal Opportunity logo, slogan, or statement and any pictorial representations must be inclusive of minority or majority group persons. Special outreach in minority and majority group media and community groups shall be used as appropriate to reach persons not normally likely to apply to the nursing home.

2. *Question.* Do applicants have to file Affirmative Marketing Plans if there are no minorities in the housing market area?

Answer. Yes, but the plan must indicate that there are no minorities in the housing market area according to the U.S. Bureau of the Census and therefore the remaining questions are not applicable.

3. *Question.* Who is supposed to file the "Certification of Intent Not to Market Housing"?

Answer. A developer who buys raw land, puts in streets, drainage, sewers, and other improvements, and then sells pieces of land to builders who build groups of houses for sale on the land is supposed to file the Certification. If a developer intends to build houses himself, he is required to file an Affirmative Marketing Plan even though he may contract out the marketing. Likewise, if he intends to market the houses but not to build them he is required to file an Affirmative Marketing Plan.

4. *Question.* With respect to subdivision developers who certify intent not to market houses, who, if anyone, submits an Affirmative Marketing Plan? If the builder does not intend to use Government mortgage financing, is a plan required if he intends to build a house in the subdivision?

Answer. The subdivision report alone is not sufficient to establish applicability of the regulations to a subdivision. If a developer who does not build or market houses gets a subdivision report, the builder who later buys that developed land for the purpose of building a house does not need to file an Affirmative Marketing Plan unless he intends to use FHA mortgage insurance.

E. *Characteristics of an acceptable plan*—1. *Question.* What can be done by HUD staff to improve the quality of the affirmative marketing plans received from builders, especially small builders?

Answer. A variety of methods have been utilized to provide technical assistance to builders in this area. Among them are:

a. Holding meetings with the home builders association to explain how the forms should be filled out.

b. Holding individual conferences with builders, especially small builders who do not have staff to prepare an Affirmative Marketing Plan.

c. Issuing Area/Insuring Office Circular further explaining what is desired on the form.

d. Providing model plans of exceptional quality as a guide.

2. *Question.* If the minority newspaper in the locality has a very small circulation, even in the minority community, does a builder still have to use it?

Answer. The primary rule for evaluating every affirmative marketing plan is whether or not Equal Opportunity staff thinks that the plan will be effective in attracting minority and majority persons to the housing. The minority newspaper does not have to be used to attract minorities if:

a. It has a very small circulation, and

b. It is not a good means of communicating with the minority people in the income range eligible for the housing, and

c. It does not have a recognized real estate section and is not used by the minority community for real estate purposes, and

d. It can be clearly established that other methods will reach the minority community effectively. For example, one of the metropolitan (white) newspapers may have very substantial minority readership.

3. *Question.* What kind of information must the applicant supply under "anticipated results"? Must this be a number or percentage?

Answer. The response under "anticipated results" must be a number or percentage. General statements about racial inclusiveness or nondiscrimination are not acceptable.

4. *Question.* What is meant by Item 2 of Form 935.2 "Solicitation of those referred by HUD"?

Answer. The developer is obligated, under the Affirmative Fair Housing Marketing Regulations to "specifically solicit eligible buyers or tenants reported to the applicant by the Area or Insuring Office." The "Instructions for Filing an Affirmative Fair Housing Marketing Plan" provide that the developer may solicit those persons referred "by direct mail with local telephone follow-up". A plan is acceptable on this item if both boxes ("direct mail" and "telephone contact") are checked or if a realistic alternative method is described. However, for the most part, Area and Insuring Offices do not have lists of homeseekers, nor do most offices do any direct housing counseling as they did at the time of the drafting of the regulations. Therefore, to the extent that lists of homeseekers are available to Housing Management or Equal Opportunity, from counseling agencies in the community or from other sources, such names may, at the discretion of the Area/Insuring Office Director, be sent to developers so that they may specifically solicit them.

5. *Question.* How does the affirmative marketing policy apply to housing which is presold before the applicant asks for a conditional commitment?

Answer. A builder who presells is covered by the affirmative marketing policy if he has participated in FHA housing programs to the extent of five or more dwelling units during the year preceding the application, just as any other builder is covered (see section 200.615 of the Affirmative Fair Housing Marketing Regulations). At the time of an application for a conditional commitment on a presold house by a builder who is subject to affirmative marketing requirements, an Affirmative Marketing Plan must be submitted and approved prior to the granting of the commitment. The plan should provide for affirmative marketing of all other units in the subdivision (by a subdivision builder) or all other units for the ensuing year (by a scattered lot builder). After the first application for a conditional commitment for a house which has already been sold, future applications by the builder shall not be approved unless he has had an affirmative marketing Plan, covering that housing approved by HUD. In order to facilitate industry understanding of and compliance with this policy, local office staff should identify those builders operating in their area who have normally done preselling and explain the policy to them, in writing or by individual conferences or group meetings.

F. *Approvals*—1. *Question.* By what method should EO staff communicate the approval of a plan to the applicant? How can the applicant show the public that his plan has been approved?

Answer. The best method is to write, stamp, or type "Approved" on the last page of the plan, sign and date it, and send a Xerox copy to the applicant with a covering letter and (for sales housing) a supply of monthly reporting forms. The covering letter should remind the applicant of the reporting requirement and ask the applicant to check "Final Report" 6 months after all the units have been offered for sale or rent or at 95 percent occupancy, whichever is first.

2. *Question.* Should the multifamily applicant be encouraged to update his plan sometime just before he is ready for occupancy?

Answer. Yes. The letter of approval of the plan should advise the multifamily applicant that compliance will be based on specific performance of the plan and that, if he wants to adapt it to reflect changes in his marketing situation as he approaches occupancy, he should contact HUD to renegotiate the plan. It is highly desirable to remind the applicant of the possible need to update his plan at the preoccupancy conference. When EO staff is unable to be present at the preoccupancy conference to negotiate any needed updating, Housing Management staff should be ready to assume responsibility for handling these negotiations, subject to EO concurrence. The EO representative should be invited to all preoccupancy conferences. All changes of a plan prior to completion of initial rent-up are voluntary. The applicant should also be reminded of the reporting requirements, have explained the "Final Report" requirements, and receive copies of the monthly occupancy report at the preoccupancy conference.

G. *Monitoring*—1. *Question.* What action should be taken when Affirmative Marketing Plans do not meet the Equal Opportunity objectives of HUD? If an applicant states that he has made good faith efforts, is HUD staff restricted from taking further action to achieve the desired results?

Answer. In relation to the submission and approval of the affirmative marketing plan,

V 38 - 5 JAN 9 73 XUM

Equal Opportunity staff has a responsibility not to sign off on any plan unless the plan is realistic, workable, and expected to achieve the results stated in the plan. The plan then sets the standard of performance required and compliance is based on the fulfillment of the provisions of the plan.

If the plan proves unworkable or ineffective, the applicant is required to notify Equal Opportunity that it is not working. Likewise, Equal Opportunity has a responsibility to monitor and identify any problems of implementation. If either the applicant or Equal Opportunity determines that the plan is not working, both should meet and work out an alternative plan on a voluntary basis. Equal Opportunity may require an alternative plan on multifamily projects after the initial rent-up.

2. *Question.* Will there be any nationwide analysis of the results of affirmative marketing?

Answer. Yes. To facilitate such analysis, copies of all final sales reports should be sent by EO staff to the Office of Program Standards and Data Analysis, Room 5136, Department of Housing and Urban Development, Washington, D.C., 20410. The final report on subdivisions is the one sent in when 95 percent of the units are sold or 6 months after all units in the subdivision became available, whichever is first. The developer should check the box marked "Final Report" on that monthly sales report. For scattered lot builders, one cumulative report shall be sent to Central Office annually by EO staff. If a builder has an annual Affirmative Marketing Plan, the last report before the renewal of his plan should be considered his "Final Report."

3. *Question.* What mechanism should be used to insure monitoring of Affirmative Marketing Plans?

Answer. Using information on expected date of availability found in the monthly "Equal Housing Opportunities Information Record of Subdivision Reports Issued, Multifamily Properties and Home Mortgage Commitments" required by HPMC 8000.3 (mailed out to fair housing groups and kept available to the public in a bound book in the office), EO staff should keep a list of developments and projects expected to market in each month. A staff member should be assigned to check the newspapers for compliance by each applicant.

A staff member should be assigned to call groups which were listed as community contacts on a spot-check basis to find out if they have been contacted by the developers. The calls could be made as soon as the developer begins to advertise in the newspaper, if both newspapers and community contacts were to be used. If only community contacts were to be used, the time for the phone calls can be determined from the list compiled above of developers and projects expected to market in each month.

Monthly reports should be checked as they are received against the anticipated results stated in the approved plan.

Civil rights groups should be encouraged to monitor by obtaining the Equal Housing Opportunity Information Record, asking developers to see their plans, and checking newspapers and community organizations.

A supply of monthly reporting forms should always be sent to developers of single family homes with the approved marketing plan. Housing Management should give the multifamily developer a supply of HUD Forms 9801 at the preoccupancy conference.

If a developer comes in with a subsequent Affirmative Marketing Plan, the monthly reporting forms sent in on the previous plan should be reviewed before the subsequent plan is approved. Copies of advertisements used pursuant to the previous plan must be attached as exhibits in the subsequent plan to show the type of advertising to be used. If the developer was in compliance with his previous plan but did not obtain his anticipated results, it should be determined whether more extensive outreach efforts or different methods of outreach may be necessary.

4. *Question.* Should a subsequent plan be approved from a builder when there is clear indication that he has not complied with his previous plan?

Answer. No. If there is clear indication that the builder is in noncompliance, based on Area/Insuring Office observations that the specific provisions of the previous plan were not carried out, approval of the subsequent plan should be deferred. Deferral may not be based on failure to reach anticipated results.

If the marketing program of the applicant is only partially completed, Area/Insuring Office staff should send the applicant a letter notifying him:

a. Of the nature of his apparent noncompliance, and

b. That he should bring his marketing program into compliance within 15 days or a compliance review will be conducted by the Regional Office. A copy of this letter should go to the Region.

If the marketing program has been completed or nearly completed, Area/Insuring Office staff should immediately request a compliance review from the Region and notify the applicant that review is being deferred pending a compliance review. The Assistant Regional Administrator for Equal Opportunity should receive a copy of the notification to the builder with a request for an immediate compliance review pursuant to EO 11063, title VIII, title VI (if applicable), the Affirmative Fair Housing Marketing Regulations, and the specific plan of the builder previously approved by HUD.

5. *Question.* Should a subsequent plan from a builder be approved when he has not complied with reporting requirements pursuant to a previous plan?

Answer. No. The builder should be notified by phone or letter that his plan is being held until his reporting requirements are satisfied. If the reports are not sent in promptly after notification, the builder should be notified in writing that approval of the subsequent plan is being deferred pending a compliance review on the previous plan (see Question 4).

6. *Question.* Who is responsible for handling compliance and conducting compliance reviews pursuant to the Affirmative Fair Housing Marketing Regulations?

Answer. In all cases, complaints and compliance reviews are the responsibility of the Assistant Regional Administrator for Equal Opportunity in the appropriate Regional Office.

(Sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d))

Effective date. This statement of policy is effective upon publication in the FEDERAL REGISTER (1-9-73).

MALCOLM E. PEABODY,
Acting Assistant Secretary for Equal Opportunity.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

NATIONAL HIGHWAY SAFETY ADVISORY COMMITTEE

Notice of Public Meeting

On January 18 and 19, 1973, the National Highway Safety Advisory Committee will hold an open meeting in Washington, D.C.

The National Highway Safety Advisory Committee is composed of 35 members appointed by the President in accordance with the Highway Safety Act of 1966 (23 U.S.C. 401 et seq.). The Committee consists of representatives of State and local governments, State legislatures, public and private interests contributing to, affected by, or concerned with highway safety, other public and private agencies, organizations, and groups demonstrating an active interest in highway safety, and research scientists and other experts in highway safety.

The Advisory Committee advises, consults with, and makes recommendations to the Secretary of Transportation on matters relating to the activities of the Department in the field of highway safety. The Committee is specifically authorized (1) to review research projects or programs, and (2) to review, prior to issuance, standards proposed to be issued by the Secretary under the national highway safety program.

Subject to approval by the Secretary of Transportation, the following meeting will be held:

The Subcommittee on Research, and Program Development will meet from 1:00 p.m. to 4:00 p.m. on Thursday, January 18, and from 9:00 a.m. to 4:00 p.m. on Friday, January 19, in room 2232 of the DoT Headquarters Building, 400 Seventh Street SW., Washington, DC, with the following agenda:

Briefing on NATO/CCMS Programs in Highway Safety
Police Manpower Requirements on Interstate System
Review and Discussion of Standards Revision
New Business

Further information may be obtained from the Executive Secretariat, National Highway Traffic Safety Administration, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590, telephone 202-426-2872.

This notice is given pursuant to Executive Orders 11671 and 11686.

Issued on: January 4, 1973.

CALVIN BURKHART,
Executive Secretary.

[FR Doc.73-491 Filed 1-8-73;8:45 am]

National Transportation Safety Board

[Docket No. SA-436]

AIRCRAFT ACCIDENT AT CHICAGO, ILL.

Notice of Investigation Hearing

In the matter of investigation of an accident involving Delta Air Lines, Inc., CV-880, of U.S. Registry N8807E, and North Central Airlines, Inc., DC-9, of U.S. Registry N954N, at O'Hare International Airport, Chicago, Ill., December 20, 1972, Docket No. SA-436.

Notice is hereby given that an accident investigation hearing on the above-matter will be held commencing at 9 a.m., c.s.t., on January 17, 1973, at the Sheraton-O'Hare Hotel, 6810 North Mannheim Road, Rosemont, IL.

Dated this 3d day of January 1973.

[SEAL] LESLIE D. KAMPSCHROR,
Hearing Officer.

[FR Doc.73-436 Filed 1-8-73;8:45 am]

ATOMIC ENERGY COMMISSION

[Dockets Nos. 50-400—50-403]

CAROLINA POWER & LIGHT CO.

Notice and Order for Special Prehearing Conference

In the matter of the Carolina Power & Light Co. (Shearon Harris Nuclear Power Plant, Units 1, 2, 3, and 4), Dockets Nos. 50-400, 50-401, 50-402, and 50-403.

Take notice, that pursuant to the Atomic Energy Commission's "Notice of Hearing On Application For Construction Permits," dated September 21, 1972, and in accordance with § 2.751a of said Commission's restructed rules of practice, a special prehearing conference will be held on the subject proceeding on January 30, 1973, at 10:30 a.m., local time, in the U.S. District Courthouse, Court Room 2, Seventh Floor, New Federal Building, 310 New Bern Avenue, Raleigh, NC 27611. The special prehearing conference will deal with the following matters:

1. Simplification, clarification, and specification of the issues;

2. Outstanding petitions for intervention;

3. The need for discovery, and the time required for such discovery, if any;

4. The necessity or desirability of amending the pleadings or petitions submitted thus far;

5. Any motions to be addressed to the Atomic Safety and Licensing Board (Board);

6. The procedures to be followed in the presentation of evidence at the evidentiary hearings;

7. Establishment of schedules for further action; and

8. Such other matters as may aid in the orderly disposition of this proceeding.

The attorneys for the respective parties are hereby directed to confer in advance of the special prehearing conference and report to the Board at the time of said conference on the prospects for:

1. Settlement of any pending contentions;

2. A stipulation as to the matters in controversy;

3. A stipulation or statement of the uncontested facts.

At the special prehearing conference, the Board will hear oral argument on the outstanding petitions to intervene. The petitioners as well as the parties, will be given an opportunity to be heard in this regard.

The Board will also hear argument pertaining to the specificity of the contentions proposed to be raised by the petitioning intervenors, Conservation Council of North Carolina and Wake Environment, Inc., as well as the authority of these two organizations to represent any of their members in this particular proceeding. The Board will also hear argument on the particular interests of said members that would, or allegedly might be, affected by the granting of the proposed construction permits. The identity and addresses of individual members of the aforesaid organizations who desire to be represented by those organizations in this proceeding should be presented to the Board at this prehearing conference, and such information should be submitted by the pertinent parties in affidavit form.

The Board will require from the parties, either in the form of briefs or oral argument, their views on the scope of the National Environmental Policy Act review to be made by the Board in light of the Commission's Notice of Hearing and, in particular, in view of the recently enacted Federal Water Pollution Control Act Amendments of 1972. As part of this discussion, the Board will require documentation or citation as to any duly enacted North Carolina State Water Quality Standards or effluent limitations which have been federally approved, and which might be applicable to the four proposed Shearon Harris units.

This Board will be concerned with the health and radiological safety issues and environmental issues set forth in the September 21, 1972 Notice of Hearing. 37 FR 20344, September 29, 1972.

All members of the public are entitled to attend the special prehearing conference, as well as any subsequent prehearing conference and the evidentiary hearing itself.

Issued at Washington, D.C., this 3d day of January 1973.

It is so ordered.

For the Atomic Safety and Licensing Board.

THOMAS W. REILLY,
Chairman.

[FR Doc.73-402 Filed 1-8-73;8:45 am]

[Docket No. 50-247]

CONSOLIDATED EDISON CO. OF NEW YORK, INC.

Order Extending Completion Date

Consolidated Edison Co. of New York, Inc. is the holder of Provisional Construction Permit CPPR-21 issued by the Commission on October 14, 1966, for the construction of the Indian Point Station Unit No. 2, a 2758 megawatt (thermal) pressurized water nuclear reactor, presently under construction at the company's site on the Hudson River in the Village of Buchanan, Westchester County, N.Y.

On November 29, 1972, the company requested an extension of completion date because of delays in the completion and associated testing of the facility due to the determination to refabricate the core and to inspect and repair, as necessary, deficiencies in particular vent/drain assemblies which were indicated during the pre-critical testing program. The Director of Regulation having determined that this action involves no significant hazards consideration, and good cause having been shown:

It is hereby ordered, That the latest completion date for CPPR-21 is extended from January 2, 1973 to March 1, 1973.

Dated of issuance: December 27, 1972.

For the Atomic Energy Commission.

R. C. DEYOUNG,
Acting Deputy Director for Reactor Projects, Directorate of Licensing.

[FR Doc.73-403 Filed 1-8-73;8:45 am]

[Docket No. 50-335]

FLORIDA POWER AND LIGHT CO.

Notice of Hearing

The Florida Power and Light Co. (the licensee) is the holder of Construction Permit No. CPPR-74 (the Construction Permit), issued by the Atomic Energy Commission on July 1, 1970. The Construction Permit authorizes the licensee to construct a pressurized water nuclear reactor, designated as the St. Lucie Nuclear Power Plant, Unit 1 (formerly designated "Hutchinson Island Nuclear Power Plant"), at the licensees' site in St. Lucie County, Fla. The reactor is designed for initial operation at approximately 2440 megawatts (thermal).

The facility is subject to the provisions of section B of Appendix D to 10 CFR Part 50, which sets forth procedures applicable to review of environmental considerations for production and utilization facilities for which construction permits or operating licenses were issued in the period January 1, 1970—September 9, 1971. Notice is hereby given, pursuant to the Atomic Energy Act of 1954, as amended, and the regulations in 10 CFR Part 2, rules of practice, and Appendix D to 10 CFR Part 50, "Implementation of the National Environmental Policy Act

V38-5 JAN 9 73 XUM

of 1969," that a hearing will be held in the captioned proceeding by an Atomic Safety and Licensing Board (Board) at a time and place to be fixed by subsequent order of the Board to consider and make determinations on the matters set forth below:

1. In the event that this proceeding is not a contested proceeding as defined by 10 CFR 2.4(n) of the Commission's rules of practice, the Board will without conducting a de novo evaluation of the application determine whether the environmental review conducted by the Commission's regulatory staff pursuant to Appendix D of 10 CFR Part 50 has been adequate.

2. In the event that this proceeding is a contested proceeding, the Board will decide any matters in controversy among the parties within the scope of Appendix D to 10 CFR Part 50, with regard to whether, in accordance with the requirements of Appendix D to 10 CFR Part 50, the construction permit should be continued, modified, terminated or appropriately conditioned to protect environmental values.

3. Regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with section A.11 of Appendix D of 10 CFR Part 50, (a) determine whether the requirements of section 102(2) (C) and (D) of NEPA and Appendix D to 10 CFR Part 50 of the Commission's regulations have been complied with in this proceeding; (b) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view toward determining the appropriate action to be taken; and (c) determine, after weighing the environmental, economic, technical and other benefits against environmental costs and considering available alternatives, whether the construction permit should be continued, modified, terminated or appropriately conditioned to protect environmental values.

The Board will be designated by the Atomic Energy Commission. Notice as to its membership will be published in the FEDERAL REGISTER. Within thirty (30) days from the date of publication of this present notice in the FEDERAL REGISTER, any person whose interest may be affected by this proceeding may file a petition for leave to intervene with respect to whether, considering those matters covered by Appendix D to 10 CFR Part 50, the construction permit should be continued, modified, terminated, or appropriately conditioned to protect environmental values. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's rules of practice in 10 CFR Part 2.

A petition for leave to intervene must be filed under oath or affirmation in accordance with the provisions of 10 CFR 2.714. As required by 10 CFR 2.714, a petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

A request for a hearing or a petition for leave to intervene must be filed with the Office of the Secretary of the Commission, United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, not later than thirty (30) days from the date of publication of this notice in the FEDERAL REGISTER. A petition for leave to intervene which is not timely will not be granted unless the Commission determines that the petitioner has made a substantial showing of good cause for failure to file on time and after the Commission has considered those factors specified in 10 CFR 2.714(a).

Any person who does not wish to, or is not qualified to become a party to this proceeding concerning continuation, modification, termination, or conditioning the construction permit may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715.

A person making a limited appearance may only make an oral or written statement on the record, and may not participate in the proceeding in any other way. Limited appearances will be permitted at the time of the hearing in the discretion of the Board, within such limits and on such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, not later than thirty (30) days from the date of publication of this notice in the FEDERAL REGISTER.

A person permitted to make a limited appearance does not become a party, but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of the hearing as specified in the issues set out above.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the licensee not later than twenty (20) days from the date of publication of this notice in the FEDERAL REGISTER.

Papers required to be filed in this proceeding may be filed by mail or telegram addressed to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

In the event that this proceeding is not contested, the Board will convene a prehearing conference of the parties within sixty (60) days after this Notice of Hearing or such other time as may be appropriate, at a time and place to be set by the Board. It will also set the schedule for the evidentiary hearing. Notice of the prehearing conference and the hearing will be published in the FEDERAL REGISTER.

In the event that this proceeding becomes a contested proceeding, the Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to intervene, or their counsel, to be held within sixty (60) days from the date of publication of this notice in the FEDERAL REGISTER, or within such other time as may be appropriate, at a place to be set by the Board for the purpose of dealing with the matters specified in 10 CFR 2.751a.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any special prehearing conference and within sixty (60) days after discovery has been completed, or within such other time as may be appropriate, at a place to be set by the Board for the purpose of dealing with the matters specified in 10 CFR 2.752.

Notices of the dates and places of the special prehearing conference, the prehearing conference and the hearing will be published in the FEDERAL REGISTER.

For further details pertinent to the matters under consideration, see the licensee's Environmental Report dated May 20, 1971, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, FL 33450. As they become available, the following documents also will be available at the above locations:

(1) The Commission's draft detailed statement on environmental considerations pursuant to 10 CFR Part 50, Appendix D; and (2) the Commission's final detailed statement on environmental considerations. Copies of item (2), when available, may be obtained by request to Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

With respect to this proceeding, pursuant to 10 CFR 2.785 an Atomic Safety and Licensing Appeal Board will exercise the authority and the review function which would otherwise be exercised and performed by the Commission. Notice as to the membership of the Appeal Board will be published in the FEDERAL REGISTER.

Dated at Germantown, Md., this 4th day of January 1973.

UNITED STATES ATOMIC ENERGY COMMISSION,
PAUL C. BENDER,
Secretary of the Commission.

[FR Doc.73-438 Filed 1-8-73;8:45 am]

[Docket No. 50-251]

FLORIDA POWER AND LIGHT CO.

Order Extending Completion Date

Florida Power & Light Co. is the holder of Provisional Construction Permit CPPR-28 (as amended) issued by the Commission on April 27, 1967, for the construction of the Turkey Point Nuclear Generating Unit No. 4, a 2,200 megawatt (thermal) pressurized water nuclear reactor, presently under construction at the company's site located at Turkey Point in Dade County, Fla., about 25 miles south of Miami.

By letter of November 7, 1972, and supplemented by a telegram dated December 1, the company requested an extension of the completion date because of construction delays as a result of additional work such as installation of piping seismic supports, and modification of the AC and DC instrument power supplies. Delays have also been experienced in the completion of the in-service inspection program. The Director of Regulation having determined that this action involves no significant hazards consideration, and good cause having been shown:

It is hereby ordered, That the latest completion date for CPPR-28 (as amended) is extended from January 1, 1973, to January 1, 1974.

For the Atomic Energy Commission.

Date of issuance: December 27, 1972.

R. C. DEYOUNG,
Acting Deputy Director for Reactor Projects, Directorate of Licensing.

SOUTH CAROLINA ELECTRIC AND GAS CO.

Notice of Reconstitution of Board

In the matter of South Carolina Electric and Gas Co., Virgil C. Summer Nuclear Station, Unit 1, Docket No. 50-395.

Mr. Frederick J. Shon was a technical member of the Atomic Safety and Licensing Board established to consider the above application. Mr. Shon is unable to continue his service as a member of this Board because of schedule conflicts.

Dr. Kenneth A. McCollom was previously designated as a technically qualified alternate member for this Board. He has been designated to serve in place of Mr. Shon. Reconstitution of the Board in this manner is in accordance with § 2.721 (b) of the rules of practice.

Dated at: Washington, D.C., this 3d day of January 1973.

JAMES R. YORE,
Executive Secretary, Atomic Safety and Licensing Board Panel.

[Docket No. 50-305]

WISCONSIN PUBLIC SERVICE CORP. ET AL.

Order Extending Completion Date

Wisconsin Public Service Corp., Wisconsin Power & Light Co., and Madison Gas and Electric Co. are the holders of Provisional Construction Permit CPPR-50 issued by the Commission on August 6, 1968, for the construction of the Kewaunee Nuclear Powerplant, a 1,650 megawatt (thermal) pressurized water nuclear reactor, presently under construction at the companies' site in the town of Carlton, Kewaunee County, Wis.

On November 6, 1972, the companies requested an extension of completion date because of shortage of skilled tradesmen and technical personnel, delays in completion of piping system restraints due to extensive seismic analysis requirements, the addition of a makeup water pretreatment system to assure a constant quality demineralized water supply, and underestimation of schedule requirements. The Director of Regulation having determined that this action involves no significant hazards consideration, and good cause having been shown:

It is hereby ordered, That the latest completion date for CPPR-50 is extended from December 31, 1972, to August 31, 1973.

Date of issuance: December 27, 1972.

For the Atomic Energy Commission.

R. C. DEYOUNG,
Acting Deputy Director for Reactor Projects, Directorate of Licensing.

S8G PROTOTYPE, KESSELRING SITE, WEST MILTON, N.Y.

Notice of Availability of the General Manager's Final Environmental Statement

Notice is hereby given that a document entitled, "S8G Prototype, Kesselring Site, West Milton, N.Y." issued pursuant to the Atomic Energy Commission's implementation of section 102(2)(c) of the National Environmental Policy Act of 1969 is being placed in the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20545, and in the Commission's Albuquerque Operations Office, Post Office Box 5400, Albuquerque, NM 87115; Chicago Operations Office, 9800 South Cass Avenue, Argonne, IL 60439; Grand Junction Office, Post Office Box 2567, Grand Junction, CO 81501; Idaho Operations Office, Post Office Box 2108, Idaho Falls, ID 83401; New York Office, 376 Hudson Street, New York, NY 10014; Oak Ridge Operations Office, Post Office Box E, Oak Ridge, TN 37830; San Francisco Operations Office, 2111 Bancroft Way, Berkeley, CA 94704. This statement was prepared in support of the Commission's legislative action related to development, construction and operation of the protoype nuclear propulsion plant for the *Trident* submarines.

This final environmental statement will be furnished upon request addressed to the Director, Division of Environmental Affairs, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Germantown, Md., this 2d day of January, 1973.

For the Atomic Energy Commission.

PAUL C. BENDER,
Secretary of the Commission.

ENVIRONMENTAL PROTECTION AGENCY

IMPLEMENTATION PLAN, PESTICIDE CONTROL ACT

Statement of Purpose and Preliminary Solicitation of Views

On October 21, 1972, the President signed into law H.R. 10729, the Federal Environmental Pesticide Control Act of 1972 (Public Law 92-516, 86 Stat. 973), amending the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 135 et seq. This document is intended to set forth the Agency's plan for implementing these amendments to FIFRA, to inform the public as to the date when the different amendments became or become effective and the general form and content that various regulations will take. Preliminary views as to form and content of regulations are invited. Naturally such regulations will be developed over time, and the public will be afforded an opportunity to submit specific and formal comments when notice of rule making is published in the FEDERAL REGISTER. However, even prior to that time, comments could be useful and should be addressed to Lowell Miller, Chairman, Pesticides Legislation Task Force, Environmental Protection Agency, Washington, D.C.

A. *Legislative history.* Enactment of the Federal Environmental Pesticide Control Act of 1972, followed numerous congressional hearings and floor debates. The legislation was originally submitted to the Congress in 1971 by the President's Office of Management and Budget and introduced in the Senate as S. 745 and in the House of Representatives as H.R. 4152 on February 10, 1971. Hearings were held before the Subcommittee on Agricultural Research and General Legislation of the Senate Committee on Agriculture and Forestry on March 23-26, 1971. Hearings were held before the Committee on Agriculture of the House of Representatives beginning February 22, 1971, and ending on March 25, 1971. That Committee reported a bill (H.R. 10729) to the full House on September 25, 1971, accompanied by House Report No. 92-511. H.R. 10729 was taken to the floor on November 7, 1971, and the floor discussion is recorded at H. 10674-10680 Congressional Record November 8, 1971 (and following: Nov. 9, H. 10726-10774, E. 11965-11966; Nov. 10, E. 12057-12058, E. 12070; Nov. 12, E. 12132-12134). H.R. 10729 passed with minor amendment on November 9, 1971, and was referred to the Senate on November 19, 1971. Hearings on H.R. 10729, which replaced S. 745, were held before the Subcommittee on Agricultural Research and General Legislation of the Senate Committee on Agriculture and Forestry on March 7 and 8, 1972. The committee reported a bill accompanied by Senate Report No. 92-838 on June 7, 1972, which was, in turn, referred for hearings to the Senate Commerce Committee, and hearings were held before the Subcommittee on the Environment on June 15 and June 19, 1972. An amended version of H.R. 10729, accompanied by Senate Report No. 92-970 was reported to the Senate on July 19, 1972. The matter was referred back to the Senate Agriculture Committee which studied H.R. 10729, issued a supplemental report, No. 92-838 Part II (Oct. 3, 1972) and ultimately reported a bill which was referred jointly to the full Senate by that Committee and the Committee on Commerce on September 25, 1972. The accompanying floor remarks can be found at S. 15885 Congressional Record, September 26, 1972. On September 26, 1972, the Senate passed H.R. 10729. The Senate and House conferees met and on October 5, 1972, reported the Federal Environmental Pesticide Control Act accompanied by a conference report, House Report No. 92-1540 (Oct. 5, 1972). The conference bill was adopted by the Senate on October 5, 1972, and by the House on October 12, 1972, and was signed into law on October 21, 1972.

B. *Description of the legislation.* Prior to the 1972 amendments to the Federal Insecticide, Fungicide, and Rodenticide Act of 1947, Federal control of pesticides was focused primarily on the licensing of pesticide products intended for interstate shipments. Control extended to requiring adequate labeling directions for use and cautions and warnings adequate for safe use. The basic structure of that legislation provided for penalties when adulterated or improperly labeled products were shipped interstate. It soon became apparent that the lack of direct control over actual use and intrastate manufacture and sale were significant gaps which created a possible hazard to users and the environment. The only possible means of Federal control over misuse was to revoke the license for registration. Such control involved cumbersome administrative procedures for cancellation based on the inadequacy of the label to protect the user or the environment or the existence of a commonly recognized practice of abuse. The net result was to force the Government to consider a pesticide registration as an "all or nothing" proposition.

The Federal Environmental Pesticide Control Act of 1972 adds a use classification and regulation scheme to the labeling scheme of the Federal Insecticide, Fungicide, and Rodenticide Act. Thus, under the new law the Administrator is given the authority to proceed against persons or individuals who engage in misusing pesticides by applying them in a manner "inconsistent with their labeling." In addition, the Administrator may place pesticides in a "restricted use" category, thus subjecting them to controls in distribution and ultimately requiring their use only by trained applicators. Federal authority is also extended to the use, shipment, distribution and sale of all pesticide products. Other new authorities include: Registration of pesticide-producing establishments and the requirement that they maintain books and records; payment of indemnities to farmers and manufacturers who, without notice, are left holding a product which is suspended because it creates an imminent hazard; authority to allocate the cost of research necessary to satisfy the requirements of product registration where two manufacturers are seeking a registration to sell the same basic product; an obligation on the Government to establish procedures for disposal of pesticide containers and excess pesticides; authority to cooperate with States in the training of applicators and an obligation to establish criteria for their certification; authority to certify States to permit them to register certain products to meet "special local needs." In addition to these authorities the legislation makes substantial amendments to the registration procedures, and the mechanisms for administrative hearings on refusals to register, changes in classification, suspension and cancellation.

C. *Timing of implementation.* Section 4 provides:

SEC. 4. (a) Except as otherwise provided in the Federal Insecticide, Fungicide, and Rodenticide Act, as amended by this Act, and as otherwise provided by this section, the amendments made by this Act shall take effect at the close of the date of the enactment of this Act, provided if regulations are necessary for the implementation of any provision that becomes effective on the date of enactment, such regulations shall be promulgated and shall become effective within 90 days from the date of enactment of this Act.

(b) The provisions of the Federal Insecticide, Fungicide, and Rodenticide Act and the regulations thereunder as such existed prior to the enactment of this Act shall remain in effect until superseded by the amendments made by this Act and regulations thereunder: *Provided*, That all provisions made by these amendments and all regulations thereunder shall be effective within 4 years after the enactment of this Act.

(c)(1) Two years after the enactment of this Act the Administrator shall have promulgated regulations providing for the registration and classification of pesticides under the provisions of this Act and thereafter shall register all new applications under such provisions.

(2) After 2 years but within 4 years after the enactment of this Act the Administrator shall register and reclassify pesticides registered under the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act prior to the effective date of the

regulations promulgated under subsection (c)(1).

(3) Any requirements that a pesticide be registered for use only by a certified applicator shall not be effective until 4 years from the date of enactment of this Act.

(4) A period of 4 years from date of enactment shall be provided for certification of applicators.

(A) One year after the enactment of this Act the Administrator shall have prescribed the standards for the certification of applicators.

(B) Within 3 years after the enactment of this Act each State desiring to certify applicators shall submit a State plan to the Administrator for the purpose provided by section 4(b).

(C) As promptly as possible but in no event more than 1 year after submission of a State plan, the Administrator shall approve the State plan or disapprove it and indicate the reasons for disapproval. Consideration of plans resubmitted by States shall be expedited.

(5) One year after the enactment of this Act the Administrator shall have promulgated and shall make effective regulations relating to the registration of establishments, permits for experimental use, and the keeping of books and records under the provisions of this Act.

(d) No person shall be subject to any criminal or civil penalty imposed by the Federal Insecticide, Fungicide, and Rodenticide Act, as amended by this Act, for any act (or failure to act) occurring before the expiration of 60 days after the Administrator has published effective regulations in the FEDERAL REGISTER and taken such other action as may be necessary to permit compliance with the provisions under which the penalty is to be imposed.

(e) For purposes of determining any criminal or civil penalty or liability to any third person in respect of any act or omission occurring before the expiration of the periods referred to in this section, the Federal Insecticide, Fungicide, and Rodenticide Act shall be treated as continuing in effect as if this Act had not been enacted.

And the Senate agree to the same.

It is the Agency's view that, with certain exceptions, section 4 makes the 1972 amendments effective as of the date of their enactment. These exceptions concern primarily the registration, classification, and the certification of applicator sections. In addition, those sections where regulations are "necessary" do not become effective until 60 days after final regulations are promulgated. This provision, in the Agency's view, refers only to those sections of the amendments where the Congress has expressly directe[1] the Agency to prepare regulations, e.g., the provisions for licensing pesticide producing establishments. While the Pesticides Office contemplates the promulgation of extensive regulations pursuant to the general authority provided in section 25 (a), the Agency does not believe that this defers the effective date of any sections. In those cases, until procedures are established by regulations, pertinent regulations previously issued will remain in effect to the extent consistent with the amendments. If no regulations are in force, the Agency will proceed on a case-by-case basis until regulations are finalized.

The Agency's view as to the effective date of particular provisions is as follows:

a. *Definitions.* The Agency believes that all the definitions and the authorities contained therein became effective upon enactment of Public Law 92-516 unless such definitions relate to an authority in Public Law 92-516 which becomes effective at some later date, e.g., certified applicators. Insofar as explanatory regulations may be desirable to furnish guidance to the public, regulations presently in force will be continued where applicable.

b. *Registration.* Section 4 expressly provides for implementation of the new registration provisions within the next 2 years. A task force has been established to write the necessary rules and regulations to implement this section. It will be the intent of the Agency to issue information guidelines in accordance with the requirements of subsection 2. Additional rules and regulations will address:

1. Procedures for publishing receipt of applications;

2. Explanation of internal procedures followed in processing registrations and notifying registrants;

3. Procedures for the release of data concerning registrations and findings contemplated by section 3(c), and notice of application where a new chemical or changed use pattern exists;

4. Requirements and procedures for identifying the direct costs involved in producing test data and identifying such other information as might be pertinent to determining "reasonable compensation" for the purpose of section (3)(c)(1)(D), and the accounting procedures registrants must follow in order to identify the "compensation" for "producing the test data."[1]

5. Requirements for the packaging of restricted use pesticide chemicals;

6. Requirements for the distribution, sale, and purchase of certain restricted-use pesticides.

Until such time as regulations are issued to implement the registration procedures of the new Act, all provisions and pertinent rules and regulations governing registrations under the 1947 FIFRA will remain in force and effect. Until such time as section 3 of Public Law 92-516 is implemented, but no later than 2 years after its date of enactment, intrastate shipments will be allowed to the same extent as under prior law and will, until such time as section 3 is operable, be subject to regulation under State law. It is understood that products which have been suspended or cancelled for noncompliance with the provisions of the 1947 FIFRA or the 1972 amendments may not be sold or distributed intrastate. After 2 years but no later than 4 years the Agency will classify products which are registered under the 1947 FIFRA.

The Agency has created a special exception to the deferred implementation of section 3 for use, at the registrant's option, in the following circumstances. Where the registration of a product has been cancelled in the last 2 years or an application for registration has been denied, the manufacturer or formulator may, prior to the general implementation of section 3, apply for registration as a restricted-use pesticide if it can be shown that restrictions, other than limiting use for certified applicators, can be placed on its use and can be enforced so as to insure that there will not be unreasonable adverse effects on the environment.[2]

c. *Use of restricted pesticides and certified applicators.* A task force has been formed to work with the States and with EPA's regional offices to develop standards for the certification of pesticide applicators. By the terms of section 4(c)(4)(A) the Agency will within 1 year publish such guidelines. At the same time the task force will work to define criteria for the approval of State plans.

d. *Experimental use permits.* All present regulations relating to experimental permits will remain in force and effect insofar as pertinent and new regulations will be written in conjunction with the regulations for approval of State plans and registration procedures.

e. *Administrative review; suspension.* Section 6 took effect on the date of the enactment of Public Law 92-516. Insofar as compatible with new law, existing

[1] This provision represents a compromise version of the Senate and House Agriculture Committees' version of section 3(c)(1)(D). Both the Senate and House versions provided that no data of one registrant could be used by a subsequent registrant without the "permission of the first" applicant. This provision was discussed extensively in the supplemental report issued by the Senate Agriculture Committee, Senate Report No. 838, supra, at 18 where the purpose was explained:

"The exclusive use of data provision of H.R. 10729 would make it feasible in many such instances for a registrant to undertake research necessary to maintain a product on the market or to put a nonpatentable pesticide on the market, if the registrant could be assured that such research expenditures would not make it possible for competitors to market the same product without the necessity of making such expenditures."

The Agriculture and Commerce Committees finally agreed on a provision and that provision was adopted by the Conference with minor drafting changes. It would appear that the purpose is to allocate among registrants the expenditures for tests necessary for maintaining or obtaining a registration.

[2] Section 4 merely establishes the outside time for implementing the amendments in section 3. Thus, it is the Agency's view that it has the authority to classify presently registered products or register and classify intrastate pesticides or new compounds, pursuant to the 1972 amendments, as soon as it can. To the extent that the certified applicator program is not effective before 4 years, the Agency can recommend use, by label caution, by trained individuals and, where appropriate, apply such other restrictions as may be necessary.

V 38 - 5 JAN 9 73 XUM

rules and policies pertaining to 5-year cancellations and renewal and sections 2(z) and 4(c) of the old FIFRA shall remain in effect. Present rules governing the conduct of hearings shall also remain in effect insofar as applicable, until new rules are promulgated. Until that time, insofar as section 6 creates new provisions and procedures, such provisions and procedures shall be applied on a case-by-case basis in accordance with general principles of law and administrative practice. To the maximum extent possible this section shall apply to all administrative proceedings, whether or not initiated before the effective date of this Act. Where a matter has not yet been referred to a scientific advisory committee, the new procedures will apply thus permitting referral of specific questions to a panel of experts. The subpoena power will be exercised in accordance with the Federal rules of civil procedure and applicable precedents.

The Agency will undertake to publish new regulations or, where appropriate, amend existing regulations pertinent to this section as soon as possible.

Such regulations will provide for the expedited hearings prior to suspension actions, and shall follow in most respects the present subpart C of the hearing rules (37 FR 9476).

In developing rules for this section it will be necessary to establish the criteria for third-party participation. Congress has made clear the right of third parties (users and public interest groups) to invoke agency processes and participate fully in agency proceedings. Parts A and B of the previously proposed hearing rules for FIFRA (37 FR 1059), with appropriate modifications to permit user participation, eliminate advisory committee sections, and reflect the Administrator's flexibility under section 6(b)(2) provide an adequate starting point for comment. In addition, many of the comments previously received would also be pertinent. These are matters of public record and interested persons may review them at the Hearing Clerk's Office. Additionally, extensive consideration has already been given to these rules by the public and agency staff, and they have been considered by Congress during its hearings on P.L. 92-516. Publication in final form will generally reflect the various changes and modifications which were cited in Agency testimony as contemplated for the final version of Parts A and B.

As far as the substantive criteria for initiating of suspension and cancellation are concerned, the Agency believes that no change in present policies is required and the Pesticides Office will continue to evolve policy, consistent with stare decisis and other rules of administrative practice, on a case-by-case basis.

f. *Registration of establishments and books and records.* Section 4 of the Act contemplates the issuance of regulations for the implementation of sections 7 and 8 to be effective 1 year after the date of enactment.

g. *Inspection of establishments.* Section 9 does not, by its terms, require regulations, nor does it require explanation in the Agency's view. It is, therefore, effective immediately and will be administered accordingly. All delegations previously issued in connection with enforcement authorities under the 1947 Federal Insecticide, Fungicide, and Rodenticide Act and general agency policy statements and delegations apply to section 9 and the implementation of the enforcement provisions of Public Law 92-516. The portions of section 12(a)(2)(B) which relate to section 9 are also effective immediately.

h. *Protection of trade secrets and release of data.* This section became effective upon enactment of Public Law 92-516. Present rules are consistent with new law and shall remain in force and effect.

i. *Unlawful acts*—1. *General.* The prohibitions against shipment in violation of the section 3 registration provisions, violations of the record-keeping and establishment registration requirements and violations of the device labeling requirements of Public Law 92-516 do not take effect until such time as those provisions are implemented by rules and regulations. Until that time the provisions of present law and pertinent regulations and policies remain in force and effect. Other provisions go into effect immediately.

The provisions of section 12 which the Agency believes are at present in force and effect are:

Section 12(a)(1)(D)	Existing regulations are applicable.
Section 12(a)(1)(E)	
Section 12(a)(1)(F)	Except insofar as it pertains to section 25(c)(4).
Section 12(a)(2)(A)	
Section 12(a)(2)(B)	Insofar as it pertains to section 9.
Section 12(a)(2)(C)	
Section 12(a)(2)(D)	
Section 12(a)(2)(G)	
Section 12(a)(2)(H)	
Section 12(a)(2)(I)	
Section 12(a)(2)(J)	
Section 12(a)(2)(K)	
Section 12(a)(2)(M)	Except for submittals pursuant to sections 7 and 8.
Section 12(a)(2)(O)	
Section 12(a)(2)(P)	

It should be noted that while certain groups of individuals and entities specified in section 12(b) are exempt from the provisions of section 12(a)(1) no such exemption exists for the provisions of section 12(a)(2).

2. *Interpretations with respect to user penalties.* Section 12(a)(2)(G) makes punishable by imposition of a civil or criminal penalty any use of a pesticide in a manner inconsistent with its instructions on the label. These provisions became effective the date the Act was signed into law. In connection with the application of this section the Agency will entertain requests to issue pesticide use rulings on a case-by-case basis and furnish its interpretation of the Act. While such rulings will, after notice, be subject to revocation, they will assist the public in understanding the Agency's interpretation of the Act.

j. *Stop sale, use, removal, and seizure.* It is the Agency's belief that this section became effective upon enactment of Public Law 92-516 and no implementing regulations are required.

k. *Penalties.* Section 14(a) of Public Law 92-516 became effective on October 22, 1972. This provision will be implemented when policy and procedures are developed.

Section 14(b) of Public Law 92-516 became effective on October 22, 1972. These increased criminal penalties apply to all violations occurring on or after October 22, 1972, whether unlawful acts are cited under the FIFRA of 1947 or under Public Law 92-516."

l. *Indemnities.* This provision became effective upon enactment of Public Law 92-516 and applies to any suspension action taken thereafter. Until rules and regulations are promulgated, any application for an indemnity will be considered on a case-by-case basis. Such application shall include a verified statement of facts showing the claimant had no knowledge or could not have been aware of facts which would put a reasonable man on notice that a substantial question existed as to whether or not the product satisfied the requirements for registration. Copies of all tests ever carried out by or on account of a registrant, if not submitted prior to or after registration, shall be submitted. Additionally such application, if made by a registrant, shall include a detailed breakdown of the cost of producing such product including an audited statement showing direct costs of labor and material on a per unit of production basis and the marginal cost of additional unit production for the stocks on hand as opposed to stocks previously sold during the production year. Additional information may be requested.

Purchasers of stock of a suspended chemical must furnish proof as to date of purchase, cost, and payment, copies of any advertisements or sales material furnished by the registrant, amount on hand as of the time of suspension and amount on hand at the conclusion of cancellation proceedings.

As soon as possible, the Agency will promulgate regulations for the implementation of this section. Such regulations will outline in detail the accounting information for product manufacture that producers must submit to claim an indemnity and the methods of computing cost for others besides producers. Procedures for hearings to establish the lack of knowledge and cost basis in the pesticides will also be addressed in the regulations. Should there be a claim submitted before such regulations are published, they will be conducted in accordance with general principles governing administrative hearings.

m. *Imports and exports.* Section 17 became effective upon enactment, except for the provision of section 17(a) subjecting producers of exported pesticides to section 8. Rules and regulations under present law are expected to continue in force insofar as they are applicable.

n. *Exemption for Federal agencies.* The 1947 FIFRA exempted public officials from certain penalty provisions. Public Law 92-516 will result in additional requirements being placed upon such public officials. Until the "emergency conditions" exemption of section 18 is implemented, the 1947 FIFRA will continue in effect as to public officials. It is the intent of the Agency to promulgate within 90 days regulations for permanent procedures for section 18.

o. *Disposal and transportation.* This section will become effective when regulations are issued.

p. *State cooperation, State authority and training.* These provisions relate to the registration provisions, enforcement authorities, and applicator certification program. Their implementation is being studied by the task force. As explicit rules and regulations are drafted, they will be published in draft form to afford the public authority to comment for the record. Existing delegations to states to cooperate in enforcement continue in force and effect until further notice.

q. *Other authority.* The authorities granted by section 25 were effective upon enactment. The authorities therein relating to pests, highly toxic substances and coloration or discoloration are substantially like the authorities under the 1947 FIFRA. Thus, existing Agency regulations and rulings remain in effect to the extent consistent with the amendments.

WILLIAM D. RUCKELSHAUS,
Administrator.

JANUARY 4, 1973.

[FR Doc.73-444 Filed 1-8-73;8:45 am]

FEDERAL DEPOSIT INSURANCE CORPORATION

INSURED BANKS

Joint Call for Report of Condition

Pursuant to the provisions of section 7(a)(3) of the Federal Deposit Insurance Act, each insured bank is required to make a Report of Condition as of the close of business December 31, 1972, to the appropriate agency designated herein, within 10 days after notice that such report shall be made: *Provided*, That if such reporting date is a nonbusiness day for any bank, the preceding business day shall be its reporting date.

Each national bank and each bank in the District of Columbia shall make its original Report of Condition on Office of the Comptroller Form CC-8022-05, Call No. 484,[1] and shall send the same to the Comptroller of the Currency, and shall send a signed and attested copy thereof to the Federal Deposit Insurance Corporation. Each insured State bank which is a member of the Federal Reserve System, except a bank in the District of Columbia, shall make its original Report of Condition on Federal Reserve Form 105-Call 206,[1] and shall send the same to the Federal Reserve Bank of the District wherein the bank is located, and shall send a signed and attested copy thereof to the Federal Deposit Insurance Corporation. Each insured State bank not a member of the Federal Reserve System, except a bank in the District of Columbia and a mutual savings bank, shall make its original Report of Condition on FDIC Form 64-Call No. 102,[1] and shall send the same to the Federal Deposit Insurance Corporation.

The original Report of Condition required to be furnished hereunder to the Comptroller of the Currency and a copy thereof required to be furnished to the Federal Deposit Insurance Corporation shall be prepared in accordance with "Instructions for Preparation of Consolidated Reports of Condition by National Banking Associations," dated November, 1972.[1] The original Report of Condition required to be furnished hereunder to the Federal Reserve Bank of the District wherein the bank is located and he copy thereof required to be furnished to the Federal Deposit Insurance Corporation shall be prepared in accordance with "Instructions for the Preparation of Reports of Condition by State Member Banks of the Federal Reserve System," dated February 1972, and any amendments thereto.[1] The original Report of Condition required to be furnished hereunder to the Federal Deposit Insurance Corporation shall be prepared in accordance with "Instructions for the Preparation of Report of Condition on Form 64 by Insured State Banks Not Members of the Federal Reserve System," dated December 1970, and any amendments thereto.[1]

Each insured mutual savings bank not a member of the Federal Reserve System shall make its original Report of Condition on FDIC Form 64 (Savings),[1] prepared in accordance with "Instructions for the Preparation of Report of Condition on Form 64 (Savings) and Report of Income on Form 73 (Savings) by Insured Mutual Savings Banks," dated December 1971,[1] and any amendments thereto, and shall send the same to the Federal Deposit Insurance Corporation.

FRANK WILLE,
Chairman, Federal Deposit Insurance Corporation.

WILLIAM B. CAMP,
Comptroller of the Currency.

J. L. ROBERTSON,
Vice Chairman, Board of Governors of the Federal Reserve System.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COTTON, WOOL, MANMADE FIBER TEXTILES AND TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN HONG KONG

Entry or Withdrawal From Warehouse for Consumption

JANUARY 3, 1973.

Under the bilateral Cotton Textile Agreement of December 17, 1970, as amended, and the bilateral Wool and Manmade Fiber Textile Agreement of January 6, 1972, between the Governments of the United States and Hong Kong, the Government of Hong Kong

[1] Filed as part of original document.

[1] Filed as part of original document for FR Doc. 73-385, in this issue.

V 38 - 5 JAN 9 73 XUM

has undertaken to limit the export of cotton, wool, and manmade fiber textiles and textile products to the United States to certain designated levels. Pursuant to these agreements, the Governments of the United States and Hong Kong have established an administrative mechanism intended to preclude circumvention of the licensing system for exports to the United States of cotton, wool, and manmade fiber textiles and textile products produced or manufactured in Hong Kong. The purpose of this notice is to announce the implementation of this administrative mechanism. Effective thirty (30) days after publication, entry into the United States for consumption and withdrawal from warehouse for consumption of any cotton, wool, and manmade fiber textile and textile products produced or manufactured in Hong Kong and exported from Hong Kong to the United States on or after that date for which Hong Kong has not issued an appropriate visa, fully described below, will be prohibited. Application of this visa requirement to cotton, wool, and manmade fiber textiles and textile products exported from Hong Kong before the date of this publication is to become effective sixty (60) days following the date of publication. The visa is in two parts: (1) A Certificate of Hong Kong Origin indicating the category or categories under which the textiles and textile products are classified; and (2) an export visa appearing as a stamped marking in blue ink on the front side of the Certificate of Hong Kong Origin. The export visa will be valid only if it bears the signature of one of the three officials authorized to issue such visas. The authorized officials are the following: TANG FONG Nai-kwan, LAM HUNG Lai-cheung, and MAK LUI Kit-ming. Facsimiles of the two documents comprising the visa, along with the signatures of the above officials, are published as enclosures to the letter set forth below.

Interested parties are advised to take all necessary steps to assure that cotton, wool, and manmade fiber textiles and textile products produced or manufactured in Hong Kong which are to be entered into the United States for consumption or withdrawn from warehouse for consumption will meet the stated visa requirements.

There is published below a letter of January 3, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs implementing the administrative mechanism.

STANLEY NEHMER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary and Director, Bureau of Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20226.

JANUARY 3, 1973.

DEAR MR. COMMISSIONER: Under the provisions of the bilateral Cotton Textile Agreement of December 17, 1970, as amended, and the bilateral Wool and Manmade Fiber Textile Agreement of January 6, 1972, between the Governments of the United States and Hong Kong, and in accordance with the procedures of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective 30 days after publication of this letter in the FEDERAL REGISTER and until further notice, entry into the United States for consumption of cotton textiles and cotton textile products in Categories 1–64 and wool textile products in Categories 101–126, 128, and 131–132 and manmade fiber textile products in Categories 200–243, produced or manufactured in Hong Kong, and exported from Hong Kong to the United States on or after that date for which Hong Kong has not issued an appropriate visa, fully described below. The visa requirements, however, will become effective 60 days following the date of publication for all cotton, wool, and manmade fiber textiles and textile products produced or manufactured in Hong Kong and exported from Hong Kong to the United States before that date.

The visa will be comprised of: (1) A Certificate of Hong Kong Origin indicating the category or categories under which the textiles and textile products are classified; and (2) an export visa appearing as a stamped marking in blue ink on the front side of the Certificate of Hong Kong Origin. The export visa will be valid only if it bears the signature of an official authorized by the Hong Kong Government to issue such visa. Facsimile signatures of the authorized officials are enclosed along with facsimiles of the two documents comprising the visa.

You are further directed to allow entry into the United States for consumption and withdrawal from warehouse for consumption of designated shipments of cotton, wool, and manmade fiber textiles and textile products, produced or manufactured in Hong Kong and exported to the United States from Hong Kong, notwithstanding the designated shipment or shipments do not meet the aforementioned visa requirements, whenever requested to do so in writing by the Chairman of the Committee for the Implementation of Textile Agreements.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on April 29, 1972 (37 FR 8802).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Hong Kong and with respect to imports of cotton, wool, and manmade fiber textiles and textile products from Hong Kong, have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

STANLEY NEHMER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary and Director, Bureau of Resources and Trade Assistance.

FEDERAL MARITIME COMMISSION

PACIFIC COAST AUSTRALASIAN TARIFF BUREAU

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the field offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

F. Conger Fawcett, Esq., Graham & James, 310 Sansome Street, San Francisco, CA 94104.

Agreement No. 50–22 approved by this Commission for 1 year from January 27, 1972, between the member lines of the Pacific Coast Australasian Tariff Bureau modified the basic conference agreement, as amended, to provide for: (1) A declaration of principle to be added to Article I wherein the parties "pledge to give impartial recognition and consideration, in all matters brought for conference deliberation, to the individual characteristics, needs, desires, and capabilities of each of the other member lines" and (2) the expansion of the cargo covered in Article II to include "cargo moving under intermodal conditions from, to, or between inland points via ports within the scope of this agreement."

By letter dated December 22, 1972, the conference requested an additional 60-day extension of presently approved Agreement No. 50–22 which would then expire on March 28, 1973. In addition, the conference also requested approval for the 2-month interim period language modifying Article III, as sub-Article III (c) to provide that the conference may enter into arrangements for through transportation from and to inland points with other modes of transportation and publish rates, rules, and regulations related thereto. Member lines may issue their own bills of lading pursuant to a published conference tariff or may adopt and utilize a uniform conference through bill of lading. However, no individual member line, either alone or in concert with any other line may establish, publish, or operate unded any through intermodal rates, rules and/or conditions or issue any through bills of lading unless authorized by the conference.

Dated: January 5, 1973.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Dockets Nos. RI73–167, etc.]

AMOCO PRODUCTION CO. ET AL.

Order Providing for Hearing On and Suspension of Proposed Changes in Rates, and Allowing Rate Changes to Become Effective Subject to Refund [1]

DECEMBER 29, 1972.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth in Appendix A hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearings regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto [18 CFR, Chapter I], and the Commission's rules of practice and procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

[1] Does not consolidate for hearing or dispose of the several matters herein.

*Unless otherwise stated, the pressure base is 14.65 p.s.i.a.
[1] Contract agreement.
[2] Applicable only to production form Price Estate, Moore and Blalock Well 1-A as provided under Supplement No. 7.
[3] Rate adjusted according to Industrial Commodities Wholesale Price Index as provided by contract.
[4] Converted from filed rate of 15.2054 cents at 15.025 p.s.i.a.
[5] Converted from filed rate of 16.9577 cents at 15.025 p.s.i.a.
[6] Amends pricing provisions.
[7] Applicable to production from formations deeper than the Strawn Formation only.
[8] No current production.
[9] Amended filing made Dec. 14, 1972.
[10] Letter Agreement dated Jan. 5, 1972 providing for renegotiated base rate of 26 cents/Mcf as of Jan. 1, 1973.
[11] 26 cents base rate plus 1 cent for gas capable of producing into an 860-pound gathering system plus tax.
[12] Revised filing received on Dec. 11, 1972.
[13] Subject to upward and downward B.t.u. adjustment from 1000 B.t.u.
[14] Increase from fractured rate to contract rate.
[15] Includes a double amount of contractually due tax reimbursement.
[16] Includes only contractually due tax reimbursement.
[17] One day after the date the increase in the Wyoming Conservation Tax becomes effective.
[18] Accepted for filing to be effective on the dates shown in the "Effective Date" column.
[19] The pressure base is 15.025 p.s.i.a.

The proposed increase of Marathon Oil Co. reflects an increase in the Wyoming Conservation Tax, effective January 1, 1973. Consistent with prior Commission action on similar increases, the proposed increase is suspended for 1 day from January 1, 1973.

The proposed increases of Amoco Production Co., Skelly Oil Co., Belco Production Corp. and Sohio Petroleum Co. exceed the rate limit for a 1 day suspension, and therefore are suspended for 5 months.

The other proposed increases involved here do not exceed the corresponding rate filing limitation imposed in southern Louisiana and therefore are suspended for 1 day from the expiration of the 60 day notice period or the contractual effective date, whichever is later.

The producers' proposed increased rates and charges exceed the applicable area price levels for increased rates as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR 2.56).

CERTIFICATION OF ABBREVIATED SUSPENSION

Pursuant to § 300.16(1)(3) of the Price Commission Rules and Regulations, 6 CFR Part 300 (1972), the Federal Power Commission certifies as to the abbreviated suspension period in this order as follows:

(1) This proceeding involves producer rates which are established on an area rather than company basis. This practice was established by Area Rate Proceeding, Docket No. AR61-1, et al., Opinion No. 468, 34 FPC 159 (1965), and affirmed by the Supreme Court in Permian Basin Area Rate Case, 390 U.S. 747 (1968). In such cases as this, producer rates are approved by this Commission if such rates are contractually authorized and are at or below the area ceiling.

(2) In the instant case, the requested increases do not exceed the ceiling rate for a 1 day suspension.

(3) By Order No. 423 (36 FR 3464) issued February 18, 1971, this Commission determined as a matter of general policy that it would suspend for only 1 day a change in rate filed by an independent producer under section 4(d) of the Natural Gas Act (15 U.S.C. 717c(d)) in a situation where the proposed rate exceeds the increased rate ceiling, but does not exceed the ceiling for a 1 day suspension.

(4) In the discharge of our responsibilities under the Natural Gas Act, this Commission has been confronted with conclusive evidence demonstrating a natural gas shortage. (See Opinions Nos. 595, 598, and 607, and Order No. 435.) In these circumstances and for the reasons set forth in Order No. 423 the Commission is of the opinion in this case that the abbreviated suspension authorized herein will be consistent with the letter and intent of the Economic Stabilization Act of 1970, as amended, as well as the rules and regulations of the Price Commission, 6 CFR Part 300 (1972). Specifically, this Commission is of the opinion that the authorized suspension is required to assure continued, adequate and safe service and will assist in providing for necessary expansion to meet present and future requirements of natural gas.

[FR Doc.73-360 Filed 1-8-73;8:45 am]

[Docket No. E-7891]

CONSUMERS POWER CO.

Notice of Initial Rate Filing

JANUARY 4, 1973.

Take notice that Consumers Power Co. (Consumers Power) on September 18, 1972, tendered for filing as an initial rate schedule copies of a wholesale rate contract between Consumers Power and Wolverine Electric Cooperative, Inc., dated July 11, 1972.

Consumers Power requests that the Commission waive the notice requirements of § 35.3 of the Commission's regulations and permit the wholesale rate contract to become effective on the date that Consumers Power's proposed 46,000-7,200/12,470 volt substation is first placed in operation.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 12, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-470 Filed 1-8-73;8:45 am]

[Docket No. RP73-69]

TRANSCONTINENTAL GAS PIPELINE CORP.

Notice of Proposed Changes in Rates and Charges

JANUARY 2, 1973.

Take notice that Transcontinental Gas Pipeline Corp. (Transco), on December 15, 1972, tendered for filing proposed changes in its FPC gas tariff, consisting of six revised tariff sheets as follows:

FIRST REVISED VOLUME NO. 1

Fourth Revised Sheet No. 5
Second Revised Sheet No. 6.

ORIGINAL VOLUME NO. 2

Tenth Revised Sheet No. 52.
Sixth Revised Sheet No. 321.
Second Revised Sheet No. 416.
First Revised Sheet No. 495.

The proposed changes would increase revenues from jurisdictional sales and service by $42,250,000 annually based on a test year ending August 31, 1972, adjusted for changes known and measurable to May 31, 1973.

Transco states that the increased rates are necessitated by decreased sales, increased operating expenses, higher debt and equity costs, which Transco says necessitates an increase in the rate of return to 8.75 percent, and a claimed need for an increase in the rate of depreciation of existing facilities from 3 percent to 3.5 percent for onshore facilities and from 3 percent to 5 percent for offshore facilities. Transco also requests a waiver of § 154.63(e)(2)(ii) of the Commission's regulations to include certain noncertified facilities in its rate base. The proposed effective date of the tendered sheets is February 1, 1973.

Transco also makes two proposals which they request be determined on a prospective basis only. First, Transco proposes to track in its GSS storage service rate schedule and also in its Rate Schedule S-2 changes in the rates for storage service furnished Transco by Consolidated Gas Supply Corp. and Texas Eastern Transmission Corp. Second, Transco proposes that a 3.0 cents per Mcf exploration, and development surcharge be included in all of Transco's firm sales rate schedules for a 5-year period.

Copies of this filing were served on Transco's customers and interested State commissions.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 19, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. This application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-384 Filed 1-8-73;8:45 am]

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

PREVAILING RATE SYSTEM

Notice of Closed Meetings

Pursuant to the provisions of section 10 of Public Law 92-463, effective January 5, 1973, notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Monday, January 8, 1973.
Thursday, January 11, 1973.
Monday, January 15, 1973.
Thursday, January 18, 1973.
Monday, January 22, 1973.
Thursday, January 25, 1973.
Monday, January 29, 1973.

The meetings will convene at 10 a.m. and will be held in Room 5A06A, Civil Service Commission Building, 1900 E Street NW., Washington, D.C.

The committee's primary responsibility is to study the prevailing rate system and from time to time advise the Civil Service Commission thereon.

At these scheduled meetings, the committee will consider proposed plans for implementation of Public Law 92-392, which law establishes pay systems for Federal prevailing rate employees.

The meetings will be closed to the public under a determination to do so, made under the provisions of section 10(d) of Public Law 92-463.

However, members of the public who may wish to do so, are invited to submit material in writing to the Chairman concerning matters felt to be deserving of the committee's attention. Additional information concerning these meetings may be obtained by contacting the Chairman, Federal Prevailing Rate Advisory Committee, Room 5554, 1900 E Street NW., Washington, D.C.

DAVID T. ROADLEY,
Chairman, Federal Prevailing Rate Advisory Committee.

JANUARY 5, 1973.

FEDERAL RESERVE SYSTEM

ALASKA BANCSHARES, INC.

Determination Regarding "Grandfather" Privileges

Section 4 of the Bank Holding Company Act (12 U.S.C. 1843) provides certain privileges ("grandfather" privileges) with respect to nonbanking activities of a company that, by virtue of the 1970 amendments to the Bank Holding Company Act, became subject to the Bank Holding Company Act. Pursuant to section 4(a)(2) of the Act, a "company covered in 1970" may continue to engage, either directly or through a subsidiary, in nonbanking activities that such company was lawfully engaged in on June 30, 1968 (or on a date subsequent to June 30, 1968, in the case of activities carried on as a result of the acquisition by such company or subsidiary, pursuant to a binding written contract entered into on or before June 30, 1968, of another company engaged in such activities at the time of the acquisition), and has been continuously engaged in since June 30, 1968 (or such subsequent date).

Section 4(a)(2) of the Act provides, inter alia, that the Board of Governors of the Federal Reserve System may terminate such grandfather privileges if, having due regard to the purposes of the Act, the Board determines that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. With respect to a company that controls a bank with assets of $60 million on or after December 31, 1970, the Board is required to make such a determination within a 2-year period.

Notice of the Board's proposed review of the grandfather privileges of Alaska Bancshares, Inc., Anchorage, Alaska, and an opportunity for interested persons to submit comments and views or request a hearing, has been given (37 FR 22414). The time for filing comments, views, and requests has expired, and all those received have been considered by the Board in light of the factors set forth in section 4(a)(2) of the Act.

On the evidence before it, the Board makes the following findings. Alaska Bancshares, Inc.,[1] Anchorage, Alaska (Registrant), became a bank holding company on December 31, 1970, as a result of the 1970 amendments to the Act, by virtue of Registrant's ownership of approximately 50 percent of the voting shares of Alaska State Bank, Anchorage, Alaska (Bank) (assets of $66 million as of December 31, 1970). Bank, which became a subsidiary of Registrant in 1962, had total deposits of approximately $62 million as of December 31, 1971, representing about 9½ percent of the total deposits in the State and giving Bank a rank of third in the State. Bank's offices

[1] Alaska Bancorporation, Anchorage, Alaska, which owns over 65 percent of the voting shares of Alaska Bancshares, became a bank holding company by virtue of the 1970 amendments to the Bank Holding Company Act. However, Alaska Bancorporation was incorporated on July 16, 1969 and acquired its interest in Alaska Bancshares on Aug. 5, 1969. Alaska Bancorporation acquired 100 percent of the voting shares of Alaska North Slope Oil Co., Inc., Anchorage, Alaska, on July 18, 1969. Alaska Bancorporation neither claims nor is entitled to grandfather benefits.

V 38 - 5 JAN 9 73 XUM

in Anchorage and Fairbanks rank fourth and third, respectively, of five banks in each of these cities. Bank is not regarded as one of the dominant financial institutions in the State but is a significant competitor. While Bank's present financial condition appears to be satisfactory, the evidence of record in this case points to areas of legitimate concern involving practices of Registrant's management that have potential for impairing Bank's financial condition. Exemplifying one action of management that is of concern to the Board is the relationship that exists between Bank as a subsidiary of Alaska Bancorporation (parent of Registrant) and North Slope Oil Co., Inc., also a subsidiary of Alaska Bancorporation, a relationship that might lead to financial difficulties for the Bank through the use of Bank's resources to further the interests of the North Slope venture. Registrant has no grandfather benefits with respect to the North Slope activity and, in view of the aforesaid adverse aspects of Bank's and Registrant's relationships with North Slope, Registrant is urged to take steps to terminate its affiliation with North Slope at the earliest practicable time.

Registrant engages directly in real estate development, insurance agency activities, mortgage financing, and acts as investment adviser and management consultant to Bank. On the basis of the facts presented, these activities were commenced before June 30, 1968, and have been conducted continuously since that date. Registrant's investment adviser and management consultant and adviser services appear to be limited exclusively to Bank; on this basis, these activities appear to be exempt, under section 4(c)(1)(C), from the general prohibitions of section 4 of the Act. Through Bank's 100 percent owned subsidiary (Alaska State Bank Building Corp., Anchorage, Alaska), Registrant owns real property used principally by Bank, an activity that appears to be exempt under section 4(c)(1)(A) of the Act.

Registrant's nonbanking activities, for which grandfather privileges seem applicable, appear to be limited in scope and not to affect significantly the market position of Bank. The real estate development activities consist of holding property in two subdivisions near Anchorage with a book value of $48,000. The insurance agency and mortgage financing activities apparently produced gross income of $16,000 and $2,800, respectively, during the first half of 1972. These grandfathered activities of Registrant do not now evidence an undue concentration of resources nor decreased or unfair competition. On the other hand, the Board is concerned about Registrant's management, about the unhealthy debt position of Registrant and its parent organization, and about the burdensome aspect of Registrant's interest commitments, particularly in the light of Registrant's reported annual cash income (as reported for calendar years 1970 and 1971), which appears to be short for servicing Registrant's debt. Because the nonbank grandfathered activities apparently have not affected the Bank in any significant adverse respect; and since 38 percent of Registrant's income derives from said nonbanking activities, so that measures looking to a curtailment of Registrant's nonbanking grandfathered activities might have an adverse effect on Bank and might tend to weaken Registrant's financial structure, the Board has concluded that, at this time, Registrant should not be required to relinquish its grandfather privileges. However, Registrant's real estate activities are limited to the two subdivisions now owned. Also, Registrant is urged to take immediate and effective steps to improve its financial condition and its management and to avoid any pressure on the Bank to pay out excessive dividends or engage in any other unsound banking practice. And applicant is alerted to the intent of the Board to require termination of grandfather benefits if it determines that such action is necessary to prevent unsound banking practices (or any of the other evils described in the Act).

It is the Board's judgment that, at this time, termination of the grandfather privileges of Registrant is not necessary in order to prevent an undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. However, this determination is not authority to enter into any activity that was not engaged in on June 30, 1968, and continuously thereafter, or any activity that is not the subject of this determination.

A significant alteration in the nature or extension of Registrant's activities or a change in location thereof (significantly different from any described in this determination) will be cause for a reevaluation by the Board of Registrant's activities under the provisions of section 4(a)(2) of the Act, that is, whenever the alteration or change is such that the Board finds that a termination of the grandfather privileges is necessary to prevent an undue concentration of resources or any of the other evils designated in the Act. No merger, consolidation, acquisition of assets other than in the ordinary course of business, nor acquisition of any interest in a going concern, to which the Registrant or any nonbank subsidiary thereof is a party, may be consummated without prior approval of the Board. Further, the provision of any credit, property, or service by the Registrant or any subsidiary thereof shall not be subject to any condition which, if imposed by a bank, would constitute an unlawful tie-in arrangement under § 106 of the Bank Holding Company Act Amendments of 1970.

The determination herein does not preclude a later review, by the Board, of Registrant's nonbank activities and a future determination by the Board in favor of termination of grandfather benefits of Registrant. The determination herein is subject to the Board's authority to require modification or termination of the activities of Registrant or any of its nonbanking subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasions thereof.

By determination of the Board of Governors,[1] effective December 29, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

[FR Doc.73-423 Filed 1-8-73;8:45 am]

AMERICAN CAPITAL CORP.

Proposed Retention of Economy Loan Co. of Texas

American Capital Corp., Houston, Tex., has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(2)) of the Board's Regulation Y, for permission to retain voting shares of Economy Loan Co. of Texas, Houston, Tex.

Notice of the application was published in the following newspapers of general circulation on the dates indicated below:

The American-Statesman	Austin, Tex.	Nov. 16, 1972
The Brownsville Herald	Brownsville, Tex.	Nov. 15, 1972
The Daily Courier	Montgomery County, Tex.	Nov. 30, 1972
Elgin Courier	Elgin, Tex.	Nov. 16, 1972
The Waco News-Tribune and Waco Times Herald	Waco, Tex.	Nov. 15, 1972

Applicant has a pending application pursuant to § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)), to become a bank holding company (see 37 FR 23222). Applicant states that the proposed subsidiary would engage in the activities of making consumer loans and the leasing of various types of personal property. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than January 25, 1973.

[SEAL] MICHAEL A. GREENSPAN,
Assistant Secretary of the Board.

[FR Doc.73-424 Filed 1-8-73;8:45 am]

[1] Voting for this action: Chairman Burns and Governors Robertson, Mitchell, Daane, Brimmer, and Sheehan. Absent and not voting: Governor Bucher.

COMBANKS CORP.

Acquisition of Bank

JANUARY 2, 1973.

Combanks Corp., Winter Park, Fla., has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire not less than 98.8 percent of the voting shares of the Commercial Bank at Union Park, Union Park, Fla., a proposed new bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit his views in writing to the Reserve Bank to be received not later than January 19, 1973.

Board of Governors of the Federal Reserve System, January 2, 1973.

[SEAL] MICHAEL A. GREENSPAN,
Assistant Secretary of the Board.

[FR Doc.73-404 Filed 1-8-73;8:45 am]

COMMERCE BANCSHARES, INC.

Order Approving Acquisition of Bank

Commerce Bancshares, Inc., Kansas City, Mo., a bank holding company within the meannig of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 percent or more of the voting shares of Citizens Bank of Festus, Festus, Mo.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none has been timely received. The Board has considered the application in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant has 23 subsidiary banks with total deposits of $995.9 million, representing 8.0 percent of total commercial bank deposits in Missouri, and is the second largest bank holding company and banking organization in the State. (All banking data are as of June 30, 1972, adjusted to reflect holding company formations and acquisitions approved by the Board through December 15, 1972.) The acquisition of Bank ($16.3 million deposits) would increase applicant's share of the State's total deposits by 0.13 percent, increasing concentration in Missouri only slightly.

Bank is the largest of seven banking organizations in the Festus-Crystal City banking market which includes all of Jefferson County except a small northern portion that is included in the St. Louis market. Although Bank controls 26.9 percent of market deposits, it is only slightly larger than the second largest bank (14.6 million deposits) and does not appear to be dominant in the market. Applicant's closest subsidiary banking office is located in a separate market area, 20 miles north of Bank. There is no meaningful present competition between any of applicant's subsidiary banks and Bank. Furthermore, it appears unlikely that any significant competition would develop between any of applicant's subsidiaries and Bank in the future due to the distances separating the banking offices, Missouri's restrictive branching law, and the presence of numerous banking alternatives in the intervening areas. The Board concludes that consummation of the proposal would not eliminate existing or potential competition, nor would it have significantly adverse effects on any competing bank.

Considerations relating to the financial and managerial resources and future prospects of applicant, its subsidiary banks, and Bank are satisfactory and consistent with approval of the application. While it appears that major banking needs in the area are being met, considerations relating to the convenience and needs of the communities to be served are consistent with approval of the application. It is the Board's judgment that the proposed transaction would be in the public interest, and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated: (a) Before the 30th calendar day following the effective date of this order or (b) later than 3 months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[1] effective December 27, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

[FR Doc.73-425 Filed 1-8-73;8:45 am]

DELTA LOAN & FINANCE CO.

Determination Regarding "Grandfather Privileges"

Section 4 of the Bank Holding Company Act (12 U.S.C. 1843) provides certain privileges (grandfather privileges) with respect to nonbanking activities of a company that, by virtue of the 1970 amendments to the Bank Holding Company Act, became subject to the Bank Holding Company Act. Pursuant to section 4(a)(2) of the Act, a "company covered in 1970" may continue to engage, either directly or through a subsidiary, in nonbanking activities that such a company was lawfully engaged in on June 30, 1968 (or on a date subsequent to June 30, 1968, in the case of activities carried on as a result of the acquisition by such company or subsidiary, pursuant to a binding written contract entered into on or before June 30, 1968, of another company engaged in such activities at the time of the acquisition), and has been continuously engaged in since June 30, 1968 (or such subsequent date).

Section 4(a)(2) of the Act provides, inter alia, that the Board of Governors of the Federal Reserve System may terminate such grandfather privileges if, having due regard to the purposes of the Act, the Board determines that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. With respect to a company that controls a bank with assets in excess of $60 million on or after December 31, 1970, the Board is required to make such a determination within a 2-year period.

Notice of the Board's proposed review of the grandfather privileges of the Delta Loan & Finance Co., St. Louis, Mo., and an opportunity for interested persons to submit comments and views or request a hearing, has been given (37 FR 22414). The time for filing comments, views, and requests has expired, and all those received have been considered by the Board in light of the factors set forth in section 4(a)(2) of the Act.

On the evidence before it, the Board makes the following findings. Delta Loan & Finance Co., St. Louis, Mo. (Registrant), became a bank holding company on December 31, 1970, as a result of the 1970 amendments to the Act, by virtue of Registrant's ownership of approximately 97 percent of the voting shares of Jefferson Bank and Trust Co., St. Louis, Mo. (Bank) (assets of $82.2 million as of December 31, 1970). Bank, control of which was acquired by Registrant in January 1950, had total deposits of approximately $80 million as of December 31, 1971, representing a little over 2 percent of the total deposits of the 27 commercial banks in the city of St. Louis, and is the 14th largest of 88 banking organizations in the St. Louis banking market. Bank's management, financial condition and prospects are regarded as satisfactory, and the Board has found no evidence of any unsound banking practices.

Registrant is a finance company and engages directly in consumer lending, commercial lending, purchasing installment time sales contracts and loan participations with Bank, and apparently has engaged in such activities continuously since before June 30, 1968. In addition, Registrant has four nonbanking subsidiaries which are engaged in nonbanking activities that appear eligible

[1] Voting for this action: Chairman Burns and Governors Robertson, Mitchell, Daane, Brimmer, and Sheehan. Absent and not voting: Governor Bucher.

V 38 - 5 JAN 9 73 XUM

for grandfather benefits. Delta Loan & Finance Co. of Tennessee, Memphis, Tenn. (acquired in July 1952) makes consumer and commercial loans. Delta Discount Co., Memphis, Tenn. (acquired in March 1961) purchases installment time contracts. Valley Printing Co., St. Louis, Mo. (acquired in June 1954) is engaged in the printing of supplies and forms almost exclusively for Registrant and its subsidiaries. Southeast Missouri Insurance & Finance Agency, Inc., St. Louis, Mo. (acquired in June 1954) makes direct loans secured by real estate.

On the basis of total capital funds, Registrant ranks as the 82d largest independent finance company in the United States; in the St. Louis market, Registrant competes with 20 of the 100 largest independent U.S. finance companies and is smaller than any of these 20. Registrant's three branch offices are located in southeastern Missouri—are at least 50 miles apart, each is more than 130 miles from St. Louis or Memphis and competes only in its respective area. Southeast Missouri Insurance & Finance Agency, Inc. (also located in St. Louis) has an insignificant volume of loan activity with less than $10,000 in loans outstanding as of December 31, 1971, and appears to have no current insurance activity. Delta Loan & Finance of Tennessee and Delta Discount Co. engage in consumer and commercial lending in Memphis, compete with 16 of the 100 largest independent U.S. finance companies, are smaller than any of the 16 and compete also with nine commercial banks. Valley Printing, with assets of $89,000, competes with more than 300 printing firms in the St. Louis area, and it appears that 99 percent of its printing services are performed for Registrant and its subsidiaries.

On the basis of the foregoing and all the facts before the Board, it appears that the volume, scope, and nature of the activities of Registrant and its subsidiaries do not demonstrate an undue concentration of resources, decreased or unfair competition, conflicts of interest nor unsound banking practices.

There appears to be no reason to require Registrant to cease engaging in the activities it engages in directly nor to require Registrant to terminate its interests in its grandfathered subsidiaries. It is the Board's judgment that, at this time, termination of the grandfather privileges of Registrant is not necessary in order to prevent an undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. However, this determination is not authority to enter into any activity that was not engaged in on June 30, 1968, and continuously thereafter, or any activity that is not the subject of this determination.

A significant alteration in the nature or extension of Registrant's activities or a change in location thereof (significantly different from any described in this determination) will be cause for a reevaluation by the Board of Registrant's activities under the provisions of section 4(a)(2) of the Act, that is, whenever the alteration or change is such that the Board finds that a termination of the grandfather privileges is necessary to prevent an undue concentration of resources or any of the other evils designated in the Act. No merger, consolidation, acquisition of assets other than in the ordinary course of business, nor acquisition of any interest in a going concern, to which the Registrant or any nonbank subsidiary thereof is a party may be consummated without prior approval of the Board. Further, the provision of any credit, property, or service by the Registrant or any subsidiary thereof shall not be subject to any condition which, if imposed by a bank would constitute an unlawful tie-in arrangement under section 106 of the Bank Holding Company Act Amendments of 1970.

The determination herein does not preclude a later review, by the Board, of Registrant's nonbank activities and a future determination by the Board in favor of termination of grandfather benefits of Registrant. The determination herein is subject to the Board's authority to require modification or termination of the activities of Registrant or any of its nonbanking subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasions thereof.

By determination of the Board of Governors,[1] effective December 27, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

[FR Doc.73-426 Filed 1-8-73;8:45 am]

DIVERSIFIED MOUNTAINEER CORP.

Formation of Bank Holding Company and Proposed Retention of Nonbanking Activities

Diversified Mountaineer Corp., Charleston, W. Va., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 85 percent or more of the voting shares of First National Bank of South Charleston, South Charleston, W. Va. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Diversified Mountaineer Corp. has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to retain the voting shares of Kanawha City Savings & Loan Co., Charleston, W. Va.; Diversified Savings & Loan Co. of Bluefield, Bluefield, W. Va.; Diversified Savings & Loan Co. of Chester, Chester, W. Va.; Diversified Savings & Loan Co. of Elkins, Elkins, W. Va.; Diversified Savings & Loan Co. of Huntington, Huntington, W. Va.; Diversified Savings & Loan Co. of Logan, Logan, W. Va.; Diversified Savings & Loan Co. of Moundsville, Moundsville, W. Va.; Fayette Loan & Thrift Co., Lexington, Ky.; Richmond Industrial Loan & Thrift, Richmond, Va.; Roanoke Industrial Loan & Thrift, Roanoke, Va.; Commonwealth Loan & Thrift Corp., Bristol, Tenn.; Valley Insurance Agency, Inc., Charleston, W. Va.; The Insurance Co. of Delaware, Charleston, W. Va.; Commonwealth Discount Corp., Commonwealth Mortgage Corp., and DMC Securities, Inc., all with offices in Charleston, W. Va. Notices of the application were published on October 20, 21, 22, or 23, 1972, in various newspapers circulated in the 11 communities in West Virginia, Kentucky, Virginia, and Tennessee, where the proposed subsidiaries' various offices are located.

Applicant states that the proposed subsidiaries would continue to engage in industrial banking activities in the manner authorized by State law and act as reinsurer for credit life and disability insurance sold in connection with credit transactions. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies under certain conditions and subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b). Applicant further states that the proposed subsidiaries would act as agent for credit life and disability insurance sold in connection with credit transactions. Under certain circumstances specified in § 225.4(a)(9) of Regulation Y and 12 CFR 225.128, such activities may be permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Richmond.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than January 29, 1973.

[1] Voting for this action: Chairman Burns and Governors Robertson, Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Governor Daane.

Board of Governors of the Federal Reserve System, January 2, 1973.

[SEAL] MICHAEL A. GREENSPAN,
Assistant Secretary of the Board.

[FR Doc.73-405 Filed 1-8-73;8:45 am]

ESTATE OF JAMES MILLIKIN, DECEASED

Determination Regarding "Grandfather" Privileges

Section 4 of the Bank Holding Company Act (12 U.S.C. 1843) provides certain privileges ("grandfather" privileges) with respect to nonbanking activities of a company that, by virtue of the 1970 amendments to the Bank Holding Company Act, became subject to the Bank Holding Company Act. Pursuant to section 4(a)(2) of the Act, a "company covered in 1970" may continue to engage, either directly or through a subsidiary, in nonbanking activities that such a company was lawfully engaged in on June 30, 1968 (or on a date subsequent to June 30, 1968, in the case of activities carried on as a result of the acquisition by such company or subsidiary, pursuant to a binding written contract entered into on or before June 30, 1968, or another company engaged in such activities at the time of the acquisition), and has been continuously engaged in since June 30, 1968 (or such subsequent date).

Section 4(a)(2) of the Act provides, inter alia, that the Board of Governors of the Federal Reserve System may terminate such grandfather privileges if, having due regard to the purposes of the Act, the Board determines that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. With respect to a company that controls a bank with assets in excess of $60 million on or after December 31, 1970, the Board is required to make such a determination within a 2-year period.

Notice of the Board's proposed review of the grandfather privileges of the estate of James Millikin, deceased, Decatur, Ill., and an opportunity for interested persons to submit comments and views or request a hearing, has been given (37 FR 22414). The time for filing comments, views, and requests has expired, and all those received have been considered by the Board in light of the factors set forth in section 4(a)(2) of the Act.

On the evidence before it, the Board makes the following findings. The estate of James Millikin, deceased, Decatur, Ill. (Registrant) became a bank holding company on December 31, 1970, as a result of the 1970 amendments to the Act, by virtue of Registrant's ownership of 55 percent of the outstanding voting shares of the Millikin National Bank of Decatur, Decatur, Ill. (Bank) (assets of $105.4 million as of December 31, 1970). Control of this Bank was acquired by Registrant on June 3, 1909, when Registrant was formed in a bequest of James Millikin, deceased. Bank had total deposits of $95.9 million as of December 31, 1971, representing 29.2 percent of total deposits of commercial banks in Macon County, and is the largest of 13 banks in Macon County, Ill. Bank's management, financial condition, and prospects are regarded as satisfactory, and the Board has found no evidence of any unsound banking practices.

Registrant is a testamentary charitable trust administered by the trustees under the decedent's will for the benefit of charitable and educational institutions within the city of Decatur, Ill. Registrant's nonbanking activities consist of ownership and operation of rural and urban real estate, ownership of various stocks and bonds and other assets. Registrant has no subsidiary other than Bank. It appears that all of the above activities have been engaged in continuously since June 30, 1968, and are eligible for retention by virtue of Registrant's grandfather privileges.

Registrant's assets, as of December 31, 1971, include two farms (valued at $327,246), a single family dwelling (valued at $17,000), common stock (valued at $250,913) other than bank stock, preferred stock (valued at $67,725), corporate and municipal bonds and notes (valued at $396,189), cash and U.S. Treasury bills (valued at $174,315), receivables (in the amount of $23,306), and 88,000 shares of Bank's stock (valued at $4,840,000). Registrant controls approximately 0.2 percent of total rental farmland in Christian County, Ill.; 0.3 percent of total rental farmland in Shelby County, Ill.; and 0.01 percent of the total number of rental occupied units in Decatur, Ill.

On the basis of the foregoing and all the facts before the Board, it appears that the volume, scope, and nature of the activities of Registrant and its subsidiaries do not demonstrate an undue concentration of resources, decreased or unfair competition, conflicts of interest nor unsound banking practices.

There appears to be no reason to require Registrant to terminate its nonbanking interests. It is the Board's judgment that, at this time, termination of the grandfather privileges of Registrant is not necessary in order to prevent an undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. However, this determination is not authority to enter into any activity that was not engaged in on June 30, 1968, and continuously thereafter, or any activity that is not the subject of this determination. Nor is this determination authority for Registrant to acquire additional shares in any company if the Registrant's holdings in said company will exceed 5 percent of the outstanding voting shares of such company.

A significant alteration in the nature or extension of Registrant's activities or a change in location thereof (significantly different from any described in this determination) will be cause for a reevaluation by the Board of Registrant's activities under the provisions of section 4(a)(2) of the Act, that is, whenever the alteration or change is such that the Board finds that a termination of the grandfather privileges is necessary to prevent an undue concentration of resources or any of the other evils designated in the Act. No merger, consolidation, acquisition of assets other than in the ordinary course of business, nor acquisition of any interest in a going concern, to which the Registrant or any nonbank subsidiary thereof is a party, may be consummated without prior approval of the Board. Further, the provision of any credit, property, or service by the Registrant or any subsidiary thereof shall not be subject to any condition which, if imposed by a bank, would constitute an unlawful tie-in arrangement under § 106 of the Bank Holding Company Act Amendments of 1970.

The determination herein does not preclude a later review, by the Board, of Registrant's nonbank activities and a future determination by the Board in favor of termination of grandfather benefits of Registrant. The determination herein is subject to the Board's authority to require modification or termination of the activities of Registrant or any of its nonbanking subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasions thereof.

By determination of the Board of Governors,[1] effective December 29, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

FIRST CONTINENTAL CORP.

Order Approving Formation of Bank Holding Company

First Continental Corp., Boulder, Colo., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 100 percent of the voting shares (qualifying shares to be sold to directors immediately thereafter) of the First National Bank of Brush, Brush, Colo. (Bank).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is a nonoperating company, recently formed for the purpose of acquiring Bank ($8.5 million deposits). (Banking data are as of June 30, 1972.) Bank is the third largest of six banks in Morgan County which is the relevant market area; the two largest banks hold deposits of $22.1 and $11.2 million, respectively. Consummation of the proposal would have no adverse effects on the other market banks. Since applicant has no present operations or subsidiaries, it appears that consummation of the proposal would not significantly affect existing or potential competition. Therefore, competitive considerations are consistent with approval of the application.

Applicant's management is capable; its financial condition is dependent on that of Bank which is deemed to be satisfactory. Prospects for both applicant and Bank are favorable in view of applicant's plan to provide the management Bank needs and additional staff. Although applicant will incur considerable debt in acquiring Bank, its income from Bank should provide sufficient revenue to retire the debt within 10 years. Banking factors are therefore consistent with approval of the application. Considerations relating to the convenience and needs of the community are also consistent with approval of the application. It is the Board's judgment that the transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated: (a) Before the 30th calendar day following the effective date of this order or (b) later than 3 months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[1] effective December 27, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

[FR Doc.73-431 Filed 1-8-73;8:45 am]

FIRST NATIONAL BANK VOTING TRUST

"Grandfather" Privileges Under Bank Holding Company Act

Section 4 of the Bank Holding Company Act (12 U.S.C. 1843) provides certain privileges ("grandfather" privileges) with respect to nonbanking activities of a company that, by virtue of the 1970 amendments to the Bank Holding Company Act, became subject to the Bank Holding Company Act. Pursuant to section 4(a)(2) of the Act, a "company covered in 1970" may continue to engage, either directly or through a subsidiary, in nonbanking activities that such a company was lawfully engaged in on June 30, 1968 (or on a date subsequent to June 30, 1968, in the case of activities carried on as a result of the acquisition by such company or subsidiary, pursuant to a binding written contract entered into on or before June 30, 1968, of another company engaged in such activities at the time of the acquisition), and has been continuously engaged in since June 30, 1968 (or such subsequent date).

Section 4(a)(2) of the Act provides, inter alia, that the Board of Governors of the Federal Reserve System may terminate such grandfather privileges if, having due regard to the purposes of the Act, the Board determines that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. With respect to a company that controls a bank with assets in excess of $60 million on or after December 31, 1970, the Board is required to make such a determination within a 2-year period.

Notice of the Board's proposed review of any grandfather privileges of the First National Bank Voting Trust, Hollywood, Fla., and an opportunity for interested persons to submit comments and views or request a hearing, has been given (37 FR 22414). The time for filing comments, views, and requests has expired, and all those received have been considered by the Board in light of the factors set forth in section 4(a)(2) of the Act.

In connection with the Board's review of the operations of First National Bank Voting Trust (Trust), relating to a possible termination of grandfather privileges, the facts presented to the Board indicate that the Trust does not constitute a "company" as defined in section 2(b) of the Bank Holding Company Act. The evidence before the Board shows that the Trust does not participate in the management or policies of First National Bank of Hollywood (apart from voting for the election of directors) and is a 10-year voting trust that, by its terms, will terminate on or before May 19, 1974. Accordingly, as presently organized and administered, the First National Bank Voting Trust does not constitute a "bank holding company" under the Act and the question of the termination of grandfather privileges of First National Bank Voting Trust is moot.

This conclusion is based upon facts presented to the Board, and any material change in those facts may result in a different conclusion.

Board of Governors, December 29, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

[FR Doc.73-432 Filed 1-8-73;8:45 am]

[1] Voting for this action: Chairman Burns and Governors Robertson, Mitchell, Daane, Brimmer, and Sheehan. Absent and not voting: Governor Bucher.

GREATER JERSEY BANCORP.

Acquisition of Bank

Greater Jersey Bancorp., Clifton, N.J., has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of the Provident Bank of New Jersey, Willingboro, N.J. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of New York. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than January 25, 1973.

Board of Governors of the Federal Reserve System, December 29, 1972.

INSURED BANKS

Joint Call for Report of Condition

CROSS REFERENCE: For a document pertaining to the joint call for report of condition of insured banks, issued jointly by the Federal Deposit Insurance Corporation, the Federal Reserve System, and the Comptroller of the Currency, see FR Doc. 73-385, *supra*.

MIDWEST BANK SHARES, INC.

Order Approving Formation of Bank Holding Company

Midwest Bank Shares, Inc., Moline, Ill., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 29.36 percent or more of the voting shares of the De Witt County National Bank of Clinton, Clinton, Ill. (Bank).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant was organized in 1971 for the primary purpose of becoming a bank holding company with respect to Bank. However, since its formation, applicant has been engaged in offering various services to certain associated banks (discussed hereinafter). As applicant does not have any banking subsidiaries at this time, this transaction would eliminate neither existing nor potential competition.

Bank ($12.6 million in deposits), located in the city of Clinton, Ill. (population approximately 7,800), is the third largest of four banks in De Witt County and controls 28.6 percent of total commercial deposits in the county and 0.03 percent of total commercial deposits in the State.[1] In view of the above, the Board concludes that consummation would not have an adverse effect on any other banking institution or result in the concentration of banking resources in any relevant area. It also appears that community needs for banking services are presently being served and that approval of this proposal would have no immediate effect thereon; however, improvements anticipated under applicant's management would enhance Bank's ability to meet the future needs and convenience of the community.

Bank is in less than satisfactory financial condition notwithstanding recent improvements achieved through new management and ownership,[2] and the injection of additional capital funds; however, Bank has favorable prospects under its present management which is believed to be capable. Applicant's financial condition and management are considered satisfactory and future prospects are most favorable. However, these projections are dependent upon applicant's continuation of its present "nonbanking" activities for a 2-year period. During this time, income largely derived from these activities would be used to reduce the initial acquisition debt to a level serviceable without income from the activities to be discontinued. (The acquisition debt of $140,000 is scheduled to be repaid in semiannual payments over a period of 5 years; an analysis of applicant's earnings statement appears to support applicant's ability to service the debt.) In view of Bank's past operating difficulties and present less than satisfactory condition, it is imperative that Bank's ownership be vested in an entity with demonstrated financial and managerial strength. The Board is of the opinion that applicant has demonstrated both its ability and willingness to provide Bank with the leadership and resources required to return it to a viable condition. Therefore, banking factors lend substantial weight toward approval of this application.

As described in footnote 2 above, applicant furnishes management services to nonsubsidiary banks; these services are not activities that the Board has at present determined to be permissible activities for bank holding companies within the statutory criteria set forth in section 4(c)(8) of the Act. Applicant, however, has committed itself to discontinue such activities within 2 years from the date of the Board's approval of this application. While the Board would normally regard the combination of banking and impermissible nonbanking activities, even for a period as short as 2 years, as an adverse factor in its consideration of an application, under the circumstances of this case such a combination for this limited period would be consistent with the public interest. Accordingly, unless the Board shall, prior to 2 years from the date of this order, determine that the management services presently conducted by applicant are permissible for bank holding companies under section 4(c)(8) of the Act, or are otherwise permissible, applicant shall, as a condition of the approval of this application, discontinue such activities.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated: (a) Before the 30th calendar day following the effective date of this order, or (b) later than 3 months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago pursuant to delegated authority.

By order of the Board of Governors,[3] effective December 27, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

[FR Doc.73-406 Filed 1-8-73;8:45 am]

SEALY AND SMITH FOUNDATION FOR THE JOHN SEALY HOSPITAL

Determination Regarding "Grandfather" Privileges Under Bank Holding Company Act

Section 4 of the Bank Holding Company Act (12 U.S.C. 1843) provides certain privileges ("grandfather" privileges) with respect to nonbanking activities of a company that, by virtue of the 1970 amendments to the Bank Holding Company Act, became subject to the Bank Holding Company Act. Pursuant to section 4(a)(2) of the Act, a "company covered in 1970" may continue to engage, either directly or through a subsidiary, in nonbanking activities that such a company was lawfully engaged in on June 30, 1968 (or on a date subsequent to

[1] Bank deposit data are as of June 30, 1972.

[2] Applicant's chairman, individually, acquired 30.36 percent of the stock of Bank in 1971 with the support of the regional administrator of national banks as a salvage move. Applicant was organized to acquire 29.36 percent of these shares by several career bankers who are associated as officers and/or directors in one or more of 17 banks (including Bank), all located in the northern half of Illinois and one bank located in eastern Iowa, and who refer to themselves as the "Midwest Associated Banks of America." These banks are a substantial distance from Bank (the nearest is 60 miles away) and it appears unlikely that their respective service areas would overlap with the service area of Bank. Members of this banking chain have through the years shared in the services which are now being offered through applicant. These management services furnished to client banks for a fee include examination of banks, insurance reviews, tax preparation, and the supervision of "disaster preparedness" programs.

[3] Voting for this action: Chairman Burns and Governors Robertson, Mitchell, Daane, Brimmer, and Sheehan. Absent and not voting: Governor Bucher.

V 38 - 5 JAN 9 73 XUM

June 30, 1968, in the case of activities carried on as a result of the acquisition by such company or subsidiary, pursuant to a binding written contract entered into on or before June 30, 1968, of another company engaged in such activities at the time of the acquisition), and has been continuously engaged in since June 30, 1968 (or such subsequent date).

Section 4(a)(2) of the Act provides, inter alia, that the Board of Governors of the Federal Reserve System may terminate such grandfather privileges if, having due regard to the purposes of the Act, the Board determines that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices. With respect to a company that controls a bank with assets in excess of $60 million on or after December 31, 1970, the Board is required to make such a determination within a 2-year period.

Notice of the Board's proposed review of the grandfather privileges of the Sealy and Smith Foundation for the John Sealy Hospital, Galveston, Tex., and an opportunity for interested persons to submit comments and views or request a hearing, has been given (37 F.R. 22414). The time for filing comments, views, and requests has expired, and all those received have been considered by the Board in light of the factors set forth in section 4(a)(2) of the Act.

On the evidence before it, the Board makes the following findings. The Sealy and Smith Foundation for the John Sealy Hospital, Galveston, Tex. (Registrant), became a bank holding company on December 31, 1970, as a result of the 1970 amendments to the act, by virtue of Registrant's ownership of approximately 48 percent of the voting shares of the First Hutchins-Sealy National Bank, Galveston, Tex. (Bank) (assets of $62.1 million as of December 31, 1970). Bank, which was acquired by Registrant more than 40 years ago, had total deposits of $61.9 million as of December 31, 1971, representing about 20 percent of the total commercial bank deposits in the Galveston Market, and is the largest of 14 banks in the Galveston market. Registrant also holds (and has held for more than 40 years) 19.7 percent of the voting shares of University National Bank, Galveston, Tex. ($4.8 million deposits as of December 31, 1971), the 13th largest bank in the Galveston market with about 1.6 percent of the total commercial bank deposits therein. Bank's management, financial condition, and prospects are regarded as satisfactory, and the Board has found no evidence of any unsound banking practices. The same conclusions and findings apply with respect to the operations of University National Bank.

Registrant is a nonprofit organization established in 1922 to engage directly in the operation of a charitable foundation principally for the benefit of the John Sealy Hospital, and apparently has engaged in such activities continuously since June 30, 1968. Registrant's nonbanking activities include investments in stocks, bonds, and real properties; owning and operating the John Sealy Hospital in Galveston and two other buildings for the University of Texas Medical School; owning and operating parking facilities and apartments principally for the use of the hospital staff; sale and leasing of land (less than 10,000 acres) now owned in Texas for oil exploration and agricultural uses; and ownership of 19.2 percent of the shares of Cotton Concentration Co., Galveston, Tex., a company engaged in the manufacturing of fiberglass pipe. It appears that all of the above activities have been engaged in continuously since June 30, 1968, and are eligible for retention by virtue of Registrant's grandfather privileges.

Registrant does not appear to be dominant in any of the activities in which it engages directly or indirectly. It holds total assets of $28.9 million as of December 31, 1971, and all of the net profits of Registrant are devoted to the charitable purposes of the foundation, i.e., the John Sealy Hospital. The John Sealy Hospital is one of three hospitals in Galveston; and the parking facilities, apartment buildings, and two other buildings are owned and operated in conjunction with the hospital and the University of Texas Medical School in Galveston. The land holdings of Registrant are dispersed and do not appear to constitute a significant portion of the land in Texas held for oil exploration and agricultural uses. Cotton Concentration Co. ($4.9 million in assets as of December 31, 1970) competes with numerous fiberglass pipe manufacturers and steel pipe manufacturers in the high pressure pipe market in Texas and Louisiana, and produces less than 1 percent of the total output of pipe in that market.

On the basis of the foregoing and all the facts before the Board, it appears that the volume, scope, and nature of the activities of Registrant and its subsidiaries do not demonstrate an undue concentration of resources, decreased or unfair competition, conflicts of interest nor unsound banking practices.

There appears to be no reason to require Registrant to terminate its nonbanking interests. It is the Board's judgment that, at this time, termination of the grandfather privileges of Registrant is not necessary in order to prevent an undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. However, this determination is not authority to enter into any activity that was not engaged in on June 30, 1968, and continuously thereafter, or any activity that is not the subject of this determination. Nor is this determination authority for Registrant to acquire additional shares in any company if the Registrant's holdings in said company will exceed 5 percent of the outstanding voting shares of such company.

A significant alteration in the nature or extension of Registrant's activities or a change in location thereof (significantly different from any described in this determination) will be cause for a reevaluation by the Board of Registrant's activities under the provisions of section 4(a)(2) of the Act, that is, whenever the alteration or change is such that the Board finds that a termination of the grandfather privileges is necessary to prevent an undue concentration of resources or any of the other evils designated in the Act. No merger, consolidation, acquisition of assets other than in the ordinary course of business, nor acquisition of any interest in a going concern, to which the Registrant or any nonbank subsidiary thereof is a party, may be consummated without prior approval of the Board. Further, the provision of any credit, property, or service by the Registrant or any subsidiary thereof shall not be subject to any condition which, if imposed by a bank, would constitute an unlawful tie-in arrangement under section 106 of the Bank Holding Company Act Amendments of 1970.

The determination herein does not preclude a later review, by the Board, of Registrant's nonbank activities and a future determination by the Board in favor of termination of grandfather benefits of Registrant. The determination herein is subject to the Board's authority to require modification or termination of the activities of Registrant or any of its nonbanking subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasions thereof.

By determination of the Board of Governors,[1] effective December 29, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

[FR Doc.73-433 Filed 1-8-73;8:45 am]

ZACHARY TAYLOR LIFE INSURANCE CO.

"Grandfather" Privileges Under Bank Holding Company Act

Section 4 of the Bank Holding Company Act (12 U.S.C. 1843) provides certain privileges ("grandfather" privileges) with respect to nonbanking activities of a company that, by virtue of the 1970 amendments to the Bank Holding Company Act, became subject to the Bank Holding Company Act. Pursuant to section 4(a)(2) of the Act, a "company covered in 1970" may continue to engage, either directly or through a subsidiary, in nonbanking activities that such a company was lawfully engaged in on June 30, 1968 (or on a date subsequent to June 30, 1968, in the case of activities carried on as a result of the acquisition by such company or subsidiary, pursuant to a binding written contract entered into on or before June 30, 1968, of another company engaged in such activities at the time of the acquisition), and has been continuously engaged in since June 30, 1968 (or such subsequent date).

Section 4(a)(2) of the Act provides, inter alia, that the Board of Governors of the Federal Reserve System may terminate such grandfather privileges if, having due regard to the purposes of the Act, the Board determines that such action is necessary to prevent undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking pratices. With respect to a company that controls a bank with assets in excess of $60 million on or after December 31, 1970, the Board is required to make such a determination within a 2-year period.

Notice of the Board's proposed review of any grandfather privileges of the Zachary Taylor Life Insurance Co., Shreveport, La., and an opportunity for interested persons to submit comments and views or request a hearing, has been given (37 FR 22414). The time for filing comments, views, and requests has expired, and all those received have been considered by the Board in light of the factors set forth in section 4(a)(2) of the Act.

Zachary Taylor Life Insurance Co., Shreveport, La. (Registrant), became a bank holding company on December 31, 1970, as a result of the 1970 amendments to the Act, by virtue of Registrant's ownership of 38.5 percent of the voting shares of Pioneer Bank and Trust Co., Shreveport, La. (assets of $70.2 million as of December 31, 1970), and would have been a bank holding company on June 30, 1968, if the 1970 amendments to the Bank Holding Company Act had been enacted on that date.

In connection with the Board's review of Registrant, facts presented to the Board show that more than 85 percent of the voting shares of Registrant was owned by members of the same family on June 30, 1968, and has been continuously so owned since that date. On this basis, the Board concludes that Registrant is exempt, by virtue of section 4(c)(ii) of the Act, from the prohibitions relating to nonbanking interests contained in section 4 of the Act; and a Board review of grandfather privileges of Registrant under the proviso of section 4(a)(2) of the Act is unnecessary in view of such exemption.

The conclusion contained herein is based upon the facts presented to the Board, and any material change in those facts may result in a different conclusion.

Board of Governors, December 29, 1972.

[SEAL] TYNAN SMITH,
Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

ABACA CORDAGE FIBER HELD IN NATIONAL STOCKPILE

Proposed Disposition

Pursuant to the provisions of section 3(e) of the Strategic and Critical Materials Stock Piling Act, 50 U.S.C. 98(e), notice is hereby given of the proposed disposition of approximately 25 million pounds of abaca cordage fiber now held in the national stockpile.

The Office of Emergency Preparedness has made a revised determination pursuant to section 2(a) of the Strategic and Critical Materials Stock Piling Act, that by reason of obsolescence there is no longer any need for stockpiling abaca cordage fiber. The revised determination was based on the finding of the Office of Emergency Preparedness that the abaca cordage fiber is obsolescent on account of (1) deterioration and (2) discovery of better materials.

General Services Administration proposes to transfer abaca cordage fiber to other Government agencies, to offer it for sale on a competitive basis, or to dispose of it otherwise in the best interest of the Government. Disposal of this material will begin 6 months after the date of publication of this notice in the FEDERAL REGISTER.

This notice has also been transmitted to the Congress and to the Armed Services Committee of each House thereof.

This plan and the date of disposition have been fixed with due regard to the protection of producers, processors, and consumers against avoidable disruption of their usual markets as well as the protection of the United States against avoidable loss on disposal.

Dated: January 2, 1973.

ARTHUR F. SAMPSON,
Acting Administrator of General Services.

[FR Doc.73-410 Filed 1-8-73;8:45 am]

SISAL CORDAGE FIBER HELD IN NATIONAL STOCKPILE

Proposed Disposition

Pursuant to the provisions of section 3(e) of the Strategic and Critical Materials Stock Piling Act, 50 U.S.C. 98b(e), notice is hereby given of the proposed disposition of approximately 100 million pounds of sisal cordage fiber now held in the national stockpile.

The Office of Emergency Preparedness has made a revised determination pursuant to section 2(a) of the Strategic and Critical Materials Stock Piling Act, that by reason of obsolescence there is no longer any need for stockpiling sisal cordage fiber. The revised determination was based on the finding of the Office of Emergency Preparedness that the sisal cordage fiber is obsolescent on account of (1) deterioration and (2) discovery of better materials.

General Services Administration proposes to transfer sisal cordage fiber to other Government agencies, to offer it for sale on a competitive basis, or to dispose of it otherwise in the best interest of the Government. Disposal of this material will begin 6 months after the date of publication of this notice in the FEDERAL REGISTER.

This notice has also been transmitted to the Congress and to the Armed Services Committee of each House thereof.

This plan and the date of disposition have been fixed with due regard to the protection of producers, processors, and consumers against avoidable disruption of their usual markets as well as the protection of the United States against avoidable loss on disposal.

Dated: January 2, 1973.

ARTHUR F. SAMPSON,
Acting Administrator of General Services.

SPERM OIL HELD IN NATIONAL STOCKPILE

Proposed Disposition

Pursuant to the provisions of section 3(e) of the Strategic and Critical Materials Stock Piling Act, 50 U.S.C. 98b(e), notice is hereby given of the proposed disposition of approximately 23,400,000 pounds of sperm oil now held in the national stockpile.

The Office of Emergency Preparedness has made a revised determination pursuant to section 2(a) of the Strategic and Critical Materials Stock Piling Act, that by reason of obsolescence there is no longer any need for stockpiling sperm oil. The revised determination was based on the finding of the Office of Emergency Preparedness that the sperm oil is obsolescent on account of the development of new or better material or materials.

General Services Administration proposes to transfer sperm oil to other Government agencies, to offer it for sale on a competitive basis, or to dispose of it otherwise in the best interest of the Government. Disposal of this material will begin 6 months after the date of publication of this notice in the FEDERAL REGISTER.

This notice has also been transmitted to the Congress and to the Armed Services Committee of each House thereof.

This plan and the date of disposition have been fixed with due regard to the

V38-5 JAN 9 73 XUM

protection of producers, processors, and consumers against avoidable disruption of their usual market as well as the protection of the United States against avoidable loss on disposal.

Dated: January 2, 1973.

ARTHUR F. SAMPSON,
Acting Administrator of General Services.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 73-1]

AD HOC PANEL ON AEROSPACE VEHICLE DYNAMICS AND CONTROL

Notice of Meeting

The NASA Research and Technology Advisory Council Ad Hoc Panel on Aerospace Vehicle Dynamics and Control will meet on January 16 and 17, 1973, at the NASA Ames Research Center, Moffett Field, Calif. 94035. The meeting will be held in the committee room of the Administration Building (N-200). Members of the public will be admitted to the open portion of the meeting beginning at 9 a.m. on the agenda below on a first-come, first-served basis up to the seating capacity of the room, which is about 30 persons. All visitors must report to the reception desk of the Administration Building.

The NASA Research and Technology Advisory Council Ad Hoc Panel on Aerospace Vehicle Dynamics and Control serves in an advisory capacity only. In this capacity, the panel is concerned with the interdisciplinary problem of the dynamics and control of spacecraft and aircraft, including present program effort, balance, technological voids, and needs for new technology. The panel represents the interests of four RTAC committees. It is cochaired by Messrs. M. J. Turner and W. L. Holladay. There are eight members. The following list sets forth the approved agenda and schedule for the meeting of the ad hoc panel. For further information, please contact Mr. George C. Deutsch: area code 202—755-3264.

JANUARY 16, 1973

Time	Topic
9:00 a.m.	Overall Space Vehicle Dynamics and Control Problem Assessment. Purpose: A NASA Center representative will present a review of the broad aspects and fundamental technological problems of the subject, followed by a brief summary of each NASA Center's program in this area.
10:15 a.m.	Marshall Space Flight Center Program Review.
10:45 a.m.	Manned Spacecraft Center Program Review.
11:15 a.m.	Goddard Space Flight Center Program Review.
11:45 a.m.	Jet Propulsion Laboratory Program Review.
1:30 p.m.	Langley Research Center Program Review.
2:00 p.m.	Discussion of Presentations.
3:00 p.m.	*Executive Session* (Closed to Public). Purpose: To consider all classified information not previously presented, advanced program resources, and preliminary recommendations.
5:00 p.m.	Adjourn.

SECURITIES AND EXCHANGE COMMISSION

[70-5280]

FALL RIVER ELECTRIC LIGHT CO.

Notice of Proposed Issue and Sale

JANUARY 3, 1973.

Notice is hereby given that Fall River Electric Light Co., 85 North Main Street, Fall River, MA 02722 (Fall River), an electric utility subsidiary company of Eastern Utilities Associates (EUA), a registered holding company, has filed an application and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating section 6(b) of the Act and Rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

Fall River proposes to issue and sell, subject to the competitive bidding requirements of Rule 50, $5 million principal amount of first mortgage and collateral trust bonds, —— percent series due 1983. The interest rate (which shall be a multiple of one-eighth of 1 percent) and the price, exclusive of accrued interest, to be paid to Fall River (which shall be not less than 100 percent nor more than 102.75 percent of the principal amount) will be determined by the competitive bidding. The bonds will be issued under the indenture of first mortgage and deed of trust dated as of January 1, 1953, between Fall River and State Street Bank and as heretofore supplemented and amended and to be further supplemented by a fourth supplemental indenture to be dated as of January 1, 1973, and which includes a prohibition until January 1, 1978, against refunding the issue with the proceeds of funds borrowed at an effective interest cost lower than that of such bonds.

The net proceeds from the sale of the bonds will be used to prepay in whole or in part, without premium, Fall River's short-term notes to banks, which were incurred to provide funds for construction purposes and for the purchase of securities of Montaup Electric Co., an associate company.

The filing further states that the Massachusetts Department of Public Utilities has jurisdiction over the proposed transaction and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction. Fees and expenses related to the proposed transaction are estimated at $75,000, including EUA Service Corp. expenses (at cost) of $15,000, legal fees of $11,450, trustee's fees and expenses of $4,200, and accounting fees of $6,500. The fees and expenses of counsel for the underwriters, estimates to be $7,300, will be paid by the successful bidders.

Notice is further given that any interested person may, not later than January 23, 1973, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as amended or as it may be further amended, may be granted as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area 959]

CALIFORNIA

Declaration of Disaster Loan Area

Whereas, it has been reported that during the months of October and November 1972, because of the effects of heavy rainfall and mudslides, damage resulted to property located in the State of California;

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the area affected;

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such area constitute a catastrophe within the purview of the Small Business Act, as amended.

Now, therefore, as Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 7(b) of the Small Business Act (15 U.S.C. 636(b)) as amended, may be received and considered by the office below indicated from persons or firms whose property situated in the Big Sur Area, Monterey County, Calif., suffered damage or destruction resulting from heavy rainfall and mudslides occurring on October 14 and November 15, 1972.

Office: Small Business Administration Regional Office, 450 Golden Gate Avenue, Box 36044, San Francisco, CA 94102.

2. Applications for disaster loans under the authority of this declaration will not be accepted subsequent to March 31, 1973.

Dated: December 15, 1972.

THOMAS S. KLEPPE,
Administrator.

[Delegation of Authority 30 (Rev. 14)—Region IV, Amdt. 1]

CHIEF AND ASSISTANT CHIEF, REGIONAL FINANCING DIVISION, ET AL.

Delegation of Authority To Conduct Program Activities in the Field Offices

Delegation of Authority No. 30 (Revision 14) (37 FR 17603) is hereby amended by revising Part I, section B (para. 1-b), (para. 3-b), (para. 3-c), (para. 4), and Part VII, section B (para. 1) to read as follows:

(1) b. To enter into blanket loan guarantee agreements with banks:

1. Chief and Assistant Chief, Regional Financing Division.
2. Supervisory Loan Officer, Regional Financing Division.
3. District Director.
4. Chief, District Financing Division.
5. Branch Manager, Gulfport, Miss., branch office.

V38-5 JAN 9 73 XUM

(3) b. For "fully undisbursed" or "partially disbursed" business, economic opportunity, disaster, displaced business, consumer protection (meat, egg, poultry), occupational safety and health, and coal mine health and safety loans:

1. Chief and Assistant Chief, Regional Financing Division.
2. Supervisory Loan Officer, Regional Financing Division.
3. District Director.
4. Chief, District Financing Division.
5. Branch Manager, Gulfport, Miss., branch office.

(3) c. For business, economic opportunity, disaster, displaced business, consumer protection (meat, egg, poultry), coal mine health and safety, and occupational safety and health loans personally approved under delegated authority:

1. Chief and Assistant Chief, Regional Financing Division.
2. Supervisory Loan Officer, Regional Financing Division.
3. District Director.
4. Chief, District Financing Division.
5. Branch Manager, Gulfport, Miss., branch office.

(4) To approve minor modifications in fully undisbursed loan authorization:

a. Chief and Assistant Chief, Regional Financing Division.
b. Supervisory Loan Officer, Regional Financing Division.
c. District Director.
d. Chief, District Financing Division.
e. Branch Manager, Gulfport, Miss., branch office.

PART VII

SEC. B. *Size determinations.* 1. a. To make initial size determinations in all financial assistance cases within the meaning of the Small Business Size Standards Regulations, as amended, and further, to make product classification decisions for financial assistance purposes only.

1. District Director.
2. Chief and Assistant Chief, Regional Financing Division.
3. Supervisory Loan Officer, Regional Financing Division.
4. Chief, District Financing Division.
5. Branch Manager, Gulfport, Miss., branch office.

Effective date: July 1, 1972.

WILEY S. MESSICK,
Regional Director, Region IV.

TARIFF COMMISSION

[337-30]

CERTAIN WRITING INSTRUMENTS AND NIBS THEREFOR

Notice of Hearing

Notice is hereby given that on March 6, 1973, the U.S. Tariff Commission will hold a public hearing in connection with investigation No. 337-30, regarding alleged unfair methods of competition and unfair acts in the importation and sale of certain writing instruments which are embraced within the claims of U.S. Patent No. 3,338,216 and nibs for such writing instruments which contribute to the practice of the claims of said patent. Notice of institution of the investigation was published in the FEDERAL REGISTER of September 21, 1972 (37 FR 19675).

The hearing will be held on March 6, 1973, at 10 a.m., e.s.t., in the hearing room of the tariff Commission, Eighth and E Streets NW., Washington, D.C. All parties concerned will be afforded an opportunity to be present, to produce evidence, and to be heard concerning the subject matter of the investigation. Interested parties desiring to appear and give testimony at the hearing should notify the Secretary of the Commission in writing at least 5 days in advance of the opening of the hearing.

Issued: January 4, 1973.

By order of the Commission.

[TEA-W-167]

AMERICAN VISCOSE DIVISION OF FMC CORP.

Workers' Petition for a Determination; Notice of Investigation

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962, on behalf of the former workers of the Lewistown, Pa., plant of the American Viscose Division of the FMC Corp., San Jose, Calif., the U.S. Tariff Commission, on January 2, 1973, instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with viscose rayon yarns wholly of continuous fibers (of the types provided for in items 310.01 and 310.02 of the tariff schedules of the United States) produced by said firm are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of significant number or proportion of the workers of such firm or an appropriate subdivision thereof.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed within 10 days after the notice is published in the FEDERAL REGISTER.

The petition filed in this case is available for inspection at the Office of the Secretary, U.S. Tariff Commission, Eighth and E Streets NW., Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

Issued: January 4, 1973.

By order of the Commission.

[TEA-W-168]

ROSE-BRO SHOE CO., INC.

Notice of Investigation

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962, on behalf of the former workers of the Rose-Bro Shoe Co., Inc., Boston, Mass., the U.S. Tariff Commission, on January 4, 1973, instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with footwear for women (of the types provided for in items 700.43, 700.45, and 700.55 of the tariff schedules of the United States) produced by said firm are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such firm or an appropriate subdivision thereof.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed within 10 days after the notice is published in the FEDERAL REGISTER.

The petition filed in this case is available for inspection at the Office of the Secretary, U.S. Tariff Commission, Eighth and E Streets NW., Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

Issued: January 4, 1973.

By order of the Commission.

TUI[2] EXTENSION

Petition for Extraordinary Relief

Order. At a session of the Interstate Commerce Commission, Division 3, Acting as an Appellate Division, held at its office in Washington, D.C., on the 13th day of December 1972.

Upon consideration of the record in the above-entitled proceedings and of the petition of TUI filed September 18, 1972, for extraordinary relief; and good cause appearing therefor:

It is ordered, That these proceedings be, and they are hereby, reopened on our own motion.

It is further ordered, That our prior order in this proceeding entered November 13, 1972, be, and it is hereby, vacated and set aside.

It is further ordered, That the findings of Division 3, in its report and order of May 19, 1969, reported at 109 M.C.C. 96, be, and they are hereby, modified to reflect the grant of authority set forth in the appendix to this order.

It is further ordered, That notice of the authority granted by this order be published in the FEDERAL REGISTER and issuance of a certificate in accordance with this order be withheld for a period of 30 days from the date of such publication, during which period any proper party in interest may file a petition for leave to intervene in this proceeding or for other appropriate relief setting forth in detail the precise manner in which it has been prejudiced by our present action.

It is further ordered, That an appropriate certificate be issued subject to the prior receipt of a request from applicant in writing for the coincidental cancellation of its Certificate of Public Convenience and Necessity in No. MC-127597 (Sub-No. 1), issued August 15, 1972, and upon compliance with the requirements set forth in the second ordering paragraph below.

It is further ordered, That the said petition except to the extent granted herein, be, and it is hereby, denied.

It is further ordered, That unless compliance is made by applicant with the requirements of sections 215, 217, and 221(c) of the Interstate Commerce Act, and with the additional conditions set forth above, within 90 days after the date of service of this order, or within such additional time as may be authorized by the Commission, the grant of authority shall be considered as null and void, and the application shall stand denied in its entirety effective upon the expiration of the said compliance time.

NOTE: That this decision is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

By the Commission, Division 3, Acting as an Appellate Division.

[SEAL] ROBERT L. OSWALD,
Secretary.

APPENDIX

[No. MC-127597 (Sub-No. 1)]

TUI EXTENTION—GRAND CANYON, ARIZ. AND DEATH VALLEY, CALIF.

[No. MC-127597 (Sub No. 3)]

TUI EXTENSION—HOOVER DAM, ARIZ.-NEV. (LAS VEGAS, NEV.)

Authority authorized:

Operation by applicant in interstate and foreign commerce, as a common carrier by motor vehicle, as follows:

Regular routes:

Passengers, and express and newspapers, in limousines or sedans with a seating capacity of not more than seven persons, including the driver, between Las Vegas, Nev., and Furnace Creek Inn., Calif., serving no intermediate points:

From Las Vegas over U.S. Highway 95 to junction Nevada Highway 29, thence over Nevada Highway 29 to the Nevada-California State line, thence over California Highway 127 to Death Valley Junction, Calif., and thence over California Highway 190 to Furnace Creek Inn, and return over the same route.

[1] Formerly consolidated in No. MC-1515 (Sub-No. 90), Greyhound Lines, Inc., Extension—Grand Canyon, Ariz., 109 M.C.C. 96.

[2] Formerly Transportation Unlimited, Inc.

V 38 - 5 JAN 9 73 XUM

From Las Vegas over U.S. Highway 95 to Beatty, Nev., thence over Nevada Highway 58 to the Nevada-California State line, thence over unnumbered California highway to junction California Highway 190, and thence over California Highway 190 to Furnace Creek Inn, and return over the same route.

The above-described authority to transport passengers was issued pursuant to an application filed on or before January 1, 1967, and therefore incidental charter operations in interstate or foreign commerce may be conducted under rules and regulations prescribed by the Commission pursuant to section 208(a) of the Interstate Commerce Act, as amended November 10, 1966.

Passengers and their baggage, in special operations consisting of sightseeing or pleasure tours, beginning at Bakersfield, Baker, and Barstow, Calif., and at Las Vegas and Beatty, Nev., and extending to entrances of the Death Valley National Monument, Calif-Nev. and ending at Bakersville, Lone Pine, Trona, Mojave, Baker, and Barstow, Calif., and Las Vegas and Beatty, Nev.:

From Bakersfield over California Highway 178 via Isabella, Calif., to Freeman, Calif. (also from Isabella over an unnumbered highway to Kernville, Calif., and return), thence over U.S. Highway 395 (portion formerly U.S. Highway 6) via Olancha, Calif., to Lone Pine, Calif. (also from Olancha over an unnumbered highway to junction California Highway 190, near Keeler, Calif.; also from Lone Pine over unnumbered highways to Whitney Portal and Alabama Hills, Calif., and return), and thence over California Highway 190 via Panamint Springs, Calif., to the entrance of Death Valley National Monument, and return over the same route.

From Bakersfield over California Highway 58 (formerly U.S. Highway 466), via Mojave, Calif., to Barstow, and return over the same route.

From junction California Highway 58 (formerly U.S. Highway 466) and an unnumbered highway, near Boron, Calif., over unnumbered highways to the Borax Works, near Boron, Calif., and return over the same route.

From Mojave over California Highway 14 (portion formerly U.S. Highway 6) to junction unnumbered highway, and thence over unnumbered highway to Trona, and return over the same route.

From junction U.S. Highway 395 and California Highway 58 (formerly U.S. Highway 466) over U.S. Highway 395 to Red Mountain, Calif., and thence over unnumbered highway via Trona, Calif., to the entrance to Death Valley National Monument, and return over the same route.

From Red Mountain over U.S. Highway 395 to junction California Highway 14 (portion formerly U.S. Highway 6), near Brown, Calif., and return over the same route.

From junction California Highway 190 and Panamint Valley Road over Panamint Valley Road to junction Emigrant Canyon Highway, and return over the same route.

From Barstow over U.S. Highway 91 to Baker, Calif., thence over California Highway 127 via Salt Springs Junction and Shoshone, Calif., to Death Valley Junction, Calif., and thence over California Highway 190 to the entrance of Death Valley National Monument (also from Salt Springs Junction over unnumbered highway to the entrance of Death Valley National Monument) and return over the same routes.

From junction California Highway 127 and unnumbered highway near Shoshone, Calif., over unnumbered highway via Saleberry Pass to the entrance to Death Valley National Monument, and return over the same route.

From Las Vegas over U.S. Highway 95 via Lathrop Wells and Beatty, Nev., to junction Nevada Highway 72, and thence over Nevada Highway 72 to the northeast entrance to Death Valley National Monument, and return over the same route.

From Beatty over Nevada Highway 58 to the entrance of Death Valley National Monument (also from junction Nevada Highway 58 and unnumbered highway over unnumbered highway via Rhyolite, Nev., to junction Nevada Highway 58), and return over the same routes.

From Lathrop Wells over Nevada Highway 29 to the Nevada-California State line, and thence over California Highway 127 to Death Valley Junction, and return over the same route.

RESTRICTION: Operations over the routes immediately described above are restricted against service consisting of sightseeing or pleasure tours which both begin and terminate at Las Vegas, Nev., and extend to Death Valley National Monument.

Irregular routes:

Passengers and their baggage, in special or charter operations, in round trip sightseeing or pleasure tours, beginning and ending at Las Vegas, Nev., and points within 5 miles thereof, and extending to Grand Canyon National Park, Ariz., Hoover Dam, Ariz.-Nev., and Death Valley National Monument, Calif.

Any duplication of authority granted herein or to the extent that such authority duplicates any heretofore granted to or now held by carrier shall not be construed as conferring more than one operating right.

[FR Doc.73-443 Filed 1-8-73;8:45 am]

[Notice 177]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JANUARY 3, 1973.

The following are notices of filing of applications[1] for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR Part 1131), published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 56679 (Sub-No. 70 TA), filed November 24, 1972. Applicant: BROWN TRANSPORT CORP., Post Office Box 6985, Atlanta, GA 30315. Applicant's representative: B. K. McClain, Brown Transport Corp. (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment because of size or weight), serving the terminal site of Harper Motor Lines, Inc., at the junction of U.S. Highway 29 and South Carolina Highway 8, near West Pelzer, S.C., as an off-route point in connection with applicant's present regular route operations between Elberton, Ga., and Greenville, S.C., for 180 days. Supporting shipper: Brown Transport Corp., 125 Milton Avenue SE., Atlanta, GA 30315. Send protests to: William L. Scroggs, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 309, 1252 West Peachtree Street NW., Atlanta, GA 30309.

No. MC 107515 (Sub-No. 830 TA), filed December 11, 1972. Applicant: REFRIGERATED TRANSPORT CO., INC., 3901 Jonesboro Road SE., Post Office Box 308, Forest Park, GA 30050. Applicant's representative: Paul M. Daniell, Suite 1600, First Federal Building, Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Yeast and yeast products*, in vehicles equipped with mechanical refrigeration from Belle Chasse, La., to Jackson, Miss., for 180 days. Supporting shipper: Universal Foods Corp., 433 East Michigan Street, Milwaukee, WI 53201. Send protests to: William L. Scroggs, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 309, 1252 West Peachtree Street NW., Atlanta, GA 30309.

No. MC 119789 (Sub-No 132 TA) (Correction), filed December 6, 1972, published in the FEDERAL REGISTER, issue of December 27, 1972, and republished as corrected this issue. Applicant: CARAVAN REFRIGERATED CARGO, INC., Post Office Box 6188 (1612 East Irving Boulevard), Dallas, TX 75222. Applicant's representative: James K. Newbold (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Playground apparatus, recreational equipment, and sporting goods*, from Bossier City, La., to points in Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming, for 180 days. NOTE: Applicant does not intend to tack authority. Supporting shipper: Gym-Dandy, Inc., Post Office Box 5637, Bossier City, LA 71010. Send protests to: District Supervisor E. K. Willis, Jr., Interstate Commerce Commission, Bureau of Operations, 1100 Commerce Street, Room 13C12, Dallas, TX 75202. NOTE: The purpose of this republication is to show the correct docket number assigned thereto, inadverently published in the FEDERAL REGISTER of December 27, 1972, as No. MC 138178 (Sub-No. 1 TA).

[1] Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 129360 (Sub-No. 2 TA), filed December 5, 1972. Applicant: KIRKLEY TRANSFER CO., INC., 1603 Nixon Road & New Savannah Road, Augusta, GA 30903. Applicant's representative: D. C. Kirkley (same as above). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Telephone equipment, materials, and supplies*, including *tools* used in the construction maintenance of telephone systems and communications between Augusta, Ga., and point in the Counties of Burke, Columbia, Emanuel, Glascock, Hancock, Jefferson, Jenkins, Lincoln, McDuffie, Richmond, Screven, Taliaferro, Warren, and Wilkes, Ga., for 180 days. Supporting shipper: Western Electric Co., 6701 Roswell Road NE., Atlanta, GA 30328. Send protests to: William L. Scroggs, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 309, 1252 West Peachtree Street NW., Atlanta, GA 30309.

No. MC 136233 (Sub-No. 3 TA), filed December 18, 1972. Applicant: NORTHTOWN TRUCK LINE, INC., 1112 Swift Street, Post Office Box 7333, North Kansas City, MO 64116. Applicant's representative: Frank W. Taylor, 1221 Baltimore, Kansas City, MO 64105. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* from Kansas City, Mo., to Omaha, Nebr., for 180 days. Supporting shipper: American Beauty Macaroni Co., 501 Funston Road, Kansas City, Kans. 66115. Send protests to: Vernon V. Coble, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 600 Federal Building, 911 Walnut Street, Kansas City, MO 64106.

No. MC 138178 (Sub-No. 1 TA) (Correction), filed December 7, 1972, published in the FEDERAL REGISTER, issue of December 27, 1972, and republished as corrected this issue. Applicant: HEFLIN INDUSTRIES, INC., 1111 West Maricopa Freeway, Phoenix, AZ 85007. Applicant's representative: A. Michael Bernstein, 1327 United Bank Building, Phoenix, AZ 85012. NOTE: The purpose of this republication is to show the correct docket number assigned thereto as MC 138178 (Sub-No. 1 TA) in lieu of MC 13878 (Sub-No. 1 TA). The rest of the notice remains as previously published.

No. MC 138261 TA, filed December 5, 1972. Applicant: S. D. ELLIS & W. F. REEVES, a Partnership, doing business as, MARIETTA TRANSFER AND STORAGE COMPANY, 24 North Alexander Street, Marietta, GA 30060. Applicant's representative: S. D. Ellis (same as above). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Telephone equipment, materials, and supplies*, including *tools* used in the construction and maintenance of telephone systems and communications between Marietta, Ga., and points in the Counties of Carroll, Cherokee, Cobb, Douglas, Haralson, and Paulding, Ga., for 180 days. Supporting shipper: Western Electric Co., 6701 Roswell Road NE., Atlanta, GA 30328. Send protests to: William L. Scroggs, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 309, 1252 West Peachtree Street NW., Atlanta, GA 30309.

No. MC 138262 TA, filed December 19, 1972. Applicant: IMPEX, INC., 2430 Pennsylvania Avenue NW., Washington, DC 20037. Applicant's representative: Alan F. Wohlstetter, 1700 K Street NW., Washington, DC 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods* between points in the Washington, D.C. Commercial Zone, restricted to the transportation of traffic having a prior or subsequent movement, in containers, and further restricted to the performance of pickup and delivery service in connection with packing, crating, and containerization or unpacking, uncrating, and decontainerization of such traffic, for 180 days. Supporting shippers: Bernard W. Ehrhard, Chief Administrative Services, French Embassy, Washington, D.C.; Stephen B. Modly, Commercial Advisor, German Embassy, Washington, D.C.; Somdee Chareonkul, Assistant Education Counselor, Royal Thai Embassy, 1906 23rd Street NW., Washington, DC 20008; Aydin Yegen, Counselor, Turkish Embassy, Washington, D.C.; Col. Nguyen Linh Chieu, Armed Forces Attaché, Embassy of Viet Nam, Washington, D.C.; Tran Ngoc Dien, Counselor, Embassy of Viet Nam, Washington, D.C. Send protests to: Robert D. Caldwell, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 12th and Constitution Avenue NW., Washington, D.C. 20423.

No. MC 138263 TA, filed December 5, 1972. Applicant: ADAMS TRANSFER & STORAGE CO., INC., 3641 Pierce Drive, Chamblee, GA 30341. Applicant's representative: Mr. R. E. Adams (same address as above). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Telephone equipment, materials, and supplies*, including *tools* used in the construction and maintenance of telephone systems and communications between Chamblee, Ga., and points in the counties of De Kalb, Fulton, Gwinnett, and Walton, Ga., for 180 days. Supporting shipper: Western Electric Co., Inc., 6701 Roswell Road NE., Atlanta GA 30328. Send protests to: William L. Scroggs, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 309, 1252 West Peachtree Street, NW., Atlanta, GA 30309.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

$3.00 per copy.
Paperbound, with charts

MAIL ORDER FORM To:
Superintendent of Documents, Government Printing Office, Washington, D.C. 20402

Enclosed find $..... (check, money order, or Supt. of Documents coupons). Please send me ..... copies of the UNITED STATES GOVERNMENT ORGANIZATION MANUAL, 1972/73, *at $3.00 per copy. (Catalog No. GS 4.109:972) (Stock No. 2203-0035)*

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., Ch. 15), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for filing, publishing, and making available to the public, regulations and legal notices issued by the Executive Branch of the Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 6—ECONOMIC STABILIZATION

Chapter III—Price Commission

PART 300—PRICE STABILIZATION

Interest Expense on Long-Term Debt

The purpose of this amendment to Appendix II to Part 300 of the Price Commission's regulations (6 CFR Part 300) is to prescribe the procedures and Price Commission form to be used in accounting for interest expense on long-term debt in computing a firm's base period profit margin.

Instructions currently on Form PC–51—Report on Sales, Costs, and Profits provide for interest expense on long-term debt to be reported as nonoperating income (deduction) in Item 10 of that form. On September 8, 1972, the Price Commission announced that for fiscal years beginning after July 31, 1972, firms are to report interest on long-term debt as an operating expense when calculating their base period profit margins and current profit margins. To facilitate computation of a firm's adjusted base period profit margin to reflect the new policy, a new schedule R–3 is being prescribed for use in connection with form PC–51. Instructions on future editions of form PC–51 will be modified to reflect this policy change with respect to the computation of current profit margins.

To provide specific guidance pending the republication of modified Form PC–51, an addendum to the existing instructions for preparation of Form PC–51 is being prescribed.

Since these amendments provide immediate guidance and information for the effective implementation of the price stabilization program, further notice and procedure thereon is impracticable and good cause exists for making them effective in less than 30 days after publication in the FEDERAL REGISTER.

(Economic Stabilization Act of 1970, as amended, Public Law 91–379, 84 Stat. 799; Public Law 91–558, 84 Stat. 1468; Public Law 92–8, 85 Stat. 13; Public Law 92–15, 85 Stat. 38; Economic Stabilization Act Amendments of 1971, Public Law 92–210, 85 Stat. 743; Executive Order No. 11640, 37 FR 1213, January 27, 1972; Cost of Living Council Order No. 4, 46 FR 20202, October 16, 1971)

In consideration of the foregoing, Appendix II to Part 300 of Title 6 of the Code of Federal Regulations is amended as set forth below effective January 4, 1973.

Issued in Washington, D.C., on January 4, 1973.

By direction of the Price Commission.

JAMES B. MINOR,
General Counsel,
Price Commission.

Appendix II to Part 300 of Title 6 of the Code of Federal Regulations is amended by inserting the following addendum and new form immediately after the end of the "Instructions for preparation of Form PC–51" and before "Form PC–63":

ADDENDUM TO INSTRUCTIONS FOR THE PREPARATION OF FORM PC–51

ACCOUNTING FOR INTEREST EXPENSE

For fiscal years which began before August 1, 1972, interest expense on long-term debt must be reported in Item 10, Nonoperating Income (Deduction). For firms' fiscal years commencing on or after August 1, 1972, all interest expense must be reported in Item 6, Cost of Sales, if such is the customary practice of the firm, or, in the absence of such practice, in Item 8, Other Operating Expenses.

All firms must submit schedule R–3, "Computation of Adjusted Base Period Profit Margin," for fiscal years commencing on or after August 1, 1972. This submission must be made at the time Form PC–51 is filed.

A firm selecting different fiscal years for its base period, solely as a result of a change in the manner of reporting interest expense on long-term debt, must submit a new Form PC–50 and schedule R–3 when Form PC–51 is filed.

A firm which has increased prices above base prices before September 9, 1972, and which would be able to continue charging those prices above base prices except for this change in policy and the resultant effect on that firm's profit margin may request that an exception be granted by the Price Commission or Internal Revenue Service, as the case may be, to be allowed to continue charging those prices.

FORM PC-51 SCHEDULE R-3

SUBCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

[FHA Instruction 444.3]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Security for Rural Housing Loans

Section 1822.30, Part 1822, Title 7, Code of Federal Regulations (35 FR 14913), is amended to permit section 504 loans of up to $1,500 to be taken without requiring a real estate mortgage as security.

In accordance with 5 U.S.C. 553 this amendment is being published without prior rulemaking because a delay in making available assistance provided by this amendment would be contrary to the public interest.

§ 1822.30 as amended, reads as follows:

§ 1822.30 Security.

Section 504 loans that exceed $1,500 will be secured by a mortgage on the borrower's real estate. Real estate security also will be taken for loans of less than $1,500, whenever the loan approval official determines that such security may be needed to reasonably assure repayment of the loan. The title requirements of Part 1807 of this chapter will not be applicable; however, the county supervisor will use all practical means to verify that title and lien information furnished by the applicant is complete and accurate. If the loan approval official determines that other security is needed to assure repayment of the loan or to accomplish the purposes of the loan, a mortgage may be taken on the applicant's chattels or other assets. § 1831.32(v) of this chapter will be followed when chattels are taken as security for the loan.

(Sec. 510, 63 Stat. 437, 42 U.S.C. 1480; Order of Act. Sec. of Agr., 36 FR 21529, 37 FR 22008; Order of Asst. Sec. of Agr. for Rural Development and Conservation 36 FR 21529)

Dated: January 2, 1973.

SUBCHAPTER E—ACCOUNT SERVICING

[FHA Instruction 456.1]

PART 1864—DEBT SETTLEMENT

Compromise and Adjustments

On page 20335 of the FEDERAL REGISTER of September 29, 1972, there was published a notice of proposed rulemaking to amend Part 1864, "Debt Settlement," Title 7, Code of Federal Regulations as follows:

1. Section 1864.3(b) has been revised by deleting the requirement that collections cannot be made without suit in effecting compromises and adjustments of debts of $20,000 or less.

2. Section 1864.3(b)(1) and subdivisions (i) and (ii) have been added to provide factors for consideration in determining inability to collect a debt in full and to provide appropriate language under the debtor's offer and certification under Part V, paragraph D of Form FHA 456-1, "Application for Settlement of Indebtedness."

3. Section 1864.3 (b)(1) and (b)(2) are renumbered to (b)(2) and (b)(3), respectively.

Interested persons were given 30 days in which to submit written comments, suggestions, or objections, regarding the proposed regulations. No objections were received within the 30-day period and the proposed regulations are hereby adopted without change and are set forth below.

Effective date: January 10, 1973.

Dated: December 27, 1972.

J. R. HANSON,
Acting Administrator,
Farmers Home Administration.

As amended, § 1864.3 (b)(1), (b)(2), and (b)(3) read as follows:

§ 1864.3 Compromise and adjustments.

* * * * *

(b) Debts of $20,000 or less, exclusive of interest, which cannot be compromised or adjusted under the provisions of paragraph (a) of this section may be compromised or adjusted in the following instances, even though the debtor may have the ability to pay in full, unless there is an indication of fraud or misrepresentation on the part of the debtor. (Where there is an indication of fraud or misrepresentation, see § 1864.2(j) for handling.)

(1) *Inability to collect.* Inability to collect is when the full amount cannot be collected because of the refusal of the debtor to pay the debt in full and the OGC advises that the Government is unable to enforce collection in full within a reasonable time by enforced collection proceedings.

(i) In determining inability to collect, the following factors will be considered:

(*a*) Availability of assets or income which may be realized upon by enforced collection proceedings, considering the applicable exemptions available to the debtor under State and Federal law.

(*b*) Inheritance prospect within a reasonable time.

(*c*) Likelihood of debtors obtaining nonexempt income within a reasonable time out of which there could be collected a substantially larger sum than the amount of the present offer.

(ii) For this type of settlement an asterisk (*) will be inserted in Part V of Form FHA 456-1 after "(D)" and before the word "I." In the blank space below Part V (E) of Form FHA 456-1 the following will be inserted:

*With knowledge of the penalties for false statements provided by 18 U.S.C. 1001 ($10,000 fine and/or 5 years imprisonment) and with knowledge that this financial statement is submitted by me (us) to affect action by the Department of Agriculture.

(2) *Litigative probabilities.* When the OGC has advised in writing that:

(i) There is a real doubt concerning the Government's ability to prove its case in court for the full amount of the debt, and

(ii) The amount offered represents a reasonable settlement considering:

(*a*) The probability of prevailing on the legal issues involved.

(*b*) The probability of proving facts to establish full or partial recovery, having due regard to the availability of witnesses and other pertinent factors.

(*c*) The probable amount of court costs which may be assessed against the Government if it is unsuccessful in litigation.

(3) *Costs of collecting debt.* When the cost of collecting the debt does not justify enforced collection of the full amount, the amount accepted in compromise or adjustment may reflect an appropriate discount for administrative and litigative costs of collection. Such discount will not exceed $250 unless the OGC advises that in the particular case a larger discount is appropriate. Costs of collecting may be a substantial factor in settling small debts but normally will not carry great weight in settling large debts.

* * * * *

(Sec. 339, 75 Stat. 318, 7 U.S.C. 1989; sec. 510, 63 Stat. 437, 42 U.S.C. 1480; sec. 4, 64 Stat. 100, 40 U.S.C. 442; sec. 602, 78 Stat. 528, 42 U.S.C. 2942; sec. 301, 80 Stat. 379, 5 U.S.C. 301; order of Acting Secretary of Agriculture, 36 FR 21529; order of Assistant Secretary of Agriculture for Rural Development and Conservation, 36 FR 21529; order of Director, OEO, 29 FR 14764)

[FR Doc.73-495 Filed 1-9-73;8:45 am]

Title 13—BUSINESS CREDIT AND ASSISTANCE

Chapter III—Economic Development Administration, Department of Commerce

PART 301—ESTABLISHMENT AND ORGANIZATION

Financial Advisors

Part 301, Subpart E of Chapter III, Title 13, of the Code of Federal Regulations (31 FR 11292 and 31 FR 16673) is amended to provide for requirements to be followed in engaging a Financial Advisor when needed for an EDA public works project. A new § 301.65 is added to Subpart E as follows:

§ 301.65 Financial advisors.

(a) *Purpose.* This section describes EDA regulations to be followed in engaging a Financial Advisor when needed for an EDA public works project.

(b) *Policy.* EDA will authorize as an allowable project cost the use of a Financial Advisor when needed to complete funding of an approved public works project. All such Financial Advisors will be selected by the grantee and approved by the Agency. Fees for these services must be reasonable and EDA will participate in accordance with the grant percentage.

(c) *Definition.* A "Financial Advisor" is an individual or firm which is qualified by reason of training and experience to advise the applicant on structuring and marketing a private bond issue needed to complete funding of an approved EDA public works project. It may be an investment banker who deals with municipal securities; a commercial bank with a syndicate department or comparable capability; or a municipal financial consultant who advises on municipal underwritings.

(d) *Financial Advisor services.* (1) The major objectives in the incurrence of long term debt by a unit of local government are:

(i) The adequacy of the loan and the assurance that funds will be available when needed.

(ii) The arrangement of the loan so that it blends into the existing overall debt structure.

(iii) The issuance and sale of bonds at the lowest interest cost consistent with all other considerations.

(2) Services normally performed by the Financial Advisor are:

(i) *Survey of financial resources.* The Financial Advisor shall make a survey of the financial resources of the issuing subdivision to determine the extent of its borrowing capacity. Such a survey shall include an analysis of the existing debt structure as compared to existing and projected sources of income which may be pledged to secure payment of debt service.

(ii) *Financial plan.* On the basis of information developed by the survey, the Financial Advisor shall establish a financial plan which shall be submitted to the governing body of the issuing subdivision. The financial plan shall be complete as to maturity schedule and estimated interest rate of the proposed bonds and shall reflect the resulting overall amount of debt service requirements as compared to existing and projected income sources.

(iii) *Bond elections.* If a bond election is deemed necessary, the Financial Advisor shall assemble and transmit to the bond attorneys such data as is required in preparation of the necessary petitions, resolutions, notices, etc.

(iv) *Terms of bond issue.* The Financial Advisor shall submit his written recommendations as to the various provisions, terms, and conditions of the proposed bond issue. He shall make recommendations as to the date of the issue, interest payment dates, schedule of maturities, options of prior payment, and place of payment. He shall also, whenever possible, suggest additional security provisions designed to make the issue more attractive to investors.

(v) *Selecting date of bond sale.* In the event the bonds are to be sold at competitive bidding, the Financial Advisor shall make a recommendation as to the date on which bids are to be considered. This recommendation shall be based on an estimate of expected market conditions, having given due consideration to such factors as the general trend of the bond market, conflict with offerings of other such divisions and other known relevant factors.

(vi) *Notice of sale.* If required in the marketing of bonds, the Financial Advisor will be expected to prepare and submit the following:

(A) Official Notice of Sale, into which shall be incorporated all necessary information as to time and place of the bond sale, the conditions under which the bonds shall be amended, and the terms and conditions of delivery.

(B) Prospectus: Which shall be fully descriptive of the bonds offered and which shall additionally contain complete information on the issuing subdivision.

(C) Uniform Bid Form: Containing provisions recognized as standard by the municipal securities industry.

(D) Bond Rating: If proper and desirable, to submit to the national bond rating agencies financial and economic data necessary to obtain a rating on the proposed issue.

(vii) *Bond Sale—award of bonds.* The Financial Advisor shall be represented at the bond sale by experienced personnel whose services shall be available to the issuing government in the tabulation and comparison of bids.

(viii) *Issuance of bonds.* As soon as a bid for the bond shall be accepted by the issuing agency, the Financial Advisor shall proceed at once with the general consideration of the efforts of all concerned to the end that the bonds may be delivered and paid for as expeditiously as possible. His services shall be available in the passage or adoption of all required ordinances, resolutions and documents which may be required by the Attorney General of the State in which the issuing subdivision is located.

(ix) *Delivery of bonds.* It shall be the duty of the Financial Advisor to inform and assist all concerned with the delivery of the bonds, and to generally coordinate their efforts. He shall notify the purchasers of the time that payment for the bonds can be made and shall assist the issuer in the escrow of closing documents and the giving of proper instruction for the receipt and transfer of bond proceeds.

(3) The fee for Financial Advisory services shall be reasonable and be in keeping with the magnitude of the service performed. Instances may arise where the preparation of the financial package for a relatively small issuer may be intricate and time consuming. The converse situation may also arise where the preparation of a large issue for a municipality with an extensive marketing history may warrant a lower fee than might normally be expected. The financial staff, Technical Support Division, shall review and approve the Financial Advisor's fee submitted with the public works application.

(e) *Selection and approval of Financial Advisors.* Selection of a Financial Advisor for a public works project will be made by the grantee. Those firms interested in participating in the solicitation of financial advisory contracts shall file their qualifications and experience with the appropriate EDA Regional Offices. The financial staff, Technical Support Division, shall review these submissions and notify approved firms that their fees may be considered as acceptable project costs.

(f) *Financial Advisor precluded as bidder.* The Financial Advisor shall be precluded from bidding except in those cases where the best interests of the grantee and the Federal Government make it necessary that they be the bidder. Any request for a right to bid on all or a part of the issue by the Financial Advisor shall be initiated by the grantee.

(g) *Written agreement with Financial Advisor.* Agreement between the grantee and the Financial Advisor shall be in writing and shall include a listing of the services to be performed, substantially as outlined in paragraph (d) of this section, and provisions for reimbursement for services rendered and precluding the Financial Advisor from bidding except in certain circumstances. The contract shall be approved by the financial component of the Office of Public Works.

This section became effective November 17, 1972.

ROBERT A. PODESTA,
Assistant Secretary
for Economic Development.

Dated: January 3, 1973.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Docket No. 12472; Amdt. No. 91-109]

PART 91—GENERAL OPERATING AND FLIGHT RULES

Experimental Aircraft; Operating Limitations

The purpose of this amendment to Part 91 of the Federal Aviation Regulations is to clarify the regulation currently prescribed in § 91.42(c) for the operation of an aircraft that has an experimental certificate.

The current regulation prohibits the operation of an experimental aircraft over a densely populated area or in a congested airway with one exception. This amendment more clearly expresses the intent of the regulation regarding that exception, which is to permit an experimental aircraft to be operated over a densely populated area or in a congested airway only when conducting a takeoff or landing for which the FAA has issued special operating limitations and when conducting the takeoff or landing in accordance with the terms and conditions of those operating limitations.

Since this amendment is clarifying in nature, I find that notice and public procedure thereon is unnecessary and that good cause exists for making it effective on less than 30 days' notice.

In consideration of the foregoing, Part 91 of the Federal Aviation Regulations is amended, effective January 10, 1973, by amending § 91.42(c) to read as follows:

V38-6 JAN 10 73 XUM

§ 91.42 Aircraft having experimental certificates; operating limitations.

• • • • •

(c) Unless otherwise authorized by the Administrator in special operating limitations, no person may operate an aircraft that has an experimental certificate over a densely populated area or in a congested airway. The Administrator may issue special operating limitations for particular aircraft to permit takeoffs and landings to be conducted over a densely populated area or in a congested airway, in accordance with terms and conditions specified in the authorization in the interest of safety in air commerce.

• • • • •

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1424; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on January 3, 1973.

J. H. SHAFFER,
Administrator.

[FR Doc.73-490 Filed 1-9-73;8:45 am]

[Docket No. 12460; Amdt. 846]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 3139, 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Document Inspection Facility, HQ-405, 800 Independence Avenue SW., Washington, DC 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or canceling the following VOR-VOR/DME SIAPs effective February 1, 1973.

Lancaster, Pa.—Lancaster Airport, VOR Runway 31, Amdt. 6.

2. Section 97.25 is amended by originating, amending, or canceling the following SDF-LOC-LDA SIAPs effective January 18, 1973.

Crossville, Tenn.—Crossville Memorial Airport, LOC Runway 25, Original.
Milwaukee, Wis.—General Mitchell Field, LOC Runway 19R, Original.

3. Section 97.27 is amended by originating, amending, or canceling the following NDB/ADF SIAPs effective February 22, 1973.

Chicago, Ill.—Chicago O'Hare International Airport, NDB Runway 9R, Amdt. 4.
Chicago, Ill.—Chicago O'Hare International Airport, NDB Runway 14L, Amdt. 13.
Chicago, Ill.—Chicago O'Hare International Airport, NDB Runway 14R, Amdt. 12.
Chicago, Ill.—Chicago O'Hare International Airport, NDB Runway 27R, Amdt. 12.

• • • effective January 18, 1973.

Milwaukee, Wis.—General Mitchell Field, NDB Runway 19R, Amdt. 5, Canceled.

4. Section 97.29 is amended by originating, amending, or canceling the following ILS SIAPs effective February 22, 1973.

Chicago, Ill.—Chicago O'Hare International Airport, ILS Runway 9R, Amdt. 2.
Chicago, Ill.—Chicago, O'Hare International Airport, ILS Runway 14L, Amdt. 17.
Chicago, Ill.—Chicago O'Hare International Airport, ILS Runway 14R, Amdt. 18.
Chicago, Ill.—Chicago O'Hare International Airport, ILS Runway 27R, Amdt. 14.
Chicago, Ill.—Chicago O'Hare International Airport, Parallel ILS Runway 27R, Amdt. 3.

5. Section 97.33 is amended by originating, amending, or canceling the following RNAV SIAPs effective February 22, 1973.

Greer, S.C.—Greenville-Spartanburg Airport, RNAV Runway 21, Original.

(Secs. 307, 313, 601, 1110, Federal Aviation Act of 1958; 49 U.S.C. 1438, 1354, 1421, 1510; sec. 6(c) Department of Transportation Act, 49 U.S.C. 1655(c) and 5 U.S.C. 552(a)(1))

Issued in Washington, D.C., on January 4, 1973.

C. R. MELUGIN, Jr.,
Acting Director,
Flight Standards Service.

NOTE: Incorporation by reference provisions in §§ 97.10 and 97.20 (35 FR 5610), approved by the Director of the Federal Register on May 12, 1969.

[FR Doc.73-489 Filed 1-9-73;8:45 am]

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 19—CHEESES, PROCESSED CHEESES, CHEESE FOODS, CHEESE SPREADS, AND RELATED FOODS

Cottage Cheese; Definitions, Standards of Identity, and Confirmation of Effective Date

In the matter of establishing a definition and standard of identity for low fat cottage cheese (21 CFR 19.531); amending the identity standard for cottage cheese (21 CFR 19.525) and changing the name of the food to "cottage cheese dry curd"; and amending the identity standard for creamed cottage cheese (21 CFR 19.530) by changing the name of the food to "cottage cheese" and requiring declaration of the milkfat content:

An order in the above identified matter was published in the FEDERAL REGISTER of June 30, 1972 (37 FR 12934). No objections were filed to the order, but communications requesting changes in the order were received from a cottage cheese manufacturer and an association representing cottage cheese manufacturers. The following changes in the identity standard for cottage cheese were requested:

1. To permit the collective ingredient declaration "vegetable gum" in lieu of the specific names for carob (locust) bean gum, guar gum, gum karaya, and gum tragacanth in order to simplify the ingredient statement and permit interchanging of these ingredients without making changes in the labels used.

2. To permit the required declaration of the percentage of fat contained in the food on any appropriate information panel rather than on the principal display panel, thus preventing overcrowding of that panel.

3. To permit use of the declaration "__ percent milkfat," the blank being filled in with the percentage of milkfat contained, as an alternative to the declaration "not less than 4 percent milkfat." The shorter declaration would conserve label space and would be more informative to consumers of cottage cheese having a milkfat content significantly greater than 4 percent by weight of the food, i.e., cottage cheese containing 5 percent or 6 percent fat which is marketed in some areas of the United States.

There is significant consumer interest that labels of standardized foods bear complete information as to the ingredients contained in the food and the Commissioner of Food and Drugs in an earlier publication (37 FR 5120, March 10, 1972) expressed agreement that such complete ingredient declaration is in the interest of consumers. The Commissioner therefore concludes that there is good reason for retaining the provision in the June 30, 1972, order that vegetable gums should be identified by their specific common names.

An increase in the fat level of cottage cheese dressing tends to increase the palatability of the product. However, some consumers wish to reduce their intake of fat. It is reasonable to conclude that statements giving the fat content of cottage cheese products would less likely to be read by consumers at the time of purchase if they appeared on a panel other than the principal display panel. This information, moreover, is part of the common or usual name of the food, and thus must appear wherever the name is used. The requirement of the June 30, 1972, order regarding placement of the fat declaration on labels is retained.

The Commissioner is also of the opinion that the declaration "not less than 4 percent milkfat" should be retained for cottage cheese having fat content at or slightly above 4 percent. Cottage cheese is composed of curd which has a negligible amount of fat and a creaming mixture having a high fat content. The food is not homogenous, and variations in the ratio of curd to creaming mixture from package to package of the finished product cannot be avoided. Manufacturers must maintain an average fat content in excess of 4 percent to assure that each individual package meets the 4 percent minimum fat content specified by § 19.530(a). Under these circumstances the declaration "Not less than 4 percent milkfat" is more truthful than the statement "4 percent milkfat." The Commissioner concludes that the alternate statement "4 percent milkfat minimum," which is somewhat shorter but conveys the same meaning as "Not less than 4 percent milkfat," should also be permitted. Further, he is of the opinion that cottage cheese containing significantly more than 4 percent milkfat should be labeled with a declaration that more accurately reflects the actual fat percentage contained, and the editorial amendment set forth below provides for such declaration.

The June 30, 1972 cottage cheese order gave notice of the intention of the Commissioner that not only the fat content, but also the caloric content and other information shall appear on cottage cheese product labels as may be required by the forthcoming nutrition labeling regulations. An association representing cottage cheese manufacturers has taken exception to this, on grounds that nutrition labeling should be voluntary, rather than mandatory. Although the nutrition labeling plan proposed in the FEDERAL REGISTER of March 30, 1972 (37 FR 6493) is a voluntary one, it would require that labels may not give only partial nutritional information (such as fat content), but must give the complete information required by the nutrition labeling regulations so that consumers can fully evaluate the total nutritional value of the food. Cottage cheese products are frequently used by persons on restricted diets, and the Commissioner is of the opinion that complete nutritional labeling on these products would be of benefit to consumers. Even without full nutrition labeling, moreover, § 125.6 would require declaration of caloric content for a lowfat food.

The amendments promulgated by the order published June 30, 1972 (37 FR 12934), were to become effective 1 year later unless stayed by the filing of proper objections. A number of forthcoming regulations will involve significant changes in the labeling requirements for packaged food. The Commissioner is aware of the unnecessary costs which would be incurred by the food industry resulting from a series of individual labeling changes made over a relatively short period of time and that such costs would likely be passed on to the consumer in the form of higher food prices. Accordingly, he concludes that it would be in the interest of the consumer and food industry alike to establish a new effective date which would provide adequate time for bringing all affected products into full compliance with these amendments.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055-1056 as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 371) and under authority delegated to the Commissioner (21 CFR 2.120), notice is given that no objections or requests for a hearing were filed to the order in the above identified matter published in the FEDERAL REGISTER of June 30, 1972 (37 FR 12934). Accordingly, the amendments promulgated by that order and the editorial amendment set forth below shall become effective December 31, 1974, except that any affected product for which labeling is ordered on or after December 31, 1973 must be brought into full compliance with these amendments at the time such labeling is placed into use, regardless of time. The editorial amendment is as follows:

In § 19.530(c), subparagraph (2) is revised to read as follows:

§ 19.530 Cottage cheese; identity; label statement of optional ingredients.

• • • • • •

(c) • • •

(2) The statement "not less than ____ percent milkfat" or "____ percent milkfat minimum", the blank being filled in with the whole number that is closest to, but does not exceed, the actual fat content of the product.

• • • • • •

Effective date. This regulation shall become effective on December 31, 1974, except that any affected product for which labeling is ordered on or after December 31, 1973, must be brought into full compliance with these amendments at the time such labeling is placed into use, regardless of time.

(Secs. 401, 701, 52 Stat. 1046, 1055-1056, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 371)

Dated: January 2, 1973.

SAM D. FINE,
Associate Commissioner
for Compliance.

[FR Doc.73-481 Filed 1-9-73;8:45 am]

PART 51—CANNED VEGETABLES

Canned Vegetables Other Than Those Specifically Regulated; Use of Safe and Suitable Organic Acid; Confirmation of Effective Date

In the matter of amending the standard of identity for canned vegetables other than those specifically regulated (21 CFR 51.990) to provide for the optional use of any safe and suitable organic acid, with label declaration, as an alternative to the use of a vinegar for acidification as a processing aid.

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055-1056 as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 371) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), notice is given that no objections were filed in response to the above-identified order which was published in the FEDERAL REGISTER of October 14, 1972 (37 FR 21807). Accordingly, the order became effective December 13, 1972.

Dated: January 2, 1973.

SAM D. FINE,
Associate Commissioner
for Compliance.

[FR Doc.73-483 Filed 1-9-73;8:45 am]

PART 121—FOOD ADDITIVES

Glycerol Ester of Wood Rosin; Adjustment of Density of Citrus Oils in Beverage Preparation

In the FEDERAL REGISTER of August 28, of Food and Drugs proposed that 1971 (36 FR 17360) the Commissioner § 121.1084 (21 CFR 121.1084), the food additive regulation providing for the use of glycerol ester of wood rosin to adjust the density of citrus oils used in the preparation of beverages, be amended to restrict usage by imposing a tolerance of not more than 100 parts per million of the additive in the finished beverage. In response to the proposal, the following three comments were received:

1. One comment was made indicating that a tolerance level in excess of 100 parts per million of the additive in the final beverage would be justified on the basis that such higher levels have been used for some time without any apparent harmful effects. It was also stated that a joint survey is underway concerning the usage of the additive, and it was requested that a final decision on the proposal be delayed until completion of the survey.

Since the available toxicological data do not support usage levels of the additive in excess of 100 parts per million, and no new data have been presented, the Commissioner concludes that there is no basis for deferring a final decision on the proposal.

2. Another comment concerned the subject of a notice of filing of a petition (FAP OA2513) published in the FEDERAL REGISTER of May 23, 1970 (35 FR 7996), requesting the use of glycerol ester of

V 38 - 6 JAN 10 73 XUM

tall oil rosin for the same use as is permitted for glycerol ester of wood rosin. The petitioner commented that glycerol ester of tall oil rosin is identical in chemical composition and safety to glycerol ester of wood rosin, and requested that the regulation be amended to authorize the use of glycerol ester of tall oil rosin to the same extent as the ester from wood rosin.

The Commissioner concludes that, although the glycerol ester of tall oil rosin is quite similar to glycerol ester of wood rosin, it is not identical and an adequate analytical method is needed for enforcement of the tolerance limitation to complete the petition requirements prescribed by § 121.51 (21 CFR 121.51).

3. A third comment offered no objection to imposing the tolerance limitation, but suggested that a period of 9 months be permitted for products containing glycerol ester of wood rosin to be brought into compliance with the proposed tolerance limitation.

The Commissioner concludes that the requested 9 months extension is reasonable and will protect the public health.

Therefore, having considered the comments received and other relevant information, the Commissioner concludes that the subject proposal should be adopted as set forth below. Accordingly, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(d), 72 Stat. 1787; 21 U.S.C. 348(d)) and under authority delegated to the Commissioner (21 CFR 2.120), § 121.1084 is amended by revising paragraph (b) to read as follows:

§ 121.1084 Glycerol ester of wood rosin.

• • • • •

(b) It is used to adjust the density of citrus oils used in the preparation of beverages whereby the amount of the additive does not exceed 100 parts per million of the finished beverage.

Effective date. This order shall become effective on October 9, 1973.

(Sec. 409(d), 72 Stat. 1787; 21 U.S.C. 348(d))

Dated: January 2, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73-484 Filed 1-9-73;8:45 am]

SUBCHAPTER C—DRUGS

PART 146c—CERTIFICATION OF CHLORTETRACYCLINE (OR TETRACYCLINE) AND CHLORTETRACYCLINE-(OR TETRACYCLINE-) CONTAINING DRUGS

Veterinary Use of Tetracycline Hydrochloride Intramuscular and Tetracycline Phosphate Complex Intramuscular; Revocation

Based on a notice of withdrawal of approval of a new animal drug application (Docket No. FDC-D-570) appearing elsewhere in this issue of the FEDERAL REGISTER, the Commissioner of Food and Drugs concludes that the antibiotic drug regulations should be amended to revoke provisions for the veterinary use of tetracycline hydrochloride intramuscular and tetracycline phosphate complex intramuscular.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 507, 512, 59 Stat. 463, as amended, 82 Stat. 343-351; 21 U.S.C. 357, 360b) and under authority delegated to the Commissioner (21 CFR 2.120), § 146c.221 *Tetracycline hydrochloride for intramuscular use; tetracycline phosphate complex for intramuscular use* is amended by revoking paragraph (c)(2).

Within 30 days after publication hereof in the FEDERAL REGISTER any person who will be adversely affected by the removal of any such drug from the market may file objections to this order stating reasonable grounds for their objections and may request a hearing on such objections. Objections and request for a hearing should be filed in quintuplicate with the Hearing Clerk, Food and Drug Administration, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852.

If a hearing is requested, the objections must identify the claimed errors in the NAS/NRC evaluation and any adequate and well-controlled investigations which would indicate conclusively that the drug would have the claimed effectiveness. Objections and requests for a hearing which are received in response to this order may be seen in the above office during business hours, Monday through Friday.

Effective date. This order shall become effective February 19, 1973.

(Secs. 507, 512, 59 Stat. 463, as amended, 82 Stat. 343-351; 21 U.S.C. 357, 360b)

Dated: January 2, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

Title 29—LABOR

Chapter XVII—Occupational Safety and Health Administration, Department of Labor

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Utah Developmental Plan

1. *Background.* The State of Utah submitted on September 20, 1972, a plan pursuant to Part 1902 requesting approval of the plan by the Assistant Secretary of Labor for Occupational Safety and Health. On October 21, 1972, a notice was published in the FEDERAL REGISTER (37 FR 22781) concerning the submission of the plan, the fact that the question of approval was in issue before the Assistant Secretary, and an invitation for public comments thereon.

The plan identifies the Utah State Industrial Commission as the State agency designated to administer the plan throughout the State. It defines the covered occupational safety and health issues as defined by the Secretary of Labor in 29 CFR 1902.2(c)(1). The plan states that the Utah Industrial Commission currently is exercising statewide inspection authority to enforce many State standards. It describes procedures for the development and promulgation of additional safety standards, rulemaking power for enforcement of standards, laws, and orders in all places of employment in the State; the procedures for prompt restraint or elimination of imminent danger conditions; and procedures for inspection in response to complaints.

The plan includes proposed draft legislation to be considered by the Utah Legislature during its 1973 session amending title 35, Chapter 1 of the Utah State Code and related provisions, to bring them into conformity with the requirements of Part 1902.

Under this legislation all occupational safety and health standards and amendments thereto which have been promulgated by the Secretary of Labor, except those found in 29 CFR 1910.13, 1910.14, 1910.15, and 1910.16 (ship repairing, shipbuilding, shipbreaking, and longshoring) will, after public hearing by the Utah agency be adopted and enforced by that agency. The plan sets forth a timetable for the proposed adoption of standards.

The legislation will give the Utah Industrial Commission full authority to administer and enforce all laws, rules, and orders protecting employee safety and health in all places of employment in the State. It also proposes to bring the plan into conformity in procedures for providing prompt and effective standards for the protection of employees against new and unforeseen hazards and for furnishing information to employees on hazards, precautions, symptoms, and emergency treatment; procedures for variances and the protection of employees from hazards; a safety and health program for public employees; and a statewide system of encouraging voluntary compliance. This enforcement will be accomplished through the utilization of State employees hired under an approved merit system.

The proposed legislation will insure employer and employee representatives an opportunity to accompany inspectors and call attention to possible violations before, during, and after inspections; protection of employees against discharge or discrimination in terms and conditions of employment; notice to employees of their protections and obligations; adequate safeguards to protect trade secrets; prompt notice to employers and employees of alleged violations of standards and abatement requirements; effective sanctions against employers; and employer's right to review alleged violations, abatement periods, and proposed penalties with opportunity for employee participation in the review proceedings.

Included in the plan is a statement of the Governor's support for the proposed legislation and a statement of legal opinion that it will meet the requirements of the Occupational Safety and Health Act of 1970, and is consistent with the constitution and laws of Utah. The plan sets out goals and provides a timetable for bringing it into full conformity with Part 1902 upon enactment of the proposed legislation by State legislature.

Interested persons were afforded thirty (30) days from the date of publication to submit written comments concerning the plan. Further, interested persons were afforded an opportunity to request an informal hearing hearing with respect to the plan, or any part thereof, upon the basis of substantial objections to the contents of the plan.

Written comments concerning the plan were submitted on behalf of the American Federation of Labor and Congress of Industrial Organizations (AFL-CIO), Utah Manufacturers Association, United States Steel Corp., Associated General Contractors of America, the Horne Construction Corp. There were no requests for an informal hearing.

2. *Issues.* The public comments and the national office review of the plan raised significant issues. The first regards section 6(2)(f)(i) of Utah's proposed legislation. This section, which concerns temporary variances, differs from the Federal Act. It does not have a maximum duration limit for temporary variances whereas OSHA has a 1-year limitation. The public comments expressed concern that temporary variances could last indefinitely. Utah has responded to this problem in a letter to the Director of Federal and State Operations of the Occupational Safety and Health Administration, dated December 11, 1972, in which they propose to include the following clause in their enabling legislation, "In no case shall the period of an temporary order exceed one (1) year." This appears satisfactory and conforms to 29 CFR 1902.4(b)(2)(iv).

Another significant issue is the thoroughness of Utah's program for public employees. Section 15 of Utah's proposed legislation did not clearly state what the elements of the public employee program would be. However, in a letter to the OSHA Director of Federal and State Operations, dated December 8, 1972, Utah stated that the public employee program would be "the same as" the private sector program with one exception. There will be no monetary sanctions assessed against political subdivisions. All such sanctions will be in the form of "close orders." This is consistent with 29 CFR 1902.3(j) and section 18(c)(6).

Another significant issue concerns the composition of the Utah Occupational Safety and Health Review Commission. The Commission is similar to the Federal Commission except that its members are chosen from the Utah Industrial Commission, the agency designated to administer and enforce the Act. Public comments expressed concern that this structure would not comply with due process and afford contesting parties a fair and objective review. The composition of the Utah Commission is acceptable on the assumption that once in operation, it will comply with basic procedural safeguards for fairness such as separation of functions at staff levels.

Public comments also expressed concern that in cases where an employee suffers discrimination due to the exercise of rights afforded him under the State plan, the Utah Review Commission may restrain such discrimination and afford the employee any appropriate relief through the issuance of an order. Under the Federal program (OSHA section 11(c)(2)) the Secretary cannot act directly but must file an action in a United States district court. In each situation, the remedies available to an employee would be identical. Utah's decision to grant such remedies, when appropriate, administratively rather than judicially does not diminish the effectiveness of their antidiscrimination provision. It may be more effective than the Federal procedure by being more efficient. It is, of course, assumed that due process will be complied with and employers will be afforded notice and an opportunity to be heard.

The public comments also raise the issue of whether the results of medical examinations required by standards will be furnished to employers. The concern expressed was that employers would not have access to those records. Section 6(2)(g) of Utah's proposed legislation mirrors OSHA, section 6(b)(7) verbatim with regard to this question. Furthermore, Utah proposes to adopt Federal standards without alteration. Therefore, Utah standards should provide for employer access to medical records whenever a corresponding OSHA standard so provides.

3. *Decision.* After careful consideration of the Utah plan and comments submitted regarding the plan, the plan is hereby approved under section 18 of the act and Part 1902.

This decision incorporates requirements of the act and implementing regulations applicable to State plans generally. It also incorporates our intentions as to continued Federal enforcement of Federal standards in areas covered by the plan and the State's developmental schedule as set out below.

Pursuant to § 1902.20(b)(iii) of Title 29 Code of Federal Regulations the present level of Federal enforcement in Utah will not be diminished. Among other things, the U.S. Department of Labor will continue to inspect catastrophes and fatalities, investigate valid complaints under section 8(f), continue its Target Safety and Target Health Program, and inspect a cross-section of all industries on a random basis.

Within 9 months following this approval, an evaluation of the State plan, as implemented, will be made to assess the appropriate level of Federal enforcement activity. Federal enforcement authority will continue to be exercised to the degree necessary to assure occupational safety and health protection to employees in the State of Utah.

The Utah plan is developmental. The following is the schedule of the developmental steps provided by the plan:

(a) Introduction of enabling legislation in State legislature during January 1973.

(b) Expected enactment of the enabling legislation by March 1973.

(c) Formal adoption of Federal standards and revocation of existing Utah State standards by September 1, 1973.

(d) Adoption of safety standards for agriculture by September 1, 1974.

(e) Formal adoption of 29 CFR Parts 1903, 1904, and 1905 as rules and regulations of Utah by July 1974.

(f) Effective date of new standards, commencement of State enforcement by September 1973.

(g) A management information system by July 1, 1974.

Pursuant to section 18 of the Occupational Safety and Health Act (29 U.S.C. 667), Part 1952 is hereby amended by adding thereto a new Subpart E reading as follows:

Subpart E—Utah

Sec.
1952.110 Description of the plan.
1952.111 Where the plan may be inspected.
1952.112 Level of Federal enforcement.
1952.113 Developmental schedule.

AUTHORITY: Sec. 18, Public Law 91-596, 84 Stat. 1608; 29 U.S.C. 667.

Subpart E—Utah

§ 1952.110 Description of the plan.

(a) The plan identifies the Utah State Industrial Commission as the State agency designated to administer the plan throughout the State. It defines the covered occupational safety and health issues as defined by the Secretary of Labor in 29 CFR 1902.2(c)(1). The plan states that the Utah Industrial Commission currently is exercising statewide inspection authority to enforce many State standards. It describes procedures for the development and promulgation of additional safety standards, rule making power for enforcement of standards, laws, and orders in all places of employment in the State; the procedures for prompt restraint or elimination of imminent danger conditions; and procedures for inspection in response to complaints. The plan includes proposed draft legislation to be considered by the Utah Legislature during its 1973 session amending title 35, chapter 1 of the Utah State Code and related provisions, to bring them into conformity with the requirements of Part 1902. Under this legislation all occupational safety and health standards and amendments thereto which have been promulgated by the Secretary of Labor, except those found in 29 CFR 1910.13, 1910.14, 1910.15, and 1910.16 (ship repairing, shipbuilding, shipbreaking, and longshoring) will, after public hearing by the Utah agency be adopted and enforced by that agency. The plan sets forth a timetable for the proposed adoption of standards. The legislation will give the Utah Industrial Commission full authority to administer and enforce all laws, rules, and orders protecting employee safety and health in all places of employment in the State. It also proposes to bring the plan into conformity in procedures for providing prompt and effective standards for the protection of employees against new and unforeseen hazards and for furnishing information to employees on hazards, precautions, symptoms, and emergency treatment; and procedures for variances and the protection of employees from

V38-6 JAN 10 73 XUM

hazards. The proposed legislation will ensure employer and employee representatives an opportunity to accompany inspectors and call attention to possible violations before, during, and after inspections; protection of employees against discharge or discrimination in terms and conditions of employment; notice to employees of their protections and obligations; adequate safeguards to protect trade secrets; prompt notice to employers and employees of alleged violations of standards and abatement requirements; effective sanctions against employers; and employer's right to review alleged violations, abatement periods, and proposed penalties with opportunity for employee participation in the review proceedings.

(b) Included in the plan is a statement of the Governor's support for the proposed legislation and a statement of legal opinion that it will meet the requirements of the Occupational Safety and Health Act of 1970, and is consistent with the Constitution and laws of Utah. The plan sets out goals and provides a timetable for bringing it into full conformity with Part 1902 of this chapter upon enactment of the proposed legislation by the State legislature.

(c) The plan includes the following documents as of the date of approval:

(1) The plan with appendixes.

(2) A letter from Carlyle F. Gronning, Chairman of the Utah Industrial Commission to the Office of State Programs with an attached memo sheet of clarifications dated October 27, 1972.

(3) A letter from Carlyle F. Gronning to the Office of State Programs dated December 3, 1972, clarifying issues raised in the plan review.

(4) A letter from Carlyle F. Gronning to the Office of Federal and State Operations dated December 11, 1972, clarifying the remaining issues raised in the review process.

§ 1952.111 Where the plan may be inspected.

A copy of the complete Utah plan may be inspected and copied during normal business hours at the Utah Industrial Commission, Safety Division, 158 Social Hall Avenue, Salt Lake City, UT 84114. A copy of the complete Utah plan may also be inspected and copied during normal business hours at (a) the Office of the Regional Administrator, Occupational Safety and Health Administration, U.S. Department of Labor, Federal Building, Room 15010, Post Office Box 3588, 1961 Stout Street, Denver, CO 80202; and (b) Office of Federal and State Operations, OSHA, U.S. Department of Labor, Room 305, Railway Labor Building, 400 First Street NW., Washington, DC 20210.

§ 1952.112 Level of Federal enforcement.

Pursuant to § 1902.20(b)(1)(iii) of this chapter of Federal Regulations, the present level of Federal enforcement in Utah will not be diminished. Among other things, the U.S. Department of Labor will continue to inspect catastrophes and fatalities, investigate valid complaints under section 8(g), continue its Target Safety and Target Health Programs, and inspect a cross-section of all industries on a random basis.

§ 1952.113 Developmental schedule.

The Utah plan is developmental. The following is the schedule of developmental steps provided by the plan:

(a) Introduction of resulting legislation in State Legislature during January 1973.

(b) Expected enactment of the enabling legislation by March 1973.

(c) Formal adoption of Federal standards and revocation of existing Utah State standards by September 1, 1973.

(d) Adoption of safety standards for agriculture by September 1, 1974.

(e) Formal adoption of Parts 1903, 1904, and 1905 of this chapter as rules and regulations of Utah by July 1974.

(f) Effective date of new standards, commencement of State enforcement by September 1973.

(g) A management information system by July 1, 1974.

(Sec. 18, Public Law 91-596, 84 Stat. 1608; 29 U.S.C. 667)

Signed at Washington, D.C., this 4th day of January 1973.

G. C. GUENTHER,
Assistant Secretary of Labor.

[FR Doc.73-487 Filed 1-9-73;8:45 am]

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 16495; FCC 72-1198]

PART 25—SATELLITE COMMUNICATIONS

Establishment of Domestic Communications-Satellite Facilities by Nongovernmental Entities

Memorandum opinion and order. In the matter of establishment of domestic communications-satellite facilities by nongovernmental entities, Docket No. 16495.

1. The Commission has before it six petitions for reconsideration or clarification of the "Second Report and Order (Second Report)" issued in this proceeding on June 16, 1972 (35 FCC 2d 844); various responsive and reply pleadings related to such petitions; a memorandum of understanding and supplementary agreement submitted by Communications Satellite Corp. (Comsat) and MCI Lockheed Satellite Corp. (MCIL); and comments and reply comments on such memorandum of understanding and supplementary agreement.[1] Those seeking reconsideration or clarification are: American Telephone and Telegraph Co. (A.T. & T.); Comsat; RCA Global Communications, Inc. and RCA Alaska Communications, Inc. (the RCA applicants); Network Project; National Association of Educational Broadcasters (NAEB); and Western Union International (WUI).

2. The "Second Report" adopted a policy of affording a reasonable opportunity for entry into the domestic communications satellite field by qualified applicants, subject to certain showings and conditions. Apart from the showings required by statute and an additional showing required of all common carrier applicants now engaged in providing essential communications services to the public ("Second Report", paragraph 18), special conditions were placed on some pending applicants ("Second Report", paragraphs 21–32, 34). The special conditions that are relevant to the instant petitions may be summarized briefly as follows:

a. A.T. & T.'s use of domestic satellites would be limited initially to MTT, WATS, AUTOVON, emergency restoration in the event of terrestrial outage, and possibly other services in the case of Alaska, Hawaii, and Puerto Rico-Virgin Islands (paragraph 21).

b. The Comsat/A.T. & T. proposal based on their contractual lease arrangement would be disallowed (paragraph 22).

c. A.T. & T. would have the option of applying for authority to own and operate domestic satellite facilities, or of leasing transponders under tariff from Comsat or any other carrier who elects to proceed solely as a carrier's carrier (paragraph 22).

d. Comsat would be required to elect between pursuing its multi-purpose application or serving A.T. & T. If it elected to serve A.T. & T., Comsat would be required to operate exclusively as a carrier's carrier pursuant to tariff offerings and to provide some capacity for use by carriers other than A.T. & T. (paragraph 23).

e. In the event Comsat should elect to proceed other than as a carrier's carrier, it would be prohibited from owning or operating domestic satellite facilities at any overseas point served by Intelsat facilities (paragraph 26).

f. A.T. & T. and other terrestrial carriers seeking domestic satellite authorizations would be required to submit for Commission approval, prior to action on their applications, a description of the kinds of interconnection arrangements they will make available to other domestic satellite system or earth station licensees (paragraph 34).

3. The "Second Report" also adopted policies relating to service to Alaska, Hawaii, Puerto Rico, and educational entities, which are under dispute in the instant pleadings. With the advent of service via domestic satellites, it would be Commission policy to integrate charges for services between Alaska, Hawaii, and Puerto Rico and the contiguous 48 States into the domestic rate patterns (paragraphs 35–41). Toward this end (id.):

a. Domestic satellite applicants authorized to serve these points would be required, within 6 months from the issuance of the authorization, to submit a specific proposal for revised rates for MTT service for review and approval of the Commission prior to the commencement of service (paragraph 37).

b. Record carriers now serving these points would be required to submit a proposal for integration within the same time frame (paragraph 38).

c. A.T & T. would provide MTT service via domestic satellites to these three points, in conjunction with the appropriate local carrier, with a possible exception for GTE Satellite Corp. (GTE)[2] in the case of Hawaii in the event GTE makes certain showings to justify authorization of its proposed system (paragraph 39).

d. Alaska, Hawaii, and Puerto Rico would be afforded an opportunity to obtain specialized services via the same satellites and earth stations used for MTT service, without precluding the authorization of additional, independent domestic satellite facilities to provide specialized services to these points (paragraph 40).

e. The system authorized to provide interstate MTT service to Alaska would be required to afford access to the same system for intra-Alaska service, if desired (paragraph 41).

With respect to the terms of access to domestic satellite facilities by public broadcasting and other educational interests, the "Second Report" stated the Commission's willingness to entertain specific proposals by carriers or users for the prescription of preferential rate classifications, but declined to initiate any requirement as to common carriers or to enunciate any general statement of policy (paragraph 43).

4. It appears to us, upon reviewing the petitions for reconsideration and other pleadings, that the principal issues posed by the A.T. & T. and Comsat petitions and by the Comsat/MCIL Memorandum of Understanding are interrelated and involve primarily the same portions of the "Second Report"; whereas other issues raised in their petitions, and in the petitions of the RCA applicants, the Network Project, NAEB and WUI, go to different policy determinations in the "Second Report." The principal requests of the A.T. & T. petition are that the Commission reconsider the conditions limiting its initial use of domestic satellites to particular services and disapproving the Comsat/A.T. & T. lease arrangement. Comsat also challenges the disallowance of the Comsat/A.T. & T. lease agreement, as well as the requirement that it elect between serving A.T. & T. and other carriers as a carrier's carrier or serving entities other than A.T. & T. on both a "retail" and "wholesale" basis as proposed in Comsat's multipurpose application. Comsat has further requested that its memorandum of understanding with MCIL be regarded as supplemental information to its petition for reconsideration, and has indicated that Commission approval of that proposal may moot some issues in its petition. Under the memorandum of understanding, MCIL reserves the right to terminate in the event that the Commission grants that portion of A.T. & T.'s petition challenging the initial limitation on the service it may provide via domestic satellite. Accordingly, we will first address these aspects of the A.T. & T. and Comsat petitions and related pleadings, and then turn to the petitions of others and the remaining questions raised by A.T. & T. or Comsat.

I. A.T. & T.'s INITIAL USE OF SATELLITE, THE COMSAT/A.T. & T. LEASE AGREEMENT, THE COMSAT ELECTION REQUIREMENT, AND THE COMSAT/MCIL MEMORANDUM OF UNDERSTANDING

A. PLEADING OF THE PARTIES

1. A.T. & T. Comsat and MCIL

5. "A.T. & T." urges that the condition limiting its initial use of domestic satellites to specified services (MTT, WATS, AUTOVON, emergency restoration in the event of terrestrial outage and possibly other services in the case of Alaska, Hawaii and Puerto Rico) is unsupported by the record, unsound as a matter of policy, and contrary to the Commission's decision in "Specialized Common Carrier Services," 29 FCC 2d 870. It sees no basis for the concerns expressed in paragraphs 9–12 of the "Second Report" and claims that considerations of this nature would not, in any event, justify the restriction. A.T. & T. also asserts that the limitation would unnecessarily fragment the network function, inject unnecessary costs by requiring A.T. & T. to segregate the segment of private line services eligible for satellite transmission from ineligible services, and deny the public the benefits of full integration of domestic satellites into the nationwide network. A.T. & T. further states that there is no rational basis for singling out only one Government system, AUTOVON, from other essential private line Government services, and that it should, in any event, be authorized to provide any U.S. Government private line service by means of its initial domestic satellite system.

6. Both "A.T. & T." and "Comsat" urge that their lease agreement should not be rejected. A.T. & T. claims that the rejection is without justification and that the Commission should permit any applicant, including A.T. & T., to determine for itself the appropriate means of providing its domestic satellite system. Comsat claims that the disallowance of the agreement constitutes a severe penalty for it, without adequate justification, and that no other system applicant has been treated so harshly. To the extent that this action was affected by A.T. & T.'s stock ownership in Comsat and ability to elect three members of Comsat's Board of Directors, Comsat deems such concern to be baseless. In any event, it asserts that restrictions on Comsat are ineffective and inappropriate to deal with a situation over which Comsat has no control. There is also, Comsat asserts, no basis for concern that the agreement would restrain it from competing vigorously in the specialized market, contrary to its own self-interest, or that revenues from the lease would give it an advantage over other domestic satellite entrants.

7. "Comsat" further urges that the "Second Report" unnecessarily weakens competition and "artificially divides the market available to competitive suppliers of satellite services by forbidding anyone who serves A.T. & T. (the largest part of the carrier portion of the market) to serve also the retail or specialized services market." It claims that, if permitted to function without this restriction, Comsat would be a most energetic competitor to A.T. & T. and would not squeeze out potential competition from future entry. Comsat asserts that the tariff alternative is illusory because A.T. & T. would probably opt for system ownership in preference to turning to a carrier's carrier offering tariffed services to A.T. & T. and other carriers. Comsat further alleges that it has no reasonable chance of attracting the business of other carriers in view of the stated intentions of Western Union and GTE in response to paragraph 45(b) of the "Second Report."

8. According to "Comsat/MCIL" their memorandum of understanding, as supplemented by the agreement of October 3, 1972,[3] contemplates a joint enterprise to establish and operate a multipurpose domestic satellite system. This would be accomplished, subject to Commission approval, through a restructured and renamed MCI Lockheed Satellite Corp., owned jointly and equally by Comsat, MCI Satellite, Inc., and Lockheed Aircraft Corp. New cash in the total amount of $1,750,000 would be contributed by Comsat ($750,000), Lockheed ($500,000) and MCI Satellite ($500,000) to cover foreseeable preoperating expenses of the new corporation. When the funding requirements of the construction phase are known, the management and directors of the jointly held corporation would determine the nature of the necessary financing. The agreement provides for a 16-member Board of Directors. Each of the three stockholders would elect four directors, and all of the stockholders unanimously would elect four independent directors. In order to assure that major decisions of the joint enterprise could not be vetoed by one of the three stockholders or affirmatively forced by any two stockholders, the agreement provides that the vote of 11 directors is required for specified major matters and a majority vote for other matters. However, notwithstanding that provision, a majority of the whole Board, exclusive of all "interested directors" elected by affected stockholders, is required to authorize any contract or transaction (including the issuance, reacquisition or redemption of any securities of the corporation) between the corporation and any

[1] A request for stay of the effectiveness of the Second Report was granted in part and otherwise denied by a memorandum opinion and order issued on Sept. 14, 1972 (FCC 72-807).

[2] Since the Second Report, GTE Service Corp. and the GTE operating companies seeking domestic satellite authorizations have transferred their applications to a newly formed corporation, GTE Satellite Corp.

[3] The agreement was negotiated by Comsat, Lockheed Aircraft Corp., MCI Communications Corp., MCI Satellite, Inc., and MCI Lockheed Satellite Corp.

V38-6 JAN 10 73 XUM

entity owning 10 percent or more of the outstanding stock of the corporation.[4]

9. The stockholders would have "pro rata" preemptive rights in any new issues of securities. The corporation and the stockholders would have successive options to purchase at book value the interest of a stockholder who wishes to dispose of its equity.[5] This requirement would be binding for 2 years or until a public issue of securities, whichever came first. The agreement would terminate in 5 years, or on the effective date of a registration statement or a public issue of securities, whichever is earlier.

10. In pertinent essence,[6] the memorandum of understanding makes the obligations of the parties contingent upon Commission approval of the Comsat/A.T. & T. lease agreement appended to the latters' applications for domestic satellite facilities. If the Comsat/A.T. & T. applications are granted and the proposed joint venture is allowed, the parties will request dismissal of the Comsat multipurpose application and such portions of the Comsat petition for reconsideration as are moot, as well as a grant of the MCIL application as modified to reflect the proposed restructuring. The parties will also request the Commission to hold that the limitation precluding Comsat participation in services or facilities at overseas domestic points served by Intelsat facilities is no longer relevant. In the event that the Commission should decline to approve the memorandum of understanding and supplementary agreement as consistent with the policies underlying the "Second Report" or to waive any variances, the memorandum of understanding would be null and void. MCIL reserves the right to terminate the memorandum of understanding if the Commission should grant A.T. & T.'s request for reconsideration of the service limitation on its initial use of satellites.

11. In a statement submitted on September 8, 1972, with the memorandum of understanding, "MCIL" set forth arguments in support of its view that the objectives stated in paragraph 7 of the "Second Report" (35 FCC 2d at 846) would be promoted by the Comsat/MCIL proposal. It is asserted that "the coalescence of know-how and expertise represented by Comsat in space communications operations, by MCI in marketing specialized services and by Lockheed in advanced space technology would 'maximize the opportunities for the early acquisition of technical, operational and marketing data and experience in the use of this technology as a new communications resource for all types of service.'" This in turn would allegedly afford an "excellent opportunity for a strong, new, and independent entity 'to demonstrate how any operational and economic characteristics peculiar to the satellite technology can be used to provide existing and new specialized services more economically and efficiently than can be done by terrestrial facilities'" (id.). MCIL further claimed that the restructuring would result in a corporate entity with a life of its own, under independent management, with no single owner in a position to dominate corporate or management decisions. As a consequence, MCI stated, "any restraints and inhibitions which some may fear Comsat suffers as a consequence of A.T. & T.'s minority equity position in Comsat and the business relationship that exists, or will exist, between the two are virtually eliminated by the circumstances of Comsats' minority position in MCIL" and the Commission's objective (c) would be served (35 FCC 2d at 847). With respect to the Commission's objective (d), it is asserted that the Comsat/MCIL proposal would "in no way derogate the 'leeway and flexibility' the Commission proposed to retain in the Second Report" (id.).

12. In addition, MCIL urged that the proposal would serve the more specific policies enunciated in paragraphs 8–11 of the "Second Report" (35 FCC 2d at 847–848) and eliminate the necessity for some of the conditions imposed by a then divided Commission in paragraphs 13, and 22–26 thereof (35 FCC 2d at 848–849, 852–853). In claiming that the concern about A.T. & T. expressed in paragraphs 9–11 of the "Second Report" would be "greatly eased" by the proposal, MCIL stated:

> The proposed ownership structure of MCIL bars A.T. & T. from influence over MCIL operations. The restrictions of paragraph 21 of the Second Report, which MCIL urges must be maintained, excludes A.T. & T.'s presence in the satellite specialized services market for the present and thus eliminate the problems of cross-subsidy discussed in paragraphs 10–11 of the Second Report.

Noting further that the conditions adopted in paragraphs 13, 22–26 of the "Second Report" were based on the proposals then pending before the Commission (i.e., the ownership and operation by Comsat of the space segment portion of a satellite system dedicated to the exclusive use of A.T. & T. and the ownership and operation of a multipurpose system by Comsat for other carriers and users), MCIL asserted that the current Comsat/MCIL proposal, if approved, would constitute a significant change (i.e., the multipurpose application of Comsat will be dismissed and Comsat would assume a minority position in MCIL). To the extent that the Commission, in paragraph 14 of the "Second Report" (35 FCC 2d at 849), found reinforcement for these conditions in the equity ownership position of A.T. & T. in Comsat, MCIL claimed that the current proposal legally and practically insulates the restructured MCIL applicant from any inhibitions or restraints that might otherwise carry over from that relationship. Finally, MCIL urged that the restriction in paragraph 26 of the "Second Report", prohibiting Comsat from owning or operating domestic satellite facilities to provide "retail" services at any overseas point served by Intelsat, should be eliminated because the concern as to a potential conflict of interest by Comsat would be diluted to insignificance if its interest were reduced to that of a minority participant in an independent domestic system.

2. Comments of Other Parties

13. A.T. & T.'s request for reconsideration of its initial service limitation was opposed by "RCA Global Communications, Inc." and "RCA Alaska Communications, Inc." (the RCA applicants); "Fairchild Industries, Inc." (Fairchild); "Western Union International, Inc." (WUI) and "Western Telecommunications, Inc." (WTCI). In its statement filed on September 8, 1972, in response to paragraph 45(b) of the "Second Report," MCIL also stated that it regards this limitation as "essential to the undertakings proposed in its application and the (memorandum of) understanding." These parties claimed that A.T. & T. is reiterating arguments previously advanced and well known to the Commission. They further urged that the "Second Report" sufficiently sets forth the policy considerations underlying this condition, which they deem to be sound and necessary in the public interest to afford a reasonable opportunity for entry by others to offer specialized communications services via domestic satellite facilities. While all such parties supported

[4] We note that the major matters requiring 11 votes are (bylaws annexed to the agreement, Articles II and III): (i) Election of the chief executive officer of the corporation; (ii) approval of the capital budgets of the corporation and any capital expenditures that would materially exceed previously approved budgets; (iii) financial plans, including any security offering and mortgage or pledge of corporation property in excess of $100,000; (iv) declaration of any dividend or return of capital on any shares of the corporation's capital stock; (v) authorization of the redemption, reacquisition or retirement of any securities of the corporation (except as required pursuant to the terms of any such security); and (vi) approval of the configuration and design of any system of communications satellite facilities, including without limitation earth stations, to be established and operated by the corporation, but not including subsystems or components of any such system. See also, Articles IV and V of the bylaws relating to the powers of the executive committee and the officers of the corporation.

[5] The agreement states in this respect that if the corporation elects to purchase none or less than all of the securities of the selling stockholder, then other stockholders have the option to purchase all or any part of their respective pro rata shares of the securities of the selling stockholder. If the corporation and/or the remaining stockholders do not exercise their successive options within 120 days, the selling stockholder may otherwise dispose of the securities.

[6] Both Comsat and MCIL reserve the right to pursue their pending applications in the event the proposed joint venture is not approved by the Commission or is terminated for other reasons, and MCIL reserves the right then to oppose the Comsat multipurpose application. Various provisions in the memorandum of understanding relating to the rights of the parties should they fail to reach agreement, now appear moot in light of the agreement filed on October 3, 1972.

retention of this condition,[7] WUI made the additional argument that it would be preferable to delete the exception for AUTOVON. These same parties also oppose those portions of the A.T. & T. and Comsat petitions for reconsideration that challenge the disallowance of the Comsat/A.T. & T. lease agreement, on substantially similar grounds.

14. In their initial comments on the Comsat/MCIL memorandum of understanding, which were filed on September 26, 1972, before the supplementary agreement of October 3, 1972, was submitted, various parties urged that the memorandum was contingent on reaching an unknown agreement, and did not afford any adequate basis for a decision by the Commission or for comments by the parties. By order issued on October 11, 1972 (FCC 72–903), the Commission afforded interested parties an opportunity to submit comments and reply comments on the October 3 agreement supplementing the Comsat/MCIL memorandum of understanding. The principal contentions on the merits are as follows.

15. "A.T. & T." has no objection to Commission consideration of the memorandum of understanding and supplemental agreement, and expresses no views on the merits of these undertakings. However, it expressly adheres to its request for reconsideration of the condition limiting its initial use of domestic satellites to particular services and the condition disallowing the Comsat/A.T. & T. proposal, and urges that these questions be resolved on their merits without being delayed or otherwise affected by the Comsat/MCIL proposal.

16. The "RCA" applicants, "Fairchild, American Satellite Corporation and WUI" are opposed to approval of the Comsat/MCIL proposal and urge that the memorandum of understanding and supplemental agreement do not obviate the considerations underlying the conditions imposed in the "Second Report." Specifically, it is asserted that the agreement does not assure that Comsat will not become the dominant partner in view of its experience in Intelsat and financial resources, as compared to MCI and Lockheed, and its position to influence Lockheed through Comsat's procurement powers in both the international and domestic satellite fields.[8] Under the agreement (bylaws, Article III, section 9), they point out, the corporation's financial plans and the system configuration and design are left for future decision by the Board of Directors, and hence are presently unknown to the Commission. Moreover, they claim that the provisions for preemptive rights in new or additional securities issues and for transfer of stockholder securities (agreement, sections 4 and 5), do not assure that Comsat would not ultimately emerge as the dominant stockholder. The provisions relating to the selection of directors and voting (agreement, section 7 and bylaws, Articles II, III and IV) allegedly do not afford an adequate safeguard because the so-called independent Class B directors (and possibly even the directors selected by Lockheed or MCI) might have to accommodate Comsat's private interests in order to avoid an operational stalemate, or might be influenced by Comsat's experience and talent reservoir or its procurement powers for the Intelsat and proposed A.T. & T. system. Further, while the agreement makes no representation as to whether a public offering is intended or not, virtually all of the restrictive provisions would disappear in the event of a public offering (agreement, section 5(g) and section 9).

17. These parties urge that no justification has been shown for departing from the conditions imposed on Comsat by the "Second Report." The RCA applicants claim that the Commission now lacks sufficient information to approve the Comsat/MCIL propopsal, and that even with a minority interest the alleged Comsat conflict of interest with its role in Intelsat would remain at offshore domestic points (see "Second Report," paragraph 26). Fairchild and WUI argue that the disallowal of the Comsat/A.T. & T. lease agreement should stand and that Comsat must be prohibited from engaging in the dual role of retailer, including offshore operations, and wholesaler to A.T. & T.[9] Fairchild further alleges that the Comsat/MCIL arrangement could, without proper safeguards, have an adverse effect on future international satellite procurement, and requests the imposition of safeguards in this area.

18. Other parties commenting take miscellaneous positions. "Western Union" states that the questions raised by the Comsat/MCIL agreement (e.g., composition of the applicant and Board of Directors, stock structure, and rights of positive and negative control) are matters that are ordinarily considered in the course of processing and acting on the application, and should be deferred to that stage. It further supports the policies and procedures of the "Second Report," and comments that the Comsat/MCIL proposal seems like evidence of the anticompetitive tendency which the Commission foresaw when it prescribed limitations on Comsat in the "Second Report." The "State of Alaska" expresses concern that if a new corporation supplants Comsat in the multipurpose domestic field, there may be a shift in attitude toward service in Alaska. However, the State urges favorable consideration of the proposal, because it believes its interests would be best served by the possibility of a continuing commitment from the new corporation (in the event the Commission is unwilling to reconsider its limitation on Comsat service to offshore points) and because the design of the corporation appears fairly to meet the Commission's earlier objection. "Hughes" has no objection to a delay in resolving the ultimate roles of A.T. & T., Comsat and MCIL in the domestic satellite field, so long as the Hughes/GTE role can be determined at the same time. "Data Transmission Company" (Datran) asserts that the Comsat/MCIL proposal does not ameliorate all of the Commission's reservations concerning the Comsat/A.T. & T. system, particularly the conclusion that if Comsat were to serve A.T. & T. it must operate exclusively as a carrier's carrier and serve all carriers indiscriminately. Since approval of the Comsat/A.T. & T. lease agreement would effect a reduction in the options available to terrestrial carriers, the Commission should first ascertain whether there is adequate assurance that satellite capacity will be available to terrestrial carriers other than A.T. & T. on a fully nondiscriminatory basis. The "Corporation for Public Broadcasting" (CPB) and the "Public Broadcasting Service" (PBS) comment that there appears to be a commitment on the part of the parties to the joint venture that the restructured corporation would prosecute the pending MCIL application, and specifically that the present MCIL proposal for service to public broadcasting would remain an obligation of the newly constituted applicant. On that basis, PBS has no objection however, if the parties to the joint venture have a different view, they should state their position at this time and CPB and PBS should be afforded an opportunity to comment on the question.

3. Replies of MCIL and Comsat

19. In reply to the contention that Comsat, by virtue of its alleged superior financial position and its satellite operating experience, would inevitably achieve dominance of the restructured MCIL Corporation even though the parties and the Commission intended otherwise, "MCIL" asserts that the provisions of the agreement governing the election of directors and voting will accomplish the purpose of independence. With this structure, MCIL contends, no single shareholder could control decisions made in vital matters except with the concurrence of both other stockholders or of another stockholder and at least three of the Class B directors. MCIL further urges that under the provisions affording preemptive rights to the stockholders with respect to any securities involving voting rights, every stockholder has the right to, and the capability of, avoiding dilution of its interest and control vis-a-vis any other shareholder and

[7] ITT World Communications, Inc. (ITT Worldcom) and All America Cables and Radio, Inc. (AAC&R) also filed comments generally supporting the Second Report, with specific comments on other aspects of the A.T. & T. and Comsat petitions.

[8] The RCA applicants note that Comsat's initial one-third ownership is greater than the A.T. & T. ownership in Comsat.

[9] In this connection, Fairchild asserts that the Comsat/MCIL proposal gives rise to a greater need for barring any dual role. Otherwise, it is claimed, the ability of other applicants to compete would be seriously impacted by the circumstance that Comsat's investment in multipurpose operations would be lessened while it continued to derive benefits from its private arrangement with A.T. & T. and possibly shared them with only one of the competitors for the specialized service market, MCIL.

V 38 6 JAN 10 73 XUM

of preventing the issuance of any securities of the corporation which would cause a shift in the control of the corporation. MCIL sees no merit in the argument that regardless of the manner in which the corporation is structured, MCI and Lockheed will be unable to exercise their rights in a manner that would avoid de jure or de facto control by Comsat at some time in the future. Apart from the asserted intent of MCI and Lockheed to the contrary, any future changes that might lead to such a result could not be accomplished without prior written consent of the Commission pursuant to section 310(b) of the Communications Act. Thus, MCIL takes the position that this is not a speculation with which the Commission must deal at this stage.

20. With respect to the contention that the reframed Comsat/MCIL proposal does not obviate the anticompetitive concerns set forth in the "Second Report", MCIL asserts that the danger the Commission sought to avoid by the election requirement is negated by the fact that, under the management structure, Comsat alone will not and cannot control the retail marketing decisions of a multipurpose system in which it holds a minority interest. Moreover, under the proposal any threat of a Comsat advantage over others by virtue of revenues from the Comsat lease agreement would be eliminated because the corporation would not receive these revenues. Though such revenues may constitute resources that Comsat could use for capital contributions to the corporation, MCIL notes this situtation pertains to every domestic satellite applicant whose stockholders have other profitable businesses through which they are able to make capital available to domestic satellite undertakings.

21. In requesting Commission approval of the proposal, MCIL states that Comsat/MCIL is not seeking complete and final approval of the technical and financial qualifications of the corporation, but rather a determination on threshold policy issues. It notes that the technical parameters of the system and the financial plans of the restructured MCIL applicant will be known by the time of, and can be treated in connection with, the Commission's consideration of whether the necessary authorizations should be issued. However, contrary to the contention of Western Union, MCIL urges that a resolution of the policy questions should not be deferred to processing of the applications, which would allegedly place Comsat and MCIL in an inequitable position vis-a-vis other applicants.

22. On November 13, 1972, "Comsat" submitted its reply to comments on the Comsat/MCIL agreement, together with a motion for acceptance of late filing which is hereby granted. Comsat states that: Under our policy of open entry, the Commission has in effect relied upon the forces of competition to ameliorate the potential harmful effects and should not now impose artificial restrictions which would eliminate the most effective potential entrants. Any attempt by one of the three shareholders to weaken the corporation's competitive ability in order to foster external private interests, such as a reluctance to compete with other terrestrial facilities or desire to favor a particular hardware supplier regardless of cost and quality, would redound to the detriment of the corporation and the other two stockholders and is therefore unlikely to succeed. While Comsat does not anticipate that each of the three partners in the corporation would entirely ignore its own self-interest, it urges that the agreement has taken more steps than any other applicant (such as the RCA applicants) to reduce potential conflicts of interest. The necessity to accommodate the widely divergent interests of Comsat, MCI and Lockheed within the framework of the proposed corporate structure that has been established would tend to promote decision-making independence. Comsat further asserts that the comments of other parties challenging the effectiveness of the safeguards in the agreement are not well founded. In any grant of applications the Commission can retain jurisdiction to assure that the representations of the Comsat/MCIL applicant are honored.

23. Specifically, with respect to Fairchild's request for safeguards to prevent an adverse impact on future international procurement competition, Comsat states that even if it were disposed to abuse its fiduciary responsibilities to Intelsat, the procurement regulations of Intelsat and its process for review and evaluation of proposals afford a sufficient safeguard. In any event, the mere fact that Lockheed is a participant in the domestic corporation would not provide sufficient incentive for Comsat to compromise the interests of Intelsat, and its own very substantial investment therein, by attempting to influence the procurement of a spacecraft that was not the best available in terms of price and technical quality. Comsat is also opposed to Western Union's suggestion that consideration of the Comsat/MCIL agreement, and a ruling on its consistency with the Commission's policy objectives, be deferred to the application processing stage.

B. DISCUSSION AND CONCLUSIONS

1. Service limitation on A.T. & T.'s initial use of satellites

24. Turning first to A.T. & T.'s request for reconsideration of the condition in the "Second Report" limiting its use of domestic satellites to specified services, we agree with A.T. & T.'s contention that this issue must be considered on its merits without being affected by the Comsat/MCIL proposal or MCIL's reservation of the right to terminate the memorandum of understanding in the event A.T. & T.'s request should be granted. While Comsat may seek dismissal of issues raised in its own petition for reconsideration, neither Comsat nor MCIL can waive A.T. & T.'s right to pursue its petition for reconsideration of this challenged limitation.

25. On the merits, we are of the opinion that A.T. & T. has not shown any sufficient reason for granting reconsideration of this condition in the public interest except with respect to private line services provided to the Federal Government. The exception for AUTOVON was made in the light of comments by the Department of Defense in response to our "Memorandum Opinion and Order issued herein on March 17, 1972 inviting comments on the staff recommendation (34 FCC 2d 1, 2, 8, 51–53). Although the Department of Defense did not seek any exemption for other private line services to the Federal Government, we are persuaded by the arguments made in paragraphs 10–11 of A.T. & T.'s petition for reconsideration that the condition should be modified to permit A.T. & T. to use any domestic satellite facilities authorized for its use to provide all U.S. Government private line services. In addition to the circumstance that there are many such services besides AUTOVON which are at least as vital to the national defense and security, private line services to the U.S. Government are peripheral to the kind of specialized service markets the "Second Report" was seeking to afford the competitive domestic satellite entrants a reasonable opportunity to develop (35 FCC 2d at 847–848, paragraphs 9–12).

26. In all other respects, we think that A.T. & T. is merely reiterating arguments made prior to the "Second Report," in its written comments and in the views expressed by other parties, and that such arguments do not call for a different conclusion upon reconsideration. We adhere to the considerations and conclusions set forth in paragraphs 4–12, and 21 of the "Second Report," with the exception discussed above and the following amplification.

27. A.T. & T.'s assertion that this initial limitation would artificially and unnecessarily fragment the network function, inject unnecessary costs by requiring it to segregate eligible from ineligible services for purposes of satellite transmission, and deny the public the benefits of full integration of domestic satellites into the nationwide network, is unsupported by cost data or other factual detail. We note that A.T. & T. does not contend that it is impracticable to segregate the services, or that the cost is such as to affect significantly its revenue requirements applicable to its public offerings of service. The "Second Report" adequately treats the policy foundation for this initial condition which is subject to reexamination no later than 3 years after A.T. & T. commences domestic satellite operations.[10] Moreover, A.T. & T. has consistently maintained that while the pending proposal for its first venture in domestic satellites utilizing 4 and 6 GHz frequencies offers certain operational advantages and an opportunity for experimentation—which justify the conceded costs in excess of utilizing terrestrial facilities only, its principal interest in the domestic satellite technology lies in the potential afforded by the large number of frequencies allocated for communications satellite use higher in the spectrum (see "Second Report," paragraph 3; 34 FCC 2d at 18, 51). We do not yet have any application of A.T. & T. for use of the higher frequencies and hence cannot predict whether the initial service limitation will have been reexamined and/or modified before A.T. & T. seeks to commence domestic satellite operations on any more substantial basis.[11] However, since the opportunity for reexamination of the initial limitation in the light of then prevailing conditions comes in a relatively short time, we fail to see how the limitation could operate to deny the public any benefits to be derived from full integration of domestic satellites into the nationwide network of A.T. & T. over any significant period. In any event, in our judgment, the public benefits to be anticipated from this initial limitation—in the form of an enhanced opportunity for other domestic satellite entrants to develop the competitive specialized markets and for users to have "a wider range of choices as to how they may best satisfy their expanding and changing requirements for specialized communication service" ("Specialized Common Carrier Services," 29 FCC 2d 870, 909–910)—outweigh any inconvenience to A.T. & T. as well as its bare assertion of temporary drawback to its customers.

28. With respect to A.T. & T.'s further contention that the initial service limitation is contrary to the policies adopted in "Specialized Common Carrier Services" and other Commission precedent and beyond the Commission's authority, we note the following. As reflected in paragraph 12 of the "Second Report" (35 FCC 2d at 848), we consider the measure adopted there—toward the end that competitive entry is a meaningful reality in the high capacity satellite field—to be reasonable and compatible with our decision in "Specialized Common Carrier Services," which stressed that "our policy determination as to new specialized carrier entry terrestrially, does not afford any measure of protection against domestic communications satellite entry or otherwise prejudge our determination in Docket No. 16495 as to what course would best serve the public interest in the domestic satellite field" (29 FCC 2d at 920).[12] We further believe this initial limitation to be well within our authority under sections 4 (i) and (j), 214, 303, and 307–309 of the Communications Act, and consonant with section 313(a) of the Communications Act and the policies underlying the antitrust laws. For example, we have previously exercised similar authority in connection with the authorization of the TAT IV cable to enhance the potential for competition among international carriers ("American Telephone and Telegraph Company," 37 FCC 1151, 1158–1160 (1964)). See also, the authority conferred by section 303(b) of the Communications Act to: "Prescribe the nature of the service to be rendered by each class of licensed stations and each station within any class" as "public convenience, interest or necessity requires"; and innumerable Commission actions prescribing the nature of the service to be provided by various classes of stations, including those licensed to miscellaneous domestic common carriers (e.g., §§ 21.705, 87.181, 91.2, 93.2, 95.83, and 74.431, 74.531, 74.631, 74.731, 74.831, 74.931, and 74.1231 of the Commission's rules and regulations).

29. Concerning the question of removal of the limitation, we have set forth the two occurrences when this will be considered (see paragraph 21, "Second Report"). We cannot now prejudge the action a future Commission may find necessary to protect the public interest. But we can delineate the appropriate burdens of the interested parties and a timetable for decision. The burden should not be upon A.T. & T. to prove a negative—that its unconditional use of satellite facilities for competitive services will not adversely affect other carriers' domestic satellite undertakings in such a way as to run counter to the public interest. These other carriers are in the most appropriate position to advance any claim of adverse impact affecting the public interest, and the burden is upon them to come forward with a detailed, convincing showing for the continuation of this limitation upon A.T. & T., to which showing A.T. & T. will be afforded an opportunity to respond. Further, the decision on any A.T. & T. request to end this condition should not be delayed for a substantial time period, so that in practical effect—simply because of a delay in administrative procedures—the 3-year initial or "grace" period becomes 4, 5 or 6 years. Accordingly, we specify that the limitation shall end at the earliest of the following occurrences: (a) Upon a finding by the Commission that domestic satellite licensees authorized to offer specialized common carrier services have achieved substantial utilization of their satellite capacity; or, in any event, (b) upon the expiration of a 3-year period after the commencement of domestic satellite operations by A.T. & T. unless the Commission acts to extend the limitation upon consideration of a petition filed by an interested party at least 6 months before the expiration date. In either of the above two circumstances, however, removal of the limitation will depend upon whether the A.T. & T./Comsat ownership issue (see following discussion) has been satisfactorily resolved, either through divestiture by A.T. & T of its stock ownership in Comsat or approval by the Commission of an acceptable plan for such divestiture.

30. Thus, there is one burden that A.T. & T. will be expected to meet as part of any request to use its satellite facilities for competitive specialized services—and that is a showing of elimination of the basic problem which stems from the interrelationship between A.T. & T. and Comsat represented by A.T. & T.'s part ownership of Comsat. It is our view that such interlocking arrangements are not compatible in the long term with the type of competitive environment in the domestic satellite communications that our policies in this and related proceedings (e.g., "Specialized Common Carrier Services," 29 FCC 2d 870) seek to create and maintain. This concern is exacerbated by the proposed interrelationship between Comsat and MCI, considering MCI's competitive posture vis-a-vis A.T. & T. in terrestrial lead-line services.

31. When the Satellite Act was enacted, Congress, in order to assure that the fledgling corporation—Comsat—received needed communications expertise and guidance, made provision for communications common carriers to own up to 50 percent of Comsat stock and to elect six members of Comsat's Board of Directors. Pursuant to this provision, A.T. & T. acquired its 29 percent ownership in Comsat in 1964 and other carriers also acquired substantial interests.[13] Comsat was created by Congress primarily for the important and immediate purpose of representing and promoting this Nation's interests in the establishment and operation, in conjunction with other nations, of a global international communications satellite system. That mission, with the aid and support of A.T. & T. and other carriers, has been achieved with a high degree of success. Comsat is now seeking entry into the domestic communications field to compete with A.T. & T. and other carriers in supplying new and improved domestic communications services. However, in this field the underlying considerations which motivated Congress to permit and

[10] While A.T. & T. renews its previous contention that it does not presently intend to offer satellite only services or to depart from terrestrial tariffs, we think that the 3-year limitation affords greater assurance of a fixed grace period to domestic satellite entrants seeking to serve the specialized markets than a statement of "present" intentions that is subject to change at the discretion of A.T. & T.

[11] However, even assuming that any such application for use of the higher frequencies should be forthcoming and processed in time for the facilities to become operational prior to reexamination of the service limitation, we are of the view that the initial 3-year limitation is nevertheless warranted in the public interest.

[12] Nor do we see any inconsistency between the Second Report and our decision on reconsideration in the Computer Inquiry (Docket No. 16979), 34 FCC 2d 557, which confirmed the Commission's jurisdiction to adopt the restrictions there imposed on non-A.T. & T. carriers eligible to engage in data processing services.

[13] The right of any carrier to own stock was not intended by Congress to be an absolute right. Rather, only those carriers authorized by the Commission upon a finding that their ownership would be consistent with the public interest could become stockholders (see section 304(b) (1) and (2) of the Satellite Act). The FCC issued the appropriate authorization to A.T. & T. on April 29, 1963.

V 38 - 6 JAN 10 73 XUM

encourage A.T. & T.'s ownership in Comsat are no longer controlling. On the contrary, the competitive roles which Comsat and A.T. & T. are assuming in the domestic communications field dictate the need for maximum independence from each other and an arm's-length relationship.

32. Consideration of Comsat's current posture in the international arena does not override the foregoing conclusion. For conditions have changed markedly from 1964 and stock ownership by A.T. & T. in Comsat is no longer necessary to further the policies of the Communications Satellite Act. Since that time, Comsat has developed its own expertise and is a viable entity in its own right, thus obviating the need for the internal guidance and assistance of A.T. & T. and other carriers. Furthermore, the Congress has recognized the diminution, with time, of the importance of carrier participation in the internal affairs of Comsat. Thus, in 1969, Congress amended the 1962 Satellite Act [14] to provide that carrier representation on the Comsat Board of Directors will be proportionate to the amount of stock they collectively own in Comsat, as contrasted with the original Act which provided for six carrier directors regardless of the amount of carrier stock ownership. The major carriers, with the exception of A.T. & T., have all divested themselves of their shareholdings with the result that only A.T. & T. is now eligible to nominate and elect carrier directors and, in fact, there are currently only three carrier directors on the Comsat Board, all of whom represent A.T. & T.

33. In light of the foregoing considerations, we believe that A.T. & T. has the burden of showing that it has either wholly eliminated the problems stemming from stock ownership in Comsat or is well on its way to doing so in accordance with a plan of divestiture approved by the Commission. That is the only burden of proceeding that we impose upon A.T. & T., in connection with removal of the limitation in question. We will, of course, consider appropriately filed pleadings of interested persons in response to any request of A.T. & T. with respect to this matter.

2. The Comsat/A.T. & T. lease agreement and the requirement of the Second Report that Comsat elect between roles

34. The Memorandum of Understanding between Comsat and MCIL and the supplementary agreement have a direct impact on the basic reasons for our requirement in the "Second Report" that Comsat elect between operating exclusively as a carrier's carrier for A.T. & T. and others pursuant to tariff or pursuing its multipurpose application. Accordingly, we deem it appropriate to take this into account in determining whether we should grant the requests of A.T. & T. and Comsat for reconsideration of the disallowal of their lease agreement in the "Second Report" and Comsat's request for reconsideration of the aforementioned election requirement. For, if we decide that the Comsat/A.T. & T. lease agreement, the applications predicated thereon, and the applications of the restructured MCIL Corp. should be accepted for processing in the present circumstances,[15] it may be unnecessary to reach the question of whether reconsideration is warranted for the reasons stated in the A.T. & T. and Comsat petitions for reconsideration. Comsat has represented that it would dismiss these portions of its petition in the event of a favorable Commission decision on the lease agreement and on its proposal to proceed in dual roles now before us. A.T. & T. has not sought reconsideration of the Comsat election requirement and will not be prejudiced if the relief it seeks as to the lease agreement is granted, albeit on grounds asserted by others.

a. *The Comsat/MCIL proposal.* 35. A combination of MCI, Lockheed and Comsat would bring together some of the basic elements that are conducive to the likelihood of the successful provision of communication common carrier services via domestic satellites. It would coalesce in one stronger applicant the retail marketing know-how of MCI, derived from its existing and proposed operations as a terrestrial specialized carrier; the technical talents of Lockheed as a major manufacturer of space hardware; and the considerable experience of Comsat in the international communications satellite field as manager of the Intelsat system and as a carrier's carrier for U.S. authorized users, as well as the strengthening factor of Comsat's financial position. This in turn would promote achievement of our objectives: "To maximize the opportunities for the early acquisition of technical, operational, and marketing data and experience in the use of the technology as a new communications resource for all types of services" ("Second Report," par. 7(a)); "to afford a reasonable opportunity for multiple entities to demonstrate how any operational and economic characteristics peculiar to the satellite technology can be used to provide existing and new specialized services more economically and efficiently than can be done by terrestrial facilities" ("Second Report," par. 7(b)); to "afford an opportunity for access to the satellite technology by retail carriers who lack sufficient existing or potential traffic to warrant the investment required for ownership of space segment facilities" ("Second Report," par. 24); and, in light of the predominant position of Hughes at this time in the field of commercial communications satellite procurement, to encourage "entry by different equipment manufacturers to demonstrate rival technologies" ("Second Report," par. 19; "Memorandum Opinion and Order" issued on March 17, 1972 herein, pars. 84–86, 34 FCC 2d 1, 44–45). In our judgment, the addition of Comsat offers a more solid foundation for an early partial realization of these objectives through implementation of the tripartite proposed system than does either the MCIL application or the Comsat multipurpose application, standing alone.

36. On the other hand, the contingencies upon which the Comsat/MCIL proposal is premised conflict on their face with the policy conditions adopted in the "Second Report" that bar consideration of the Comsat/A.T. & T. proposal based on their lease agreement and require Comsat to elect between operating solely as a carrier's carrier serving A.T. & T. and other carriers pursuant to tariffs or serving entities other than A.T. & T. as a "retail" and/or "wholesale" carrier ("Second Report," paragraphs 13–14, 22–23). Thus, the threshold question for present resolution is whether the Comsat/MCIL proposal constitutes such a significant change in circumstances as to substantially alleviate the concerns underlying those requirements and to warrant deletion or modification of such requirements upon reconsideration.

37. The nub of the dispute between the parties on this point seems to turn on the issue of the degree of potential Comsat influence over the restructured MCIL applicant. As previously indicated, the basic thrust of MCIL's position is that Comsat's minority participation in the new corporation poses a situation fundamentally different from its multipurpose application, because the corporation is so structured under the agreement as to preclude dominance or control by any one of the three owners and to reduce to a minimum any restraints or inhibitions that might flow from Comsat's corporate and business relationship with A.T. & T. or its roles in the Intelsat system. Those challenging this position contend principally that the agreement does not suffice to assure that Comsat would not in fact become the dominant partner because of its experience in Intelsat, financial resources and procurement powers, or as a result of future changes in the initial stock ownership pattern.

38. Upon considering the agreement in light of the contentions of the parties, we are persuaded that it constitutes a good faith endeavor by Comsat, MCI and Lockheed to structure an applicant in which all three could participate as equals, without placing any single owner in a position to control or dominate corporate or management decisions or depriving the corporation of flexibility to make future decisions on the basis of evolving circumstances. With respect to the provisions of the agreement relating to election of directors and voting on specified major matters and transactions between the corporation and a stockholder (agreement, section 7 and bylaws, articles III–V), we think that Comsat/MCIL have been reasonably successful in achieving independent management—that is, "independent" in the sense that of being not subject to control by any one stockholder without the substantial concurrence of both other stockholders or at least one other stockholder and most of the Class B directors.[16] While Comsat's voice might be more influential to some directors because of its experience in Intelsat and procurement powers, it could not join forces with Lockheed to compel action contrary to the views of MCI (or vice versa), unless it also succeeds in persuading at least three of the four Class B directors that such action is in the best interest of the corporation.

39. The aspect of the agreement giving rise to greater concern is the presently unknown nature of future management and/or stockholder decisions concerning financing and securities (new issuances, transfers and/or a public offering). Though Comsat, MCI, and Lockheed would each furnish preoperational capital in approximately equal amounts, the agreement leaves for future decision by the board of directors the plans for financing the system, including any security offering and mortgage or pledge of corporation property in excess of $100,000 (agreement, section 3; bylaws, Art. III, section 9(a)(iii)). Moreover, while Comsat, MCI, and Lockheed would each own one-third of the initial stock of the corporation (agreement, section 3), each such stockholder would have the preemptive right to subscribe for all or any part of its pro rata share of any new or additional securities issued by the corporation (agreement, section 4); the corporation and the stockholders would have successive options during a 2-year initial period to purchase the interest of a stockholder wishing to dispose of its equity or of a bankrupt or breaching stockholder (agreement, sections 5 and 6); and the duration of the agreement is only for 5 years or "until the day preceding the effective date of a registration statement under the Securities Act of 1933 relating to a public, underwritten offering of securities of the corporation (whether such offering is made by the corporation or by its stockholders, or both), whichever shall come first" (agreement, section 5(g)). As some parties point out, the agreement does not preclude the possibility of an enhanced Comsat role due to, for example, a management decision to obtain all or a disproportionate part of future financing from Comsat, or an increased Comsat ownership interest, or de facto control by Comsat in the event of a public offering.

40. Further, apart from the agreement, we see some basis for concern as to interlocking directorates and the possibility of conflicting fiduciary duties of directors. For example, MCI would probably disclose to the corporation's board of directors its long-range plans for utilizing terrestrial and satellite facilities and its marketing plans in the specialized field so that intelligent decisions could be made with respect to such matters as the location of earth stations, assignment of transponders and the breakdown of channels within transponders. Comsat's representatives on the corporation's board of directors who became privy to MCI's plans would, in turn, be required to report to Comsat's board of directors on which three representatives of A.T. & T. sit. Two of the present A.T. & T. nominees on the Comsat Board are active officials in A.T. & T., one being a vice president of A.T. & T. and president of the Long Lines Department, which would appear to be primarily charged with meeting potential MCI competition.[17] These corporate relationships give rise to the possibility that A.T. & T., through its representatives on the Comsat Board of Directors, would have some indirect influence on decisions of the Comsat/MCIL management or on decisions of the Comsat Board affecting the interests of Comsat/MCIL, as well as access to proprietary information of Comsat/MCIL and MCI.

41. In view of the foregoing uncertainties and potential conflicts of interest, we cannot conclude on the basis of the agreement alone that Comsat's role in the restructured corporation would actually be of such nature as to minimize any restraints that might flow from its corporate and business relationship with A.T. & T. However, it is not necessary to bar the Comsat/MCIL and Comsat/A.T. & T. proposals from further consideration on that ground,[18] for we can and will condition further implementation of those proposals upon the following requirements to safeguard the public interest.

42. First, since Comsat and MCIL have premised their request for approval of the presently proposed dual role by Comsat on the representation that Comsat would be a minority participant in the restructured MCIL Corp., we will hold the Comsat/MCIL applicant to that standard for so long as Comsat provides, or proposes to provide, domestic satellite service to A.T. & T. As a prerequisite to any authorization, the corporation will be required to show not only that it is financially qualified, but also that its financial plans are not in derogation of that standard, directly or indirectly, and that there have been no changes in ownership interest such as to affect the minority status of Comsat. Any grant will be upon condition that the corporation obtain prior written consent from the Commission, whether or not required by section 310(b) of the Communications Act, for any securities acquisition by the corporation or the stockholders pursuant to section 4 or section 5 of the agreement or any public offering that would increase directly or indirectly the ownership position of Comsat beyond 33⅓ percent or in any other way place it in a position where it could exercise de facto control.

43. Second, we will not grant any application for authorization under section 212 of the Communications Act to permit any person holding the position of officer or director in A.T. & T. to serve on the Comsat board of directors.[19] Since 1964 the Commission has approved, on an annual basis, applications for section 212 authorization of interlocking relationships between A.T. & T. and Comsat on the ground that the representatives nominated by A.T. & T. were experienced officials whose expertise would benefit Comsat.[19a] In addition to Comsat's present lack of need for such expert assistance ("Second Report," paragraph 14; 35 FCC 2d at 849), authorization of the Comsat/MCIL proposal would preclude us from finding that "neither public nor private interests will be adversely affected" by authorizing interlocking relationships between A.T. & T. and Comsat (section 212).

44. Third, we think it necessary to condition any approval of the Comsat/A.T. & T. lease arrangement upon further requirements to mitigate the potential conflict of interest. The foregoing condition would not suffice to preclude A.T. & T. from nominating to the Comsat Board of Directors other persons closely identified with A.T. & T.'s interests, such as former officers or directors or present or past employees of A.T. & T. Accordingly, the Comsat/A.T. & T. lease arrangement will be approved only upon condition that any members of the Comsat Board nominated by A.T. & T. shall be persons who do not have any present or past affiliation with A.T. & T.; and that Comsat submit for Commission approval prior to authorization, a statement of the procedures that the Comsat Board of Directors will follow to avoid any participation by A.T. & T. elected

[14] 47 U.S.C. 733.

[15] We are not, of course, in a position—prior to the processing of perfected applications—to make any determination as to whether the pending Comsat/A.T. & T. applications or any future applications incorporating the Comsat/MCIL proposal should be granted.

[16] We are not persuaded by the argument of the RCA applicants that these provisions afford each of the three stockholders such a degree of veto power as to make some accommodation of private stockholder interests a prerequisite to the corporation's ability to act. The provision for 11 out of 16 director votes for major matters does not confer a veto power upon any one stockholder alone, though it requires a relatively high degree of unanimity among directors not elected by a particular stockholder for action contrary to the desires of that stockholder. See also, agreement, bylaws, articles IV and V.

[17] Another of A.T. & T.'s nominees on the Comsat Board of Directors is a vice president and general counsel of A.T. & T., and the third is a former vice chairman of the A.T. & T. Board of Directors.

[18] Contrary to the suggestion of Western Union, we will not defer the threshold policy questions for resolution in the course of processing and acting on the applications. It appears more equitable and in the public interest to set forth now for the guidance of all applicants the conditions to which any grant would be subject.

[19] This condition is consistent with the provisions of section 303 of the Communications Satellite Act of 1962, as amended in 1969 (47 U.S.C. 733). That Act does not require that members elected by A.T. & T. need be officers or directors of A.T. & T., or override provisions of section 212 of the Communications Act that are not inconsistent with the Satellite Act.

[19a] While the most recent authorization issued on April 14, 1972, by the staff under delegated authority was not specifically limited to 1 year, we do not construe that authorization as extending beyond the customary 1-year period.

V 38 16 JAN 10 73 XUM

members in matters involving the Comsat/MCIL domestic satellite venture or disclosure to such members of confidential aspects of the plans and operations of that venture. These requirements in combination with the requirements for divestiture of A.T. & T.'s stock in Comsat described in paragraphs 29–33, supra, will in our judgment protect the public interest. The Commission will study whether further actions are required in this matter.

45. In this connection, we note that Comsat has not sought reconsideration of the requirement of the "Second Report" that it form a separate corporation to engage in any domestic satellite venture whether or not entailing service to A.T. & T. (paragraph 26, 35 FCC 2d at 853). In light of the dual capacity in which Comsat now proposes to proceed, the Comsat/MCIL Corp. does not encompass the aspect of furnishing domestic satellite facilities for the use of A.T. & T. Moreover, the formation of a separate corporate subsidiary to engage in all domestic satellite activities of Comsat, including its participation in the Comsat/MCIL Corp., will assist in separating such activities from Comsat's role in Intelsat. Since such separate corporate subsidiary would not come within the provisions of section 303(a) of the Communications Satellite Act of 1962 relating to the nomination of directors by A.T. & T., we anticipate that the board of directors for this separate corporate subsidiary of Comsat will not include any representatives of A.T. & T.

46. Finally, in agreement with the position of Comsat, we reject the argument of various parties that additional safeguards are necessary to avoid the possibility that Lockheed would be overly subject to influence by Comsat because of the latter's proceurement powers for the Intelsat system and for the proposed Comsat/A.T. & T. system (see pars. 16–17, above). With respect to any procurement matter coming before the management of Comsat/MCIL the provisions of the agreement and bylaws relating to election of officers and voting afford a reasonably adequate assurance that the independent corporate interests of Lockheed and/or Comsat are unlikely to dictate management decisions contrary to the best interests of the corporation (see pars. 38–42 above). Insofar as procurement for the Intelsat system and the proposed Comsat/A.T. & T. system is concerned, we think that Intelsat and A.T. & T. are in the best position to protect their own interests.[19b] Significantly, Hughes, which has a record of being the predominant supplier of spacecraft to Intelsat, has not objected to the Comsat/MCIL proposal on this ground or urged that safeguards are necessary in order to afford it a realistic opportunity to compete for the procurement business of Comsat/A.T. & T. or other domestic satellite applicants.

47. In light of all of the foregoing, we conclude that the Comsat/MCIL proposal as conditioned herein constitutes a significantly different situation from that before us at the time of the "Second Report" and that the public interest does not now require that Comsat elect between participating in the Comsat/MCIL applicant or serving A.T. & T. We turn next to the related question of whether Comsat should be permitted to serve A.T. & T. on the basis contemplated by their lease agreement in the present circumstances.

b. *The Comsat/A.T. & T. lease agreement.* 48. The disallowance of the Comsat/A.T. & T. lease agreement in the "Second Report" was premised largely on the following considerations (paragraph 13, 35 FCC 2d at 848–849): Concern that Comsat would be unlikely to compete vigorously with A.T. & T. in the provision of specialized domestic services because A.T. & T. would be the principal source of the domestic revenues Comsat would seek to obtain; concern that the revenues from its contractual arrangement with A.T. & T. would give Comsat an extraordinary advantage and head-start over domestic satellite entrants seeking to compete with Comsat and with A.T. & T.'s terrestrial services; and concern that Comsat's expertise and facilities would not be available to the public and carriers other than A.T. & T. if Comsat elected to serve A.T. & T. (paragraph 24, 35 FCC 2d at 852–853).

49. To a significant extent these concerns have been ameliorated by the nature of the Comsat/MCIL proposal and the conditions attached above for further consideration of that proposal and the Comsat/A.T. & T. lease agreement. Thus, even assuming that should Comsat feel some constraint about competing vigorously with A.T. & T., it will not be in a position to preclude the directors selected by MCI and Lockheed and the Class B directors, who are not so constrained, from taking such action as they believe to be most conducive to successful operations by the corporation. Indeed, their predominant role and influence may encourage Comsat to adopt a more aggressive competitive stance than it would assume if it were solely responsible for a domestic satellite system offering specialized services in competition to A.T. & T.'s terrestrial offerings. Moreover, while Comsat's participation in the corporation and its overall financial position, including its revenues from the A.T. & T. lease agreement, may make it easier for the corporation to obtain equity or debt financing, it does not follow that the Comsat/MCIL system would be financed primarily or to any substantial degree out of revenues from A.T. & T. As MCIL points out, such revenues flow to Comsat and not to the Comsat/MCIL Corp. Even if Comsat should use revenues derived from A.T. & T. for a further capital investment in, or loan to, the corporation, the conditions specified in paragraphs 41–42 above would preclude authorization of any financial plan of the corporation that changes Comsat's presently proposed minority status, directly or indirectly, unless the Commission should find that the public interest will be served thereby in light of the circumstances then prevailing.

50. Acceptance of the Comsat/A.T. & T. lease agreement for further consideration would deprive other carriers of an opportunity to lease transponders on the same system from Comsat under a tariff offering, as developed in the "Second Report" (paragraphs 24–25; 35 FCC 2d at 852–853). However, the present Comsat/MCIL proposal and the proposal of American Satellite Corp., submitted on October 16, 1972, would, if authorized, increase the likelihood that such carriers will have other available options. Such carriers would also have the option of leasing transponder capacity in the Western Union System, if authorized, or that of any other carrier entrant offering this type of service. Comsat's expertise would be available to other carriers and to the public through the Comsat/MCIL system, if desired. In the present circumstances, we conclude that the public interest does not require that other carriers have access to the system used by A.T. & T. under a tariff offering by Comsat. However, the special conditions in the "Second Report" and in paragraphs 64–76 below require A.T. & T. to permit access to its facilities by other carriers, whether by lease or otherwise, for the purpose of service to Alaska, Hawaii, and Puerto Rico.

51. There remains the question of whether one common carrier should be permitted to provide space segment capacity or other domestic satellite system services and/or facilities to another common carrier on a nontariff basis. The "Second Report" did not raise any question about the Hughes/GTE applications on the ground that GTE was proposing to lease transponder capacity from a private entity on a nontariff basis. However, aside from the policy conditions relating to Comsat and A.T. & T., the "Second Report" adopted a general requirement that other common carriers authorized domestic satellite system facilities shall offer all services, incuding services and facilities to other carriers, pursuant to tariff schedules setting forth all terms and conditions relating to each class of offering ("Second Report," paragraph 31, 35 FCC 2d at 854–855). This requirement was deemed particularly essential for domestic satellite system common carrier licensees offering both "wholesale" and "retail" services (i.e., the provision of services and facilities to other carriers and the provision of end-to-end services to noncarrier customers) to insure that "other carriers leasing transponder or satellite system facilities are not burdened with any portion of the revenue requirements applicable to the supplying carrier's retail offerings". (id.)[20] It also constitutes an appropriate means of implementing the statutory requirements contained in sections 202(a) and 203(c) of the Communications Act.

52. The Comsat/A.T. & T. agreement presents a somewhat different situation in that the entire capacity of the proposed space segment facilities would be leased to A.T. & T. In view of our determination that the public interest does not require that Comsat offer service to other carriers on the same system in light of other available options,[21] the principal purpose of a tariff filing embodying the Comsat/A.T. & T. contractual terms would be to afford A.T. & T. the protections of sections 203–205 of the Communications Act. Since GTE would be permitted to forego these protections in the event that the Hughes/GTE proposal is authorized, we will accord A.T. & T. a similar option.[22] In other words, Comsat's provision of facilities and services to A.T. & T. pursuant to their lease agreement will be treated as a noncommon carrier activity not requiring a tariff filing.

53. Accordingly, in light of the changed circumstances now before us, the Comsat/A.T. & T. applications based on their lease agreement will be accepted for further consideration under the policy conditions of the "Second Report" as modified herein.

c. *The A.T. & T. and Comsat petitions for reconsideration.* 54. Having decided to accept the Comsat/MCIL and Comsat/A.T. & T. proposals for further consideration, for the reasons and under the conditions specified above, we find it unnecessary to reach the merits of those portions of the Comsat and A.T. & T. petitions that seek reconsideration of the disallowal of the Comsat/A.T. & T. lease agreement or of Comsat's request for reconsideration of the election requirement of the "Second Report."[23] Since the Comsat/MCIL proposal is a substitute for Comsat's multipurpose application, the latter application will be dismissed. In view of Comsat's minority role in the Comsat/MCIL Corporation, which substantially obviates the potential conflict of interest formerly posed by its multipurpose application vis-a-vis Comsat's responsibilities to the Intelsat system, we will not impose any general prohibition that would preclude the Comsat/MCIL Corporation from being authorized to own or operate domestic satellite facilities at any overseas point served by Intelsat facilities. However, like other applicants, the Comsat/MCIL applicant will be subject to our determinations as to conditions under which domestic satellite facilities to serve Alaska, Hawaii and/or Puerto Rico-Virgin Islands will be authorized.

II. Service To Alaska, Hawaii, and Puerto Rico-Virgin Islands

A. Pleadings of the Parties

1. The RCA Petition for Reconsideration

55. The "RCA applicants" have requested clarification or partial reconsideration of paragraphs 35–42 of the "Second Report" insofar as they relate to service to Alaska. RCA Alascom supports the fundamental policy that, upon the advent of domestic satellite service, Alaska (along with Hawaii and Puerto Rico), should be included in the uniform mileage rate pattern that now obtains for interstate message telephone service (MTT) in the contiguous States "with all that such approach implies in terms of nationwide cost averaging and equalizations for interstate rate making purposes" ("Second Report," paragraph 37). However, RCA Alascom urges that it should be permitted to interconnect with A.T. & T. in the contiguous States, in accordance with existing interconnection policy and practice,[24] and it should provide the facilities between Alaska and the contiguous States, either through use of the proposed system of the RCA applicants or through an appropriate ownership interest in the A.T. & T. system. RCA Alascom further urges that it should be the only carrier authorized to provide record services to Alaska, and that rate levels for such services should be the "lowest reasonable," rather than made comparable to mainland charges, since they would not derive any subsidy from the interstate MTT "pool" of revenues.

56. According to RCA Alascom, the most important specific issue in its Petition relates to the points at which it will interconnect with A.T. & T.'s network for MTT service. RCA Alascom claims that its continued right to provide the interstate service with interconnection in the contiguous States is the foundation of its entire ability to service Alaska, as well as essential to fulfillment of its existing commitments to improve and expand both interstate and intrastate service for Alaska at greatly reduced rates. In order to be able to continue to provide present services and to make major investments for intrastate service, RCA Alascom asserts that it must be permitted to make additional necessary investments in interstate facilities and to derive a reasonable rate of return on interstate service.

57. In this connection, RCA Alascom alleges that it faces an unusual and difficult situation. It points out that a very high percentage of its existing facilities are leased rather than owned, and rental expense does not contribute to a carrier's return or profit from its participation in the interstate MTT pool of revenues.[25] Rather, return or profit is related to the carrier's investment in facilities used to participate in the rendition of interstate MTT service, which currently constitutes about 80 percent of its total operating revenues, and intrastate service is currently provided below cost. The State of Alaska has a land area comprising some 586,000 square miles, a total population of only 302,000 persons, and few population centers of any substantial size.[26] RCA Alascom states:

> With intrastate routes of 1,000 miles or more leading to very small population centers, with an obligation to provide telephone service to 142 Indian and Eskimo villages at costs which greatly exceed the revenues than can ever be expected from them and with all of its other obligations to serve Alaska under conditions which make that service a high risk undertaking, RCA Alascom is wholly dependent upon interstate business and revenues, which constitute its life blood.

[19b] As Comsat points out, procurement for Intelsat is governed by its procurement regulations and proposals for spacecraft procurement are evaluated not only by the manager but also by the interim committee and the technical subcommittee. Moreover, under the definitive arrangements Comsat will not have a veto power as a member of the board of governors. Further, it is subject to instructions from the U.S. Government insofar as its vote on the interim committee or the board of governors is concerned.

[20] Although paragraph 31 of the Second Report is phrased in terms of "terrestrial carriers," our intent was not so narrow. That paragraph is hereby modified to delete the word "terrestrial" from the first and second sentences.

[21] While A.T. & T. may be required to permit other carriers to have access to its leased transponder capacity as a result of our policy determinations with respect to service to Alaska, Hawaii, and Puerto Rico, this requirement does not entail any arrangement between Comsat and such third parties or raise any question of possible cross-subsidy insofar as Comsat is concerned.

[22] This does not mean, of course, that we are abdicating our responsibility to assure that customers of A.T. & T. and/or GTE, and/or the RCA applicants, are not burdened with unreasonable costs. In the event that we should subsequently find in a rate making context that A.T. & T., or GTE, or the RCA applicants have not properly discharged their obligation to obtain and operate facilities in the most economical and efficient manner possible, any excess costs will not be included in any rate base, or charged to expense for rate purposes, but will be charged against surplus.

[23] Although Comsat requested oral argument in its petition for reconsideration, the pleadings of the parties afford an adequate basis for decision and that request is hereby denied.

[24] RCA Alascom relies on: The Alaska Communications Disposal Act, 40 U.S.C. 771 et seq.; its legislative history (e.g., S. Rept. No. 213 (pp. 8, 9–10) and H. Rept. No. 662 (p. 4), 90th Cong., 1st sess.; and "RCA Alaska Communications, Inc. et al.," 26 FCC 2d 466, 473–474 (1970). RCA Alascom states that acting in reliance on present interconnection practices and its authorizations from the FCC and the Alaska Public Utilities Commission to effectuate the Alaska Communications Disposal Act, it has already cut rates by approximately one-third and has spent more than $45 million of the $58 million it is committed to invest by 1974. It stands ready to invest millions more in domestic satellite system facilities if authorized to do so.

[25] RCA Alascom does not have any substantial ownership interest in local exchange facilities in Alaska used to provide the "local loop" portion of interstate service or intrastate toll service.

[26] We note that the 1970 census reflects the following with respect to larger population centers and census divisions (equivalent in Alaska to a county):

City	Population	Census division	Population	Land area square miles
Anchorage	48,081	Anchorage	126,333	927
Fairbanks	14,771	Fairbanks	45,864	7,074
Juneau	6,050	Juneau	13,556	1,286
Bethel	2,416	Bethel	7,767	19,642

V 38 - 6 JAN 10 73 XUM

58. While conceding that the existing interconnection practice for Alaska interstate service could be "maintained simply by affording RCA Alascom the right to an appropriate ownership interest in the A.T. & T. system," RCA Alascom urges that use of the proposed system of the RCA applicants would be preferable. It claims that unit costs per transponder on the RCA system would be less than on A.T. & T.'s system, that coverage of Alaska by means of the elliptical main beam proposed by the RCA applicants is superior to the type of spot beam coverage proposed by A.T. & T., and that interconnection at multiple earth station points in the contiguous States, as proposed by RCA, would do more to deemphasize distance as a cost factor than would A.T. & T.'s proposal for interconnection at a single gateway earth station on the west coast.[27] RCA Alascom further notes that, unlike the RCA proposal, the A.T. & T. system does not include any proposal for the use of 2 GHz frequencies for instructional television and intrastate radio service with small, low cost earth stations. Though claiming that there is no basis for an assumption that A.T. & T. has greater ability to load a high capacity domestic satellite system, RCA Alascom states that it "is prepared to proceed on the basis that the costs of its satellite facilities and earth station facilities in the contiguous States utilized to derive message telephone circuits and thus included in the calculation of its share of revenues from the interstate telephone 'pool' would be based on a loading substantially equal to that" of A.T. & T., and that the "RCA applicants and their parent corporation, rather than the rate paying public, would assume the risk involved in being unable to 'achieve a substantial initial loading.' "

2. Other Parties

59. In its petition for reconsideration, "A.T. & T." comments on the question of service to Alaska, Hawaii, and Puerto Rico, but does not expressly seek reconsideration of this portion of the "Second Report." A.T. & T. is of the view that these off-shore points should receive a high quality of service at rates supported by costs, with the ultimate objective that rate levels should be comparable to those provided on the mainland. However, A.T. & T. questions whether this objective should be realized simultaneously with the advent of domestic satellites, and states that rates for services between these points and the mainland should not be made uniform with the mainland rate structure by imposing on mainland users the burden (which it estimates to approximate $100 million) of subsidizing the allegedly higher costs of such service.[28] Moreover, a diversity of facilities, both cable and satellite, is allegedly essential for the protection of services. Both cable and satellite costs are declining dramatically, and over a reasonable period of time would permit rate reductions to levels that approach the mainland rate structure.

60. A.T. & T.'s opposition to RCA's petition may be summarized as follows: The Commission has correctly concluded that Alaska should receive domestic satellite MTT service as an integral part of a larger domestic system. A.T. & T. points out that it has previously offered the use of its system for this purpose. Making available to other carriers transponders in the A.T. & T. system for the purpose of furnishing domestic satellite service to Alaska in conjunction with such carriers is the appropriate means of providing efficient and economical service to Alaska. Duplicate construction and operation by RCA of earth stations in the contiguous States, whether or not there is a duplicate space segment, would result in the expenditure of substantial sums—ultimately to be borne by the interstate rate payers. RCA's cost arguments are allegedly infirm, because they are based on the assumption of a 100 percent fill of the satellites and do not take account of the costs of earth stations, connecting terrestrial facilities, and additional multiplex costs attributable to RCA's multiple earth station access proposal. There are diseconomies and inefficiencies in the RCA proposal, such as having multiple carriers access a single transponder from separate earth stations—which may require a reduction in circuit capacity by one-half or more. According to A.T. & T., directing many small circuit groups to several different earth stations, rather than one large group to a single earth station, reduces significantly the traffic handling capability of each individual circuit.

61. The "State of Hawaii" generally supports paragraphs 35–40 of the "Second Report" and urges that it is important to the people of Hawaii that implementation of this goal proceed without further delay. The State "views with considerable alarm the position taken by A.T. & T." in its petition for reconsideration, and urges the Commission to reject that position as invalid and not in the public interest. It urges that A.T. & T. has not defined the "inherent physical characteristics of service" which it alleges justify tariffs higher than mainland rates or the basis for its estimate for a $100 million burden on mainland rate payers if Hawaii, Alaska, and Puerto Rico are integrated in the mainland rate pattern. The State of Hawaii also urges that GTE and other system applicants propose a type of geographic integration that is superior in certain respects to that proposed by A.T. & T., for, whereas they propose access to multiple earth stations in the contiguous States, A.T. & T. is proposing to include Hawaii in point-to-point linkage with only one gateway earth station on the west coast, "thus perpetuating the 'umbilical cord' service" that Hawaii now has.

62. "The State of Alaska" also approves of the Commission's decision to require integration of the cost of interstate Alaska service into the nationwide rate structure, and requests firm adherence to that policy. However, it is concerned that the "Second Report" may operate to the State's disadvantage in the area of improved intrastate service insofar as it eliminated Comsat as a contender for service to Alaska via domestic satellite. The State values the presence in Alaska of the most experienced and technically proficient company now operating in the field of satellite communications, and the potential of competition as a spur to innovation. It asserts that there is room for competition in the provision of some services to Alaska, and requests that all generally authorized carriers willing to assume the financial risks of entry be permitted to serve Alaska, including the Comsat/MCIL applicant.

63. "WUI" urges that RCA Alascom should not be granted a monopoly position for all services to Alaska. It requests that capital investment positions in the facilities of domestic satellite systems authorized to serve Alaska, Hawaii, and Puerto Rico be made available to qualified entrants for the purpose of providing services other than MTT. In its petition for clarification of the "Second Report," WUI also argues that Western Union is precluded by section 222 of the Communications Act from operating between Hawaii or Puerto Rico and the mainland, and from owning or operating earth stations at these locations. WUI claims that services to such points are not "domestic" under law, and should be treated as "overseas" services in accordance with past practice.

B. DISCUSSION AND CONCLUSIONS

1. Service to Alaska, Hawaii, and Puerto Rico

64. RCA's request for clarification or partial reconsideration of the "Second Report" is premised on valid concerns insofar as it may be construed as contemplating that MTT service between Alaska and the contiguous States would be furnished by means of satellite facilities owned or operated by A.T. & T. We are constrained to agree with RCA Alascom that in acquiring the Alaska Communications System (ACS) pursuant to the Alaska Communications Disposal Act, it succeeded to the right and responsibility of its predecessor to provide the facilities for the transmission of MTT traffic between Alaska and the contiguous States. We acknowledged RCA Alascom's entitlement to perform this service in "RCA Alaska Communications, Inc. et al.," 26 FCC 2d 466, 473–474 (1970). Thus, we recognized the importance and desirability of giving RCA Alascom "every legitimate opportunity to improve and expand interstate communications between Alaska and the lower 48 States." Hence, we stressed that we would not adhere to the practices applicable to overseas MTT service under which mainland carriers and their correspondents at the overseas locations interconnect at the satellite. As we indicated in that decision, RCA Alascom's offer, accepted by the Government, proposed to succeed to the interstate operations of ACS and anticipated that, regardless of the mode of communication it may be authorized to engage in, the interconnection practices previously followed by ACS would apply. ACS's practice was to interconnect with A.T. & T.'s domestic system at a gateway in or at the boundaries of the contiguous States and not at a midpoint between Alaska and the lower 48 States.

65. While the Commission qualified its action in the aforementioned proceedings as not being controlling of matters that may come before us in the future, we believe that the considerations which underpinned our ruling at that time are equally relevant to a resolution of the questions raised by RCA Alascom's instant petition. In other words, it is our view that in the interest of assuring that RCA Alascom shall have a bona fide opportunity to establish and maintain a viable financial condition required to discharge its obligations with respect to the development and improvement of services, RCA Alascom should have reasonable access to the revenues and earnings that may derive from interstate MTT operations. Accordingly, the policies formulated herein should accord to RCA Alascom, to the extent consistent with the public interest in efficient and economic service, appropriate responsibility for the operations involved in the rendition of interstate MTT service between Alaska and the lower 48 States.

66. It is our opinion that this objective can be realized in a manner consistent with the other objectives set forth in our "Second Report," particularly that Alaska shall be integrated into the uniform mileage rate pattern that now obtains for the contiguous States. However, we are not in a position to conclude that these objectives will be met by authorizing, at this time, the provision of interstate MTT service to Alaska on independent satellite system facilities entirely owned by the RCA applicants. We recognize that the proposed system of the RCA applicants may offer some technical advantages (e.g., the use of an elliptical main beam covering the contiguous States and Alaska and the use of 2 GHz frequencies in addition to 4 and 6 GHz) which might benefit the State of Alaska with respect to such services as interstate television program transmission for reception at less expensive earth stations such as might be used by a community and for intrastate instructional television and radio service to "bush" communities.

67. There are, however, a number of uncertainties which we are unable to resolve on the basis of the record before us as to whether interstate MTT service to Alaska as proposed by the RCA applicants can be provided either as efficiently, or more efficiently and economically, than would be possible by reliance on the A.T. & T. system proposal. For example, it is not clear that the proposed RCA system would be implemented as promptly as the A.T. & T. system which is premised largely on developed technology whereas RCA's proposal is premised on largely undemonstrated technology. Nor is it clear that the RCA proposed system would be likely to achieve a level of traffic loading or fill sufficient to make a cost per unit of MTT service comparable to or more favorable than the unit costs derived from a domestic satellite system, such as proposed by A.T. & T., integrated into the nationwide MTT terrestrial network. In this connection, the record does not provide an adequate basis for evaluating the effects of RCA's proposed operation of multiple earth stations in the contiguous States on the efficient use of satellite transponder circuit capacity in the rendition of MTT service or the extent to which additional multiplex costs will be generated by RCA's multiple earth station access proposal.

68. The foregoing is not to be construed as foreclosing our consideration of a future application by the RCA applicants for authorization to transfer Alaskan service, including MTT, to the RCA system in the event that this system is implemented.[29] In this connection, we also take official notice that the RCA applicants are negotiating for the use of the Canadian Telsat satellite system as an interim measure for its provision of MTT services between Alaska and its own earth stations in the contiguous States. However, our authorization of either of these systems must be predicated upon a more convincing showing than has thus far been made that the cost of using such facilities for interstate MTT service to Alaska would be less than or approximately equivalent to the use of the domestic satellite system facilities of A.T. & T. as discussed in paragraphs 65–66 above.

69. It is our view that until such showing is made by the RCA applicants, we shall require that A.T. & T. extend to the RCA applicants appropriate access, by lease or otherwise, to the circuit capacity in the A.T. & T. facilities involved in serving Alaska. We shall therefore condition any authorization of satellite and earth station facilities issued to A.T. & T. accordingly. Any such arrangement will, of course, be subject to prior approval by this Commission.

70. By such arrangements, the RCA carriers, rather than A.T. & T., will be responsible for the costs associated with that portion of the satellite circuit facilities involved in providing MTT service between Alaska and those locations in the contiguous States where such facilities interconnect with the terrestrial MTT network of A.T. & T. In this context, we perceive no cost or other detriment to the interest of the general public in the availability of efficient and economic MTT service. Nor do we perceive any reason why such arrangements should thwart our policy objective of promoting the integration of Alaska in the uniform mileage rate pattern as discussed in paragraphs 35–40 of the "Second Report."

71. From a cost of service standpoint, there should be no significant difference to the total MTT service depending upon how cost responsibility for this increment of satellite circuit capacity is arranged. Although as a result of integrating Alaska into the interstate MTT uniform rate schedule, the costs related to such facilities may, to some extent, be subsidized by the interstate nationwide MTT pool of revenues, the total cost of nationwide MTT will not be significantly different whether A.T. & T. or RCA Alascom is responsible for those costs. However, the arrangement is significant in terms of maintaining RCA Alascom's established role and responsibility as the supplier of interstate service between Alaska and the contiguous States.

72. We do not here resolve the question of whether service to Alaska and/or Hawaii (in the event of a determination that the A.T. & T. rather than the GTE system should be utilized for MTT service to Hawaii) should be through one gateway earth station, as proposed by A.T. & T., or through multiple earth stations, as proposed by GTE and the RCA applicants and as urged by the State of Hawaii. Our policy objective is that service between Alaska, Hawaii, and Puerto Rico and all mainland points shall be provided at rates and on terms comparable to those obtaining within the contiguous States and at the lowest possible cost. It is anticipated that A.T. & T. and those carriers affected will work together in an effort to propose a mutually satisfactory solution, for the Commission's approval, which will best accomplish this objective considering all pertinent factors. In the event that they are unable to reach agreement, the applicants can address this matter in their application for authority to acquire circuit capacity in the A.T. & T. system facilities. A.T. & T. will also be afforded an opportunity to submit a showing in support of

[27] The RCA applicants concede that, for the purpose of serving Alaska, access to satellite transponders through a single gateway earth station may result in a more efficient utilization of transponder capacity than would be achieved through access by multiple earth stations. However, in their reply comments the RCA applicants outline an approach for handling traffic, which they allege would minimize the difference between the two methods insofar as efficient use of transponder capacity is concerned. The RCA applicants state that they expect to file an amendment to their applications incorporating this approach.

[28] A.T. & T. is supported in this position by All America Cables and Radio, Inc., and ITT World Communications, Inc.

[29] Contrary to the construction of the RCA applicants, the Second Report does not require that MTT service to Alaska be provided exclusively on domestic satellite facilities or bar the use of alternative facilities for diversity purposes. We are concerned that the nationwide MTT and other interstate services not be burdened with costs that are greater than necessary in order to integrate Alaska into domestic rate patterns, and that full advantage be taken of any cost savings that can be derived from the use of domestic satellite facilities. However, the extent to which domestic satellites should be utilized is a matter the RCA applicants can address in their application to acquire circuit capacity in the satellite system facilities of A.T. & T., and will be resolved in that context.

V38-6 JAN 10 73 XUM

its position, as will the State of Hawaii and carriers now serving that State in the event of a determination that the GTE system should not be utilized for MTT service to Hawaii. Our decision as to what method would be less costly (all relevant factors considered) and should therefore be employed, will be made after consideration of such submissions.

73. However, we hereby reaffirm the policy determinations in paragraphs 35–38 and 40–41 of the "Second Report" (35 FCC 2d at 856–859) that rates for interstate services to Alaska, Hawaii, and Puerto Rico shall not be higher because one or the other method is authorized, and that the advent of domestic satellite service will be accompanied by the integration of all interstate services between the mainland and Alaska, Hawaii, and Puerto Rico into an enlarged domestic rate pattern. As specified in paragraphs 37–38, the timetable for accomplishing this and the question of whether any deviations should be permitted will be determined after consideration of the specific proposals for revised rates and supporting showings to be submitted by the affected carriers for Commission approval no later than 6 months after the issuance of authorizations for the system or systems to serve these points. We will at that time determine whether any further procedures are necessary and, if so, of what nature.

74. We also reaffirm our decision that carriers now providing services other than MTT to Hawaii, Alaska, and Puerto Rico shall be afforded appropriate access to the A.T. & T. system (and/or GTE system) and to the earth stations in Hawaii, Alaska, and Puerto Rico used for the provision of interstate MTT service (paragraphs 38 and 40 of the "Second Report"). While this requirement pertains only to carriers now engaged in providing non-MTT services to these points, we do not foreclose consideration of an application by another carrier for authority to acquire a similar right of access to such facilities to provide non-MTT services upon a showing that the public interest would be served thereby (see paragraph 54 above). The question of whether such "appropriate access" should be afforded pursuant to a tariff offering by the supplying carrier or through a proportionate investment or rental interest in the facilities of the supplying carrier will be determined upon consideration of applications for authority to obtain such access and the responsive pleadings of the supplying carrier.

75. As indicated in paragraphs 38 and 40 of the "Second Report" such right of access to the satellite system facilities used for interstate MTT is designed to facilitate implementation of our goal that all interstate services to these three points shall be integrated into domestic rate patterns. It is also predicated on our belief that the public in Alaska, Hawaii, and Puerto Rico should have an opportunity to take advantage of the potential cost savings in obtaining specialized services on the same satellite system facilities used for MTT without the necessity for duplicate earth station and space segment facilities. However, as stated in the "Second Report", we do not preclude the authorization of independent domestic satellite system facilities to provide specialized interstate services to these points. In view of our policy determinations above with respect to the Comsat/MCIL proposal, and upon consideration of the arguments of the RCA applicants and the State of Alaska, we will consider on their merits applications from the Comsat/MCIL applicant or any other eligible applicant desiring to provide specialized interstate and/or intrastate services to these points, including Alaska, by means of independent satellite system facilities owned by such applicants.[30] We do not regard this policy as unduly prejudicial to RCA Alascom, since no duplicate facilities will be authorized for the provision of the interstate MTT service which concededly constitutes the bulk of the interstate business and revenues that are its "life blood." Furthermore, such applicants will be required to show with specificity how a grant of their application will serve the public interest and how they will provide tangible benefits in the form of new and better service, lower rates, etc. We will also consider the impact of a grant on the ability of RCA Alascom to discharge its responsibility to Alaska.

76. It is not practicable, however, to authorize all of the pending system applicants to serve Alaska, Hawaii, and Puerto Rico or to adopt a licensing standard that makes the desire of a qualified applicant to serve one or more of these points the sole controlling consideration. There are only seven available orbital locations (at 3° separations) capable of viewing all 50 States at 4 and 6 GHz frequencies. While the system or systems authorized to provide MTT service to Alaska, Hawaii, and Puerto Rico will not utilize all of these locations, we will not authorize use of the remaining locations for 4 and 6 GHz operations, in whole or in part, unless in addition to meeting the standard set forth above the applicant shows that it will provide an additional service which should be made available to all 50 States on the same system (e.g., interstate television program transmission) or that it will provide some service on terms and conditions of special benefit to the States of Alaska and/or Hawaii. Service at 4 and 6 GHz frequencies can be provided to the contiguous States and Puerto Rico by means of the 15 more easterly orbital locations that are available. The foregoing requirement will not apply to applicants proposing to use only frequencies other than 4 and 6 GHz, or to the use of an orbital location west of those capable of viewing all 50 States for operations at 4 and 6 GHz (and other frequencies allocated for communications satellite use) to provide service to Alaska and/or Hawaii and to such of the contiguous States as can be served by that orbital location.[31]

2. WUI Petition for Clarification[32]

77. Finally, in the case of Western Union which proposes to provide, among other services, network program transmission service, message, Mailgram and other services to Hawaii and Alaska,[33] there is an unresolved question as to whether and to what extent Western Union is barred by Section 222 of the Communications Act from furnishing any such services between the contiguous States and Hawaii. This question is now the subject of active consideration by the Commission pursuant to a petition for reconsideration filed by Western Union against an action taken by the Chief, Common Carrier Bureau which rejected an application of Western Union for authority to lease satellite channels from Comsat in the Intelsat system in order to furnish Mailgram service between the U.S. Mainland and Hawaii. The Commission expects to resolve this question very shortly and will thereby determine the scope of permissible operations between these points for which Western Union may seek authorization.

78. Pending such determination, we will withold processing of Western Union's application for authority to construct an earth station in Hawaii. We stress, however, that our assessment of an application by Western Union or any other applicant for an earth station in either Hawaii or Alaska must take account of the limited market in those States for non-MTT services and the effects thereof on the economic viability of satellite service, particularly in view of the relatively limited markets and the requirements we are imposing with respect to the integration of rates and charges for MTT services into the MTT rate schedule applicable within the contiguous States.

III. Interconnection

79. Our "Second Report" enunciated the policy objective of

> • • • assuring that all carriers providing retail interstate satellite services (whether or not affiliated with Bell System companies) have access at nondiscriminatory terms and conditions to local loop and interexchange facilities as necessary for the purpose of originating and terminating such interstate services to their customers (paragraph 34, 35 FCC 2d at 856).

In furtherance of this policy, we stated that we would require all terrestrial carriers seeking domestic satellite system authorizations to submit, for Commission approval, prior to action on their applications, a description of the kinds of interconnection arrangements they will make available to other satellite system and/or earth station licensees.

A. Pleadings of the Parties

80. In its petition for reconsideration of the "Second Report" A.T. & T. urges that the requirement in paragraph 34 (see also, paragraph 2 (f) above) is unnecessary and burdensome, and would unduly delay authorizations for domestic satellite system facilities. It sets forth its belief that a preferable course would be that followed by the Commission in "Specialized Common Carrier Services" (29 FCC 2d at 940), primarily wherein we indicated our reliance on the commitments of existing carriers to negotate interconnection arrangements with new carrier entrants on just, reasonable and nondiscriminatory terms. A.T. & T. further states that it sees no factual support in the record of this proceeding to justify the imposition of the condition adopted by the Commission in the "Second Report."

81. Other parties commenting in response to this portion of A.T. & T.'s petition (e.g., "General Electric Co." (GE) and "Fairchild Industries, Inc." Fairchild)) have taken positions contrary to that of A.T. & T. By letter dated November 22, 1972 "Western Union International" (WUI) also submitted an untimely pleading in support of the views of GE and Fairchild.[34]

B. Discussion and Conclusions

82. A.T. & T. has failed to demonstrate how or why the requirement for nondiscriminatory access to local loops and interexchange facilities controlled by A.T. & T. and its operating subsidiaries is either unnecessary or budensome. The entire thrust of our policy of encouraging multiple entities to provide service via domestic satellite facilities to meet current and emerging needs could be vitiated if such access were to be denied or unduly delayed. Furthermore, experience with respect to international communications, particularly insofar as the use of local loops and interexchange facilities are concerned for access between the offices of international carriers and earth stations which communicate with the Intelsat satellites, refutes A.T. & T.'s contentions. During the many years when the required facilities were supplied to the international carriers by A.T. & T. pursuant to Commmission order for nondiscriminatory access, we have not been made aware of any difficulties or burdens whatsoever that these requirements imposed on A.T. & T.

83. Accordingly, we perceive no reason to reconsider, at this time, the policies and conditions set forth in the "Second Report" concerning interconnection. We simply reiterate that it is our intent and requirement that the terrestrial carriers who are applicants for satellite and/or earth station authorization comply fully with these policies and conditions. In this connection we stress that we will not accept as compliance a token statement of good intentions to negotiate appropiate terms and conditions. We have already indicated, with clarity, the type of objectives we believe can guide the carriers in formualting a specific framework of standards within which they will make their facilities available to other Commission licensees.

84. The availability of timely and effective interconnection arrangements may well, in many cases, be vital to the meaningful implementation of authorizations issued in the public interest in furtherance of the Commission's policies herein. We therefore intend to examine thoroughly the showings made by existing carriers in their applications for satellite facilities pursuant to the above cited provisions of our "Second Report."[35] In the event that such showings fall short of satisfying us that interconnection will be offered in a timely manner by existing carriers to other licensees on reasonable and nondiscriminatory terms and conditions, we will withhold the issuance of authorizations to the existing carriers and will take whatever affirmative actions as may be required for the prompt and effective implementation of our interconnection policies.

IV. Terms of Access by Public Broadcasting and Other Educational Interests

85. As indicated in paragraph 3 above, our "Second Report" stated the Commission's willingness to entertain specific proposals by carriers or users for the prescription of preferential rate classifications, but declined to initiate any requirement as to common carriers or to enunciate any general statement of policy at this time (paragraph 43, 35 FCC 2d at 859).

A. Pleadings of the Parties

86. In its petition for partial reconsideration of the "Second Report," the NAEB urges us to set forth more specific policy objectives now and to require, rather than invite, rate proposals from all carrier applicants for domestic satellite system facilities. The position of NAEB is supported by the "Corporation for Public Broadcasting" (CPB) and the "Public Broadcasting Service" (PBS). In their comments filed on October 30, 1972, CPB and PBS stated that they would have no objection to Commission approval of the proposed Comsat/MCIL joint venture if that corporation should adhere to the commitment in the pending MCIL application as to service to educational interests. However, in the event that Comsat/MCIL Corp. has different views, CPB and PBS request that the corporation be required to state their position and that CPB and PBS be afforded an opportunity to submit specific comments bearing on this matter.

B. Discussion and Conclusions

87. We have carefully considered the requests of NAEB, CPB, and PBS that we specify policy objectives, rather than simply invite rate proposals from all carrier applicants. However, we are of the opinion that there are ample safeguards and statutory guidelines and policies to promote, in a timely fashion, the interests of educational broadcasters and other educational users in preferential rates. We will, of course, welcome a showing by all applicants as to the terms and conditions upon which they will make their services available to public broadcasting and educational interests. We recognize, nevertheless, that it may well be premature to expect applicants, several years in advance of their operational date, to have sufficient cost and other information available to set forth their rate proposals with specificity. It was based on the same considerations that the Commission indicated in the "Second Report" that it is not in a position at this time to enunciate any general statement of policy beyond that indicated in the analysis and conclusions of the staff recommendation ("Memorandum Opinion and Order," paragraphs 153–162, 34 FCC 2d at 73–76) and our statement in paragraph 43 of the "Second Report" (35 FCC 2d at 859).

88. Concerning the request that the Comsat/MCIL joint venture be required to adhere to the commitments made by MCIL in its pending application, we do not feel that we would be justified in holding the new applicant to any greater obligation or standard than we have laid down for all other carrier applicants to follow in the matter of free or reduced rate service for educational interests.

V. The National Environmental Policy Act of 1969

89. The Commission did not treat the question of the applicability of the National Environmental Policy Act of 1969 (NEPA)[36] to the policy objectives adopted in our "Second Report," although the Network Project was granted leave to participate in the oral argument held in this proceeding on May 1–2, 1972, and raised this question in its oral presentation. Since the issuance of the "Second Report" we have instituted a rule making proceeding (Docket No. 19555) looking toward the adoption of rules in this area which are designed to govern our action on applications for authorization for construction and operation of the various types of radio, cable and wire facilities, including communications satellites and earth stations that are subject to our jurisdiction. Although that proceeding is still pending before us, we are applying the proposed rules to all such applications.

---

[30] In the case of Alaska, we do not exclude the possibility that intrastate MTT service may be provided on domestic satellite facilities not used for interstate MTT, upon a showing that the public interest would be best served by such an authorization. As stated in the Second Report, A.T. & T. will be required to afford access to its transponder capacity for the purpose of intra-Alaska service, if desired.

[31] See, Second Report, paragraph 42, 35 FCC 2d at 859; memorandum opinion and order, paragraph 152, 34 FCC 2d at 72–73; Public Notice issued on Nov. 9, 1972 (FCC 72–992).

[32] See paragraph 63 above.

[33] See, Second Report, paragraph 3 (35 FCC 2d at 845); memorandum opinion and order, paragraph 10 (34 FCC 2d at 14); see also, Western Union's amended application filed on July 25, 1972. In this connection, we do not construe section 222 of the Communications Act as precluding Western Union from owning or operating earth stations in the State of Hawaii for intrastate service.

[34] WUI's letter of Nov. 22 is hereby accepted for our consideration.

[35] See also, Public Notice issued on Nov. 9, 1972 (FCC 72–992).

[36] 42 U.S.C. sec. 4331 et seq.

V 38 6 JAN 10 73 XUM

A. PLEADINGS OF THE PARTIES

90. In its petition for reconsideration of the "Second Report," the "Network Project" asserts principally that the "Second Report" is in contravention of the NEPA in the following respects:

(a) In the "Second Report" the Commission did not employ a systematic, interdisciplinary approach which will insure the integrated use of the natural and social sciences and the environmental design arts, as required by section 4332(2)(A) of the NEPA, which is applicable to this proceeding since the earth-transmitting and microwave relay stations to be employed in a domestic satellite system would emit microwave radiation which may have an adverse impact on man's environment;

(b) The Commission did not identify and develop methods and procedures, in consultation with the Council on Environmental Quality, in order to insure that presently unquantified environmental amenities and values, regarding the imposition of such microwave radiation, will be given appropriate consideration in the Commission's resolution of this proceeding along with the economic and technical considerations, as required by section 4332(B) of the NEPA;

(c) The Commission did not include a detailed statement discussing such matters as the environmental impact on, and possible alternatives to, the establishment of a domestic satellite system, as required by section 4332(2)(C) of the NEPA, which is applicable to this proceeding since, in light of such microwave radiation, a policy looking toward the potential establishment of multiple domestic satellite systems is a major Federal action significantly affecting the quality of the human environment.

(d) The Commission did not study, develop, or describe appropriate alternatives to the recommended courses of action made in the 1970 report and order in Docket No. 16495, its staff recommendation, or in the "Second Report" as required by section 4332(D) of the NEPA, which is applicable to this proceeding because the establishment of a policy looking toward the authorization of domestic satellite systems involves unresolved conflicts concerning alternative uses of available resources; and

(e) The Commission did not initiate and utilize ecological information in the planning and development of domestic satellite systems, as required by section 4332(2)(G) of the NEPA, which is applicable to this proceeding since the establishment of a policy looking toward authorization of such systems constitutes a resource-oriented project.

91. In support of the foregoing assertions, the Network Project relies on scientific literature expressing concern regarding the potential physiological and behavioral dangers posed to man by low intensity, nonionizing microwave radiation.[37] As legal authority for its position the Network Project cites: "Calvert Cliffs' Coordinating Committee v. A.E.C.," 449 F. 2d 1109, 1123–4 (C.A.D.C. 1971); "WMOZ, Inc. v. F.C.C.," 344 F. 2d 197 (C.A.D.C. 1965); Banzhaf v. F.C.C., 405 F. 2d 1082, 1096–7 (C.A.D.C. 1968), "cert. den. sub nom. Tobacco Institute v. F.C.C.," 396 U.S. 842 (1969); "National Helium Corp. v. Morton," 455 F. 2d 650, 654–5 (C.A. 10 1971); "Ely v. Velde,". 451 F. 2d 1130, 1138 (C.A. 4 (1971)). For the Network Project's arguments in support in its position, see pages 14–27 of its petition for reconsideration of the "Second Report," the affidavit attached to the petition, and its subsequently filed errata. By way of relief, the Network Project requests the Commission to rescind the "Second Report" and to remand this proceeding to the staff, so that our staff can prepare a detailed draft environmental impact statement which could be subject to ongoing review and reconsideration through the agency review process.

92. In opposition to the Network Project's petition, "MCIL" asserts that it has raised a highly novel question with respect to the Commission's compliance with NEPA. MCIL argues that the Network Project's concern is premised largely on a study presented to OTP by ERMAC (see footnote 37 above), which recommended a $63 million research program with respect to the biological effects of nonionizing electromagnetic radiation; and that the Network Project is requesting us "to undertake the type of thorough study recommended in the ERMAC Report." MCIL points to statements made by a member of our staff at the oral argument on May 2, 1972 (see transcript, pp. 393–395) and asserts that the pleading of the Network Project (as well as its supporting affidavit) does not allege any actual harm, but rather states that there is no assurance that human beings would be reasonably safe if authorizations implementing the policy objectives of the "Second Report" were to be issued. MCIL also takes issue with the scientific literature cited by the Network Project (see footnote 37 above), and urges that any problem relating to terrestrial radio radiation is not limited to the authorization of domestic satellite facilities but rather concerns all radio authorizations granted by this Commission—particularly those for television broadcast stations. MCIL asserts that it would be irresponsible and contrary to the public interest to halt all radio licensing actions, "pending long research programs to fill in remote lacunae in our present state of scientific knowledge." It also argues that the legal authorities cited by the Network Project deal with "very real environmental problems, not mere conjections about unknown laws of nature."[38]

93. In reply to MCIL's opposition, the Network Project takes issue with the arguments briefly summarized above, and concludes its reply statement as follows (pp. 7–8):

> In conclusion, the number of research conclusions criticized by the single author cited by MCI-Lockheed underscores the substantiality of scientific opinion supportive of the position that low-level radiation bears the potential for significantly affecting the quality of the human environment. To the extent that definitive evidence as to the consequences of such radiation is lacking, the presence of "known" consequences or of "answers" to questions surrounding the effects of such radiation is not a prerequisite to the Commission's obligation to prepare an environmental impact statement, and the substance of the impact statement, required by section 102(2)(C) of NEPA, 42 U.S.C. sec. 4332(2)(C), can and should be tailored accordingly. Aside from the preparation of an environmental impact statement, the consideration, utilization, and study—on the record—of environmental factors and information remain as required elements of this proceeding, pursuant to sections 102 (A), (B), (D), and (G) of NEPA * * *.

B. DISCUSSION AND CONCLUSIONS

94. Upon consideration of the pleadings of the parties and the views of our staff, we have determined to require all applicants for earth stations and satellite facilities to make a satisfactory showing that their operations will comply with

[37] The Network Project cites, inter alia: Michaelson, "Human Exposure to Nonionizing Radian Energy—Potential Hazards and Safety Standards," 60 Proceedings of the IEEE, pages 389, 390 (Apr. 1972); Bowers and Frey, "Technology Assessment and Microwave Diodes," Scientific American, pages 13, 21 (Feb. 1972); a standard adopted by the Department of Labor pursuant to the Occupational Safety and Health Act of 1970, 29 U.S.C. 657 (36 FR 10466, 10522–3 (1971)); A. H. Frey, "Human Auditory System Response to Modulated Electromagnetic Energy," 17 J. Appl. Physiol. pages 689–692 (1962); R. L. Carpenter, "Studies on the Effects of 2450 Mc Radiation on the Eye of the Rabbit," Proceedings of the Third Annual Tri-Service Conference Biological Hazards of Microwave Radiating Equipments (University of California, Berkeley), pages 279–290 (1959); A. F. Frey, "Biological Function as Influenced by Low-Power Modulated RF Energy," IEEE Transactions on Microwave Theory and Techniques, Vol. MTT–19 (Feb. 1971), pages 153–164; and (concerning direct and indirect effects on the central nervous system of man) Yu. A. Kholodov, "The Effect of an Electromagnetic Field on the Central Nervous System," 4 Priroda (U.S.S.R.), pages 104–105, Library of Congress, ATD P 65–68, FTD–TT 62–1107; Yu. A. Kholodov, "The Effect of Electromagnetic and Magnetic Fields on the Central Nervous System," NASA Technical Translation, TTF–465, Washington, D.C. 1967; and a Program for Control of Electromagnetic Pollution of the Environment: The Assessment of Biological Hazards of Nonionizing Electromagnetic Radiation, pages 2, 5, and 9 submitted to the Office of Telecommunications Policy (OTP) by the Electromagnetic Radiation Management Advisory Council (ERMAC).

[38] See pages 9–12 of MCIL's opposition.

governmentally prescribed standards for the protection of employees and the general public against excess levels of nonionizing radiation. In this regard we have reference to the standards promulgated by the Department of Labor pursuant to the Occupational Safety and Health Act of 1970, giving maximum levels of continuous exposure of employees. We shall require each applicant for earth station and satellite facilities to make a full showing of the measures he has taken to comply with these standards. The Occupational Safety and Health Act of 1970, governing levels of continuous exposure for employees covered by the Act, specifies a maximum of ten milliwatts per square centimeter of area (10 mw./cm.^{2}) averaged over any 6-minute period. These levels derive from Standard C95.1 of the American National Standards Institute (ANSI). Essentially these same levels have been adopted by the three military services.

95. We will expect applicants to conduct studies to predict radiation levels in and around earth stations and their associated terrestrial facilities. The results of such studies shall be submitted to the FCC as part of the appropriate application. Licensees will also be required to conduct surveys at intervals to be specified in our authorizations. Such surveys will be conducted in and around earth stations and their associated terrestrial facilities to determine levels of radiation. All licensees will also be required to identify areas having levels above 10 mw./cm.^{2} Such areas shall be prominently posted with appropriate warnings. As any additional evidence becomes available, which would raise further questions with respect to adverse effects of radiation and indicate a reasonable probability of damage to the quality of the environment, we will promptly take such action as is necessary to mitigate and obviate the dangers of which we are made aware. In this connection, applicants for satellite facilities will be subject to any other applicable requirements of the proposed environmental protection rules now being considered in Docket 19555, including any revisions of such rules as finally promulgated therein by the Commission. It is, of course, also our intention to comply fully with the requirements of NEPA in the handling of applications for authority to use the radio spectrum and to coordinate our efforts with those other branches of the Federal Government which are concerned with environmental matters.

VI. MISCELLANEOUS

96. With respect to various other requests made in pleadings of parties to Docket No. 16495, our views are as follows: First, in light of our resolution of the policy issues in the Second Report, as modified herein, we are of the opinion that any remaining questions raised by the petition of the Network Project (p. 30), that have not previously been treated in this proceeding, should be appropriately considered in connection with the processing of the applications. Second, the pleading filed by WUI on September 22, 1972, and supported by Datran, which suggested a possible solution to certain of the policy questions determined in this proceeding, is hereby dismissed as moot. And, finally, the request for licensing policy filed by the RCA applicants on September 26, 1972, will be treated as a petition for rule making and placed on public notice in accordance with the Commission's usual procedures.

97. Finally, we have taken note that various United States entities have been exploring the possible use of the Canadian Telsat System until such time as domestically owned space segment facilities are available and operational. In fact, two applicants for domestic common carrier satellite authorizations have recently entered into agreements with Telsat of Canada for the lease of transponder capacity in the Telsat system, subject to obtaining this Commission's authorization. Implementation of these arrangements would, of course, require appropriate authorizations by this Commission since such arrangements involve the construction and operation of earth stations in the United States. We are now prepared to state definitively what our policies will be with respect to the use of the Telsat system for the purposes contemplated by either carriers or noncarriers. The use of the Telsat system for purely domestic communications purposes is not barred or inhibited by any international agreement to which the United States is signatory. However, each specific proposal involving the use of Telsat of Canada will be examined for its justification in terms of all applicable statutory requirements and the policies set forth herein at such time as we are presented with implementing applications for authorization.

VII. ORDER

98. In light of all of the foregoing: *It is hereby ordered*, Pursuant to sections 1, 2, 3, 4 (i) and (j), 201, 202, 203, 212, 214, 218, 219, 220, 301, 303, 307–309, 310 (b), 319, 396, 403, and 605 of the Communications Act of 1934, and sections 102, 201(c), and 303–304 of the Communications Satellite Act of 1962, as amended, that:

A. The requests made by the various parties to this proceeding in pleadings filed since the "Second Report" are granted to the extent reflected herein and are otherwise denied.

B. This proceeding is terminated.

(Secs. 1–4, 201–203, 212, 214, 218–220, 301, 303, 307–310, 319, 403, 605, 48 Stat., as amended, 1065–1066, 1070, 1074, 1075, 1077, 1078, 1081–1086, 1089, 1094, 1103; sec. 396, 81 Stat. 368, as amended, secs. 102–201, 303, 304, 76 Stat., 419, 421, 423, 424; 47 U.S.C. 151–154, 201–203, 212, 214, 218–220, 301, 303, 307–310, 319, 396, 403, 605, 701, 721, 733, 734)

Adopted: December 21, 1972.

Released: December 22, 1972.

FEDERAL COMMUNICATIONS COMMISSION,[39]

[SEAL] BEN F. WAPLE, *Secretary.*

[FR Doc.73–515 Filed 1–9–73;8:45 am]

[Docket No. 19598]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations in Certain Cities in Certain States; Correction

In the Matter of Amendment of § 73.202(b), *Table of assignments*, FM broadcast stations (Washington, Iowa, Centerville, Tenn.; Winnsboro, Tex.; Stanton, Ky.; Gordon, Ga.; Mercersburg, Pa.; Elkader, Iowa; and Kernville, Calif.). Docket No. 19598, RM–1926, RM–1969, RM–1972, RM–1988, RM–1993, RM–1996, RM–2009, RM–2010.

The first report and order (FCC 72–1134), (37 FR 28138) released December 18, 1972, in the above-captioned proceeding, disposed of all of the petitions for rule making except RM–2010. The proceeding is still open, and action remains to be taken with regard to RM–2010. Through inadvertence, paragraph 5 of the First Report and Order read, in its entirety, as follows: "5. *It is further ordered*, That this proceeding is terminated."

Accordingly, the first report and order is corrected by striking all of paragraph 5.

Released: January 2, 1973.

FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] BEN F. WAPLE, *Secretary.*

[FR Doc.73–516 Filed 1–9–73;8:45 am]

PART 76—CABLE TELEVISION SERVICE

Performance Tests; Extension of Time; Correction

In regard petitions for an extension of time for initial compliance with § 76.601 of the rules.

The memorandum opinion and order in the above entitled matter, FCC 72–1147, released December 18, 1972, and

[39] Chairman Burch concurring and issuing a statement, which is filed as part of the original document, in which Commissioners Reid and Wiley join; Commissioners Johnson and H. Rex Lee concurring in the result; Commissioner Hooks concurring in the result and joining in paragraph 3 of Chairman Burch's statement.

V38-6 JAN 10 73 XUM

published in the FEDERAL REGISTER on December 22, 1972, 37 FR 28296, is corrected to indicate "Adopted: December 13, 1972".

Released: January 2, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

[FR Doc.73-517 Filed 1-9-73;8:45 am]

[Docket No. 18944]

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

Technical Standards for Computation of Service Area for Public Coast III–B Stations; Correction

In the matter of amendment of Part 81 of the Commission's rules to provide technical standards for the computation of service area for public coast III–B Stations, Docket No. 18944.

In paragraph 27 of the report and order in the above-entitled matter released May 31, 1972, FCC 72–448 (37 FR 11328, June 2, 1972) we stated, essentially, that we considered it a responsibility of an applicant for a public coast class III–B station to submit a map showing the service area contour of the proposed station as a part of the application, and that the application should include supporting data used in determining the service area contour. In the appendix attached to that report and order, however, the words "with supporting data" were inadvertently omitted from the text of § 81.49 that requires applicants for stations of this class to include service area contour charts with applications. These words should be included in the rule section so that the rule will be consistent with our intention as explained in the report and order.

Accordingly, § 81.49 is amended to read as follows:

§ 81.49 Supplemental information for public coast stations.

Each application for a new public coast station operating on frequencies in the band 156–162 MHz shall include as supplementary information a chart, with supporting data, showing the service area contour computed in accordance with Subpart R of this part.

Released: January 2, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

[FR Doc.73-518 Filed 1-9-73;8:45 am]

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Receiving Apparatus and Assignment of Frequencies; Correction

Order. In the matter of correcting cross references in Part 83 of the Commission's rules and regulations.

1. The report and order in Docket 14375, FCC 62–722 released July 17, 1962, published at 27 FR 7096, redesignated § 8.240 as § 8.243, in Part 8 (now Part 83). This change was not reflected in § 8.112. Accordingly, the text of § 83.112 is corrected to substitute reference to § 83.243 in lieu of § 83.240.

2. Additionally, the report and order in Docket 18632, FCC 71–1044, released October 26, 1971, published at 36 FR 20949, amended § 83.351(a) by deleting subparagraphs (1) through (5). Section 83.359 is therefore corrected by cross-referencing § 83.351(a) in lieu of § 83.-351(a) (5).

3. Authority for these changes is contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and in § 0.231(d) of the Commission's rules and regulations. Since these changes are editorial to correct oversights in previous actions, the prior notice, procedure, and effective date provisions of the Administrative Procedure Act, 5 U.S.C. 553, do not apply.

4. In view of the foregoing, Part 83 is amended as set forth below, effective January 12, 1972.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: December 27, 1972.

Released: December 29, 1972.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] JOHN M. TORBET,
Executive Director.

Part 83, Stations on Shipboard in Maritime Services.

1. Section 83.112 is amended to read as follows:

§ 83.112 General requirements for receiving apparatus.

The radio equipment of each ship station, or marine-utility station, using telegraphy or telephony, must be capable of permitting the reception of the class or classes of emission on the frequency or frequencies, normally received for the service carried on. The technical arrangement of the station apparatus shall be such that the necessary reception of emissions, including in particular that necessary for compliance with the provisions of §§ 83.181 and 83.243 can be readily effected prior to the transmission of any signals or communications by the ship station on the associated transmitting frequency.

2. The introductory statement of § 83.-359 is amended to read as follows:

§ 83.359 Frequencies in the band 156–162 MHz available for assignment.

The frequencies listed in the following table are available for assignment to stations as indicated. Except as provided in § 83.351(b)(55), these frequencies are not authorized for communication with stations on board aircraft. The limitations applicable to the respective frequencies are set forth in § 83.351(a).

* * * * *

[FR Doc.73-519 Filed 1-9-73;8:45 am]

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Frequencies Available

Order. In the matter of amendment of Part 83—to include the frequency 6451.9 kHz in § 83.351(a).

1. In the appendix to the third report and order in Docket No. 18271, released December 22, 1969, FCC 69–1369 (34 FR 20194), the Commission set forth, in § 83.354(a)(2),[2] frequencies to be used for communication with public correspondence stations when the mobile station and the coast station transmit alternately on the same radio channel.

2. The frequencies listed in column (4) of the table of § 83.354(a)(2)[1] are also set forth in the table following § 83.351 (a), with the exception of the frequency 6451.9 kHz, which was inadvertently omitted.

3. This amendment is editorial in nature, and hence the prior notice, and effective date provisions of 5 U.S.C. 553 are not applicable. Authority for the promulgation of this amendment, is contained in section 4(i) and 303(r) of the Communications Act of 1934, as amended, and § 0.231(d) of the Commission's rules.

4. In view of the foregoing, § 83.351(a) is amended to include the frequency 6451.9 kHz, which was in advertently January 12, 1973.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: December 29, 1972.

Released: January 2, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] JOHN M. TORBET,
Executive Director.

In § 83.351, paragraph (a) is amended to add the frequency 6451.9 kHz, to read as follows:

§ 83.351 Frequencies available.

(a) * * *

Carrier frequency (kHz)	See section—	Conditions of use
* * *	* * *	* * *
6147.5	83.354	3, 5, 15, 21.
6451.9	83.354	3, 5, 15, 21.
6455.0	83.354	3, 4, 15, 21.

Proposed Rule Making

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Ch. IX]

[Docket No. AO–377]

RYEGRASS SEED GROWN IN OREGON

Notice of Hearing on Proposed Marketing Agreement and Order

Notice is hereby given of a public hearing to be held in the Swept Wing Motel, Route 1 (Box 207), Santiam Highway, Albany, OR, beginning January 30, 1973, with respect to a proposed marketing agreement and order regulating the handling of ryegrass seed grown in Oregon. Each day's session of the hearing will commence at 10 a.m., local time, unless the presiding officer otherwise specifies during the course of the hearing. The hearing is called pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U.S.C. 601 et seq.), and in accordance with the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900).

The public hearing is for the purpose of: (a) Receiving evidence with respect to the economic and marketing conditions which relate to the proposed marketing agreement and order, hereinafter set forth, and to any appropriate modifications thereof;

(b) Determining whether the handling of ryegrass seed in the area proposed for regulation is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects interstate or foreign commerce;

(c) Determining whether there is a need for a marketing agreement or order regulating the handling of ryegrass seed in the area; and

(d) Determining whether provisions specified in the proposals or some other provisions appropriate to the terms of the Agricultural Marketing Agreement Act of 1937, as amended, will tend to effectuate the declared policy of the Act.

The proposed marketing agreement and order, the provisions of which are as follows, were submitted with a request for a hearing thereon by the Oregon Ryegrass Growers Association, Post Office Box 765, Albany, OR 97321, and have not received the approval of the Secretary of Agriculture (the sections identified with asterisks (***) apply only to the proposed marketing agreement and not to the proposed order):

DEFINITIONS

§ __.1 Acquire.

"Acquire" means to purchase ryegrass from, or otherwise handle ryegrass on behalf of the grower thereof.

§ __.2 Act.

"Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

§ __.3 Ryegrass.

"Ryegrass" means seed of annual ryegrass (Lolium multiflorum) and perennial ryegrass (Lolium perenne) grown in the production area.

§ __.4 Committee.

"Committee" means the Ryegrass Administrative Committee established pursuant to this Part.

§ __.5 Crop year.

"Crop year" means the 12 months beginning July 1 of any year through June 30 of the following year inclusive, or such other period as the Committee, with the approval of the Secretary, may establish.

§ __.6 District.

"District" means the applicable one of the following defined subdivisions of the production area or as such subdivisions may be redefined pursuant to § —.20

(a) District 1—Linn County, Oreg.

(b) District 2—Benton and Lane Counties, Oreg.

(c) District 3—All other counties in Oregon.

§ __.7 Grower.

"Grower" is synonymous with "producer" and means any person engaged in a proprietary capacity in the commercial production of ryegrass for market.

§ __.8 Handle.

"Handle" means to purchase ryegrass from the grower thereof, or to sell, consign, ship or transport (except as a common or contract carrier of ryegrass owned by another person) or acquire ryegrass, whether or not of own production, except that (a) the shipment or transportation within the production area of ryegrass by the grower thereof for cleaning or storage therein shall not be construed as "handling", and (b) the sale, shipment, or transportation of ryegrass by the grower thereof to a registered handler shall not be construed as handling by the grower.

§ __.9 Handler.

"Handler" and "registered handler" means any person who handles ryegrass: *Provided, however,* That with respect to the acquisition of a grower's ryegrass by a person other than a registered handler, such grower shall be the first handler of such ryegrass. "Registered handler" means any handler who has been registered as a handler with the Committee pursuant to rules and regulations issued by the Committee.

§ __.10 Part and subpart.

"Part" means the order regulating the handling of ryegrass grown in the production area, and all rules and regulations issued thereunder. The order regulating the handling of ryegrass grown in the production area shall be a "subpart" of such part.

§ __.11 Person.

"Person" means any individual, partnership, corporation, association, or any other business unit.

§ __.12 Production area.

"Production area" means the State of Oregon.

§ __.13 Secretary.

"Secretary" means the Secretary of Agriculture of the United States, or any other officer or employee of the U.S. Department of Agriculture to whom authority has heretofore been delegated, or to whom authority may be hereafter delegated to act in his stead.

§ __.14 Quantity.

"Quantity" means the weight of cleaned ryegrass in pounds.

§ __.15 through .19. Additional definitions as required.

RYEGRASS ADMINISTRATIVE COMMITTEE

§ __.20 Establishment and membership.

(a) There is hereby established a Ryegrass Administrative Committee consisting of nine members, each of whom shall have an alternate. The term "member" throughout this subpart, unless otherwise specified, shall refer to both the member and his alternate. Seven of the members shall be growers or officers or employees of growers, who are not also handlers. Of the grower members, four shall be producers of ryegrass in District 1, two in District 2, and one in District 3. Two of the members shall be handlers or officers or employees of handlers who shall be elected from the production area at large. A producer who is also a handler may serve as a handler member only.

(b) The Committee, with the approval of the Secretary, may redefine the Districts into which the production area is divided, and reapportion the representation of any District on the Committee: *Provided,* That any such changes shall reflect, insofar as practicable, shifts in Ryegrass production within the Districts and the production area.

§ __.21 Eligibility.

Each grower member of the Committee shall be, at the time of his selection and during his term of office, a grower or an officer or employee of a grower in the District for which selected. Each handler member of the Committee shall

V38-6 JAN 10 73 XUM

be, at the time of his selection and during his term of office, a handler or an officer or employee of a handler.

§ ___.22 Nominations.

(a) *General.* Separate nominations shall be made for each member position listed in § ___.20. Except as otherwise provided for obtaining initial nominations, nominations shall be certified by the Committee and submitted to the Secretary by June 1 of each crop year, together with information deemed by the Committee to be pertinent or requested by the Secretary. If nominations for any member are not submitted in the specified manner by such date, the Secretary may select the member for that position without nomination.

(b) *Grower members.* The Committee shall conduct nominations for grower members in each District through meetings or on the basis of ballots to be mailed by the Committee to all growers of record. Only growers eligible to serve on the Committee from the District in which the nominations are to be held shall be eligible to vote and each such grower shall have one vote for each grower member position to be filed. If a grower is also a handler, such grower may vote either as a grower or as a handler, but not both. No grower shall participate in the election of nominees in more than one District regardless of the number of Districts in which such person is a grower. A multidistrict grower may elect the district in which he votes.

(c) *Handler nominations.* The Committee shall conduct nominations for handler members through meetings or on the basis of ballots to be mailed by the Committee to all handlers who have registered with the Committee. Each handler shall have one vote for each handler member position to be filled.

(d) *Initial nominations.* For the purpose of obtaining the initial nominations, the Secretary shall perform the functions of the Committee as soon as practicable after the effective date of this part.

§ ___.23 Selection.

(a) *Selection.* Members shall be selected by the Secretary from nominees submitted by the Committee or from among other eligible persons on the basis of the representation provided for in §—.20.

(b) *Term of office.* The terms of office of the initial members of the Committee shall be established by the Secretary so that the term of office for two grower members and one handler member shall be the initial crop year, the term of office for two grower members and one handler member shall be the initial crop year plus the succeeding crop year, and the term of office for three grower members shall be the initial crop year plus the two succeeding crop years. Successor members of the Committee shall serve for terms of 3 crop years, except for shorter terms occasioned by the death, removal, resignation, or disqualification of any member, and subject to any such disqualification each member shall serve until his successor is selected and has qualified.

§ ___.24 Acceptance.

Each person selected by the Secretary as a member shall qualify by filing a written acceptance with the Secretary as soon as practicable after being notified of his selection.

§ ___.25 Vacancy.

To fill any vacancy occasioned by the death, removal, resignation, or disqualification of any member of the Committee, or in the event of the failure of any person selected as a member to qualify, a successor for the unexpired term or the term shall be nominated and selected in the manner provided in §§—.22 and —.23, so far as applicable, unless a selection is deemed unnecessary by the Secretary.

§ ___.26 Alternates.

(a) An alternate for a member of the Committee shall act in the place and stead of such member during his absence, and in the event of the member's removal, resignation, disqualification, or death until a successor for such member's unexpired term has been selected and has qualified.

(b) If both a member and his alternate are unable to attend a Committee meeting, the Committee may designate any other alternate from the same group (grower or handler) to serve in the member's place if such alternate is not serving in the place of another member.

§ ___.27 Procedure.

(a) Six members (including alternates acting as members) of the Committee shall constitute a quorum at an assembled meeting of the Committee and any action of the Committee at such meeting shall require the concurring vote of at least five members (including alternates acting as members). At any assembled meeting, all votes shall be cast in person.

(b) The Committee may provide for voting by mail, telephone, telegraph, or other means of communication upon due notice to all members and any proposition to be so voted upon first shall be explained accurately, fully, and identically. Any such vote other than by mail, telegraph, or other written means of communication shall be promptly confirmed by the member in writing or by telepgraph. Seven concurring votes shall be required for approval of a Committee action so voted upon.

(c) Members and alternate members of the Committee shall serve without compensation, but shall be allowed such reasonable expenses as approved by the Committee in attending to authorized Committee business.

§ ___.28 Powers.

The Committee shall have the following powers:

(a) To administer the provisions of this part in accordance with its terms;

(b) To make rules and regulations to effectuate the terms and provisions of this part;

(c) To receive, investigate, and report to the Secretary complaints of violations of this part; and

(d) To recommend to the Secretary amendments to this part.

§ ___.29 Duties.

The Committee shall have among others the following duties:

(a) To select from among its members such officers and adopt such rules or bylaws for the conduct of its meetings as it deems necessary;

(b) To hire employees, appoint such subcommittees and advisory committees as it may deem necessary, and to determine the compensation and to define the duties of each;

(c) To keep minutes, books, and records which will reflect all of the acts and transactions of the Committee and which shall be subject to examination at any time by the Secretary;

(d) To submit to the Secretary as soon as practicable after the beginning of each crop year a budget for such period, including a report in explanation of the items appearing therein, and a recommendation as to the rate of assessment for such period;

(e) To prepare quarterly statements of the financial operations of the Committee and to make copies of each such statement available to growers and handlers for examination at the office of the Committee and to send two copies to the Secretary;

(f) To cause the books of the Committee to be audited by a competent accountant at least once each crop year and at such other times as the Committee may deem necessary or as the Secretary may request, to submit two copies of each such audit report to the Secretary, and to make available a copy which does not contain confidential data for inspection at the office of the Committee by growers and handlers;

(g) To act as intermediary between the Secretary and any grower or handler;

(h) To investigate and assemble data on the growing, handling, and marketing conditions with respect to Ryegrass;

(i) To submit to the Secretary such available information as he may request or the Committee may deem desirable and pertinent;

(j) To notify growers and handlers of all meetings of the Committee to consider recommendations for regulation; and of all regulatory actions taken affecting growers and handlers;

(k) To give the Secretary the same notice of meetings of the Committee and of meetings of its subcommittees as is given to the applicable membership; and

(l) To investigate compliance and to use means available to the Committee to prevent violations of the provisions of this part.

RESEARCH AND DEVELOPMENT

§ ___.30 Research and development.

The Committee, with the approval of the Secretary, may establish or provide

for the establishment of production research, marketing research, and development projects designed to assist, improve, or promote the marketing, distribution, and utilization or efficient production of ryegrass. The expense of such projects shall be paid from funds collected pursuant to §—.56.

MARKETING POLICY

§ ___.35 Marketing policy.

Prior to and as far in advance of each ensuing crop year as it finds feasible, but in any event not prior to the preceding September 1, the Committee shall submit to the Secretary a report setting forth the marketing policy it deems desirable for such crop year. Such marketing policy shall set forth the Committee's evaluation of the various factors of supply and demand that will affect the marketing of ryegrass (separately for annual and perennial ryegrass) during the crop year, including:

(a) Carryin: The estimated quantity of ryegrass in all hands (growers, handlers, brokers, and wholesalers) at the beginning (July 1) of the crop year;

(b) Production: The estimated ryegrass production during the crop year;

(c) Trade demand: The prospective domestic and export trade demand, taking into consideration prospective imports;

(d) Carryout: The quantity to be in all hands at the end of the crop year;

(e) Market prices for ryegrass; and

(f) Other relevant factors.

On the basis of its evaluation of these factors, the Committee shall recommend to the Secretary the total quantity of ryegrass (hereinafter referred to as the "Total Desirable Quantity") (separately for annual and perennial) that should be allotted for handling during the crop year. If, in the event of subsequent changes in the supply and demand factors, the Committee deems it advisable that the total desirable quantity be increased for such crop year, it shall prepare a new or revised marketing policy and submit a report thereon to the Secretary together with its recommendations as to an appropriate revision in the total desirable quantity for such crop year. The Committee shall announce each marketing policy (including new and revised policies) and notice and contents thereof shall be provided to growers and handlers by bulletins, newspapers, or other appropriate media.

VOLUME REGULATION

§ ___.36 Total desirable quantity.

Whenever the Secretary finds, on the basis of the Committee's recommendation or other available information, that establishing, limiting, or increasing the quantity of ryegrass (annual or perennial) available for handling during a crop year, would tend to effectuate the declared policy of the Act, he shall establish the total desirable quantity for such crop year, which all handlers may acquire in the crop year. The Committee shall equitably apportion such quantity among producers by establishing allocation bases and allotments as provided in §§ —.41 and —.42.

§ ___.41 Grower allocation bases.

(a) Upon request of the Committee, each producer desiring an allocation base for ryegrass (annual or perennial or both) shall register with the Committee and furnish to it on forms prescribed by the Committee, a report of the number of pounds of such ryegrass produced by him and sold by him, or on his behalf, during each of the crop years 1969 through 1972, broken down by annual and perennial ryegrass, and names of handlers to whom sales were made as may be required by the Committee and approved by the Secretary.

(b) For the crop year which begins in 1973 a separate allocation base shall be established by the Committee for each registered producer for each of the two kinds—annual and perennial—in accordance with: (1) The average crop year pounds of ryegrass, of the particular kinds produced and sold by him, or on his behalf, during the four crop years 1969 through 1972 if such production and sales covered such four crop years; (2) the average crop year pounds of ryegrass of a particular kind produced and sold by him, or on his behalf, during any three of the crop years 1969 through 1972 if such production and sales covered only three of such crop years; (3) the average crop year pounds of ryegrass of a particular kind produced and sold by him or on his behalf, during any two of the crop years 1969 through 1972 if such production and sales covered only two of such crop years; (4) the crop year pounds of ryegrass of a particular kind produced and sold by him, or on his behalf, during any one of the crop years 1969 through 1972 if such production and sales covered only one of such crop years.

(c) For each crop year subsequent to the crop year 1973, each allocation base shall be recomputed by the Committee to recognize trend in sales volume of individual operations. This shall be accomplished by recalculating for each crop year all allocation bases according to the applicable one of the following procedures: (1) The allocation bases computed on a four-crop year basis shall be adjusted by: (i) Adding the producer's preceding crop year's sales of ryegrass of the particular kind to his four-crop year's total sales of such ryegrass used in computing his existing allocation base; (ii) subtracting the smallest quantity of sales for a crop year recorded as the sales of such ryegrass during such four-crop years; (iii) recalculating a new four-crop year simple average which shall be the new allocation base. (2) Allocation bases computed on a less than four-crop year basis shall be adjusted by adding the producer's preceding crop year's sales of ryegrass of the particular kind to the total number of pounds used in computing his preceding allocation base and dividing by the number of years of sales of such ryegrass.

(d) The Committee may provide for adjustment of a grower's allocation base upon a showing that such grower's sales in the base period, as provided in §§ —.41 (b) and —.41(c), were not representative due to conditions such as: adverse weather, insects disease, and fire.

(e) A condition for the continuing validity of an allocation base is production and sale of ryegrass thereunder. If no bona fide effort is made, or has been made in reference to the original allocation base, to produce and sell ryegrass thereunder during any 3 consecutive crop years, such allocation base shall be declared invalid due to lack of use and canceled at the end of such third consecutive year of nonproduction and sale.

(f) The Committee shall, for the crop year 1974 and each subsequent year, recommend to the Secretary an adjustment in allocation bases which will reflect (1) increase in usage of ryegrass; (2) desires of new producers to gain entry, and producers with existing allocation bases to expand, as evidenced by application for allocation bases or increased allocation bases; and (3) any additional factors which bear on industry adjustments to new and changing conditions.

(g) (1) Notwithstanding the foregoing provisions of paragraph (f) of this section any increase in the quantity of ryegrass provided for by all allocation bases covered by this part shall be no more than 5 percent of the total allocation bases encompassed by this part during the previous crop year.

(2) Any person may apply, under rules and procedures to be established by the Committee with the approval of the Secretary, either for a new allocation base or for an increase in an existing allocation base. Such applications may be submitted each crop year, but must be filed with the Committee not later than January 1 of a crop year in order to be considered for an award for a new allocation base or the adjustment of an existing allocation base to take effect the following crop year.

(h) The Committee recommendations, with justifications, supporting data, and a listing and summary of all applications for new or adjusted allocation bases, shall be submitted to the Secretary no later than March 1 of each crop year.

(1) Not more than 60 days after receipt of the Committee recommendations, the Secretary shall either approve said recommendations or make whatever alterations therein that he deems necessary in the public interest. In the event no such recommendations or listing of applications are received, the Secretary may issue adjustments in allocation bases each crop year. The decision of the Secretary shall be final; and he shall communicate his decision and the reasons therefor to the Committee in writing.

(2) Within 30 days after receipt of the Secretary's decision, the Committee shall notify each applicant of the Secretary's decision and of their allocation bases for the following crop year.

(i) The Committee shall, with the approval of the Secretary, establish rules, guides, bases, or standards to be used in determining allocation base awards or adjustments that are to be recommended

V38-6 JAN 10 73 XUM

to the Secretary taking into account, among other things, the minimum economic enterprise requirements for ryegrass production.

(j) Each allocation base shall be for ryegrass of a particular kind (annual or perennial).

(k) Growers' allocation bases may be transferred to other growers as authorized by regulations recommended by the Committee and approved by the Secretary.

(l) The Committee shall check and determine the accuracy of the information submitted pursuant to this section and is authorized to make a thorough investigation of any application. Whenever the Committee finds an error, omission, or inaccuracy in any such application, it shall correct the same and shall give the grower who submitted the application a reasonable opportunity to discuss with the Committee the factors considered in making the correction. In the event the error, omission, or inaccuracy requires correction of an allocation base, the applicable allotment computed for the grower pursuant to § __.42 shall be on the basis of the corrected allocation base. All allocation base applications, allocation bases assigned, and adjustments therein, shall be subject to review by the Secretary.

§ __.42 Grower allotments.

(a) Prior to the beginning of each crop year but no later than March 15, the Committee shall apportion to each grower who has an allocation base for ryegrass of a particular kind an allotment of ryegrass of such kind which handlers may acquire from each grower during the crop year. Each such allotment shall be computed by dividing the total desirable quantity of ryegrass of such kind established pursuant to § __.36 by the sum of the allocation bases of ryegrass of such kind for all producers and multiplying such grower's allocation base by the resulting percentage. The result shall be the grower's allotment of ryegrass of such kind. Except as otherwise provided, no handler may acquire any quantity of ryegrass of a particular kind (including ryegrass of such kind of own production) which would result in all handlers having acquired a greater quantity of such ryegrass with respect to such grower than the applicable allotment computed for such grower. Each allotment shall be expressed in pounds of cleaned ryegrass.

(b) The Committee with the approval of the Secretary may establish by regulation such means of certification or identification with respect to allotments of producers as may be required to effectuate the purposes of any regulation issued under this part.

(c) Growers allotments shall be nontransferable except in conjunction with the transfer of an allocation base.

§ __.43 Ryegrass harvested prior to effective date of this part.

Any person in the possession of ryegrass harvested prior to the effective date of this part or such date as the Committee may determine, but not more than 90 days following the effective date of this part, shall be entitled, upon application to the Committee to have such ryegrass so designated, and upon so doing, the ryegrass may be certified for handling without regard to any allotment: *Provided*, That the amount certified for handling under this paragraph in any one crop year may be limited by the Committee to not less than 25 percent of the total amount originally so designated.

§ __.44 Foundation and registered ryegrass seed.

The handling of foundation and registered ryegrass seed shall be subject to this part.

INSPECTION AND IDENTIFICATION

§ __.46 Quality regulation.

Subject to §§ —.40 and —.41 all ryegrass seed shall meet regulations of Federal and State seed acts prior to sale. The Committee with the approval of the Secretary, may establish requirements which will prohibit the handling of seed containing viable quack grass, wild garlic, wild onion seed, or any other undesirable seed. The Committee shall notify growers at least 2 crop years in advance before any quality regulation requiring change in production practices shall become effective. No ryegrass shall be handled unless it meets the quality standards established under this part. The Committee shall have authority to regulate the size of a lot certificated by one certificate in order to control quality.

§ __.47 Identification.

All ryegrass purchased from growers by all handlers must be identified as eligible seed under rules prescribed by the Committee. Adequate records shall be maintained by each designated handler of all transactions involving ryegrass seed.

EXPENSES AND ASSESSMENTS

§ __.55 Expenses.

The Committee is authorized to incur such expenses as the Secretary finds are reasonable and likely to be incurred by the Committee for its maintenance and functioning and to enable it to exercise its powers and perform its duties in accordance with the provisions hereof. The funds to cover such expenses shall be paid to the Committee by handlers in the manner prescribed in § —.56.

§ __.56 Assessments.

(a) As his pro rata share of the expenses which the Secretary finds are reasonable and likely to be incurred by the Committee during a crop year, each handler shall pay to the Committee, upon demand, assessments on all ryegrass he handles as the first handler thereof, during such period. The payment of assessments for the maintenance and functioning of the Committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) The Secretary shall fix the uniform rate of assessment to be paid by each handler during a crop year in an amount designed to secure sufficient funds to cover the expenses which may be incurred during such period and to accumulate and maintain a reserve fund not to exceed 1 crop year's expenses: *Provided*, That such rate of assessment, including any increase thereof, shall not exceed 5 cents per 100 pounds of cleaned ryegrass handled. At any time during or after the crop year, the Secretary, upon recommendation of the Committee, may increase the rate of assessment in order to secure sufficient funds to cover any later finding by the Secretary relative to the expenses which may be incurred. Such increase shall be applied to all ryegrass handled during the applicable crop year. In order to provide funds for the administration of the provisions of this part during the first part of a crop year before sufficient operating income is available from assessments, the Committee may accept the payment of assessments in advance, and may also borrow money for such purposes.

§ __.57 Accounting.

(a) If, at the end of a crop year, the assessments collected are in excess of expenses incurred, the Committee with the approval of the Secretary, may carry over such excess into subsequent crop years as a reserve: *Provided*, That funds already in the reserve do not exceed approximately 1 crop year's expenses. Such reserve funds may be used: (1) To cover any expenses authorized by this part and (2) to cover necessary expenses of liquidation in the event of termination of this part. If any such excess is not retained in a reserve, it shall be refunded proportionately to the handlers from whom assessments were collected. Upon termination of this part, any funds not required to defray the necessary expenses of liquidation shall be disposed of in such manner as the Secretary may determine to be appropriate: *Provided*, That to the extent practical such funds shall be returned pro rata to the handlers from whom such funds were collected.

(b) All funds received by the Committee pursuant to the provisions of this part shall be used solely for the purpose specified in this part and shall be accounted for in the manner provided in this part. The Secretary may at any time require the Committee and its members to account for all receipts and disbursements.

REPORTS AND RECORDS

§ __.60 Reports.

(a) *Inventory.* Each handler shall file with the Committee a certified report, showing such information as the Committee may specify with respect to any ryegrass held by him on such dates as the Committee may designate.

(b) *Receipts.* Each handler shall, upon request of the Committee, file with the Committee a certified report showing for each lot of ryegrass received or handled, the identifying marks, variety, weight, place of production, and the grower's name and address on such date(s) as the Committee may designate.

(c) *Other reports.* Upon the request of the Committee, with the approval of the Secretary, each handler shall furnish to the Committee such other information as may be necessary to enable it to exercise its powers and perform the duties under this part.

§ __.61 Records.

Each handler shall maintain such records pertaining to all ryegrass acquired from, or handled on behalf of all producers as will substantiate the required reports and such others as may be prescribed by the Committee. All such records shall be maintained for not less than 3 years after the termination of the crop year to which such records relate.

§ __.62 Verification of reports and records.

For the purpose of assuring compliance with record keeping requirements and verifying reports filed by handlers, the Secretary and the Committee, through its duly authorized employees, shall have access to any premises where applicable records are maintained, where ryegrass is received or held, and at any time during reasonable hours, shall be permitted to inspect such handler premises, and any and all records of such handlers with respect to matters within the purview of this part.

§ __.63 Confidential information.

All reports and records furnished or submitted by growers and handlers to or obtained by the employees of the Committee, which contain data or information constituting a trade secret or disclosing the trade position, financial condition, or business operation of the particular grower or handler from whom received, shall be treated as confidential and the reports and all information obtained from records shall at all times be kept in the custody and under control of one or more employees of the Committee who shall disclose such information to no person other than the Secretary.

MISCELLANEOUS PROVISIONS

§ __.70 Compliance.

Except as provided in this subpart;

(a) No handler may handle ryegrass, the handling of which has been prohibited under the provisions of this subpart, and no handler shall handle ryegrass except in conformity with the provisions of this subpart.

(b) No handler may purchase from or otherwise handle on behalf of a grower any amount of ryegrass that, together with all other marketings of such grower during the crop year, would exceed the apportioned allotment of such grower.

§ __.71 Right of the Secretary.

The members of the Committee (including successors, and alternates), and any agent or employee appointed or employed by Committee, shall be subject on just cause to removal or suspension at any time by the Secretary. Each and every order, regulation, decision, determination or other act of said Committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval the disapproved action of the said Committee shall be deemed null and void, except as to acts done in reliance thereon or in compliance therewith prior to such disapproval by the Secretary.

§ __.72 Effective time.

The provisions of this subpart shall become effective at such time as the Secretary may declare and shall continue in force until terminated in one of the ways specified in § —.73.

§ __.73 Termination or suspension.

(a) The Secretary may terminate or suspend the operation of any or all of the provisions of this part whenever he finds that such provisions do not tend to effectuate the declared policy of the Act.

(b) The Secretary shall terminate the provisions of this part at the end of any crop year whenever he finds that such termination is favored by a majority of producers who, during the preceding crop year, have been engaged in the production for market of ryegrass seed within the production area: *Provided*, That such majority has, during such period held allotments for more than 50 percent of the volume of all allotments of such ryegrass in the production area; but such termination shall be effective only if announced at least 30 days prior to the end of the then crop year.

(c) The provisions of this part shall, in any event, terminate whenever the provisions of the Act authorizing them cease to be in effect.

§ __.74 Proceedings after termination.

(a) Upon the termination of the provisions of this part, the members of the Committee then functioning shall continue as joint trustees, for the purpose of liquidating their affairs and of all the funds and property then in the possession of or under their control, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustees.

(b) The said trustees shall continue in such capacity until discharged by the Secretary; shall, from time to time, account for all receipts and disbursements and deliver all property on hand, together with all books and records of the Committee and of the trustees, to such person as the Secretary may direct; and shall upon request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the Committee or the joint trustees pursuant to this subpart.

§ __.75 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or any regulation issued pursuant to this subpart or the issuance of any amendments to either thereof, shall not (a) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued under this subpart, or (b) release or extinguish any violation of this subpart or of any regulation issued under this subpart or (c) affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violation.

§ __.76 Duration of immunities.

The benefits, privileges, and immunities conferred upon any person by virtue of this subpart shall cease upon termination of this subpart, except with respect to acts done under and during the existence of this subpart.

§ __.77 Agents.

The Secretary may, by designation in writing, name any person including any officer or employee of the Government, or name any agency in the U.S. Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this subpart.

§ __.78 Derogation.

Nothing contained in this subpart is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the Act or otherwise, or in accordance with such powers, to act in the premises whenever such action is deemed advisable.

§ __.79 Personal liability.

No member or alternate of the Committee nor any employee or agent thereof, may be held personally responsible, either individually or jointly with others, in any way whatsoever, to any handler or to any other person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, employee, or agent except for acts of dishonesty.

§ __.80 Separability.

If any provision of this subpart is declared invalid, or the applicability thereof to any person, circumstances, or thing is held invalid, the validity of the remainder of this subpart, or the applicability thereof to any other person, circumstance, or thing shall not be affected thereby.

§ __.81 Counterparts.

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.***

V 38-6 JAN 10 73 XUM

§ ...82 Additional parties.

After the effective date hereof, any handler who has not previously executed this agreement may become a party hereto if a counterpart hereof is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.***

§ ...83 Order with marketing agreement.

Each signatory handler favors and approves the issuance of an order by the Secretary regulating the handling of ryegrass in the same manner as is provided for in this agreement; and each signatory handler hereby requests the Secretary to issue, pursuant to the Act such an order.***

Copies of this notice may be procured from the Hearing Clerk, Room 112, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250; or James W. Coddington, Grain Divison, USDA, AMS, 6525 Belcrest Road, Hyattsville, MD 20782.

Signed at Washington, D.C. on January 5, 1973.

JOHN C. BLUM,
Deputy Administrator,
Regulatory Programs.

[7 CFR Parts 1032, 1050, 1062, 1064, 1065]

[Docket No. AO-313-A23, etc.]

MILK IN SOUTHERN ILLINOIS AND CERTAIN OTHER MARKETING AREAS

Decision on Proposed Amendments to Marketing Agreements and to Orders

7 CFR Part	Marketing area	Docket No.
1032	Southern Illinois	AO-313-A23.
1050	Central Illinois	AO-355-A12.
1062	St. Louis-Ozarks	AO-10-A45.
1064	Greater Kansas City	AO-23-A44.
1065	Nebraska-Western Iowa	AO-86-A28.

A public hearing was held upon proposed amendments to the marketing agreements and the orders regulating the handling of milk in the aforesaid marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at Bridgeton, Mo., on October 18, 1972, pursuant to notice thereof issued on October 3, 1972 (37 FR 21171).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on December 1, 1972 (37 FR 25940), filed with the Hearing Clerk, U.S. Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein.

The material issues on the record of the hearing relate to:

1. Adoption of an advertising and promotion program as authorized under Public Law 91-670; and

2. The specific terms and provisions necessary to implement such program in the aforesaid marketing areas.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof.

1. *Adoption of an advertising and promotion program.* The respective orders should be amended to provide for an advertising and promotion program to be administered in each case by an agency organized by producers and producers' cooperative associations and financed by producer moneys deducted from pool proceeds.

The amendments to the Agricultural Marketing Agreement Act under Public Law 91-670 provide that a Federal milk order may, with the approval of producers on the market, include provisions for establishing or providing for the establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products (hereinafter referred to in this part as the "advertising and promotion program" or "the program").

The hearing on the matter here under consideration was requested by seven dairy cooperatives representing a majority of producers in the respective markets. These associations are the Associated Milk Producers, Inc., (AMPI), Champaign County Milk Producers Association, Mid-America Dairymen, Inc., Mid-West Dairymen's Co., Mississippi Valley Milk Producers Association, Prairie Farms Dairy, Inc., and Wisconsin Dairies Cooperative.

Under the proposal supported at the hearing and as herein adopted, the advertising and promotion program under each respective order will be funded through a 5-cent per hundredweight assessment each month on producer milk pooled during such month. Such moneys will be deducted from the aggregate value of producer milk in computing the uniform price. Except for certain reserves withheld by the market administrator to cover refunds and administrative costs, the money will be turned over to and administered by an agency organized by producers and producers' cooperative associations under such order. The agency will be responsible for the development and implementation of programs and projects approved by the Secretary and designed to carry out the purposes of the act as prescribed in the attached amending orders.

Any producer not desiring to participate in the program, upon proper application, will be eligible for refund of the assessments made against his proportionate share of total producer marketings of milk, such refunds to be made by the market administrator on a quarterly basis. The program as adopted also provides for suitable adjustments to producers assessed under mandatory programs of the same nature under authority of any State law.

It is proponents' contention that there must be a sound and comprehensive program of promotion, education and research in the use of milk and dairy products if producers in the five markets are to compete with other beverage products, substitutes, and alternative foods competing for the consumer's nutritional dollar. Sellers of competing food products, they stated, engage in intensive advertising and promotional plans as a means of stimulating the sales of their products. Proponents suggested the need, therefore, that dairy farmers (members and nonmembers) join together in strong support of an advertising and promotion program as provided for under Public Law 91-670 if they are to hope for a continuing healthy and growing market in the future.

Proponents pointed to the long term decline in consumption of milk and milk products as well as in its share of the food dollar. The per capita civilian domestic consumption of milk solids in dairy products has declined about 9 percent from 1960 to 1971.[1] Consumer expenditures for dairy products as a percentage of all food expenditures dropped from 17.3 percent in 1960 to 14.3 percent in 1971.

In contrast to the declining trend in milk and dairy product consumption as a whole, proponents testified that in the case of cheese in its various forms there have been extensive promotional activities and that per capita consumption has increased. For instance, per capita consumption of American cheese increased from 5.4 pounds in 1960 to 7.4 pounds in 1971.

Proponents further testified that there is substantial support in these markets for the proposed programs, as evidenced both by the proportion of total producers represented by proponent cooperatives and the extent of support now being given by cooperatives to various advertising and promotional programs. Proponents favor the programs here proposed, claiming that a single Agency for each market can maximize effectiveness in the use of funds for promotion of milk and milk products and that more equitable participation by producer members and nonmembers alike will result.

Currently, proponents represent more than three-fourths of the producers on each of the St. Louis-Ozarks, Greater Kansas City and Nebraska-Western Iowa markets. In the Southern Illinois market, more than 80 percent of producers on the market are members of the several proponent cooperatives, and in Central Illinois about two-thirds.

At the present time, most dairy farmers pooled under each of the five markets are currently contributing toward various advertising, research, educational, and promotion programs, but in varying degrees. The proceeds from these contributions are turned over to such organizations as the local Dairy Councils, State American Dairy Associations, the Midland United Dairy Industry Association and the United Dairy Industry Association in Chicago.

Proponents testified that producers in each of the five markets presently support the promotion of milk and dairy products as follows:

St. Louis-Ozarks. About 95 percent of the producers are contributing at the rate of 5¼ cents per hundredweight.

Southern Illinois. Most producers contribute 5¼ cents per hundredweight of their milk marketings.

Greater Kansas City. Producer-members of a proponent cooperative (about 80 percent of the market) contribute 5 cents per hundredweight. Members of another cooperative contribute 3 cents per hundredweight.

Nebraska-Western Iowa. Producer members of a proponent cooperative (about 80 percent of the market) contribute 5½ cents per hundredweight. Producer-members of another cooperative contribute 2-cents per hundredweight.

The foregoing data suggest that for advertising and promotional programs as here proposed, there is reasonable expectation of support by a large majority of producers in each of the five markets. There was no testimony on the record in opposition to the adoption of the proposed programs. In these circumstances, it is concluded that a program essentially as proposed by the cooperatives should be adopted in each market. Specific modifications are necessary, however, as discussed below.

2. *Terms and provisions.* The proposed rate of 5 cents per hundredweight on producer milk suggested by proponents is a reasonable assessment on the marketings of producers under the respective orders and is adopted. Based on the volume of milk marketed in 1971 under these orders, an assessment rate of 5 cents per hundredweight on producer milk will provide a potential of approximately $2.4 million annually.

The enabling legislation specifically provides that the promotion funds deducted from producer proceeds "shall be paid to an agency organized by milk producers and producers' cooperative associations in such form and with such methods of operation as shall be specified in the order."

A definition of "Agency" therefore is incorporated in each order to identify the administrative body organized by producers and producers' cooperatives that will be authorized to expend the funds for advertising and promotional activities. As hereinafter used, the term "Agency" is to be understood to be the Agency as it would be organized pursuant to the terms of a particular order.

The Agency under the terms prescribed herein is responsible for administration of the terms and provisions of the program within the scope of its authority. Subject to the approval of the Secretary, it also is empowered to enter into contracts and agreements with persons or organizations as deemed necessary to carry out such program. In addition, the Agency may recommend to the Secretary amendments to the terms of the program and make such rules and regulations as are necessary to carry out its stated objectives.

The powers, duties, and functions specifically assigned to the Agency under the terms herein adopted are of a nature and scope to provide participating[2] producers on the market full and necessary authority through their representatives on the Agency to develop and administer advertising and promotion programs designed to accomplish the purposes of Public Law 91-670.

The Act states that the Agency "* * * may designate, employ, and allocate funds to persons and organizations engaged in such programs which meet the standards and qualifications specified in the order." The guidelines concerning this matter are set forth in the amendments to the respective orders. Under the terms of such amendments the Agency will develop and submit to the Secretary for approval, programs and projects that may provide for: (a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for advertising and promotion of milk and milk products on a nonbrand basis; (b) the utilization of the services of other organizations to carry out Agency programs and projects, if the Agency finds that such activities will benefit producers supplying the market; and (c) the establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers supplying the market.

Producers held that certain major considerations should be guidelines in the constituency of such an Agency:

(1) There should be adequate representation of producers in the market both for the membership of various cooperatives and for nonmembers; and

(2) The Agency should be a workable unit, not so large as to encumber its effective operation or impose excessive administrative costs on the program.

The procedures adopted herein authorize cooperative associations in each market to select Agency members to represent their participating producer members. It is provided, likewise, that Agency representatives for participating nonmembers will be elected in a referendum conducted by the market administrator among individual participating producers. In the case of any small cooperative association not having the minimum number of participating members to qualify for a representative, participating producer members of such cooperative will be included with participating nonmembers in such referendum.

It is provided also that cooperative associations may choose to combine their participating memberships for purposes of selecting Agency members. Such combined participating membership then will be treated as a single group in determining the number of Agency representatives to be selected by the cooperative associations.

Since cooperative members constitute most of the producers in each of these markets, it follows that Agency members will be principally persons selected by the cooperatives. Such Agency members (selected by cooperatives individually or in combination) may be producers or individuals not engaged in milk production, for example, employees of the cooperative.

In the case of a cooperative that does not have sufficient participating membership to select an Agency representative, and has not elected to combine with another cooperative(s) to achieve representation, its participating members may vote in a referendum together with participating nonmembers in the selection of Agency members to represent such group. The persons selected as Agency members through the referendum procedure should be producers who actively support the program.

The makeup of producer groups in each market, in terms of cooperative members and nonmember producers, varies distinctly from market to market particularly as to the relative size and number of cooperatives involved. It should be anticipated, also, that relevant grouping of producers in any one market may change considerably from year to year. In determining Agency membership it is concluded that allotment of one Agency member for a specified percentage of participating producers in each market (such as 5 percent or 10 percent) will tend to result in proper producer and cooperative representation in the varying circumstances. For each of the markets, except Central Illinois, the adopted provisions allot one Agency member for each full 5 percent of total participating producers on the market. In Central Illinois there would be one Agency member for each 10 percent of participating producers in the market.

This method differs from proponents' plan for allotting Agency membership. Proponents would allow to each cooperative one Agency member for the first 1 percent that its participating producer members represent of total participating

***Applicable only to the proposed marketing agreement.

[1] Official notice is taken of data in the "Dairy Situation", May 1972 published by Economic Research Service, U.S. Department of Agriculture.

[2] Participating producers are those who have not requested refunds. Further, the program adopted herein for each order provides that for the purposes of the Agency's initial formation, all producers under such order will be considered as participating producers.

V 38 - 6 JAN 10 73 XUM

producers on the market, and one additional Agency member for each additional 15 percent it represents of the market's participating producers.

A difficulty in the application of such a dual percentage may arise in a market where a number of cooperatives each represent a small percentage of producers and are individually awarded Agency representation. As a group these small cooperatives may achieve a majority membership on the Agency although their producer membership is a minority in the market.

While it cannot be determined from the record that this situation will occur, the data for one market suggest that the potential definitely exists. In the Southern Illinois market, proponents testified there are nine cooperatives with membership ranging from as little as 1.5 percent up to about 25 percent of the producers on the market. This situation at least approaches the condition under which a minority of producers might select the majority of members on the Agency.

The allotment of one Agency member for each 5 percent (10 percent in Central Illinois) of participating producers will avoid the difficulty illustrated above. Further, with additional adjustments as explained herein, it will provide Agency representation consistent with proponents' guidelines and reasonable representation of all producers on each market.

The different percentage to be used in Central Illinois is advisable in the interest of conserving administrative expense where there is a substantially smaller number of producers than in the other markets. Producer numbers in each market in August 1972 were: St. Louis-Ozarks, 3,285; Southern Illinois, 2,173; Greater Kansas City, 2,207; Nebraska-Western Iowa, 1,797; and Central Illinois, 777. (Official notice is taken of the August 1972 issue of "Summary of Federal Milk Market Statistics", as compiled and published by the Dairy Division, AMS, USDA.)

An additional consideration in some of these markets, however, is that a single cooperative constitutes a large majority of the producers on the market. Selection of Agency members merely according to the proportion of participating producers represented by such cooperatives in the respective markets could result in a larger Agency than necessary for the purposes of: (1) Adequately representing participating producers; and (2) efficient operation. This would be true in the St. Louis-Ozarks, Greater Kansas City and Nebraska-Western Iowa markets where a single cooperative represents three-fourths or more of the producers on each such market.

If a single cooperative represents a substantial majority of participating producers, Agency representation for such cooperative should be limited to a number necessary to retain a voting majority on the Agency but in no event less than five. Considering the market structure of the five orders as here discussed, a minimum of five members for a majority cooperative's representation will allow the breadth of geographical representation among members in each market that proponents suggested.

As indicated previously, cooperative associations may elect to combine their participating membership with those of other cooperatives. If the combined group in total has a majority of participating producers on the market, the number of representatives that may be selected by such group also shall be limited to the minimum necessary to constitute a majority of the Agency representatives, but in no event less than five.

The participating producer members of any cooperative association(s) having less than the required specified minimum percentage, that elects not to combine as discussed above, and nonmember participating producers, will be authorized (as a group) one Agency representative for each full 5 percent (10 percent in Central Illinois market) that such producers constitute of the total number of participating producers under the respective orders. If, however, such group of producers in total constitutes less than the minimum percentage specified for obtaining at least one Agency member, but not less than 1 percent, the group, nevertheless, will be authorized to elect one Agency representative.

On the basis of proponents' statements of cooperative representation on each market, the procedures herein adopted could result in a maximum of 10 Agency members under the Central Illinois order and 11 each, respectively, under St. Louis-Ozarks, Greater Kansas City and Nebraska-Western Iowa. Under the Southern Illinois order a somewhat greater Agency membership could result because of the greater number of cooperatives on this market than in the other markets.

Under the program herein adopted, the market administrator will conduct a referendum annually to determine representation on the Agency of nonmember participating producers and cooperatives not having sufficient membership to select a representative.

Within 30 days after the effective date of the amended order and annually thereafter, the market administrator shall give notice to all such producers (member and nonmember) of their opportunity to nominate Agency members from among their groups and shall specify the number of representatives that such nonmember and member producers together are authorized.

Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and then shall conduct a referendum in which each individual participating producer (member or nonmember) shall have one vote.

Since cooperative associations may freely elect to combine or not combine for purposes of selecting agency representation, it is provided in the case of a cooperative with less than the indicated minimum percentage that does not combine, that the balloting of its participating producer members shall be on an individual basis, the same as nonmembers. This procedure will tend to promote equity between member and nonmember producers in the selection of representation. Election of Agency membership will be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes of participating producers.

Each person selected for the Agency shall qualify by filing with the market administrator a written acceptance of his willingness and intention to serve in such capacity. It is anticipated that any eligible nominee included on the list that the market administrator is required to circulate to participating nonmember producers and certain participating member producers in the conduct of the referendum, as discussed elsewhere in these findings, would advise the market administrator promptly if he were not willing to be a nominee. Notwithstanding, it is possible that a person elected to membership or so designated by a cooperative may not be able or may not wish to accept the position. This requirement, therefore, is necessary in order that the market administrator will know whether or not the position has been filled. Such acceptance should be filed promptly after notification in order that the formation of the Agency can be prompt.

The term of office of each member of the Agency as herein adopted is 1 year or until a replacement is designated by the cooperative association or is elected.

It is possible that an elected representative may leave the market or otherwise be unable to complete his term of office. It is desirable, therefore, that some procedure be provided for filling the vacancy. It is concluded appropriate in such circumstance that the market administrator appoint as his replacement the then currently participating producer who received the next highest number of eligible votes in the referendum.

Actions to be taken by the Agency are of such importance that a majority of the representatives should be required to be present at any meeting to constitute a quorum and any action taken by the Agency should require a majority of concurring votes of those present and voting. The provisions herein adopted so provide except that the Agency may adopt rules that a decision on any action require a greater proportion than a simple majority of members present.

The Agency's duties set forth in the respective orders are generally necessary for the discharge of its responsibilities. It is intended that activities undertaken by the Agency shall be confined to those reasonably necessary to carry out its responsibilities as prescribed by the program. At the same time it should be recognized that these specified duties are not necessarily all inclusive, and it may develop that there are other duties the Agency may need to perform.

The Congress clearly contemplated that producer activities under Public Law 91-670 would be under direct surveillance of the Secretary. It was specifically provided that "all funds collected under this subparagraph (I) shall be separately accounted for and shall be used only for the purposes for which they are collected." It is essential, therefore, that the Agency prepare and submit to the Secretary for his approval budgets showing projected amounts of available funds and how such funds are to be disbursed. Also, in order to make the audit necessary to establish that Agency funds are used only for authorized purposes, the market administrator or other representative of the Secretary must have access to all of the Agency's records and access to, and the right to examine, any directly pertinent books, documents, papers, and records of any organization performing advertising and promotion activities for such Agency.

Proponents proposed that budgets be prepared and submitted for approval on a quarterly basis. The Agency must be in a position to develop firm plans and make commitments covering a sufficient forward period to insure a continuing viable program. A calendar quarter is concluded to be the minimum practical period for achieving this end and it is provided therefore that a budget shall be submitted to the Secretary for his approval prior to each quarterly period.

All of the possible promotion and other authorized activities that the Agency may wish to pursue cannot be anticipated at this time. Therefore, the authority for the Agency to establish programs and projects is purposely left broad and flexible to facilitate the timely development of such programs suitable to prevailing circumstances in the market.

Any promotion program or project the Agency may consider must comport with the terms and conditions of the order and be evaluated in terms of cost, the statutory objectives to be accomplished, the time required to complete the program or project, and other such factors, in order to arrive at a sound decision as to whether the program or project is justified.

The required budget submissions will permit the Secretary to evaluate projected programs in terms of the declared policy of the Act and also will serve as policy guidelines for Agency members in the conduct of their operations for each ensuing quarterly period. This will be particularly helpful in the transition of Agency membership as the terms of office of individual members expire.

The Agency appropriately must follow prudent operating procedures in the furtherance of the best interests of producers. It is required, therefore, that it shall keep minutes of its meetings and such other books and records as will clearly reflect all its transactions, and on request shall submit such books and records to the Secretary for his examination. It also shall provide for the bonding of all persons handling Agency funds with surety thereon satisfactory to the Secretary.

The amending orders prescribe no specific requirements of the Agency to publish an account of funds collected and the use made thereof or to make releases of information concerning the operation of the program to producers and other interested parties. Since the activities of the Agency are under the direct supervision of the Secretary, it is not necessary to prescribe such requirements to insure the integrity of the program. However, since the degree of producer participation in the program, and thus its relative success, will depend in large part upon the interest and confidence it generates among producers, the Agency undoubtedly will keep producers on the market fully informed of its milk promotion plans, projects, and activities. In view of these considerations, it is not necessary to prescribe specific informational releases to producers and other parties.

It is possible that the Agency may find it desirable to enlist the aid of individuals with special talents who might be helpful in program and promotion planning by virtue of their particular knowledge, skills, or expertise, on matters directly involved with advertising and promotion programs. Provision is made, therefore, whereby the Agency, at its pleasure, may establish an advisory committee(s) of persons other than Agency members. Such a committee(s) may include, but would not be necessarily limited to persons drawn from universities, land grant colleges, or extension services, public officials, and others, in the dairy industry. Such committee(s) could make recommendations and participate in the deliberations of the Agency but would have no voting rights.

It would not be expected that the market administrator or his staff or other officials of the U.S. Department of Agriculture would serve on such a committee(s) since the activities of the Agency are under the surveillance of the Department.

The Agency should be authorized to incur reasonable expense in its administration of the program, including the employment and the fixing of compensation of any person necessary to the exercise of its powers and performance of its duties. For example, the Agency may find it necessary to retain the services of an attorney from time to time to assist in the preparation of contracts, or to employ a stenographer, or other individual(s) to handle its recordkeeping and bookkeeping functions. Other Agency costs could be expected to involve miscellaneous office costs usually associated with a business office.

It is, of course, appropriate and necessary, that Agency representatives be reimbursed for reasonable expenses incurred in attending meetings and while on other Agency business. This could involve expenses for travel in private car, and expenses incurred for public transportation, meals, and lodging. It would be unreasonable to require members of the Agency to bear such expenses incurred in the interest of all producers on the market.

It was proposed, and it is here adopted, that the amount of money utilized by the Agency for its expenses in administering the program should not exceed 5 percent of the funds received by the Agency from the market administator. This establishes a reasonable limitation on Agency costs and assurance to producers that the funds collected under the program will be expended prudently on advertising and promotion activities.

The Agency, of course, is handling funds otherwise payable to producers. The Agency members therefore should have assurance that they will not be personally liable for the impact of their official acts except for willful misconduct, gross negligence, or any acts that are criminal in nature. To assure that the Agency funds are used only for the purpose contemplated by the Congress, it is provided that such funds shall not be used for political activities, or for influencing governmental policy or acts.

Although a specified assessment automatically will be withheld for the program with respect to milk deliveries of all producers, the authorizing statute, nevertheless, provides that producers not wishing to participate in the program shall have the right to refund of the deductions on their milk. The provision of the act is that "notwithstanding any other provisions of this Act, as amended, any producer against whose marketings any assessment is withheld or collected under the authority of this subparagraph, and who is not in favor of supporting the advertising and promotion programs, as provided for herein, shall have the right to demand and receive a refund of such assessment pursuant to the terms and conditions specified in the order."

The proposals made by producer groups for these markets would implement refunds by a method similar to those provided in other orders where programs of this type have been established. Specifically, a producer desiring a refund on the assessments made against his marketings would submit to the market administrator his signed request, in the manner prescribed by the market administrator, within the first 15 days of the month (December, March, June, or September) preceding the calendar quarter for which refund is requested.

Refunding on a quarterly basis as proposed is reasonable in that it insures refunds on a timely basis, without undue administrative costs, and therefore conforms to the intent of the Congress.

It was suggested by proponents that patron numbers, social security numbers, or similar information will in most cases provide the necessary identification of the producer requesting the refund. While it is intended that the refund procedure not be cumbersome or in any way impede producers who wish to obtain refunds, it is necessary to require records relevant to the refund. It is not possible to anticipate what information might be necessary in all particular cases to identify an applicant for refund, for instance where several dairy farmers

V 38 - 6 JAN 10 73 XUM

having similar names occur on producer payrolls.

In any event, the provisions provided herein will permit the market administrator to develop appropriate procedures to this end. These procedures should include reasonable safeguards to clearly establish that any refund request originates with, and is the action of, the individual producer. It would be inappropriate, for example, for any cooperative or individual not in harmony with the program to file refund requests in the names of individual producers without their full knowledge or understanding of the nature of the action.

To insure that producers have an awareness of the program and of their rights thereunder, it is provided that the market administrator shall forward to each producer a copy of the amended order promptly when the program is effectuated, and thereafter to new producers.

All refunds paid should be made by the market administrator directly to the producer requesting the refund. This is a primary consideration in assuring that the payment of the money to the producer will be expedited and that the producer does, in fact, receive the money to which he is entitled. The market administrator is in possession of the information on which to determine the validity of the request, and the identity of the producer, or is in a position to obtain the necessary information for these purposes. Further, inasmuch as all the money involved in the program is in the first instance collected by the market administrator, there is no reason for any other method of payment of refunds than directly from the market administrator to the individual producer.

Proponents recognized that certain elements of flexibility are necessary in the procedure when a dairy farmer is not on the market during the specified notification period in which request for refunds are to be made. It was proposed that a dairy farmer coming on the market after such specified period and before the beginning of the next regular period for requesting refunds be permitted to request refund for the calendar quarter.

It was pointed out, however, that a dairy farmer coming on the market may have been a producer on another market where a similar program applies and where he had requested refund for the calendar quarter or had opportunity to make such request. Proponents suggested that, ideally, one request by a producer should serve for all markets in which his milk is delivered and subject to program assessments.

The program should operate in such a manner that an application properly submitted by a dairy farmer for refund for a calendar quarter under one order will be valid with respect to refund of program assessments on his milk under a second order. As a corollary, there is no need to provide a new producer opportunity to request refund if he already has had such opportunity in another market. To do so would result in unnecessary duplication of the refund procedure and added expense. A second opportunity for such producers to request a refund would also be inequitable compared to the application of the order to producers who are afforded the opportunity only in the specified 15-day period.

In the case of a new producer who has not been under another order where a similar program exists, and who enters the market after the regular refund notification period applicable to a calendar quarter, or comes on the market during such calendar quarter, application for refund may be made with respect to assessments against such producer's milk during such calendar quarter.

Proponents requested at the hearing that in the event deductions at the start of the program are initiated other than at the beginning of a calendar quarter, a period for requesting refunds be specified in the month prior to the first month in which deductions are made. As proposed in the hearing notice, however, in such circumstances a producer would be allowed to make application for refund for the current calendar quarter up to the beginning date of the next regular period for requesting refunds for the ensuing quarter.

The proposed special refund request period is not considered necessary. The particular circumstance described by proponent would occur only at the beginning of the program. It is not expected under the circumstances in these markets that the proposal would make a significant difference in the funds available.

Proponents recognized that the milk of some producers may be subject to deductions under a State program requiring a mandatory checkoff for a similar advertising and promotion program. Proponents held that a double assessment was not intended and that refund should be made under the Federal order of an amount equal to such State assessment but not in excess of 5 cents per hundredweight. This procedure is provided for in the statute and should be adopted.

A part of the function of the market administrator in relation to handling of applications for refunds is the ascertainment of the amount of funds to be available to the Agency during the ensuing calendar quarter for use in the program. Under the procedure specifying that application for refunds should be made in the first 15 days of the month preceding the quarter, the market administrator will have in hand information from which to estimate the total of assessments on milk during the ensuing quarter that will be available for disbursement to the Agency. Such estimate of available funds will be based, of course, only on existing information at the beginning of the calendar quarter. Changes in producer numbers as well as other occurrences during the quarter will affect somewhat the amount of money available.

Since this is a voluntary program there should be no provision for disclosure by the market administrator regarding the status of any producer under the program. It will be incumbent upon the participants, through their Agency, to conduct programs in a manner and of a nature to set the climate for maximum participation by producers.

It is possible that at some later date producers could request termination of the program, or that the order provisions could be terminated by the Secretary on a finding that they no longer tend to effectuate the declared policy of the Act. In the event that the provisions of the advertising and promotion program are terminated in their entirety, any remaining uncommitted funds applicable thereto should revert to producers since such moneys are derived solely from funds otherwise due producers. In each of these orders market-wide pools exist and such uncommitted funds appropriately should be deposited in the producer-settlement fund for distribution to producers.

Expenses incurred by the market administrator in the administration of the advertising and promotion program should be charged against the advertising and promotion funds. Neither the marketing service fund nor the administrative fund should be charged with costs directly related to the administration of the advertising and promotion program. The program is producer originated and should be self-sustaining. The expenses attendant to its administration appropriately should be borne by participating producers.

The statutory authority supports this position and makes it clear that this is intended to be strictly a producer program. In part the law states that "Establishing or providing for the establishment of * * * program * * * to be financed by producers in a manner and at a rate specified in the order, on all producer milk under the order. * * * All funds collected under this subparagraph shall be separately accounted for and shall be used only for the purpose for which they are collected."

To implement the advertising and promotion program under each order, it is necessary that certain provisions of the current orders be modified.

The provisions for computing the weighted average (or uniform) prices must be modified by inserting a new paragraph prescribing the deduction of 5 cents per hundredweight of producer milk from the aggregate value included in the computation. It is through this procedure that the advertising and promotion funds are reserved. This, of course, has the result of reducing the weighted average (or uniform) prices by 5 cents.

The advertising and promotion moneys so reserved will be held in the producer-settlement fund as a separate account for disposition by the market administrator in accordance with the terms and conditions prescribed under the advertising and promotion program order provisions.

In the Greater Kansas City order where a base and excess payment plan applies, it also is necessary to modify the provisions prescribing the computation of the uniform prices for base and excess milk so that the cost of the advertising and promotion program will be divided pro rata between base and excess milk rather than be placed on base milk alone. Official notice is taken of a decision with respect to the Nebraska-Western Iowa order (37 F.R. 23438) in which a Class I base plan is proposed. Appropriate provisions for computation of uniform prices are contained herein in the event such base plan is adopted.

It is necessary also that appropriate corollary changes be made in the provisions prescribing the obligations of a handler operating a partially regulated distributing plant and the obligations of any handler with respect to other source milk allocated to Class I (on which the pool obligation is the difference between the Class I and the weighted average price) so that such handler's pool obligations will not be increased by 5 cents because of the change in the weighted average price.

It is recognized that, unless otherwise provided for, an audit adjustment involving any handler's balance of payment to or from the producer-settlement fund could also require adjustments in the moneys to be turned over to the program or refunded to producers, as the case may be. However, such adjustment normally would not involve sufficient volumes of milk to significantly affect the moneys available to the program. For this reason and because of the substantial administrative costs that would be involved in reflecting audit adjustment in adjusted payments to the program, it is intended that such audit adjustments shall not result in adjustments of funds available to the program.

Other order modifications not specifically discussed herein are necessary and incidental to insure the proper functioning of the order to accommodate the advertising and promotion program as here established.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are hereby made with respect to each of the aforesaid tentative marketing agreements and orders:

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on Exceptions

In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a marketing agreement[1] regulating the handling of milk, and an order amending the orders regulating the handling of milk in the aforesaid specified marketing areas which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement,[1] be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreements are identical with those contained in the respective orders as hereby proposed to be amended by the attached order which is published with this decision.

Determination of Producer Approval of the Advertising and Promotion Program and Determination of Representative Period

November 1972 is hereby determined to be the representative period for the purpose of ascertaining whether the proposed order provisions, constituting the advertising and promotion program in each order regulating the handling of milk in the aforesaid specified marketing areas are separately approved or favored by producers, as defined under the terms of the respective order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the respective marketing area.

Signed at Washington, D.C., on January 5, 1973.

RICHARD E. LYNG,
Assistant Secretary.

Order[2] amending the orders, regulating the handling of milk in certain specified marketing areas.

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are hereby made with respect to each of the aforesaid orders:

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid specified marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of

[1] Marketing agreement filed as part of the original document.

[2] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

V 38-6 JAN 10 73 XUM

industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of each of the orders, as amended, and as hereby amended, as follows:

The provisions of the proposed marketing agreements and order amending each of the specified orders contained in the recommended decision issued by the Deputy Administrator, Regulatory Programs, on December 1, 1972, and published in the FEDERAL REGISTER on December 6, 1972 (37 FR 25940) shall be and are the terms and provisions of this order, amending the orders, and are set forth in full herein.

With respect to the Nebraska-Western Iowa Order No. 65, the amending order includes certain provisions (amendment numbers 6 and 7 relative to §§ 1065.71a and 1065.80a, respectively) that were set forth in the recommended decision to apply if a proposed Class I base plan was adopted for such order. By an order of the Assistant Secretary issued December 15, 1972, and published in the December 21, 1972, issue of the FEDERAL REGISTER, a Class I Base Plan was adopted for the Nebraska-Western Iowa Order 65 to become effective February 1, 1973.

PART 1032—MILK IN THE SOUTHERN ILLINOIS MARKETING AREA

1. Section 1032.60 is revised as follows:

§ 1032.60 Producer-handlers.

Sections 1032.40 through 1032.54, 1032.61 through 1032.90 and 1032.110 through 1032.122 shall not apply to a producer-handler.

2. In § 1032.62, paragraph (b)(5) is revised as follows:

§ 1032.62 Obligations of handler operating a partially regulated distributing plant.

* * * * *

(b) * * *

(5) From the value of such milk at the Class I price applicable at the location of the nonpool plant, subtract its value at the weighted average price applicable at such location plus five cents, or the Class II price, whichever is higher; and add for the quantity of reconstituted skim milk specified in subparagraph (3) of this paragraph its value computed at the Class I price applicable at the location of the nonpool plant less the value of such skim milk at the Class II price.

3. In § 1032.71, a new paragraph (c–1) is added to read as follows:

§ 1032.71 Computation of the uniform price.

* * * * *

(c–1) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a) of this section by 5 cents;

* * * * *

4. In § 1032.84, paragraph (b)(2) is revised to read as follows:

§ 1032.84 Payments to the producer-settlement fund.

* * * * *

(b) * * *

(2) The value at the weighted average price(s) applicable at the location of the plant(s) from which received plus 5 cents (not to be less than the value at the Class II price) with respect to other source milk for which a value is computed pursuant to § 1032.70(f).

5. Immediately following § 1032.89, a new centerhead and new §§ 1032.110 through 1032.122 are added as follows:

ADVERTISING AND PROMOTION PROGRAM

§ 1032.110 Agency.

"Agency" means an agency organized by producers and producers' cooperative associations, in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1032.121 (b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

§ 1032.111 Composition of Agency.

Subject to the conditions of paragraph (a) of this section, each cooperative association or combination of cooperative associations, as provided for under § 1032.113(b), is authorized one agency representative for each full 5 percent of the participating member producers (producers who have not requested refunds for the most recent quarter) it represents. Cooperative associations with less than 5 percent of the total participating producers that have elected not to combine pursuant to § 1032.113(b), and participating producers who are not members of cooperatives, are authorized to select from such group of participating producers, in total, pursuant to § 1032.113(c), one Agency representative for each full 5 percent that such producers constitute of the total participating producers. If such group of producers in total constitutes less than 5 percent but not less than 1 percent of the total participating producers it shall nevertheless be authorized to select from such group in total one agency representative. For the purpose of the agency's initial organization, all persons defined as producers shall be considered as participating producers.

(a) If any cooperative association or combination of cooperative associations, as provided for under § 1032.113(b), has a majority of the participating producers, representation from such cooperative or group of cooperatives, as the case may be, shall be limited to the minimum number of representatives necessary to constitute a majority of the agency representatives, but not less than five.

§ 1032.112 Term of office.

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

§ 1032.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 5 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to the Agency under the rules of § 1032.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than the required 5 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this amending order, and annually thereafter, the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more producers as Agency representatives, as the case may be, and also shall specify the number of representatives to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual participating producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

§ 1032.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum. Any action of the Agency shall require a majority of concurring votes of those present and voting, unless the Agency determines that more than a simple majority shall be required.

§ 1032.115 Powers of the Agency.

The Agency is empowered to:

(a) Administer the terms and provisions of the program within the scope of Agency authority pursuant to § 1032.110;

(b) Make rules and regulations to effectuate the purposes of Public Law 91–670;

(c) Recommend amendments to the Secretary; and

(d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1032.110 and 1032.117.

§ 1032.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

(a) Meet, organize, and select, from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;

(b) Develop programs and projects pursuant to §§ 1032.110 and 1032.117;

(c) Keep minutes, books, and records, and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;

(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;

(e) When desirable, establish an advisory committee(s) of persons other than Agency members;

(f) Employ and fix the compensation of any person deemed to be necessary to its exercise of powers and performance of duties;

(g) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and

(h) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

§ 1032.117 Advertising, Research, Education, and Promotion Program.

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

§ 1032.118 Limitation of expenditures by the Agency.

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1032.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

§ 1032.119 Personal liability.

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

§ 1032.120 Procedure for requesting refunds.

Any producer may apply for refund subject to the applicable conditions set forth in this section.

(a) Refund shall be accomplished only through application filed with, and in the manner prescribed by, the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the end of the ensuing calendar quarter may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such calendar quarter pursuant to § 1032.71 (c–1): *Provided:* That, such eligibility for refund shall not apply to a dairy farmer who during the first 15 days of such December, March, June, or September, respectively, was a producer under an order where the same refund notification period applied and such dairy farmer did not appropriately submit refund application during such period. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.

(d) A dairy farmer who, with respect to any calendar quarter, has appropriately filed request for refund of program assessments on his marketings of milk under another order that provides for an advertising and promotion program will be eligible (on the basis of his request filed under the other order) for refund with respect to his producer milk marketed under this order during such quarter for which deductions were made pursuant to § 1032.71(c–1).

§ 1032.121 Duties of the market administrator.

Except as specified in § 1032.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1032.113(c);

(b) Set aside the amounts subtracted under § 1032.71(c–1) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to subparagraphs (2) and (3) of this paragraph, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that exceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1032.71(c–1).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1032.120. Such refund shall be computed at the rate of 5 cents per hundredweight of such producer's

V 38 - 6 JAN 10 73 XUM

milk pooled for which deductions were made pursuant to § 1032.71(c–1) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to subparagraph (2) of this paragraph.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1032.110 through 1032.122).

(d) Make necessary audits to establish that all agency funds are used only for authorized purposes.

§ 1032.122 Liquidation.

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1032.83.

PART 1050—MILK IN THE CENTRAL ILLINOIS MARKETING AREA

1. Section 1050.60 is revised as follows:

§ 1050.60 Producer-handlers.

Sections 1050.40 through 1050.54, 1050.61 through 1050.90, and 1050.110 through 1050.122 shall not apply to a producer-handler.

2. In § 1050.62, paragraph (b)(5) is revised as follows:

§ 1050.62 Obligations of handler operating a partially regulated distributing plant.

* * * * *

(b) * * *

(5) From the value of such milk at the Class I price applicable at the location of the nonpool plant (not to be less than the Class II price), subtract its value at the weighted average price applicable at such location plus 5 cents, or the Class II price, whichever is higher; and add for the quantity of reconstituted skim milk specified in subparagraph (3) of this paragraph its value computed at the Class I price applicable at the location of the nonpool plant (not to be less than the Class II price) less the value of such skim milk at the Class II price.

3. In § 1050.71, a new paragraph (c–1) is added to read as follows:

§ 1050.71 Computation of the uniform price.

* * * * *

(c–1) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a) of this section by 5 cents;

4. In § 1050.84, paragraph (b)(2) is revised to read as follows:

§ 1050.84 Payments to the producer-settlement fund.

* * * * *

(b) * * *

(2) The value at the weighted average price(s) applicable at the location of the plant(s) from which received plus 5 cents (not to be less than the value at the Class II price) with respect to other source milk for which a value is computed pursuant to § 1050.70(f).

5. Immediately following § 1050.89, a new centerhead and new §§ 1050.110 through 1050.122 are added as follows:

ADVERTISING AND PROMOTION PROGRAM

§ 1050.110 Agency.

"Agency" means an agency organized by producers and producers' cooperative associations, in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1050.121 (b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

§ 1050.111 Composition of Agency.

Subject to the conditions of paragraph (a) of this section, each cooperative association or combination of cooperative associations as provided for under § 1050.113(b), is authorized one agency representative for each full 10 percent of the participating member producers (producers who have not requested refunds for the most recent quarter) it represents. Cooperative associations with less than 10 percent of the total participating producers that have elected not to combine pursuant to § 1050.113(b), and participating producers who are not members of cooperatives, are authorized to select from such group of participating producers, in total, pursuant to § 1050.113(c), one Agency representative for each full 10 percent that such producers constitute of the total participating producers. If such group of producers in total constitutes less than 10 percent but not less than 1 percent of the total participating producers it shall nevertheless be authorized to select from such group in total one agency representative. For the purpose of the agency's initial organization, all persons defined as producers shall be considered as participating producers.

(a) If any cooperative association or combination of cooperative associations, as provided for under § 1050.113(b), has a majority of the participating producers, representation from such cooperative or group of cooperatives, as the case may be, shall be limited to the minimum number of representatives necessary to constitute a majority of the agency representatives, but not less than five.

§ 1050.112 Term of office.

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

§ 1050.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 10 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to the Agency under the rules of § 1050.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than the required 10 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this amending order, and annually thereafter, the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more producers as Agency representatives, as the case may be, and also shall specify the number of representatives to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual participating producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

§ 1050.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum. Any action of the Agency shall require a majority of concurring votes of those present and voting, unless the Agency determines that more than a simple majority shall be required.

§ 1050.115 Powers of the Agency.

The Agency is empowered to:

(a) Administer the terms and provisions of the program within the scope of Agency authority pursuant to § 1050.110;

(b) Make rules and regulations to effectuate the purposes of Public Law 91–670;

(c) Recommend amendments to the Secretary; and

(d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1050.110 and 1050.117.

§ 1050.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

(a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;

(b) Develop programs and projects pursuant to §§ 1050.110 and 1050.117;

(c) Keep minutes, books, and records, and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;

(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;

(e) When desirable, establish an advisory committee(s) of persons other than Agency members;

(f) Employ and fix the compensation of any person deemed to be necessary to its exercise of powers and performance of duties;

(g) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and

(h) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

§ 1050.117 Advertising, Research, Education and Promotion Program.

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

§ 1050.118 Limitation of expenditures by the Agency.

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1050.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

§ 1050.119 Personal liability.

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

§ 1050.120 Procedure for requesting refunds.

Any producer may apply for refund subject to the applicable conditions set forth in this section.

(a) Refund shall be accomplished only through application filed with, and in the manner prescribed by, the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the end of the ensuing calendar quarter may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such calendar quarter pursuant to § 1050.71(c–1). *Provided:* That, such eligibility for refund shall not apply to a dairy farmer who during the first 15 days of such December, March, June, or September, respectively, was a producer under an order where the same refund notification period applied and such dairy farmer did not appropriately submit refund application during such period. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.

(d) A dairy farmer who, with respect to any calendar quarter, has appropriately filed request for refund of program assessments on his marketings of milk under another order that provides for an advertising and promotion program will be eligible (on the basis of his request filed under the other order) for refund with respect to his producer milk marketed under this order during such quarter for which deductions were made pursuant to § 1050.71(c–1).

§ 1050.121 Duties of the market administrator.

Except as specified in § 1050.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1050.113(c);

(b) Set aside the amounts subtracted under § 1050.71(c–1) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to subparagraphs (2) and (3) of this paragraph, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that exceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1050.71(c–1).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1050.120. Such refund shall be computed at the rate of 5 cents per hundredweight of such producer's milk pooled for which deductions were made pursuant to § 1050.71(c–1) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to subparagraph (2) of this paragraph.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1050.110 through 1050.122).

(d) Make necessary audits to establish that all agency funds are used only for authorized purposes.

V 38 - 6 JAN 10 73 XUM

§ 1030.122 Liquidation.

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1050.83.

PART 1062—MILK IN THE ST. LOUIS-OZARKS MARKETING AREA

1. In § 1062.60, paragraph (a) is revised as follows:

§ 1062.60 Exemptions.

(a) *Producer-handler.* Sections 1062.40 through 1062.46, 1062.50 through 1062.54, 1062.61, 1062.62, 1062.70 through 1062.72, 1062.80 through 1062.89 and 1062.110 through 1062.122 shall not apply to a producer-handler; and

• • • • •

2. In § 1062.62, paragraph (b)(5) is revised as follows:

§ 1062.62 Obligations of handlers operating a partially regulated distributing plant.

• • • • •

(b) • • •

(5) From the value of such milk at the Class I price applicable at the location of the nonpool plant, subtract its value at the uniform price applicable at such location plus 5 cents (not to be less than the Class II price) and add for the quantity of reconstituted skim milk specified in subparagraph (3) of this paragraph its value computed at the Class I price applicable at the location of the nonpool plant less the value of such skim milk at the Class II price.

3. In § 1062.71, a new paragraph (c–1) is added as follows:

§ 1062.71 Computation of uniform prices.

• • • • •

(c–1) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a) of this section by 5 cents.

§ 1062.84 [Amended]

4. In § 1062.84, *Payments to the producer-settlement fund*, paragraph (b)(2) is revised by inserting the words "plus 5 cents" following the initial words "The value at the weighted average price(s) applicable at the location of the plant(s) from which received • • •"

5. Immediately following § 1062.88, a new centerhead and new §§ 1062.110 through 1062.122 are added as follows:

ADVERTISING AND PROMOTION PROGRAM

§ 1062.110 Agency.

"Agency" means an agency organized by producers and producers' cooperative associations, in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1062.121(b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

§ 1062.111 Composition of Agency.

Subject to the conditions of paragraph (a) of this section, each cooperative association or combination of cooperative associations, as provided for under § 1062.113(b), is authorized one agency representative for each full 5 percent of the participating member producers (producers who have not requested refunds for the most recent quarter) it represents. Cooperative associations with less than 5 percent of the total participating producers that have elected not to combine pursuant to § 1062.113(b), and participating producers who are not members of cooperatives are authorized to select from such group of participating producers, in total, pursuant to § 1062.113(c), one Agency representative for each full 5 percent that such producers constitute of the total participating producers. If such group of producers in total constitutes less than 5 percent but not less than 1 percent of the total participating producers it shall nevertheless be authorized to select from such group in total one agency representative. For the purpose of the agency's initial organization, all persons defined as producers shall be considered as participating producers.

(a) If any cooperative association or combination of cooperative associations, as provided for under § 1062.113(b), has a majority of the participating producers, representation from such cooperative or group of cooperatives, as the case may be, shall be limited to the minimum number of representatives necessary to constitute a majority of the agency representatives, but not less than five.

§ 1062.112 Term of office.

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

§ 1062.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 5 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to the Agency under the rules of § 1062.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than the required 5 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this amending order, and annually thereafter, the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more producers as Agency representatives, as the case may be, and also shall specify the number of representatives to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual participating producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

§ 1062.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum. Any action of the Agency shall require a majority of concurring votes of those present and voting, unless the Agency determines that more than a simple majority shall be required.

§ 1062.115 Powers of the Agency.

The Agency is empowered to:

(a) Administer the terms and provisions of the program within the scope of Agency authority pursuant to § 1062.110;

(b) Make rules and regulations to effectuate the purposes of Public Law 91–670;

(c) Recommend amendments to the Secretary; and

(d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1062.110 and 1062.117.

§ 1062.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

(a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;

(b) Develop programs and projects pursuant to §§ 1062.110 and 1062.117;

(c) Keep minutes, books, and records and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;

(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;

(e) When desirable, establish an advisory committee(s) of persons other than Agency members;

(f) Employ and fix the compensation of any person deemed to be necessary to its exercise of powers and performance of duties;

(g) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and

(h) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

§ 1062.117 Advertising, research, education, and promotion program.

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

§ 1062.118 Limitation of expenditures by the Agency.

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1062.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

§ 1062.119 Personal liability.

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

§ 1062.120 Procedure for requesting refunds.

Any producer may apply for refund subject to the applicable conditions set forth in this section.

(a) Refund shall be accomplished only through application filed with, and in the manner prescribed by, the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the end of the ensuing calendar quarter may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such calendar quarter pursuant to § 1062.71(c–1): *Provided:* That, such eligibility for refund shall not apply to a dairy farmer who during the first 15 days of such December, March, June, or September, respectively, was a producer under an order where the same refund notification period applied and such dairy farmer did not appropriately submit refund application during such period. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.

(d) A dairy farmer who, with respect to any calendar quarter, has appropriately filed request for refund of program assessments on his marketings of milk under another order that provides for an advertising and promotion program will be eligible (on the basis of his request filed under the other order) for refund with respect to his producer milk marketed under this order during such quarter for which deductions were made pursuant to § 1062.71(c–1).

§ 1062.121 Duties of the market administrator.

Except as specified in § 1062.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1062.113(c);

(b) Set aside the amounts subtracted under § 1062.71(c–1) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to subparagraphs (2) and (3) of this paragraph, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that exceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1062.71(c–1).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1062.120. Such refund shall be computed at the rate of 5 cents per hundredweight of such producer's milk pooled for which deductions were made pursuant to § 1062.71 (c–1) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to subparagraph (2) of this paragraph.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1062.110 through 1062.122).

(d) Make necessary audits to establish that all agency funds are used only for authorized purposes.

§ 1062.122 Liquidation.

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1062.83.

PART 1064—MILK IN THE GREATER KANSAS CITY MARKETING AREA

1. Section 1064.60 is revised as follows:

§ 1064.60 Exempt handlers.

Sections 1064.40 through 1064.46, 1064.50 through 1064.53, 1064.61, 1064.70, 1064.71, 1064.80 through 1064.88, and

V 38 6 JAN 10 73 XUM

1064.110 through 1064.122, shall not apply to a handler pursuant to § 1064.7(f), a producer-handler, or to a handler operating a plant from which less than an average of 600 pounds of Class I milk per day is distributed on routes in the marketing area.

2. In § 1064.61, paragraph (b)(5) is revised as follows:

§ 1064.61 Obligations of handler operating a partially regulated distributing plant.

• • • • •

(b) • • •

(5) From the value of such milk at the Class I price applicable at the location of the nonpool plant, subtract its value at the weighted average price applicable at such location plus 5 cents (not to be less than the Class III price), and add for the quantity of reconstituted skim milk specified in subparagraph (3) of this paragraph its value computed at the Class I price applicable at the location of the nonpool plant less the value of such skim milk at the Class III price.

3. In § 1064.71, a new paragraph (c–1) is added to read as follows:

§ 1064.71 Computation of uniform price.

• • • • •

(c–1) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a) of this section by 5 cents;

4. In § 1064.72 revise paragraphs (a) and (b) to read as follows:

§ 1064.72 Computation of uniform prices for base and excess milk.

• • • • •

(a) Subtract from the amount resulting from the computations made pursuant to paragraphs (a) through (d) of § 1064.71 an amount computed by multiplying the weighted average price plus 5 cents times the hundredweight of milk specified in § 1064.71(e)(2);

(b) Determine the value of excess milk by multiplying the hundredweight of producer milk determined to be excess milk in series beginning with Class III by the respective class prices minus 5 cents for milk of 3.5 percent butterfat content, and adding together the resulting amounts;

• • • • •

§ 1064.80 [Amended]

5. In § 1064.80, *Time and method of payment*, the phrase in paragraph (a) "at not less than the applicable uniform price(s) pursuant to § 1064.71 or § 1064.82" is changed to read "at not less than the applicable uniform price(s) pursuant to § 1064.71 or § 1064.72."

6. In § 1064.84, revise paragraph (a)(2)(ii) to read as follows:

§ 1064.84 Payments to the producer-settlement fund.

(a) • • •

(2) • • •

(ii) The value at the weighted average price(s) applicable at the location of the plant(s) from which received plus 5 cents (not to be less than the Class III price) with respect to other source milk for which a value is computed pursuant to § 1064.70(e).

7. Immediately following § 1064.88 a new centerhead and new §§ 1064.110 through 1064.122 are added as follows:

ADVERTISING AND PROMOTION PROGRAM

§ 1064.110 Agency.

"Agency" means an agency organized by producers and producers' cooperative associations in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1064.121(b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

§ 1064.111 Composition of Agency.

Subject to the conditions of paragraph (a) of this section, each cooperative association or combination of cooperative associations, as provided for under § 1064.113(b), is authorized one agency representative for each full 5 percent of the participating member producers (producers who have not requested refunds for the most recent quarter) it represents. Cooperative associations with less than 5 percent of the total participating producers that have elected not to combine pursuant to § 1064.113(b), and participating producers who are not members of cooperatives, are authorized to select from such group of participating producers, in total, pursuant to § 1064.113(c), one Agency representative for each full 5 percent that such producers constitute of the total participating producers. If such group of producers in total constitutes less than 5 percent but not less than 1 percent of the total participating producers, it shall nevertheless be authorized to select from such group in total one agency representative. For the purpose of the agency's initial organization, all persons defined as producers shall be considered as participating producers.

(a) If any cooperative association or combination of cooperative associations, as provided for under § 1064.113(b), has a majority of the participating producers, representation from such cooperative or group of cooperatives, as the case may be, shall be limited to the minimum number of representatives necessary to constitute a majority of the agency representatives but not less than five.

§ 1064.112 Term of office.

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

§ 1064.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 5 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to the Agency under the rules of § 1064.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than the required 5 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this amending order, and annually thereafter, the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more producers as Agency representatives, as the case may be, and also shall specify the number of representatives to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual participating producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

§ 1064.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum. Any action of the Agency shall require a majority of concurring votes of those present and voting, unless the Agency determines that more than a simple majority shall be required.

§ 1064.115 Powers of the Agency.

The Agency is empowered to:

(a) Administer the terms and provisions of the program within the scope of Agency authority pursuant to § 1064.110;

(b) Make rules and regulations to effectuate the purposes of Public Law 91–670;

(c) Recommend amendments to the Secretary; and

(d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1064.110 and 1064.117.

§ 1064.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

(a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;

(b) Develop programs and projects pursuant to §§ 1064.110 and 1064.117;

(c) Keep minutes, books, and records and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;

(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;

(e) When desirable, establish an advisory committee(s) of persons other than Agency members;

(f) Employ and fix the compensation of any person deemed to be necessary to its exercise of powers and performance of duties;

(g) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and

(h) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

§ 1064.117 Advertising, research, education, and promotion program.

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

§ 1064.118 Limitation of expenditures by the Agency.

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1064.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

§ 1064.119 Personal liability.

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

§ 1064.120 Procedure for requesting refunds.

Any producer may apply for refund subject to the applicable conditions set forth in this section.

(a) Refund shall be accomplished only through application filed with, and in the manner prescribed by, the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the end of the ensuing calendar quarter may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such calendar quarter pursuant to § 1064.71(c–1): *Provided*, That such eligibility for refund shall not apply to a dairy farmer who during the first 15 days of such December, March, June, or September, respectively, was a producer under an order where the same refund notification period applied and such dairy farmer did not appropriately submit refund application during such period. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.

(d) A dairy farmer who, with respect to any calendar quarter, has appropriately filed request for refund of program assessments on his marketings of milk under another order that provides for an advertising and promotion program will be eligible (on the basis of his request filed under the other order) for refund with respect to his producer milk marketed under this order during such quarter for which deductions were made pursuant to § 1064.71(c–1).

§ 1064.121 Duties of the market administrator.

Except as specified in § 1064.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1064.113(c);

(b) Set aside the amounts subtracted under § 1064.71(c–1) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to subparagraphs (2) and (3) of this paragraph, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that exceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1064.71(c–1).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1064.120. Such refund shall be computed at the rate of 5 cents per hundredweight of such producer's milk pooled for which deductions were made pursuant to § 1064.71(c–1) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to subparagraph (2) of this paragraph.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1064.110 through 1064.122).

V 38-6 JAN 10 73 XUM

(d) Make necessary audit to establish that all Agency funds are used only for authorized purposes.

§ 1064.122 Liquidation.

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1064.83.

PART 1065—MILK IN THE NEBRASKA-WESTERN IOWA MARKETING AREA

1. Section 1065.60 is revised as follows:

§ 1065.60 Producer-handler.

Sections 1065.40 through 1065.46, 1065.50 through 1065.53, 1065.70 through 1065.73, 1065.80 through 1065.87, and 1065.110 through 1065.122 shall not apply to a producer-handler.

2. In § 1065.62, paragraph (b)(5) is revised as follows:

§ 1065.62 Obligations of handler operating a partially regulated distributing plant.

* * * * *

(b) * * *

(5) From the value of such milk at the Class I price applicable at the location of the nonpool plant, subtract its value at the weighted average price applicable at such location plus 5 cents (not to be less than the Class III price), and add for the quantity of reconstituted skim milk specified in subparagraph (3) of this paragraph its value computed at the Class I price applicable at the location of the nonpool plant less the value of such skim milk at the Class III price.

3. In § 1065.71, a new paragraph (d–1) is added as follows:

§ 1065.71 Computation of uniform prices.

* * * * *

(d–1) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a) of this section by 5 cents;

4. Section 1065.71a is revised to read as follows:

§ 1065.71a Computation of uniform prices for base milk and excess milk.

For each month in which a base plan is effective the market administrator shall compute the uniform prices per hundredweight for base milk and excess milk of 3.5-percent butterfat content received from producers as follows:

(a) From the net amount computed pursuant to § 1065.71 (a) through (e) subtract the amounts specified in subparagraphs (1) through (5) of this paragraph:

(1) The amount computed by multiplying the hundredweight of milk specified in § 1065.71(f)(2) by the weighted average price plus 5 cents for all milk;

(2) The amount obtained by multiplying by the Class III price, less 5 cents, the total hundredweight of milk delivered by all producers who have no Class I base;

(3) The amount computed by multiplying the hundredweight of excess milk by the Class III price, less 5 cents, for 3.5-percent butterfat milk provided that the quantity of milk to which the Class III price, less 5 cents, is applied pursuant to this subparagraph plus the quantity pursuant to subparagraph (2) of this paragraph shall not exceed the quantity of producer milk in Class III;

(4) An amount computed by multiplying any remaining hundredweight of excess milk by the Class II price, less 5 cents, for 3.5-percent butterfat milk to the extent that producer milk in Class II is available for such assignment; and

(5) An amount computed by multiplying any remaining hundredweight of excess milk by the Class I price, less 5 cents, for 3.5-percent butterfat milk;

(b) Divide the net amount obtained in paragraph (a) of this section by the total hundredweight of base milk and subtract not less than 4 cents but less than 5 cents. This result shall be known as the uniform base price per hundredweight of milk of 3.5-percent butterfat content; and

(c) Divide the amount obtained in paragraphs (a) (3), (4) and (5) of this section by the hundredweight of excess milk, and subtract any fractional part of 1 cent. This result shall be known as the uniform excess price per hundredweight of milk of 3.5-percent butterfat content.

§ 1065.80a [Amended]

5. In § 1065.80a, *Time and method of payment to producers and to cooperative associations*, paragraph (a) is revised by inserting the words "less 5 cents" (preceded and followed by commas), immediately following the words "at not less than the Class III price".

6. In § 1065.82, paragraph (b)(2) is revised as follows:

§ 1065.82 Payments to the producer-settlement fund.

* * * * *

(b) * * *

(2) The value at the weighted average price(s) applicable at the location of the plant(s) from which received plus 5 cents (not to be less than the value at the Class III price) with respect to other source milk for which a value is computed pursuant to § 1065.70(e).

7. A new centerhead and new §§ 1065.110 through 1065.122 are added as follows:

ADVERTISING AND PROMOTION PROGRAM

§ 1065.110 Agency.

"Agency" means an agency organized by producers and producers' cooperative associations, in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1065.121(b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

§ 1065.111 Composition of Agency.

Subject to the conditions of paragraph (a) of this section, each cooperative association or combination of cooperative associations, as provided for under § 1065.113(b), is authorized one agency representative for each full 5 percent of the participating member producers (producers who have not requested refunds for the most recent quarter) it represents. Cooperative associations with less than 5 percent of the total participating producers that have elected not to combine pursuant to § 1065.113(b), and participating producers who are not members of cooperatives, are authorized to select from such group of participating producers, in total, pursuant to § 1065.113(c), one Agency representative for each full 5 percent that such producers constitute of the total participating producers. If such group of producers in total constitutes less than 5 percent but not less than 1 percent of the total participating producers it shall nevertheless be authorized to select from such group in total one agency representative. For the purpose of the agency's initial organization, all persons defined as producers shall be considered as participating producers.

(a) If any cooperative association or combination of cooperative associations, as provided for under § 1065.113(b), has a majority of the participating producers, representation from such cooperative or group of cooperatives, as the case may be, shall be limited to the minimum number of representatives necessary to constitute a majority of the agency representatives, but not less than five.

§ 1065.112 Term of office.

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

§ 1065.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 5 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to

the Agency under the rules of § 1065.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than the required 5 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this amending order, and annually thereafter, the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more producers as Agency representatives, as the case may be, and also shall specify the number of representatives to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual participating producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

§ 1065.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum. Any action of the Agency shall require a majority of concurring votes of those present and voting, unless the Agency determines that more than a simple majority shall be required.

§ 1065.115 Powers of the Agency.

The Agency is empowered to:

(a) Administer the terms and provisions of the program within the scope of Agency authority pursuant to § 1065.110;

(b) Make rules and regulations to effectuate the purposes of Public Law 91–670;

(c) Recommend amendments to the Secretary; and

(d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1065.110 and 1065.117.

§ 1065.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

(a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;

(b) Develop programs and projects pursuant to §§ 1065.110 and 1065.117;

(c) Keep minutes, books, and records and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;

(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;

(e) When desirable, establish an advisory committee(s) of persons other than Agency members;

(f) Employ and fix the compensation of any person deemed to be necessary to its exercise of powers and performance of duties;

(g) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and

(h) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

§ 1065.117 Advertising, research, education, and promotion program.

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

§ 1065.118 Limitation of expenditures by the Agency.

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1065.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

§ 1065.119 Personal liability.

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

§ 1065.120 Procedure for requesting refunds.

Any producer may apply for refund subject to the applicable conditions set forth in this section.

(a) Refund shall be accomplished only through application filed with, and in the manner prescribed by, the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the end of the ensuing calendar quarter may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such calendar quarter pursuant to § 1065.71(d–1). *Provided:* That, such eligibility for refund shall not apply to a dairy farmer who during the first 15 days of such December, March, June, or September, respectively, was a producer under an order where the same refund notification period applied and such dairy farmer did not appropriately submit refund application during such period. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.

(d) A dairy farmer who, with respect to any calendar quarter, has appropriately filed request for refund of program assessments on his marketings of milk under another order that provides for an advertising and promotion program will be eligible (on the basis of his request filed under the other order) for refunds with respect to his producer milk marketed under this order during such quarter for which deductions were made pursuant to § 1065.71(d–1).

§ 1065.121 Duties of the market administrator.

Except as specified in § 1065.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

V 38 6 JAN 10 73 XUM

(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1065.113(c);

(b) Set aside the amounts subtracted under § 1065.71(d–1) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to subparagraphs (2) and (3) of this paragraph, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that exceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1065.71(d–1).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1065.120. Such refund shall be computed at the rate of 5 cents per hundredweight of such producer's milk pooled for which deductions were made pursuant to § 1065.71(d–1) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to subparagraph (2) of this paragraph.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1065.110 through 1065.122).

(d) Make necessary audits to establish that all agency funds are used only for authorized purposes.

§ 1065.122 Liquidation.

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1065.81.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 19]

CREAMED COTTAGE CHEESE

Definitions and Standards of Identity; Termination of Proposed Rule Making

In the matter of amending the definition and standard of identity for creamed cottage cheese (21 CFR 19.530) to permit the use of the mold inhibitors sorbic acid, sodium sorbate, and potassium sorbate, or mixtures thereof as optional ingredients:

A notice of proposed rule making in the above-identified matter was published in the FEDERAL REGISTER of September 22, 1971 (36 FR 18800), based on a petition filed by the Milk Industry Foundation, 910 17th Street NW., Washington, DC 20006. Subsequently, an order was published (37 FR 12934, June 30, 1972) which amended § 19.530 by changing the name "creamed cottage cheese" to "cottage cheese," and by providing for use in the creaming mixture of any "safe and suitable" ingredient as defined in 21 CFR 19.499. This would include the subject ingredients. In view of the June 30, 1972, publication, the Milk Industry Foundation has requested withdrawal of its petition, and as provided for in 21 CFR 10.2, notice is given that the rule making procedure in this matter is terminated. The withdrawal of this petition is without prejudice to a future filing.

In response to the above notice of proposed rule making in this matter, a total of 75 written comments were received; 13 comments favored the proposal and 62 comments expressed opposition. The Commissioner wishes to acknowledge these comments and to state his conclusions with respect to those expressing opposition to the proposal in summary as follows:

1. The majority of the adverse comments, mostly from individuals, expressed opposition to the adding of sorbic acid or other chemicals to food.

A review of the legislative intent of the Food Additives Amendment indicates that the use of safe and suitable additives to enable the housewife to safely keep food longer is specifically expressed as a primary purpose of the law. This matter was elaborated upon in the order amending § 19.530 published in the FEDERAL REGISTER on June 17, 1972 (37 FR 12065).

2. Other respondents asserted that preservatives are not needed in creamed cottage cheese produced under good manufacturing practices, since the present product is dated and will keep up to 2 to 3 weeks under refrigeration.

Several research studies have shown that even under conditions of good manufacturing practice, low levels of microflora are present in creamed cottage cheese and that sorbic acid and/or sorbates are effective in suppressing the growth of such microflora. In the manufacture and packaging of creamed cottage cheese, the creaming mixture is added to the curd either in the vat or by utilizing various blenders. Some bacteria capable of producing economic spoilage will gain admittance into the product prior to or during packaging even where the strictest of good manufacturing practices are observed. Creamed cottage cheese is also very susceptible to inoculation with microorganisms from exposure to a variety of utensils used to mix and serve the product. Moreover, many home refrigerators are not maintained at a temperature that is sufficiently low to protect the product adequately, particularly when such microorganisms are present. Cottage cheese is normally spoiled by the growth of Gram-negative bacteria rather than yeasts and molds. When these bacteria have grown sufficiently to produce off-flavors or odors or discoloration, the product is no longer considered fit for consumption, regardless of whether or not sorbic acid and/or sorbates were initially added. While sorbic acid and/or sorbates do help to extend the salable life of foods, they by no means can completely restrict microbial growth, especially with high initial levels of contamination. The use of sorbic acid and/or sorbates as proposed will only delay the respective growth rates of these microorganisms and cannot be used to upgrade a product of poor quality. Chemical off-flavors and physical degradation such as drying, wheying off, etc., that occur in overage cottage cheese would not be impeded by the use of sorbic acid and/or sorbates.

3. Comments were received that certain ingredients (sometimes referred to as "chemicals") in food are detrimental to health, since some individuals should avoid them and other individuals should adhere to restricted diets.

The label declaration of safe and suitable ingredients, as required by the order of June 30, 1972, referred to above, would enable the consumer to learn if a food contains an ingredient which should be avoided and thus provide the consumer a basis for choice.

4. Several commented that use of preservatives in cottage cheese would not improve the nutritional quality of the food and would be more beneficial to the manufacturer than to the consumer.

The optional use of sorbic acid and/or sorbates, while not improving the nutritional quality of the food, will enable the consumer to utilize creamed cottage cheese in a condition comparable to that of the product when manufactured and with no reason for an increase in price. Also, given the opportunity to utilize the additives, producers of cottage cheese would be able to compete in more distant markets; thus competition would likely be intensified, rather than lessened as some respondents asserted, leading to a wider variety of brands from which the consumer may select.

5. One respondent, a manufacturer and major supplier of sorbic acid and potassium sorbate favored the proposal but suggested that a level higher than that of 0.10 percent proposed by the petitioner be permitted.

Data submitted by the petitioner show that a use level of more than 0.10 percent potassium sorbate may impart a detectable off-flavor to creamed cottage cheese and is not warranted.

This termination of proposed rule making is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055–1056, as amended, 70 Stat. 919, 72 Stat. 948; 21 U.S.C. 341, 371) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120).

Effective date. This termination is effective on January 10, 1973.

Dated: January 2, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

PROCAINE PENICILLIN AND STREPTOMYCIN SULFATE IN COMBINATION, PENICILLIN-STREPTOMYCIN POWDER VETERINARY, AND PENICILLIN-DIHYDROSTREPTOMYCIN POWDER VETERINARY

Proposed Revocation of Certification for Use in Animal Drinking Water

In the FEDERAL REGISTER of July 22, 1970 (35 FR 11706, DESI 0063NV), the Commissioner of Food and Drugs announced the conclusions of the Food and Drug Administration following evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on Whitmoyer A–V 25, NADA (new animal drug application) No. 65–295; marketed by Whitmoyer Laboratories, Inc., 19 North Railroad Street, Myerstown, PA 17067. The announcement invited the holder of said new animal drug application and any other interested person to submit pertinent data on the drug's effectiveness.

Available information fails to provide substantial evidence that this drug will have the effect it purports to have when administered in accordance with the conditions of use prescribed, recommended, or suggested in its labeling. Accordingly, the Commissioner concludes that neither this nor any similar product should be permitted in the drinking water of animals. Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 507, 512, 59 Stat. 463 as amended, 82 Stat. 343–351; 21 U.S.C. 357, 360b) and under authority delegated to the Commissioner (21 CFR 2.120), it is proposed that Parts 135c, 141a, and 146a be amended by revoking §§ 135c.45 *Procaine penicillin and streptomycin sulfate in combination;* 141a.71 *Penicillin-streptomycin powder veterinary; penicillin dihydrostreptomycin powder veterinary;* and 146a.93 *Penicillin-streptomycin powder veterinary; penicillin-dihydrosteptomycin powder veterinary.*

Any person who would be adversely affected by the removal of any such drugs from the market may file, by February 9, 1973, objections to this proposal stating reasonable grounds and requesting a hearing on such objections. A statement of reasonable grounds for hearing must identify the claimed errors in the NAS/NRC evaluation and identifying any adequate and well-controlled investigation on the basis of which it could reasonably be concluded that these drugs would have the effectiveness claimed and would be safe for their intended use. Objections and requests for a hearing should be filed (preferably in quintuplicate) with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852. Objections and requests for a hearing which are received in response to this order may be seen in the above office during business hours, Monday through Friday.

(Secs. 507 512, 59 Stat. 463 as amended, 82 Stat. 343–351; 21 U.S.C. 357, 360b)

Dated: January 2, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

ENVIRONMENTAL PROTECTION AGENCY

[41 CFR Part 15–16]

PROCUREMENT FORMS

Forms for Advertised and Negotiated Nonpersonal Service Contracts (Other Than Construction and Architect-Engineer Contracts)

Notice is hereby given that the Environmental Protection Agency proposes an amendment to 41 CFR Chapter 15, § 15–16.553 to add general provisions to be used in cost reimbursement contracts with educational and other nonprofit institutions to read as set forth below.

Interested parties may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Environmental Protection Agency, Contracts Management Division, Washington, D.C. 20460. All communications received within thirty (30) days from the date of publication of this notice in the FEDERAL REGISTER will be considered prior to adoption of the final regulation. A copy of each communication will be placed on file for public inspection in the Contracts Management Division, Room 415B, Waterside Mall, Washington, D.C. 20460.

Dated: January 5, 1973.

WILLIAM D. RUCKELSHAUS,
Administrator.

Subpart 15–16.5—Forms for Advertised and Negotiated Nonpersonal Service Contracts (Other Than Construction and Architect-Engineer Contracts)

§ 15–16.553–4 General provisions for use in cost reimbursement contracts with educational and other nonprofit institutions.

GENERAL PROVISIONS

The following listed clauses (1–39), previously published in the FEDERAL REGISTER, dated September 20, 1972, will be included:

1. Definitions.
2. Disputes.
3. Changes.
4. Printing.
5. Stop work order.
6. Inspection.
7. Subcontracts.
8. Competition in subcontracting.
9. Overtime.
10. Foreign travel.
11. Services of consultants.
12. Insurance.
13. Litigation and claims.
14. Notice to the Government of delays.
15. Limitation on withholding of payments.
16. Interest.
17. Payment of interest of contractor's claims.
18. Audit and records.
19. Examination of records by Comptroller General.
20. Price reduction for defective cost or pricing data.
21. Subcontractor cost and pricing data.
22. Pricing of adjustments.
23. Assignment of claims.
24. Utilization of small business concerns.
25. Utilization of labor surplus area concerns.
26. Utilization of minority business enterprises.
27. Equal opportunity.
28. Listing of employment openings.
29. Walsh-Healey Public Contracts Act.
30. Contract Work Hours and Safety Standards Act—overtime compensation.
31. Convict labor.
32. Buy American Act.
33. Officials not to benefit.
34. Covenant against contingent fees.
35. Gratuities.
36. Authorization and consent.
37. Rights in data.
38. Data requirements.
39. Notice and assistance regarding patent and copyright infringement.

In addition to the above, the following clauses will be included for use in cost reimbursement contracts with educational and other nonprofit institutions:

40. TERMINATION FOR CONVENIENCE OF THE GOVERNMENT

(a) The performance of work under this contract may be terminated, in whole or from time to time in part, by the Government whenever for any reason the Contracting Officer shall determine that such termination is in the best interest of the Government. Termination of work hereunder shall be effected by delivery to the Contractor of a notice of termination specifying the extent to which performance of work under the contract is terminated and the date upon which such termination becomes effective.

(b) After receipt of the notice of termination the Contractor shall cancel his outstanding commitments hereunder covering the procurement of materials, supplies, equipment, and miscellaneous items. In addition, the Contractor shall exercise all reasonable diligence to accomplish the cancellation or diversion of his outstanding commitments covering personal services and extending beyond the date of such termination to the extent that they relate to the performance of any work terminated by the notice. With respect to such canceled commitments the Contractor agrees to (1) settle all outstanding liabilities and all claims arising out of such cancellation of commitments, with the approval or ratification of the Contracting Officer, to the extent he

V 38-6 JAN 10 73 XUM

may require, which approval or ratification shall be final for all purposes of this clause, and (2) assign to the Government, in the manner, at the time, and to the extent directed by the Contracting Officer, all of the right, title, and interest of the Contractor under the orders and subcontracts so terminated, in which case the Government shall have the right, in its discretion, to settle or pay any or all claims arising out of the termination of such orders and subcontracts.

(c) The Contractor shall submit his termination claim to the Contracting Officer promptly after receipt of a notice of termination, but in no event later than 1 year from the effective date thereof, unless one or more extensions in writing are granted by the Contracting Officer upon written request of the Contractor within such 1-year period or authorized extension thereof. Upon failure of the Contractor to submit his termination claim within the time allowed, the Contracting Officer may, subject to any review required by the contracting agency's procedures in effect as of the date of execution of this contract, determine, on the basis of information available to him, the amount, if any, due to the Contractor by reason of the termination and shall thereupon pay to the Contractor the amount so determined.

(d) Any determination of costs under paragraph (c) shall be governed by the contract cost principles and procedures in Subpart 1–15.3 of the Federal procurement regulations (41 CFR 1–15.3) in effect on the date of this contract, except that if the Contractor is not an educational institution any costs claimed, agreed to, or determined pursuant to paragraphs (c) or (e) hereof shall be in accordance with Subpart 1–15.2 of the Federal procurement regulations (41 CFR 1–15.2) in effect on the date of this contract.

(e) Subject to the provisions of paragraph (c) above, and subject to any review required by the contracting agency's procedures in effect as of the date of execution of this contract, the Contractor and the Contracting Officer may agree upon the whole or any part of the amount or amounts to be paid to the Contractor by reason of the termination under his clause, which amount or amounts may include any reasonable cancellation charges thereby incurred by the Contractor and any reasonable loss upon outstanding commitments for personal services which he is unable to cancel: *Provided, however,* That in connection with any outstanding commitments for personal services which the Contractor is unable to cancel, the Contractor shall have exercised reasonable diligence to divert such commitments to his other activities and operations. Any such agreement shall be embodied in an amendment to this contract and the Contractor shall be paid the agreed amount.

(f) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments against costs incurred by the Contractor in connection with the terminated portion of this contract, whenever, in the opinion of the Contracting Officer, the aggregate of such payments is within the amount to which the Contractor will be entitled hereunder. If the total of such payments is in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand: *Provided,* That if such excess is not so paid upon demand, interest thereon shall be payable by the Contractor to the Government at the rate of 6 percent per annum, beginning 30 days from the date of such demand.

(g) The Contractor agrees to transfer title to the Government and deliver in the manner, at the times, and to the extent, if any, directed by the Contracting Officer, such information and items which, if the contract had been completed, would have been required to be furnished to the Government, including:

(1) Completed or partially completed plans, drawings, and information; and

(2) Materials or equipment produced or in process or acquired in connection with the performance of the work terminated by the notice.

Other than the above, any termination inventory resulting from the termination of the contract may, with the written approval of the Contracting Officer, be sold or acquired by the Contractor under the conditions prescribed by and at a price or prices approved by the Contracting Officer. The proceeds of any such disposition shall be applied in reduction of any payments to be made by the Government to the Contractor under this contract or shall otherwise be credited to the price or cost of work covered by this contract or paid in such other manner as the Contracting Officer may direct. Pending final disposition of property arising from the termination, the Contractor agrees to take such action as may be necessary, or as the Contracting Officer may direct, for the protection and preservation of the property related to this contract which is in the possession of the Contractor and in which the Government has or may acquire an interest.

(h) Any disputes as to questions of fact which may arise hereunder shall be subject to the "Disputes" clause of this contract.

41. GOVERNMENT PROPERTY

(a) *Government-furnished property.* The Government shall deliver to the Contractor, for use in connection with and under the terms of this contract, the property described as Government-furnished property in the schedule or specifications, together with such related data and information as the Contractor may request and as may reasonably be required for the intended use of such property (hereinafter referred to as "Government-furnished property"). The delivery or performance dates for the supplies or services to be furnished by the Contractor under this contract are based upon the expectation that Government-furnished property suitable for use will be delivered to the Contractor at the times stated in the Schedule or, if not so stated, in sufficient time to enable the Contractor to meet such delivery or performance dates. In the event that Government-furnished property is not delivered to the Contractor by such time or times, the Contracting Officer shall, upon timely written request made by the Contractor, make a determination of the delay, if any, occasioned the Contractor and shall equitably adjust the estimated cost, fixed fee, or delivery or performance dates, or all of them, and any other contractual provisions affected by any such delay, in accordance with the procedures provided for in the clause of this contract entitled "Changes." In the event that Government-furnished property is received by the Contractor in a condition not suitable for the intended use, the Contractor shall, upon receipt thereof notify the Contracting Officer of such fact and, as directed by the Contracting Officer, either (i) return such property at the Government's expense or otherwise dispose of the property or (ii) effect repairs or modifications. Upon completion of (i) or (ii) above, the Contracting Officer shall upon written request of the Contractor shall equitably adjust the estimated cost, fixed fee, or delivery or performance dates, or all of them, and any other contractual provision effected by the return or disposition, or the repair or modification in accordance with the procedures provided for in the clause of this contract entitled "Changes." The foregoing provisions for adjustment are exclusive and the Government shall not be liable to suit for breach of contract by reason of any delay in delivery of Government-furnished property or delivery of such property in a condition not suitable for its intended use.

(b) *Changes in Government-Furnished Property.* (1) By notice in writing, the Contracting Officer may (i) decrease the property furnished or to be furnished by the Government under this contract, and/or (ii) substitute other Government-owned property for property to be furnished by the Government, or to be acquired by the Contractor for the Government, under this contract. The Contractor shall promptly take such action as the Contracting Officer may direct with respect to the removal and shipping of property covered by such notice.

(2) In the event of any decrease in or substitution of property pursuant to paragraph (1) above, or any withdrawal of authority to use property provided under any other contract or lease, which property the Government had agreed in the Schedule to make available for the performance of this contract, the Contracting Officer, upon the written request of the Contractor (or, if the substitution of property causes a decrease in the cost of performance, on his own initiative), shall equitably adjust such contractual provisions as may be affected by the decrease, substitution or withdrawal, in accordance with the procedures provided for in the "Changes" clause of this contract.

(c) *Title.* Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor, for the cost of which the Contractor is entitled to be reimbursed as a direct item of cost under this contract, shall pass to and vest in the Government upon delivery of such property by the vendor. Title to other property, the cost of which is reimbursable to the Contractor under the contract, shall pass to and vest in the Government upon (i) issuance for use of such property in the performance on this contract, or (ii) commencement of processing or use of such property in the performance of this contract, or (iii) reimbursement of the cost thereof by the Government in whole or in part, whichever first occurs. All Government-furnished property, together with all property acquired by the Contractor, title to which vests in the Government under this paragraph, is subject to the provisions of this clause and is hereinafter collectively referred to as "Government property." Title to the Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personalty by reason of affixation to any realty.

(The following paragraph shall be substituted for (c) above when the contract is with an educational institution.)

(c) *Title.* Title to all property furnished by the Government shall remain in the Government. Title to all property purchased by the Contractor with the prior approval of the Contracting Officer shall be vested in the Contractor without further obligation to the Government except as provided below, unless it is determined by the Contracting Officer that such vesting is not in furtherance of the objectives of the Government or unless there is not proper authority to vest title in the Contractor. Such title shall be vested in the Contractor upon acquisition of the property or as soon as feasible thereafter provided that:

(1) The Contractor shall not under any Government contract, or subcontract thereunder, charge for any depreciation, amortization, or use of such property.

(ii) At any time prior to twelve (12) months after completion or termination of the contract, the Contracting Officer reserves the right to require the Contractor to transfer title to property costing $1,000 or more per unit to the Government or to a third party named by the Contracting Officer.

(iii) The Contractor shall, at the end of the calendar year, and within 30 days after completion of the contract, furnish the Contracting Officer a list of all property where title is vested in the Contractor. If no such property has vested, the report shall so state.

All Government furnished property, together with all property title to which vests in the Government under this clause, is subject to the provisions of this clause and is hereinafter collectively referred to as "Government Property." Title to the Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government, nor shall such Government property, or any part thereof, be or become a fixture or lose its identity as personality by reasons of affixation to any realty.

(d) *Property Administration.* The Contractor agrees to maintain and administer a property control system in accordance with EPA publication "Guide for Control of Government Property by Contractors," in effect as of the date of this contract, supplied by the Government. While the Contractor is responsible for the Government Property (Government furnished and Contractor acquired), the Government will maintain the official accountability records.

(e) *Use of Government Property.* The Government property shall, unless otherwise provided herein or approved by the Contracting Officer, be used only for the performance of this contract.

(f) *Maintenance of Government Property.* The Contractor shall maintain and administer, in accordance with sound business practice, a program for the maintenance, repair, protection, and preservation of Government property so as to assure its full availability and usefulness for the performance of this contract. The Contractor shall take all reasonable steps to comply with all appropriate directions or instructions which the Contracting Officer may prescribe as reasonably necessary for the protection and disposition of Government property.

(g) *Risk of Loss.* (1) The Contractor shall not be liable for any loss of or damage to the Government property, or for expenses incidental to such loss or damage, except that the Contractor shall be responsible for any such loss or damage (including expenses incidental thereto):

(i) Which results from willful misconduct or lack of good faith on the part of any one of the Contractor's directors or officers, or on the part of any of his managers, superintendents, or other equivalent representatives, who has supervision or direction of—

(A) All or substantially all of the Contractor's business; or

(B) All or substantially all of the Contractor's operations at any one plant or separate location, in which this contract is being performed; or

(C) A separate and complete major industrial operation in connection with the performance of this contract;

(ii) Which results from a failure on the part of the Contractor, due to the willful misconduct or lack of good faith on the part of any of his directors, officers, or other representatives mentioned in subparagraph (i) above—

(A) To maintain and administer, in accordance with sound industrial practice, the program for utilization, maintenance, repair, protection, and preservation of Government property as required by paragraph (f) hereof, or to take all reasonable steps to comply with any appropriate written direction of the Contracting Officer under paragraph (f) hereof; or

(B) To establish, maintain, and administer, in accordance with (d) above, a system for control of Government property;

(iii) For which the Contractor is otherwise responsible under the express terms of the clause or clauses designated in the Schedule;

(iv) Which results from a risk expressly required to be insured under this contract, but only to the extent of the insurance so required to be procured and maintained, or to the extent of insurance actually procured and maintained, whichever is greater; or

(v) Which results from a risk which is in fact covered by insurance or for which the Contractor is otherwise reimbursed, but only to the extent of such insurance or reimbursement.

(2) If more than one of the above exceptions shall be applicable in any case, the Contractor's liability under any one exception shall not be limited by any other exception. The Contractor shall obtain the approval of the Contracting Officer prior to transferring any Government Officer prior to subcontractor. If the Contractor transfers Government property to the possession and control of a subcontractor, the transfer shall not affect the liability of the Contractor for loss or destruction of or damage to the property as set forth above. However, the Contractor shall require the subcontractor to assume the risk of, and be responsible for, any loss or destruction of or damage to the property while in the latter's possession or control, except to the extent that the subcontract, with the prior approval of the Contracting Officer, provides for the relief of the subcontractor from such liability. In the absence of such approval, the subcontract shall contain appropriate provisions requiring the return of all Government property in as good condition as when received, except for reasonable wear and tear or for the utilization of the property in accordance with the provisions of the prime contract.

(3) The Contractor shall not be reimbursed for, and shall not include as an item of overhead, the cost of insurance, or any provision for a reserve, covering the risk of loss of or damage to the Government property, except to the extent that the Government may have required the Contractor to carry such insurance under any other provisions of this contract.

(4) Upon the happening of loss or destruction of or damage to the Government property, the Contractor shall notify the Contracting Officer thereof, take all reasonable steps to protect the Government property from further damage, separate the damaged and undamaged Government property, put all the Government property in the best possible order and furnish to the Contracting Officer a statement of—

(i) The lost, destroyed, and damaged Government property;

(ii) The time and origin of the loss, destruction, or damage;

(iii) All known interests in commingled property of which the Government property is a part; and

(iv) The insurance, if any, covering any part of or interest in such commingled property.

The Contractor shall make repairs and renovations of the damaged Government property or take such other action, as the Contracting Officer directs.

(5) In the event the Contractor is indemnified, reimbursed, or otherwise compensated for any loss or destruction of or damage to the Government property, he shall use the proceeds to repair, renovate, or replace the Government property involved, or shall credit such proceeds against the cost of the work covered by the contract, or shall otherwise reimburse the Government, as directed by the Contracting Officer. The Contractor shall do nothing to prejudice the Government's right to recover against third parties for any such loss, destruction, or damage and, upon the request of the Contracting Officer, shall, at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining recovery. In addition, where the subcontractor has not been relieved from liability for any loss or destruction of or damage to Government property, the Contractor shall enforce the liability of the subcontractor for such loss or destruction of or damage to the Government property for the benefit of the Government.

(h) *Access.* The Contractor agrees to make available to the Contracting Officer, at all reasonable times, at the office of the Contractor, all its property records under this contract, and the Government shall at all reasonable times have access to the premises where any of the Government property is located.

(i) *Final Accounting and Disposition of Government Property.* Upon the completion of this contract, or at such earlier dates as may be fixed by the Contracting Officer, the Contractor shall submit to the Contracting Officer in a form accountable to him, inventory schedules covering all items of the Government property not consumed in the performance of this contract, or not theretofore delivered to the Government, and shall deliver or make such other disposal of such Government property as may be directed or authorized by the Contracting Officer. The net proceeds of any such disposal shall be credited to the cost of the work covered by the contract or shall be paid in such manner as the Contracting Officer may direct. The foregoing provisions shall apply to scrap from Government property: *Provided, however,* That the Contracting Officer may authorize or direct the Contractor to omit from such inventory schedules any scrap consisting of faulty castings or forgings, or cutting and processing waste, such as chips, cuttings, borings, turnings, short ends, circles, trimmings, clippings, and remnants, and to dispose of such scrap in accordance with the Contractor's normal practice and account therefor as a part of general overhead or other reimbursable cost in accordance with the Contractor's established accounting procedures.

(j) *Restoration of Contractor's premises and abandonment.* Unless otherwise provided herein, the Government:

(i) May abandon any Government property in place, and thereupon all obligations of the Government regarding such abandoned property shall cease; and

(ii) Has no obligation to the Contractor with regard to restoration or rehabilitation of the Contractor's premises, neither in case of abandonment (paragraph (j)(i) above), disposition on completion of need or of the contract (paragraph (i) above), nor otherwise, except for restoration or rehabilitation costs caused by removal of Government property pursuant to paragraph (b) above.

(k) *Communications.* All communications issued pursuant to this clause shall be in writing.

V 38 - 6 JAN 10 73 XUM

42. PRINCIPAL INVESTIGATORS

Where principal investigators have been identified in this contract, it has been determined that such named investigators are necessary for the successful performance of this contract; and the Contractor agrees to assign such persons to the performance of the work under this contract, and shall not reassign or remove any of them without the consent of the Contracting Officer. Whenever, for any reason, one or more of the aforementioned investigators is unavailable for assignment for work under the contract, the Contractor shall immediately notify the Contracting Officer to that effect and shall, subject to the approval of the Contracting Officer without formal modification to the contract, replace such investigators with investigators of substantially equal ability and qualifications.

43. ALLOWABLE COST AND PAYMENT

(a) For the performance of this contract, the Government shall pay to the Contractor the cost thereof (hereinafter referred to as "allowable cost") determined by the Contracting Officer to be allowable in accordance with:

(1) Subpart 1–15.3 of the Federal Procurement Regulations as in effect on the date of this contract except that if the Contractor is not an educational institution the allowable costs shall be determined by Subpart 1–15.2 of FPR; and

(2) The terms of this contract.

(b) Once each month (or more frequent intervals, if approved by the Contracting Officer), the Contractor may submit to an authorized representative of the Contracting Officer, in such form and reasonable detail as such representative may require, an invoice or public voucher supported by a statement of cost incurred by the Contractor in the performance of this contract and claimed to constitute allowable cost.

(c) Promptly after receipt of each invoice or voucher and statement of cost, the Government shall, except as otherwise provided in this contract, subject to the provisions of (d) below, make payment thereon as approved by the Contracting Officer. After payment of an amount equal to eighty percent (80%) of the total estimated cost of performance of this contract set forth in the schedule, further payment on account of allowable cost shall be withheld until a reserve of either one percent (1%) of such total estimated cost or ten thousand dollars ($10,000), whichever is less, shall have been put aside.

(d) At any time or times prior to final payment under this contract, the Contracting Officer may have the invoices or vouchers and statements of cost audited. Each payment theretofore made shall be subject to reduction for amounts included in the related invoice or voucher which are found by the Contracting Officer, on the basis of such audit, not to constitute allowable cost. Any payment may be reduced for overpayments, or increased for underpayments, on preceding invoices or vouchers.

(e) A "completion invoice" or "completion voucher" shall be submitted upon the physical completion of all performance provisions and when all costs applicable to the contract have been incurred.

The completion invoice or voucher shall be submitted by the Contractor promptly following completion of the work under this contract but in no event later than one (1) year (or such longer period as the Contracting Officer may in his discretion approve in writing) from the date of such completion. Upon the completion of the final audit and the receipt of a "final invoice" or "final voucher," the Government shall promptly pay to the Contractor any balance of allowable costs, which has been withheld pursuant to (c) above or otherwise not paid to the Contractor.

(f) The Contractor agrees that any refunds, rebates, credits, or other amounts (including any interest thereon) accruing to or received by the Contractor or any assignee under this contract shall be paid by the Contractor to the Government, to the extent that they are properly allocable to costs for which the Contractor has been reimbursed by the Government under this contract. Reasonable expenses incurred by the Contractor for the purpose of securing such refunds, rebates, credits, or other amounts shall be allowable costs hereunder when approved by the Contracting Officer. Prior to final payment under this contract, the Contractor and each assignee under this contract whose assignment is in effect at the time of final payment under this contract shall execute and deliver:

(1) An assignment to the Government, in form and substance satisfactory to the Contracting Officer, of refunds, rebates, credits, or other amounts (including any interest thereon) property allocable to costs for which the Contractor has been reimbursed by the Government under this contract; and

(2) A release discharging the Government, its officers, agents, and employees from all liabilities, obligations, and claims arising out of or under this contract, subject only to the following exceptions:

(A) Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor:

(B) Claims, together with reasonable expense incidental thereto, based upon liabilities of the Contractor to third parties arising out of the performance of this contract: *Provided*, That such claims are not known to the Contractor on the date of execution of the release: *And provided further*, That the Contractor gives notice of such claims in writing to the Contracting Officer not more than six (6) years after the date of the release or the date of any notice to the Contractor that the Government is prepared to make final payment, whichever is earlier; and

(C) Claims for reimbursement of costs (other than expenses of the Contractor by reason of his indemnification of the Government against patent liability), including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of this contract relating to patents.

(g) Any cost incurred by the Contractor under the terms of this contract which would constitute allowable cost under the provisions of this clause shall be included in determining the amount payable under this contract, notwithstanding any provisions contained in the specifications or other documents incorporated in this contract by reference, designating services to be performed or materials to be furnished by the Contractor at his expense or without cost to the Government.

44. LIMITATION OF COST

(a) It is estimated that the total cost to the Government, for the performance of this contract will not exceed the estimated cost set forth in the Schedule, and the Contractor agrees to use his best efforts to perform the work specified in the Schedule and all obligations under this contract within such estimated cost. If, at any time, the Contractor has reason to believe that the cost which he expects to incur in the performance of this contract in the next succeeding sixty (60) days, when added to all costs previously incurred, will exceed seventy-five percent (75%) of the estimated cost set forth in the Schedule, or if, at any time, the Contractor has reason to believe that the total cost to the Government for the performance of his contract will be greater or substantially less than the then estimated cost hereof, the Contractor shall notify the Contracting Officer in writing to that effect, giving the revised estimate of such total cost for the performance of this contract.

(b) Except as required by other provisions of this contract specifically citing and stated to be an exception from this clause, the Government shall not be obligated to reimburse the Contractor for costs incurred in excess of the estimated cost set forth in the Schedule, and the Contractor shall not be obligated to continue performance under the contract (including actions under the Termination Clause) or otherwise to incur costs in excess of the estimated cost set forth in the Schedule, unless and until the Contracting Officer shall have notified the Contractor in writing that such estimated cost has been increased and shall have specified in such notice a revised estimated cost which shall thereupon constitute the estimated cost of performance of this contract. No notice, communication or representation in any other form or from any person other than the Contracting Officer shall affect the estimated cost of this contract. In the absence of the specified notice, the Government shall not be obligated to reimburse the Contractor for any costs in excess of the estimated cost set forth in the Schedule, whether those excess costs were incurred during the course of the contract or as a result of termination. When and to the extent that the estimated cost set forth in the Schedule has been increased, any costs incurred by the Contractor in excess of the estimated cost prior to such increase shall be allowable to the same extent as if such costs had been incurred after the increase unless the Contracting Officer issues a termination or other notice and directs that the increase is solely for the purpose of covering termination or other specified expenses.

(c) Change orders issued pursuant to the Changes clause of this contract shall not be considered an authorization to the Contractor to exceed the estimated cost set forth in the Schedule in the absence of a statement in the change order, or other contract modification, increasing the estimated cost.

(d) In the event this contract is terminated or the estimated cost not increased the Government and the Contractor shall negotiate an equitable distribution of all property produced or purchased under the contract based upon the share of costs incurred by each.

45. NEGOTIATED OVERHEAD RATES POSTDETERMINED

(a) Notwithstanding the provisions of the clause of this contract entitled "Allowable Cost and Payment," the allowable indirect costs under this contract shall be obtained by applying negotiated overhead rates to bases agreed upon by the parties, as specified below.

(b) The Contractor, as soon as possible but not later than six (6) months after the close of his fiscal year, or such other period as may be specified in the contract, shall submit to the Contracting Officer, with a copy to the cognizant audit activity, a proposed final overhead rate or rates for that period based on the Contractor's actual cost experience during that period, together with supporting cost data. Negotiation of final overhead rates by the Contractor and the Contracting Officer shall be undertaken as promptly as practicable after receipt of the Contractor's proposal.

(c) Allowability of costs and acceptability of cost allocation methods shall be determined in accordance with Subpart 1–15.3 of the Federal Procurement Regulations (41 CFR 1–15.3), as in effect on the date of this contract. (Other than educational institutions shall be governed by Subpart 1–15.2 and 41 CFR 1–15.3).

(d) The results of each negotiation shall be set forth in a written overhead rate agreement, executed by both parties. Such agreement is automatically incorporated in this contract upon execution and shall specify: (1) The agreed final rates; (2) the bases to which the rates apply; (3) the periods for which the rate apply; and (4) the items treated as direct costs. The overhead rate agreement shall not change any monetary ceiling, contract obligation, or specific cost allowance or disallowance provided for in this contract.

(e) Pending establishment of final overhead rates for any period, the Contractor shall be reimbursed either at negotiated provisional rates as provided in the contract, or at billing rates acceptable to the Contracting Officer, subject to appropriate adjustment when the final rates for that period are established. To prevent substantial over or under payment, and to apply either retroactively or prospectively: (1) Provisional rates may, at the request of either party, be revised by mutual agreement, and (2) billing rates may be adjusted at any time by the Contracting Officer. Any such revision of negotiated provisional rates specified in the contract shall be set forth in a modification to this contract.

(f) Any failure by the parties to agree on any final rate or rates under this clause shall be considered a dispute concerning a question of fact for decision by the Contracting Officer within the meaning of the "Disputes" clause of this contract.

(g) Nothing in this clause shall preclude the Contracting Officer from negotiating final overhead rates applicable to this contract, for any period, for the purpose of contract closeout: *Provided*, That (i) the negotiated amount of overhead costs applicable hereto does not exceed $200,000 for any one fiscal year; (ii) there is agreement between the Government and the Contractor that there will be no adjustment against other Government contracts for over or under recovery under this contract disclosed through a subsequent, regular final overhead rate negotiation or determination; and (iii) this contract is appropriately modified to reflect the finality of this negotiation and the fact that other contracts shall not be affected by any over or under recovery resulting therefrom.

(40 U.S.C. 486(c), sec. 205(c), 63 Stat. 377, as amended)

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 61]

[Docket No. 19660; FCC 72-1192]

DOMESTIC HANDLING OF INTERNATIONAL RECORD TRAFFIC

Inquiry and Proposed Tariff Revisions; Order Specifying Hearing Date

In the matter of International Record Carriers' scope of operations in the Continental United States, including possible revisions to the formula prescribed under section 222 of the Communications Act. Docket No. 19660, RM–690.

1. On December 18, 1972 we issued a notice of inquiry and proposed rule making (37 FR 28303; December 22, 1972) herein in which, among other things, we ordered oral argument on the question whether authorization under section 222 of the Communications Act is a prerequisite to the tariff revisions filed by ITT World Communications Inc., Western Union International, Inc., and RCA Global Communications, Inc.,[1] to absorb the charges associated with direct access between hinterland users and international carriers, e.g., the domestic telex, TWX, and WATS networks for the pickup and delivery of international message telegrams.

2. In the notice of inquiry we left open the date on which the oral argument would be heard, and we are now specifying such date. Moreover, Western Union Telegraph Co., a party respondent, on December 19, 1972, requested that the time specified for the filing of briefs preparatory to oral argument be extended to 30 days, rather than 20 days, and shows good cause for such extension.

3. The time allotments set forth below reflect the fact that the Western Union Telegraph Co. has raised the question whether prior authority is required for the tariff filings at issue herein, and, further, reflects the fact that ITT World Communications Inc. was the original record carrier proposing such tariff.

Accordingly, it is ordered, That oral argument on the above matter shall be heard before the Commission en banc at Washington, D.C. on February 13, 1973 at 9:30 a.m.

It is further ordered, That times allotted for the parties to the oral argument shall be as follows:

Western Union Telegraph Company, 50 minutes; ITT World Communications Inc., 30 minutes; Western Union International, Inc., 15 minutes; RCA Global Communications, Inc., 15 minutes; and TRT Telecommunications Corp., 15 minutes.

Provided, however, that should the parties agree among themselves to a different allocation of time, or should the international carriers agree among themselves on a different allocation of the time allotted to them as a group, the Commission should be so notified 1 week in advance of the date set herein for oral argument;

Provided, further, that the Western Union Telegraph Co. may reserve for rebuttal a portion of the time allocated to it; and

It is further ordered, That the time for filing briefs in this matter is extended until January 17, 1973.

Adopted: December 20, 1972.

Released: December 29, 1972.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

[FR Doc.73-522 Filed 1-9-73;8:45 am]

[1] Since the release of our notice of inquiry and proposed rule making, TRT Telecommunications Corp., on December 19, 1972, filed revisions to its Tariff F.C.C. No. 60 (specifically, 156th revised page 1, 33d revised page 9, 23d revised page 9A, and original page 9B) to provide free direct access as proposed by the other record carriers herein.

[47 CFR Part 73]

[Docket No. 19628]

FM BROADCAST STATIONS IN UNION SPRINGS AND TALLASSEE, ALA.

Proposed Table of Assignments; Order Extending Time for Filing Reply Comments

In the matter of amendment of § 73.202(b), *Table of assignments*, FM Broadcast Stations (Union Springs and Tallassee, Ala.), Docket No. 19628, RM–1902, RM–2040.

1. The notice of proposed rule making in the above-entitled proceeding was adopted on November 8, 1972, and published in the FEDERAL REGISTER on November 16, 1972 (37 FR 24369). The dates for filing comments and reply comments are presently designated as December 22, 1972, and January 2, 1973, respectively.

2. On January 2, 1973, Union Springs Broadcasting Co., by its attorney filed a request for extension of time in which to submit reply comments to and including January 15, 1973. Counsel states that the comments and counterproposal of All Channel TV Service, Inc. were received on December 26, 1972, and due to the holidays and delay of the mails resulting therefrom, it has not been possible to communicate with principals of Union Springs Broadcasting or its consulting engineer. Counsel further states that, while it appears the Union Springs proposal will possibly not be affected, additional time is needed for consideration.

3. It appears that the additional time is warranted and would serve the public interest. *Accordingly, it is ordered*, That the time for filing reply comments in Docket No. 19628 is extended to and including January 15, 1973.

4. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended and § 0.281(d)(8) of the Commission's rules.

Adopted: January 3, 1973.

Released: January 4, 1973.

[SEAL] HAROLD L. KASSENS,
Acting Chief, Broadcast Bureau.

Notices

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

OFFICIAL RULINGS AND PROCEDURES

Notice of Publication

Effective January 1, 1973, the Bureau of Alcohol, Tobacco and Firearms will use the Alcohol, Tobacco and Firearms Bulletin as the authoritative instrument of the Director for announcing official rulings and procedures of the Bureau and for publishing other items of general interest. The use of the Internal Revenue Bulletin for announcing such matters, notice of which was published in the FEDERAL REGISTER for July 29, 1972, will be concurrently discontinued.

All regulations, rulings, and procedures, in effect prior to July 1, 1972, issued by the Alcohol, Tobacco and Firearms Division of the Internal Revenue Service, will continue in effect until superseded or revised under the authority of Treasury Department Order No. 221, dated June 6, 1972, published in the FEDERAL REGISTER for June 10, 1972. All rulings and procedures issued by the Bureau of Alcohol, Tobacco and Firearms since July 1, 1972, which have been published in the Internal Revenue Bulletin, remain in effect; however, solely for the purposes of continuity, they will be republished in early issues of the Alcohol, Tobacco and Firearms Bulletin.

[SEAL] REX D. DAVIS,
Director.

DEPARTMENT OF STATE

[Public Notice 375]

CERTAIN FOREIGN PASSPORTS

Notice of Validity

Under the provisions of section 212(a)(26) of the Immigration and Nationality Act, a nonimmigrant alien who makes application for a visa or for admission into the United States is required to be in possession of a passport which is valid for a minimum period of 6 months from the date of expiration of the initial period of his admission into the United States or his contemplated initial period of stay authorizing him to return to the country from which he came or to proceed to and enter some other country during such period. By reason of the foregoing requirement, certain foreign governments have entered into argeements with the Government of the United States whereby their passports are recognized as valid for the return of the bearer to the country of the foreign-issuing authority for a period of 6 months beyond the expiration date specified in the passport. These agreements have the effect of extending the validity period of the foreign passport an additional 6 months notwithstanding the expiration date indicated in the passport. Notice is hereby given that the following foreign governments have concluded such an agreement with the Government of the United States:

Australia.
Austria (Reisepass only).
Bahamas (See United Kingdom).
Bangladesh (Travel permit and passport).
Belgium.
Bolivia.
Brazil.
Canada.
Chile
Colombia.
Cuba.
Cyprus.
Dominican Republic.
Ecuador.
Egypt (Arab Republic of).
Ethiopia.
Finland.
